triungulin (trī-ung'gū-lin), *n.* [< L. *tres* (*tri-*), three, + *ungula*, a hoof, claw.] The first larval stage of the hypermetamorphic blister-beetles, or *Meloïdæ*. See also cut under *Meloë*.

Triungulin.
a, egg-pod of a grasshopper, *Melanoplus differentialis*; *b*, eggs of same; *c*, triungulin of *Epicauta vittata*; *d*, second larval stage of same (line shows natural size); *e*, side view of *d*; *f*, triungulin within egg-pod of the grasshopper.

triunity (trī-ū'ni-ti), *n.* [< *triune* + *-ity*. Cf. *unity*.] The state or quality of being triune; trinity.

The *triunity* of the Godhead.
Dr. H. More, Mystery of Godliness, p. 203. (*Latham.*)

Triuridaceæ (trī-ū-ri-dā'sē-ē), *n. pl.* [NL. (Bentham and Hooker, 1883), < *Triuris* (*-urid-*) + *-aceæ*.] A family of monocotyledonous plants, constituting the order *Triuridales*. It is characterized by unisexual racemose flowers with a regular perianth of three to eight valvate segments in a single row. It includes 2 genera, *Triuris* (the type) and *Sciaphila*, the latter comprising about 15 species of white or reddish plants of South America, India, the Malay archipelago, and Papua. The family is nearest akin to the *Vallisneriaceæ*, but is terrestrial and saprophytic, growing upon decayed wood and leaves. Its species are diminutive, slender, but rather rigid leafless plants, wholly white, yellow, pink, or red, with a few scales at the base, and producing a few long flexuous unbranched roots. The small stellate flowers are numerous and racemose, or fewer and somewhat corymbose; they hang on decurved pedicels, and are often papillose or minutely fringed.

Triuris (trī-ū'ris), *n.* [NL. (Miers, 1841), so called with ref. to the appendaged calyx-lobes; < Gr. τρεῖς, three, + οὐρά, a tail.] A genus of plants, type of the family *Triuridaceæ*. It is characterized by anthers immersed in a large conical receptacle, and by a nearly or quite terminal style. The 3 species, *T. hyalina*, *T. lutea*, and *T. major*, are natives of Brazil. They are yellow, white, or colorless and transparent plants, with two to four slender-pedicelled flowers on a filiform stem, each of the three or six triangular-ovate perianth-segments extended into a filiform tail.

trivalence (trī'vā- or triv'ạ-lens), *n.* [< *trivalen(t)* + *-ce*.] The quality of being trivalent; triatomic valence.

The conclusions drawn therefrom as to the *trivalence* of aluminium cannot be maintained.
Athenæum, No. 3183, p. 558.

trivalent (trī'vā- or triv'ạ-lent), *a.* [< L. *tres* (*tri-*), three, + *valen(t-)s*, ppr. of *valere*, be strong: see *valid*.] In *chem.*, equivalent in combining or displacing power to three monad atoms; triadic: applied to an atom of an element or a unit of a radical; triatomic.

trivalve (trī'valv), *a.* and *n.* [< L. *tres* (*tri-*), three, + *valva*, door: see *valve*.] **I.** *a.* Having three valves, as a shell; trivalvular.—**Trivalve speculum**, a vaginal speculum having three blades.

II. *n.* In *conch.*, a trivalve shell.

trivalved (trī'valvd), *a.* [< *trivalve* + *-ed*2.] Three-valved; trivalvular.

trivalvular (trī-val'vū-lär), *a.* [< L. *tres* (*tri-*), three, + *valvula*, dim. of *valva*, door: see *valvular*.] Three-valved; having three valves.

trivant† (triv'ant), *a.* and *n.* An obsolete variant of *truant*. [Rare.]

Thou art . . . a trifler, a *trivant*, thou art an idle fellow. *Burton*, Anat. of Mel., To the Reader, p. 10.

trivantly† (triv'ant-li), *adv.* [< *trivant* + *-ly*2.] In a trivant or truant manner. [Rare.]

Him that by reason of a voluble tongue, a strong voice, a pleasing tone, and some *trivantly* Polyanthean helps, steales and gleanes a few notes from other mens Harvests, and so makes a fairer shew than he that is truly learned indeed. *Burton*, Anat. of Mel., p. 188.

trivet†, *v. t.* [Abbr. from *contrive*1.] To contrive.

The thrifty that teacheth the thriving to thrive,
Teach timely to traverse the thing that thou *trive*.
Tusser, Husbandry, Brief Conclusion.

triverbial (trī-vėr'bi-al), *a.* [< L. *tres* (*tri-*), three, + *verbum*, word: see *verb*.] Of three words: applied to certain days in the Roman calendar which were juridical, or days appointed to the pretor for deciding causes: so named from the three characteristic words of his office, *do*, *dico*, *addico*. They were also called *dies fasti*.

In the Roman calendar there were in the whole year but twenty-eight judicial or *triverbial* days allowed to the prætor for deciding causes. *Blackstone*, Com., III. xxvi.

trivertebral (trī-vėr'tē-bral), *a.* [< L. *tres* (*tri-*), three, + *vertebra*, vertebra: see *vertebral*.] Composed of three vertebræ.

The last cervical [of *Glyptodon*] and the anterior dorsal vertebræ are ankylosed together into a single *tri-vertebral* bone, which moves by a hinge joint upon the third dorsal. *Huxley*, Anat. Vert., p. 291.

trivet1 (triv'et), *n.* [Also *trevet*; early mod. E. also *tryvet*, *trivette*, *trevett*; < ME. *treved*, *trevid*, < OF. *trepied*, *trepie*, *tripied* = OSp. *trevede*, *treudes* = OIt. *trepie*, *trepiedi*, *trespido*, *trespito*, < ML. *tripes* (*triped-*), a three-footed stool, a tripod, < L. *tripes* (*triped-*), having three feet, < *tres* (*tri-*), three, + *pes* (*ped-*) = E. *foot*. Cf. *tripod*, ult. a doublet of *trivet*. For the form, cf. the equiv. D. *drievoet* = MLG. *drivot*, *drevot*, a trivet, = E. *three-foot*.] **1.** A three-footed stool or stand; a tripod; especially, an iron tripod on which to place cooking-vessels or anything which is to be kept hot by the fire.

He shulde fynde in one place a friyngpan, in an other a chauldron, here a *tryuet*, and there a spytte, and these in maner in euery pore mannes house.
Peter Martyr (tr. in Eden's First Books on America, ed. [Arber, p. 145).

She got up to set the pot of coffee back on the *trivet*.
E. Eggleston, The Graysons, xxxii.

2. In *her.*, a bearing representing the three-legged iron support used in cooking. It is usually represented in plan, or as looked at from above, the feet or uprights seen in perspective.—**Right as a trivet**, standing steadily (in allusion to the fact that a tripod stands firm on irregular surfaces); hence, proverbially, entirely or perfectly right. [Colloq.]

I'll warrant you'll find yourself *right as a trivet!*
Barham, Ingoldsby Legends, II. 71.

"As to the letter, Rokesmith," said Mr. Boffin, "you're as *right as a trivet*." *Dickens*, Our Mutual Friend, ii. 14.

trivet2 (triv'et), *n.* [Formerly also *trevat*; origin obscure.] A knife for cutting the loops of terry fabrics, such as velvets or Wilton carpets, in which the looped warp is formed over wires in the shed. Each wire has a groove at the top to serve as a guide for the trivet, which can be run rapidly along the wires, cutting all the loops and thus making a pile fabric or cut pile fabric. *E. H. Knight.*

For velvets, &c., the wires are provided with a groove on their upper face, and along this groove a cutting knife called a *trivet* is run to cut the loops.
Encyc. Brit., XXIV. 467.

trivet-table (triv'et-tā'bl), *n.* A table supported by three feet.

The *trivet-table* of a foot was lame.
Dryden, tr. of Ovid's Metamorph., viii. 84.

Trivia1 (triv'i-ä), *n.* [NL. (J. E. Gray), named in allusion to its trivial size and value; < L. *trivius*, of three roads: see *trivium*.] The typical genus of the family *Triviidæ*, containing a number of small species of various parts of the world, among those known as *sea-beans*. See *sea-bean*, 2. See also cut under *Triviidæ*.

Trivia europæa. *a*, upper aspect; *b*, lower aspect.

trivia2, *n.* Plural of *trivium*.

Triviacea (triv-i-ā'sē-ä), *n. pl.* [NL., < *Trivia*1 + *-acea*.] Same as *Triviidæ*.

trivial (triv'i-al), *a.* and *n.* [< F. *trivial* = Sp. Pg. *trivial* = It. *triviale*, < L. *trivialis*, of the cross-roads, hence common, commonplace, ML. of the trivium, or three liberal arts, < *trivium*, a meeting of three roads, in ML. the first three liberal arts: see *trivium*. Cf. *bivial*, *quadrivial*.] **I.** *a.* **1.** Such as may be found everywhere; commonplace; ordinary; vulgar.

In the infancy of learning . . . those conceits which are now *trivial* were then new.
Bacon, Advancement of Learning, ii.

The *trivial* round, the common task,
Would furnish all we ought to ask.
Keble, Christian Year, Morning.

2. Trifling; insignificant; of little worth or importance; paltry.

Trivial objections to the plan were made at the time by cavillers. *Barham*, Ingoldsby Legends, I. 141.

3. Occupying one's self with trifles; trifling.

As a scholar meantime he was *trivial* and incapable of labour. *De Quincey.*

4. Of or pertaining to the trivium, or the first three liberal arts—grammar, rhetoric, and logic; hence, initiatory; rudimentary.

Whose deep-seen skill
Hath three times construed either Flaccus o'er,
And thrice rehears'd them in his *trivial* floor.
Bp. Hall, Satires, IV. i. 173.

5. In *zoöl.* and *bot.*: (*a*) Common; popular; vernacular; not technical: noting the popular or familiar names of animals or plants, as distinguished from the technical New Latin names. (*b*) Specific; not generic: noting what used to be called the *nomen triviale*—that is, the second or specific term in the binomial technical name of an animal or a plant, such terms being often adopted or adapted from a popular name or epithet. Thus, in the several designations *Homo sapiens*, *Felis leo*, *Mus musculus*, *Rosa canina*, the words *sapiens*, *leo*, *musculus*, and *canina* are respectively the trivial names of the species they designate. See *specific*, 3 (*b*).

6. In echinoderms, specifically, of or pertaining to the trivium: as, the *trivial* (anterior) ambulacra of a sea-urchin.

II. *n.* **1.** One of the three liberal arts which constitute the trivium.—**2.** A coefficient or other quantity not containing the quantities of the set considered.

trivialism (triv'i-al-izm), *n.* [< *trivial* + *-ism*.] A trivial matter; a trivial remark. *Carlyle.*

triviality (triv-i-al'i-ti), *n.* [< OF. *trivialite*, F. *trivialité* = Sp. *trivialidad* = Pg. *trivialidade* = It. *trivialità*; as *trivial* + *-ity*.] **1.** Trivial or paltry character or quality.

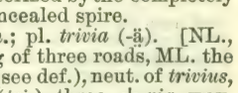
The *triviality* of its meaningless details. *J. Caird.*

2. Pl. *trivialities* (-tiz). A trivial thing; a trifle; a matter of little value or importance. *Cotgrave.*

It is in these acts called *trivialities* that the seeds of joy are forever wasted, until men and women look round with haggard faces at the devastation their own waste has made. *George Eliot*, Middlemarch, xlii.

trivialize (triv'i-al-īz), *v. t.*; pret. and pp. *trivialized*, ppr. *trivializing*. [< *trivial* + *-ize*.] To render trivial or paltry.

Southey. . . . We are now at the Sonnets [of Milton]. I know your dislike of this composition.
Landor. In English, not in Italian; but Milton has ennobled it in our tongue, and has *trivialized* it in that.
Landor, Imag. Conv., Southey and Landor, ii.



trivially (triv'i-al-i), *adv.* In a trivial manner.

Neither is money the sinews of war (as it is *trivially* said). *Bacon*, True Greatness of Kingdoms, etc. (ed. 1887).

trivialness (triv'i-al-nes), *n.* The state or quality of being trivial; triviality.

We always seem to be living just on the brink of a pure and lofty intercourse, which would make the ills and *trivialness* of life ridiculous. *Thoreau*, Letters, p. 13.

Triviidæ (tri-vī'i-dē), *n. pl.* [NL., < *Trivia* + *-idæ*.] A family of involute tænioglossate gastropods, typified by the genus *Trivia*. They are of small size, and closely related to the cowries, but differ in the multicuspid median teeth and unguiform marginal teeth of the radula, and the shell is generally transversely ribbed. They chiefly inhabit tropical seas, but one (*Trivia europæa*) occurs in British waters. See also cut under *Trivia*.

Trivia europæa, seen from above.

Triviinæ (triv-i-ī'nē), *n. pl.* [NL., < *Trivia* + *-inæ*.] A subfamily of *Triviidæ* (or of *Cyprædæ*), including the genus *Trivia*, and characterized by the completely involute shell with concealed spire.

trivium (triv'i-um), *n.*; pl. *trivia* (-ä). [NL., < L. *trivium*, a meeting of three roads, ML. the first three liberal arts (see def.), neut. of *trivius*, of three roads, < *tres* (*tri-*), three, + *via*, way, road.] **1.** In the schools of the middle ages, the first three liberal arts (grammar, rhetoric, and logic)—the other four (namely, arithmetic, music, geometry, and astronomy) being termed *quadrivium*.—**2.** In echinoderms, as any sea-urchin, the three anterior ambula-

cra, taken collectively and distinguished from the two posterior ones taken together. See *bivium*, and cut under *Spatangoida*.

trivoltin (trī-vol'tin), *n.* [< L. *tres* (*tri-*), three, + It. *volto*, turn: see *volt*[1].] A race of the silkworm of commerce (*Bombyx mori*) which has three annual generations, thus producing three crops of cocoons each year; also, such a silkworm. Also *trivoltine*.

triweekly (trī-wēk'li), *a.* [< *tri-* + *weekly*.] 1. Occurring, performed, or appearing once every three weeks.—2. Less correctly, occurring, performed, or appearing thrice a week: as, a *triweekly* newspaper.

Trixagus (trik'sa-gus), *n.* [NL., < Gr. *τριξός*, var. of *τρισσός*, *τριττός*, threefold (< *τρεῖς* (*τρι-*), three), + *ἄγειν*, drive, do.] A genus of beetles: same as *Throscus*.

trizomal (trī-zō'mal), *a.* [For **trirhizomal*, < Gr. *τρεῖς* (*τρι-*), three, + *ῥίζωμα*, root, + *-al*.] Formed of the sum of three square roots.—**Trizomal curve**, a curve whose equation is

$$\sqrt{\alpha x} + \sqrt{\beta y} + \sqrt{\gamma z} = 0,$$

where α, β, γ are parameters, and X, Y, Z three curves of the same system.

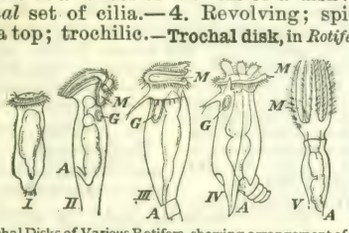
troat (trōt), *v. i.* [Said to be imitative.] To cry as a buck in rutting-time.

troat (trōt), *n.* [< *troat*, *v.*] The cry of a buck in rutting-time.

trobellion†, *n.* [ME., < OF. **trobellion*, **torbellion*, < L. *turbella*, a bustle, stir, < *turba*, a bustle, stir, disturbance: see *trouble*.] A storm; disturbance. *Merlin* (E. E. T. S.), ii. 324.

trocar (trō'kär), *n.* [Also *trochar*; < F. *trocar*, *trocart*, also *trois-quarts* (as if involving *quart*, a quarter), < *trois*, three, + *carre*, side, face, OF. *quarre*, a square: see *three* and *square*[1].] A surgical instrument used for withdrawing fluid from the body in cases of dropsy, hydrocele, etc. It consists of a perforator, or stylet, and a cannula. After the puncture is made the stylet is withdrawn, and the cannula remains for the escape of the fluid.

trocha (trō'chä), *n.* [Sp.] 1. A narrow path.—2. *Milit.*, a strategic line of defenses across a given territory.



Trochacea (trō-kā'sē-ä), *n. pl.* Same as *Trochidæ*.

trochaic (trō-kā'ik), *a.* and *n.* [= F. *trochaïque*, < L. *trochaicus*, < Gr. *τροχαϊκός*, pertaining to or consisting of trochees, < *τροχαῖος*, a trochee: see *trochee*.] I. *a.* 1. Pertaining to or characteristic of a trochee: as, *trochaic* rhythm.—2. Constituting or equivalent to a trochee: as, a *trochaic* foot.—3. Consisting or composed of trochees: as, *trochaic* verses. Trochaic verse is measured by dipodies, of the form – ⏑ – ⏑. In ancient metrics the dipody is the shortest and the hexapody the longest trochaic colon, and the tetrameter catalectic (see *tetrameter*) the most usual meter. In English poetry trochaic meter is not infrequent in hymns and lyrics, and in Longfellow's "Hiawatha" the dimeter (tetrapody) is used throughout, as in the Kalevala, as a narrative (epic) meter. See *ithyphallic*, *octonarius*, *scazon*, *septenarius*.—**Trochaic cesura.** See *cesura*.

II. *n.* A trochaic verse or period.

trochaical (trō-kā'i-kal), *a.* [< *trochaic* + *-al*.] Same as *trochaic*.

trochal (trō'kal), *a.* [< NL. **trochalis*, < *trochus*, < Gr. *τροχός*, a wheel (cf. Gr. *τροχαλός*, running, round, < *τροχός*, a wheel): see *trochus*.] 1. Wheel-like; rotiform; discoidal: as, a *trochal* disk or organ (see below). Also *trochate*.—2. Having a trochal disk or organ; trochate; trochiferous.—3. Encircling or surrounding, like the tire of a wheel or the rim of a disk: as, a *trochal* set of cilia.—4. Revolving; spinning like a top; trochilic.—**Trochal disk**, in *Rotifera*, the

Trochal Disks of Various Rotifers, showing arrangement of the cilia. I, II, larval and adult *Larinularia*; III, *Philodina*; IV, *Brachionus*; V, *Stephanoceros*. *A*, anus; *M*, mouth; *G*, ganglion.

oral organ characteristic of the rotifers; the wheel of the wheel-animalcules; the velum.

Trochalopteron (trok-a-lop'te-ron), *n.* [NL. (E. Blyth, 1843), also *Trochalopterum* (Agassiz, 1846), < Gr. *τροχαλός*, round (< *τροχός*, a wheel), + *πτερόν*, wing.] An extensive genus of oriental timeliine birds, whose type is *T. squamatum*. These birds range in the hill-countries of India, in Burma, through China, and in some of the islands, as Formosa and Hainan; the species are 25 or 30. Most of them have been properly identified only of late years, as *T. canorum*, the so-called Chinese thrush of Latham (1783), described many years before that as *Turdus chinensis* by Osbeck. The genus is also called *Pterocyclus* and *Leucodioptron*.

trochanter (trō-kan'tėr), *n.* [= F. *trocanter*, < NL. *trochanter*, < Gr. *τροχαντήρ*, the ball on which the hip-bone turns in its socket, < *τρέχειν*, run: see *trochus*.] 1. In *anat.* and *zoöl.*, a tuberosity, protuberance, or apophysis of the upper part of the femur or thigh-bone, for the insertion of various muscles which flex, extend, or rotate the limb. There may be one (elephant), two (usually), or three (horse) such processes; in man there are two, called the *greater* and the *lesser trochanter*, the former for the gluteal muscles and those collectively called rotators, the latter for the psoas and iliacus. In birds the great trochanter enters into the construction of the hip-joint, as a shoulder of the femur which abuts against the ilium. Trochanters commonly have an independent center of ossification, and are therefore of the nature of epiphyses. See cuts under *epiphysis* and *femur*.

2. In *entom.*, the second joint of an insect's leg, succeeding the coxa. The trochanter is sometimes two-jointed, in which case the proximal one of its two joints takes the name of *trochantin*, the other being the trochanter proper. See cut under *coxa*.—**Intercepting trochanter.** See *intercept*.

trochanterian (trō-kan-tē'ri-an), *a.* [< *trochanter* + *-i-an*.] Of or pertaining to the greater trochanter of the femur.

trochanteric (trō-kan-ter'ik), *a.* [< *trochanter* + *-ic*.] Of or pertaining to a trochanter, in any sense; trochanterian or trochantinian: as, a *trochanteric* tuberosity.—**Trochanteric fossa.** Same as *digital fossa* (which see, under *digital*).

trochantin, trochantine (trō-kan'tin), *n.* [< *trochant*(*er*) + *-in*[1].] 1. In *anat.* and *zoöl.*, the lesser trochanter of the femur.—2. In *entom.*, the first or proximal one of two joints of which the trochanter may consist (see *trochanter*, 2). It is often united with the coxa.

trochantinian (trō-kan-tin'i-an), *a.* [< *trochantin* + *-i-an*.] Of or pertaining to the lesser trochanter of the femur.

trochar, *n.* See *trocar*.

trochate (trō'kāt), *a.* [< NL. **trochatus*, < Gr. *τροχός*, a wheel: see *trochus*.] 1. Same as *trochal*, 1.—2. Trochiferous; provided with a trochal organ.

troche[1] (trōch or trōk; commonly trō'kē: see etym.), *n.* [< NL. **trochus*, a circular tablet, < Gr *τροχός*, a round cake, a pill: see *trochus*. The word *troche*, for which no corresponding forms are found in the Rom. languages (they use, instead, forms corresponding to the dim *trochisk*, q. v.), seems to have been formed in E. directly from the NL. or Gr. In the absence of a vernacular pronunciation and of obvious analogies, various pronunciations have been given to it: (*a*) trōch, as if from a F. **troche*, not found in this sense (though existing in the plural, as a hunting-term, *troches*, fumets, the (round) droppings of deer); (*b*) trōsh, supposed to be a more exact rendering of the assumed F. **troche*; (*c*) trōk, an E. accommodation of the NL. **trochus* (trō'kus), Gr. *τροχός*; (*d*) trō'kē, an erroneous pronunciation now common, appar. due to confusion with *trochee*, or to a notion that the word is NL. **troche*, < Gr. *τροχή* (which exists only as a by-form of *τρόχος*, course). (*e*) A more exact E. form of the Gr. term would be **troch* (trok), after the analogy of *stich*, the only other instance, and that technical or rare, of an E. monosyllable from a Gr. word ending in *-χ-ος* (other instances are polysyllables, as *distich*, *tetrastich*, *acrostic*[1] for **acrostich*, etc.).] A small circular cake, as a lozenge or other form of tablet composed of some medicinal ingredients mixed into a paste with sugar and mucilage, and dried. It is intended to be gradually dissolved in the mouth, and slowly swallowed, as a demulcent, especially to allay irritation of the throat.

Take of Benjamin six ounces, wood of aloes eight ounces, styrax calamite three ounces, musk half a dram, orrice two ounces, sugar candy three pound; powder them, and with rose-water make *troches*.

Cosmeticks (1660), p. 138. (*Halliwell.*)

troche[2]†, *v.* [< OF. *trocher*, branch. Cf. *trocking*.] To branch.

Whan he [a hart] hath *troched* on that one partye .iiij. and on the other .v., than is he of .xvj. of defaunte. Whan he is *trochid* on bothe sydes .v., than is he of .xvj. atte fulle.

Rel. Antiq., I. 151.

Teste de cerf trochée [F.], *troched* or whose top is divided into three or four small branches. *Cotgrave.*

trochee (trō'kē), *n.* [Formerly also, as L., *trochæus*; = F. *trochée* = Sp. *troqueo* = Pg. It. *trocheo*, < L. *trochæus*, a trochee, also a tribrach, < Gr. *τροχαῖος*, a trochee, tribrach, prop. adj. (sc. *πούς*, foot), running, tripping, < *τρόχος*, a running, a course: see *trochus*.] In *pros.*, a foot of two syllables, the first long or accented and the second short or unaccented. The trochee of modern or accentual versification consists of an accented followed by an unaccented syllable. The trochee of Greek and Latin poetry (– | ⏑) consists of a long time or syllable, forming the thesis (or metrically accented part of the foot), succeeded by a short as arsis, and is accordingly trisemic and diplasic. Its resolved form is the (trochaic) tribrach (⏑ ⏑ | ⏑). In the even places of a trochaic line an irrational trochee or spondee is frequently substituted for the normal trochee (– – for – ⏑), as also in the so-called "basis" of logaœdic verse. The irrational trochee may take an apparently anapestic form (⏑ ⏑ – for – – for – ⏑). This foot receives its names of *trochee* (running) and *choree* or *choreus* (dancing) from its rapid movement and fitness to accompany dances.—**Trochee semantus**, in *anc. pros.*, one of the greater feet, consisting of three double or tetrasemic longs, the first two of which belong to the thesis and the last to the arsis. Compare *orthius*.

Trochidæ (trok'i-dē), *n. pl.* [NL., < *Trochus* + *-idæ*.] A family of rhipidoglossate gastropods, typified by the genus *Trochus*; the top-shells. They have the foot moderately broad, the epipodium fringed with lobes or tentacular filaments, the tentacles elongate and simple, the eyes pedunculated at the outer bases of the tentacles, a pair of intertentacular appendages, and a spiral, generally conic, shell with a rhombiform aperture closed by a multispiral corneous operculum. It is a large group of marine shells, many of which exhibit a brilliant nacre or ornamentation. See cuts under *Monodonta*, *operculum*, *radula*, *top-shell*, and *Trochus*.

trochiform (trō'ki-fôrm), *a.* [< NL. *trochus*, a top, + L. *forma*, form.] In *conch.*, specifically, of the form of a top-shell; belonging or allied to the *Trochidæ*.

trochil (trō'kil), *n.* [= F. *trochile* = It. *trochilo*, < L. *trochilus*: see *trochilus*[1]. Cf. *thrall*.] The trochilus. See *trochilus*[1], 1 (*a*).

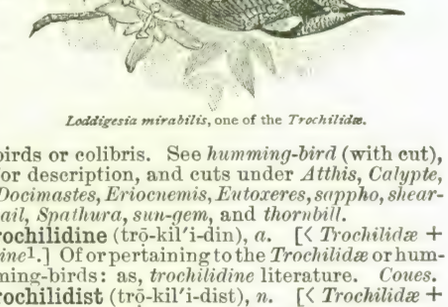
He [the crocodile] opens his chaps to let the *Trochil* pick his teeth, which give it feeding.

Sir T. Herbert, Travels, p. 323.

Trochili (trok'i-lī), *n. pl.* Same as *Trochilidæ*.

trochilic (trō-kil'ik), *a.* and *n.* [< Gr. *τροχίλος*, *τροχιλία*, a revolving cylinder, a pulley, < *τρέχειν*, run: see *trochilus*[2].] I. *a.* Pertaining to or characterized by rotary motion; having power to draw out or turn round. [Rare.]

Thus farre had I proceeded in names, when it was hie time to stay, for I am aduertised that there is one which by arte *trochilick* will drawe all English surnames of the best families oute of the pitte of poetrie, as Bourchier from Busyris the tyrant of Ægypt.



Camden, Remains, Surnames.

II.† *n.* The doctrine of the composition of circular motions.

trochilics (trō-kil'iks), *n.* [Pl. of *trochilic* (see *-ics*).] The science of rotary motion. [Rare.]

For the better conceiving of this invention, it is requisite that we rightly understand some principles in *trochilics*, or the art of wheel-instruments. *Wilkins*, Dædalus, xiv.

Trochilidæ (trō-kil'i-dē), *n. pl.* [NL., < *Trochilus*[1] + *-idæ*.] A family of tenuirostral macrochirous picarian birds peculiar to America, whose typical genus is *Trochilus*; the humming-

Loddigesia mirabilis, one of the *Trochilidæ*.

birds or colibris. See *humming-bird* (with cut), for description, and cuts under *Atthis*, *Calypte*, *Docimastes*, *Eriocnemis*, *Eutoxeres*, *sappho*, *sheartail*, *Spathura*, *sun-gem*, and *thornbill*.

trochilidine (trō-kil'i-din), *a.* [< *Trochilidæ* + *-ine*[1].] Of or pertaining to the *Trochilidæ* or humming-birds: as, *trochilidine* literature. *Coues*.

trochilidist (trō-kil'i-dist), *n.* [< *Trochilidæ* + *-ist*.] A monographer of humming-birds; one who is versed in the study of the *Trochilidæ*. *Encyc. Brit.*, XII. 358.

Trochiliidæ† (trok-i-li-i'i-dē), *n. pl.* [NL. (Westwood, 1843), < *Trochilium* + *-idæ*.] A family of moths; the clear-winged hawk-moths. See *Ægeriidæ* and *Sesiidæ*.

Trochilinæ (trok-i-li-nē), *n. pl.* [NL., < *Trochilus*[1], 2, + *-inæ*.] 1†. The humming-birds. Same as *Trochilidæ*.—2. One of the subfamilies of *Trochilidæ*, containing most of the species.

Trochilium (trō-kil'i-um), *n.* [NL. (Scopoli, 1777), < Gr. *τροχίλος*, some small bird: see *trochilus*[1].] A genus of clear-winged hawk-moths, including large species with transparent wings, obsolete tongue, subclavate antennæ with a brush of hair at the tip, and rather densely clothed legs, which, however, are not tufted. *T.* (*Ægeria*) *apiformis* of the United States is so called from its bee-like appearance.

trochilus[1] (trok'i-lus), *n.* [NL., < L. *trochilus*, < Gr. *τροχίλος*, some small bird, < *τρέχειν*, run: see *trochus*. Cf. *trochil*[1].] **1.** A trochil; one of several different birds. (*a*) A bird described by some ancient writers, as Herodotus, as a kind of wagtail or sandpiper which enters the mouth of the crocodile and feeds by picking the reptile's teeth. Many surmises have been made in the attempt to identify this bird. It is certainly one of the small plover-like birds of the region of the Nile, probably either the Egyptian courser, crocodile-bird, or sicsac, *Pluvianus ægyptius*, belonging to the subfamily *Cursoriinæ* (see cut under *Pluvianus*), or the Egyptian spur-winged plover, *Hoplopterus spinosus* (see cut under *spur-winged*). (*b*) One of several very small European warbler-like birds, as the golden-crested wren, or kinglet, *Regulus cristatus* (see cut under *goldcrest*), and the willow-warbler, *Phylloscopus trochilus*, etc. (*c*) Some or any humming-bird; a colibri.

2. [*cap.*] In *ornith.*, a Linnean genus of humming-birds, type of the family *Trochilidæ*, formerly including all the species then known, since divided into perhaps 200 modern genera. The generic name is now commonly restricted to such species as the common ruby-throated humming-bird of the United States, *T. colubris*, and the black-throated humming bird of California, *T. alexandri*. See cut under *humming-bird*.

trochilus[2] (trok'i-lus), *n.*; pl. *trochili* (-lī). [< L. *trochilus*, < Gr. *τροχίλος*, a broad hollow molding running round the base of a column, a casement, scotia, < *τρέχειν*, run.] In *arch.*, same as *scotia*.

trochin (trō'kin), *n.* [< Gr. *τροχός*, wheel, something spherical or circular (see *trochus*), + *-in*[1].] The lesser tuberosity of the head of the humerus, in man the site of the insertion of the subscapularis muscle. See *trochiter*, and cut under *humerus*.

trochingt, *n.* [< *troche*[2] + *-ing*[1].] One of the small snags or points surmounting the antlers of the stag. *Howell*.

trochinian (trō-kin'i-an), *a.* [< *trochin* + *-ian*.] Of or pertaining to the trochin, or lesser tuberosity of the humerus.

trochiscus (trō-kis'kus), *n.*; pl. *trochisci* (-ī). [< L. *trochiscus*: see *trochisk*.] Same as *trochisk*.

trochisk (trō'kisk), *n.* [< OF. *trochisque* = Pg. *trochisco*, *trocisco* = It. *trochisco* = G. *trochisk*, < L. *trochiscus*, a pill, troche, < Gr. *τροχίσκος*, a small wheel, a small disk or ball, pastil, troche, dim. of *τροχός*, a round cake, a pill: see *trochus*, *troche*[1].] A troche.

> I would have trial made of two other kinds of bracelets, for comforting the heart and spirits: the one of the *trochisk* of vipers, made into little pieces of beads; for since they do great good inwards, especially for pestilent agues, it is like they will be effectual outwards, where they may be applied in greater quantity. There would be *trochisk* likewise made of snakes, whose flesh dried is thought to have a very opening and cordial virtue.
> *Bacon*, Nat. Hist. (ed. Montagu), § 965.

> God finds out a way to improve their evils to advantage; and teaches them, of these vipers, to make sovereign treacles, and safe and powerful *trochisees* [read *trochiskes*].
> *Bp. Hall*, Balm of Gilead, xvii. § 4.

trochite (trō'kīt), *n.* [< Gr. *τροχός*, a wheel, + *-ite*[2].] One of the disks or wheel-like joints of the stem of an encrinite; a wheelstone, screwstone, or entrochus. [Rare or obsolete.]

trochiter (trok'i-tėr), *n.* [An arbitrary variant of *trochanter*.] The greater tuberosity of the head of the humerus, in man the site of the insertion of the supraspinatus, infraspinatus, and teres minor muscles. See *trochin*, and cut under *humerus*.

trochiterian (trok-i-tē'ri-an), *a.* [< *trochiter* + *-ian*.] Of or pertaining to the trochiter: as, the *trochiterian* fossa (a depression upon the trochiter for insertion of the infraspinatus muscle).

trochitic (trō-kit'ik), *a.* [< *trochite* + *-ic*.] Of the nature of a trochite; pertaining to a trochite.

trochlea (trok'lē-ą), *n.*; pl. *trochleæ* (-ē). [NL., < L. *trochlea*, *trochlea*, a pulley, sheaf, block, ML. also a windlass, roller, small wheel, < Gr. *τροχιλία*, *τροχιλέα*, *τροχαλία*, a pulley, a block; cf. *τροχαλός*, running, < *τρέχειν*, run: see *trochus*. Hence ult. E. *truckle*.] In *anat.* and *zoöl.*, a pulley or pulley-like arrangement of parts, affording a smooth surface upon which another part glides. Specifically—(*a*) A fibrous loop in the upper inner corner of the orbit of the eye, through which runs the tendon of the superior oblique muscle of the eyeball. The line of traction of the muscle is by this contrivance deflected at nearly a right angle. This trochlea is not found below mammals. Similar loops (seldom, however, taking the name *trochlea*) bind down and alter the direction of some other double-bellied muscles, as the digastricus and omohyoid. See cuts under *eye*[1] and *eyeball*. (*b*) In the elbow-joint, the articular surface of the inner condyle of the humerus, with which the ulna articulates: distinguished from the capitellum, or outer convex surface for the articulation of the radius: so called because in man it is concave from side to side, though very convex in the opposite direction, thus affording a surface like that of the rim of a pulley-wheel. See cuts under *capitellum* and *epicondyle*. (*c*) In *entom.*, the orifice of the metathorax through which passes the tendon of the abdomen, and whose smooth rim serves as a sort of pulley. *Kirby and Spence.*—**Tibial trochlea.** See *tibial*.

trochlear (trok'lē-ąr), *a.* and *n.* [< NL. *trochlearis*, < L. *trochlea*, pulley: see *trochlea*.] **I.** *a.* **1.** Pulley-like; forming a loop that acts like a pulley for a tendon to run through, or affording a surface like that of a pulley, upon which a bone may ride back and forth. See *trochlea*.—**2.** In *bot.*, circular, compressed, and contracted in the middle of its circumference, so as to resemble a pulley, as the embryo of *Commelina communis*. Also *trochleate*.—**3.** Pertaining to or connected with a trochlea: as, a *trochlear* muscle or nerve; *trochlear* movements.—**Trochlear fossa**, a small depression in the orbital plate of the frontal bone, situated near the internal angular process, for attachment of the trochlea of the eye.—**Trochlear muscle**, the superior oblique muscle of the eyeball, whose tendon runs through a trochlea. See cut under *eyeball*.—**Trochlear nerve** (*nervus trochlearis*), the fourth and smallest of the cranial nerves. Its superficial origin is just behind the corpora quadrigemina. It supplies the superior oblique muscle of the orbit. It is purely motor in its function. Also called *patheticus*, *oculomuscularis superior*. See second cut under *brain*.—**Trochlear spine.** See *spine*.—**Trochlear surface of the femur**, the smooth depression forming the anterior part of the articular surface of the condyles, for articulation with the patella.

II. *n.* A trochlear muscle or nerve; a trochlearis.

Also *trochleary*.

trochlearis (trok-lē-ā'ris), *n.*; pl. *trochlearес* (-rēz). [NL. (sc. *musculus*): see *trochlear*.] In *anat.*, a trochlear muscle or nerve. See phrases under *trochlear*.

trochleary (trok'lē-ā-ri), *a.* and *n.* [< *trochlea* + *-ary*.] In *anat.*, same as *trochlear*.

trochleate (trok'lē-āt), *a.* [< NL. **trochleatus*, < L. *trochlea*, a pulley: see *trochlea*.] In *bot.*, same as *trochlear*, 2.

Trochocarpa (trok-ō-kär'pą), *n.* [NL. (R. Brown, 1810), from the fruit; < Gr. *τροχός*, a wheel, + *καρπός*, fruit.] A genus of dicotyledonous plants, of the family *Epacridaceæ* and tribe *Styphelieæ*. It is characterized by a ten-celled ovary, and a drupaceous fruit with five to ten one-seeded nutlets. The 6 species are natives of Australia and Tasmania. They bear petioled polymorphous leaves, either scattered, two-ranked, or somewhat whorled. The small flowers form axillary or terminal spikelets. *T. thymifolia*, a small Tasmanian shrub, is cultivated under the name of *wheelseed*. *T. laurina* is the beech- or brush-cherry of New South Wales and Queensland, a tree reaching 20 or ★40 feet high, with tough fine-grained wood.

trochoid (trō'koid), *a.* and *n.* [= F. *trochoïde*, < Gr. *τροχοειδής*, round like a wheel, < *τροχός*, a wheel, + *εἶδος*, form.] **I.** *a.* **1.** In *geom.*, trochoidal.—**2.** In *anat.*, rotating or revolving like a wheel; pivotal, as an articulation; trochoidal: applied to that kind of rotatory arthrosis in which a part revolves to some extent upon another, as the head of the radius in the lesser sigmoid cavity of the ulna in pronation and supination of the forearm, or the atlas about the odontoid process of the axis in shaking the head.—**3.** In *conch.*, top-shaped, like a shell of the genus *Trochus;* conical with a flat base; of or related to the *Trochidæ*.

II. *n.* **1.** In *geom.*, a prolate or curtate cycloid or curve traced by a point in fixed connection with, but not generally on the circumference of, a wheel which rolls upon a right line. If the point is outside the circumference, the trochoid has loops; if inside, it has waves. See *cycloid*.—**2.** In *anat.*, a rotatory or pivotal joint; diarthrosis rotatorius; cyclarthrosis.—**3.** In *conch.*, a top-shell, or some similar shell; any member of the *Trochidæ*.

trochoidal (trō'koi-dal), *a.* [< *trochoid* + *-al*.] **1.** Pertaining to a trochoid; partaking of the nature of a trochoid: as, the *trochoidal* curves, such as the epicycloid, the involute of the circle, and the spiral of Archimedes.—**2.** In *anat.* and *conch.*, same as *trochoid*.

trochometer (trō-kom'e-tėr), *n.* [< Gr. *τροχός*, a wheel, + *μέτρον*, a measure.] Same as *trechometer*.

Trochosphæra (trok-ō-sfē'rą), *n.* [NL.: see *trochosphere*.] 1†. A supposed genus of rotifers, as *T. æquatorialis* of the Philippines. *Semper.*—**2.** [*l. c.*] A trochosphere.

trochosphere (trok'ō-sfēr), *n.* [< Gr. *τροχός*, a wheel, + *σφαῖρα*, a sphere.] That larval form of various annelids, mollusks, and mulluscoids which has a circlet of cilia. The trochosphere in *Mollusca* is an advanced gastrula or gastrular stage of the embryo, prior to the veliger stage, when the original blastopore has been lost or transformed, a rudimentary mouth and anus have appeared, and there is an equatorial circlet of cilia about the spheroidal body. In mollusks also called *neoembryo* (see *typembryo*).

trochospherical (trok-ō-sfer'i-kal), *a.* [< *trochosphere* + *-ic-al*.] Having a spherical figure and a ciliated circlet; of or pertaining to a trochosphere.

Trochotoma (trō-kot'ō-mą), *n.* [NL. (Deslongchamps, 1841), < Gr. *τροχός*, wheel, + *-τομος*, < *τέμνειν*, *ταμεῖν*, cut.] A genus of pleurotomarioid gastropods with a trochiform shell, an infundibuliform base, and a slit above the carina, obliterated except near the margin of the aperture. The species flourished in the Liassic seas.

Trochotoma conuloides.

Trochozoa (trok-ō-zō'ą), *n. pl.* [NL., pl. of *trochozoön*.] Those invertebrates, as annelids and mollusks, whose larval forms in one stage are trochospheres; also, loosely, such larvæ, collectively considered, or hypothetical organisms from which annelids and mollusks are supposed to have been derived.

trochozoön (trok-ō-zō'on), *n.* [NL., < Gr. *τροχός*, wheel, + *ζῷον*, animal.] Any member of the *Trochozoa*, considered as hypothetical ancestral forms of annelids and mollusks. *Stand. Nat. Hist.*, I. 236.

> The Balanoglossus occupies an intermediate position between the worms and the Chordata. It has originated from a *trochozoön* which acquired some features in common with worms. *Nature*, XLII. 94.

trochus (trō'kus), *n.* [< L. *trochus*, ML. also *trocus*, hoop, ML. also wheel, top, < Gr. *τροχός*, something round, as a wheel, hoop, circle, circuit, ring, cake, pill, < *τρέχειν*, run. Hence ult. (from *τροχός* or the orig. verb) E. *troche*[1], *trochiscus*, *trochisk*, *trochee*, *trochil*, *trochilus*, *trochanter*, *truck*[1], *truckle*, etc. See especially *troche*[1] and *truck*[1].] 1†. A wheel. *Bailey*, 1733.—2†. A round lump. *Bailey*, 1733.—**3.** [*cap.*] [NL.] In *conch.*, the typical genus of *Trochidæ*, having a regular conic form with flat base, oblique and rhombic aperture, and a horny operculum of many whorls; top-shells. *T. zizyphinus* and *T. obeliscus* are examples. Some of the species grow to a large size, are handsomely marked, and when cut and polished show an extremely brilliant nacre. See also cuts under *operculum*, *radula*, and *top-shell*.

Trochus obeliscus.

Trochus zizyphinus.

trock (trok), *v.* A Scotch form of *truck*[1].

troco (trō'kō), *n.* [< Sp. *truco*, "a truck table to play on" (Stevens, 1706): see *truck*[3].] An old English game, formerly known as *lawn-billiards*. It is played on a lawn with wooden balls and a cue ending in a spoon-shaped iron projection. In the center of the green there is an iron ring moving on a pivot, and the object is to drive the ball through the ring. Points are also made by caroming—that is, by the striking of two balls in succession with the player's own ball.

trod (trod), *n.* [< ME. *trod* (cf. Norw. *trod*, a way or path much trodden), < AS. *tredan* (pret. *træd*), etc., tread: see *tread*, and cf. *trode*, *trade*[1].] Tread; tramp; track. [Obsolete or Scotch.]

> This is the worst o' a' mishaps,
> 'Tis war than death's fell *trod*.
> *Tarras*, Poems, p. 59. (*Jamieson.*)

Hot trod, the pursuit or tracings of moss-troopers or reavers; literally, a fresh track or footstep.

> The pursuit of Border marauders was followed by the injured party and his friends with blood-hounds and bugle-horn, and was called the *hot-trod*. He was entitled, if his dog could trace the scent, to follow the invaders into the opposite kingdom, a privilege which often occasioned bloodshed. *Scott*, L. of L. M., v. 29, note.

trod, trodden (trod, trod'n), *p. a.* [Pp. of *tread*, *v.*] Trampled; crushed; hence, insulted; degraded: much used in composition with an adverbial element: as, down-*trodden*.

> Then to the well-*trod* stage anon,
> If Jonson's learned sock be on.
> *Milton*, L'Allegro, l. 131.

trode (trōd), *n.* [A var. of *trod*, *trade*[1].] Footing; path. [Obsolete or prov. Eng.]

> In numble dales is footing fast,
> The *trode* is not so tickle.
> *Spenser*, Shep. Cal., July.

trögerite (trė′gėr-īt), *n.* [< *Tröger* (see def.) + *-ite*[2].] A hydrous arseniate of uranium, occurring in thin tabular crystals of a lemon-yellow color: named after R. Tröger, an inspector of mines at Neustädtel in Saxony.

troggin (trog′in), *n.* [Cf. *trock*, *truck*[1].] Small wares. *Burns*, An Excellent New Song. [Scotch.]

troggs (trogz), *n. pl.* [Cf. *troggin*.] Duds; clothes. [Scotch.]

> "By my *troggs*," replied Christie, "I would have thrust my lance down his throat." *Scott*, Monastery, xiv.

troglodyte (trog′lō-dīt), *a.* and *n.* [Formerly also *troglodite*; < F. *troglodyte* = Pg. *troglodyta* = Sp. It. *troglodita*, < L. *troglodyta*, only in pl. *Troglodytæ*, *Trogodytæ* (as a proper name), < Gr. τρωγλοδύτης, cave-dweller, lit. 'one who creeps into holes,' < τρώγλη, hole, cave, + δύειν, enter, creep into.] **I.** *a.* Inhabiting caverns; cave-dwelling; cavernicolous; spelæan; troglodytic: specifically noting human beings, apes, and birds.

II. *n.* **1.** A cave-dweller; a caveman; one who lives in a naturally formed cavity in the rocks, or, by extension, one who has his abode in a dwelling-place of that kind, whether constructed by enlarging a natural cave or by making an entirely new excavation. The word *troglodyte* is rarely used except in translating from the classic authors, or in discussions with regard to the nature of the people so denominated by them, or as applied to members of some prehistoric tribes, as those of the Mediterranean caves near Mentone, in Italy. Caves were natural places of refuge and residence in the early stages of man's development, and were very frequently thus occupied by various prehistoric races, as has been proved by explorations made in different parts of the world. These explorations have in numerous instances revealed the existence of human remains mingled with implements and ornaments made by the hand of man, together with the bones of living and extinct species of animals, the whole occurring in such a way as to prove beyond a doubt that they were contemporaneous. Several classic authors—among whom are Herodotus, Aristotle, Strabo, and Pliny—speak of the troglodytes, and give this name to cave-dwellers in various rather vaguely designated regions. Cave-dwellers still live in a few places in the United States, as some of the Yavasupai Indians in caves in the side cañons of the Colorado river.

> *Q.* Are there still any *troglodytes*, or inhabitants of caves, and are they numerous?
> *A.* The district between Marsa Susa and Cyrene is full of caverns in the very heart of the mountains, into which whole families get by means of ropes; and many are born, live, and die, in these dens, without ever going out of them.
> *W. H. Smyth*, The Mediterranean, p. 497.

> Palæolithic man was unquestionably a true *troglodyte*, the caves which he is known to have inhabited being very numerous. *J. Geikie*, Prehistoric Europe, p. 19.

2. Hence, one living in seclusion; one unacquainted with the affairs of the world. *Saturday Rev.*—**3.** In *mammal.*, an anthropoid ape of the genus *Troglodytes*, as the chimpanzee or the gorilla, especially the former, which was earlier known to naturalists and was called *Simia troglodytes*. The name is actually a misnomer, arising from some confounding or comparing of these apes with peoples who in ancient times were called *troglodytes*. See *Troglodytes*, 2, and cuts under *chimpanzee* and *gorilla*.

4. In *ornith.*, a wren of the genus *Troglodytes* or family *Troglodytidæ*. The term is a misnomer, since no wrens live in caves.

Troglodytes (trog-lod′i-tēz), *n.* [NL.: see *troglodyte*.] **1.** In *ornith.*: (*a*) A genus of wrens, type of the family *Troglodytidæ*, based by Vieillot in 1807 on *T. aëdon*. The type is taken to be the common wren of Europe, *T. europæus* or *T. parvulus*, formerly *Sylvia troglodytes*. The name, erroneous in fact, was changed by Rennie in 1831 to *Anorthura*. It has been used by different writers for nearly all the birds of the family *Troglodytidæ* (and for some others). Thus, the common winter wren of the United States is *T. hiemalis*; the house wren, *T. aëdon*; the great Carolina wren was *T. ludovicianus*; Bewick's wren, *T. bewicki*; the long-billed marsh-wren, *T. palustris*; the short-billed marsh-wren, *T. brevirostris*. The last four named are now placed in other genera. See cuts under *marsh-wren* and *Thryothorus*. (*b*†) In the form *Troglodites*, a Linnean name (1744) of humming-birds, later (1748–66) called *Trochilus*. Compare similar confusion of *trochilus*, 1 (*b*) and (*c*).—**2.** In *mammal.*, a genus of anthropoid apes, instituted by Isidore Geoffroy St. Hilaire after 1807, containing the chimpanzee, *T. niger*, and the gorilla, *T. gorilla*. The generic name being preoccupied in ornithology, and therefore strictly untenable in mammalogy, this genus was called *Mimetes* by Leach in 1819, and afterward *Anthropopithecus* by De Blainville; but *Troglodytes* is still much used. See cuts under *chimpanzee* and *gorilla*.

Winter Wren (*Troglodytes hiemalis*).

troglodytic (trog-lō-dit′ik), *a.* [< L. *troglodyticus*, < Gr. τρωγλοδυτικός, pertaining to a cave-dweller, < τρωγλοδύτης, a cave-dweller, troglodyte: see *troglodyte*.] Of or pertaining to the troglodytes or cave-dwellers; relating to or having the habits of the cave-dwellers.

> The dwelling-places or the burial vaults of a *troglodytic* tribe closely akin to the Guanches of the Canaries.
> *The Academy*, No. 891, p. 370.

troglodytical (trog-lō-dit′i-kal), *a.* [< *troglodytic* + *-al*.] Troglodytic in character or habits; relating to the troglodytes or cave-dwellers.

Troglodytidæ (trog-lō-dit′i-dē), *n. pl.* [NL., < *Troglodytes* + *-idæ*.] In *ornith.*, a family of oscine passerine birds, whose typical genus is *Troglodytes*; the wrens. The family is of no fixed limit or satisfactory definition. The birds referred to it, in its usual acceptation, are mainly American, and very numerous in tropical and subtropical America. These are well distinguished from most New World passerines, excepting from the mocking-birds, thrashers, and the like, toward which they grade so closely, through such forms as the cactus-wrens, for example, that they have often been associated with them in the family *Liotrichidæ* (the mockers, etc., being then removed from *Turdidæ* to enter into this association). But the Old World wren-like birds have so many and varied relationships that they have thus far proved entirely unmanageable. The whole of them, therefore, together with the American forms, have been thrown in the ornithological waste-basket (*Timeliidæ*). See *wren*, and cuts under *Campylorhynchus*, *marsh-wren*, *Pnoëpyga*, *rock-wren*, *Tesia*, *Thryothorus*, and *Troglodytes*.

Troglodytinæ (trog-lod-i-ti′nē), *n. pl.* [NL., < *Troglodytes* + *-inæ*.] The wrens, most properly so called: (*a*) As one of the restricted groups of *Troglodytidæ*, when the latter name is used in a broad sense. (*b*) As a subfamily of *Liotrichidæ* or of *Timeliidæ*.

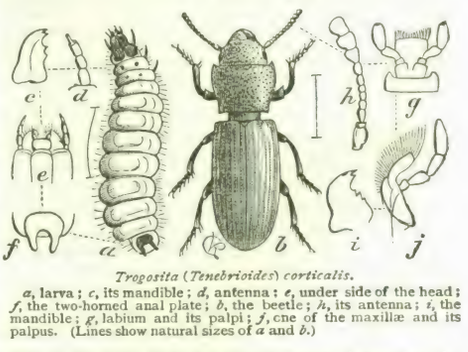
troglodytism (trog′lō-dīt-izm), *n.* [< *troglodyte* + *-ism*.] The state or condition of troglodytes; the habit of living in caves. See *troglodyte*.

Paradise-Trogon (*Pharomacrus mocinno*).

Trogon (trō′gon), *n.* [NL., < Gr. τρώγων, ppr. of τρώγειν, gnaw, chew.] **1.** A genus of birds, type of the family *Trogonidæ*, formerly conterminous with the same, subsequently variously restricted.—**2.** [*l. c.*] Any bird of the genus *Trogon* in a broad sense, as a curucui or quetzal. The most brilliant and splendid of these birds, and one of the most gorgeous of all the feathered tribes, is the famous quetzal, or sacred bird, of the ancient inhabitants of Central America, variously known as the long-tailed, paradise-, or peacock-trogon, *Trogon paradiseus*, *T. pavoninus*, *Calurus resplendens*, *Pharomacrus mocinno*, and by other names. The body is not so large as a pigeon's, but the long upper tail-coverts project beyond the tail for two feet or more, forming a graceful spray-like train. The bird is rich golden-green above, and mostly bright-crimson below.

Trogonidæ (trō-gon′i-dē), *n. pl.* [NL., < *Trogon* + *-idæ*.] The only family of heterodactylous and heteropelmous birds, belonging to the order *Picariæ*; the trogons or curucuis. They are very beautiful birds, including about 50 species inhabiting tropical and subtropical countries of both hemispheres, most numerous in the Neotropical, less so in the Oriental, and least so in the Ethiopian region. A principal technical character is the structure of the feet; for, though many other birds are yoke-toed or zygodactyl, in all except the trogons the first and fourth toes are reversed, in trogons the first and second; and this character is correlated with the heteropelmous disposition of the flexor tendons of the digits. In the skull basipterygoids are present and the palate is desmognathous, the sternum is double-notched on each side behind, there is only one carotid (sinistral), cæca are present, the oil-gland is nude, the pterylosis is somewhat passerine, there are large aftershafts of the contour-feathers, and these feathers are peculiarly soft and of brilliant hues. The trogons inhabit the depths of the forest, and are both frugivorous and insectivorous. The African type of trogons is the genus *Hapaloderma*; the Oriental is *Harpactes*; the West Indian forms are *Priotelus* and *Temnotrogon*. The more numerous trogons of continental America have a characteristic coloration, the upper parts being green or brown, and the lower red or yellow with a white throat-bar. There are several genera of these besides *Trogon*, including *Pharomacrus*. One species, *T. ambiguus*, extends over the Mexican border of the United States in Arizona. See cut under *Trogon*.

An African type of *Trogonidæ* (*Hapaloderma constantia*).



trogonoid (trō′gō-noid), *a.* [< *trogon* + *-oid*.] Resembling a trogon; belonging to the *Trogonoideæ*.

Trogonoideæ (trō-gō-noi′dē-ē), *n. pl.* [NL., < *Trogon* + *-oideæ*.] The trogons as a superfamily of picarian birds, characterized by being heterodactylous and heteropelmous: a needless synonym of *Heterodactylæ*. *Stejneger*, 1885.

Trogonophidæ (trō-gō-nof′i-dē), *n. pl.* [< *Trogonophis* + *-idæ*.] A family of ophiosaurian lizards, typified by the genus *Trogonophis*, and characterized by the acrodont dentition and the absence of fore limbs.

Trogonophis (trō-gon′ō-fis), *n.* [NL. (Kaup), < Gr. τρώγων (see *Trogon*) + ὄφις, a snake.] A genus of snake-like lizards destitute of limbs, typical of the family *Trogonophidæ*.

Trogosita (trō-gō-sī′tă), *n.* [NL. (Olivier, 1790), < Gr. τρώγειν, gnaw, + σῖτος, corn, grain.] A cosmopolitan genus of clavicorn beetles, typical of the family *Trogositidæ*. They have the eyes transverse, the tibiæ not spinous, and the thorax truncate at the apex, with the lateral margin deflexed at the middle. About 50 species are known. *T.* (*Tenebrioides*) *mauritanica* is a common cosmopolitan species found in stored grain. *T.* (*Tenebrioides*) *corticalis* is American. Also *Trogosites*.

Trogosita (*Tenebrioides*) *corticalis*.

a, larva; *c*, its mandible; *d*, antenna; *e*, under side of the head; *f*, the two-horned anal plate; *b*, the beetle; *h*, its antenna; *i*, the mandible; *g*, labium and its palpi; *j*, one of the maxillæ and its palpus. (Lines show natural sizes of *a* and *b*.)

Trogositidæ (trō-gō-sit′i-dē), *n. pl.* [NL. (Kirby, 1837), < *Trogosita* + *-idæ*.] A family of clavicorn beetles, allied to the *Nitidulidæ*, but separated by the slender tarsi, whose first joint is short. The family contains two groups, members of the first of which are elongate, with the prothorax narrowed behind, those of the second rounded and somewhat flattened. About 160 species are known, of which nearly 50 inhabit the United States; many are found under bark, and others live in fungi.

trogue (trōg), *n.* [A var. of *trough*.] A wooden trough. [North. Eng.]

Troic (trō′ik), *a.* [< L. *Troicus*, < Gr. Τρωϊκός, of or pertaining to Troy, < Τρώς, a Trojan; cf. Τρῳάς, the Troad, L. *Troia*, *Troja*, Troy.] Of or pertaining to ancient Troy or the Troas; Trojan; relating to the Trojan war. *Gladstone*.

troika (troi'kä), *n.* [Russ. *troĭka*, < *troe*, *troi*, three: see *three*.] A team of three horses abreast, peculiar to Russian traveling-conveyances; hence, the vehicle itself to which the horses are attached, or the vehicle and horses taken together.

troil†, *v. t.* [ME. *troilen*, < OF. *troiller*, *truiller*, charm, deceive, < Icel. *trylla*, charm, fascinate, < *troll*, a troll: see *troll*[2].] To deceive; beguile.

By-hihtest heore and hym after to knowe,
As two godes, with god bothe good and ille;
Thus with treison and with trecherie thow *troiledest* hem bothe. *Piers Plowman* (C), xxi. 321.

troilite (troi'līt), *n.* [Named after D. *Troïli*, who in 1766 described a meteorite containing this species.] A native iron sulphid often occurring in meteorites, and especially meteoric irons, as embedded nodules or generally disseminated. It may be identical with the terrestrial pyrrhotite, but most authorities regard it as the protosulphid of iron (FeS), a substance not otherwise known outside of the laboratory.

troilus (trō'i-lus), *n.*; pl. *troili* (-lī). [NL., < *Troïlus*, a mythical hero of Troy.] A large swallow-tailed butterfly, *Papilio troilus*, common in the United States. It is for the most part black, but has yellow marginal spots on the fore wings and blue spots on the hind wings. The larva feeds on laurel and sassafras.

Trojan (trō'jan), *a.* and *n.* [= F. *Troyen*, < L. *Trojanus*, < *Troja*, *Troia*, Troy, < *Tros*, < Gr. Τρώς, a Trojan, also the mythical founder of Troy, in Asia Minor.] **I.** *a.* Of or relating to ancient Troy, a celebrated city in Mysia, Asia Minor.—**Trojan War**, in *classical myth.*, a war waged for ten years by the confederated Greeks under the lead of Agamemnon, king of Mycenæ and Argolis, against the Trojans and their allies, for the recovery of Helen (wife of Menelaus, king of Sparta or Lacedæmon), who had been carried away by Paris (son of the Trojan king Priam).

II. *n.* **1.** An inhabitant of Troy.—**2.** A plucky or determined fellow; one who fights or works with a will. [Colloq.]

He bore it [the amputation of his hand], in cors, like a *Trojin*. *Thackeray*, Yellowplush Papers, Mr. Deuceace [at Paris, vii.

3. A boon companion; an irregular liver: sometimes used loosely as a term of opprobrium.

Tut! there are other *Trojans* that thou dreamest not of, the which for sport sake are content to do the profession some grace. *Shak.*, 1 Hen. IV., ii. 1. 77.

Sam the butler's true, the cook a reverend *Trojan*.
Fletcher and Shirley, Night-Walker, ii. 1.

4. *pl.* In *entom.*, a name given by Linnæus to certain butterflies, mostly tropical and now generally included in the genus *Papilio*, characterized by their velvety-black colors with crimson spots on the wings and breast. Allied species of different colors were called *Greeks*, and both together formed the group *Equites*. It is now known that certain "Trojans" are sexual varieties of the "Greeks," but the names are still occasionally used.

troke (trōk), *v.* and *n.* An obsolete or Scotch form of *truck*[1].

troll[1] (trōl), *v.* [Formerly also *trole*, *troul*, *trowl*; < ME. *trollen*, roll, stroll, < OF. *troller*, *trauler*, *troler*, run hither and thither, range, stroll, F. *tróler*, lead, drag about, also stroll, ramble (Picard *droler*, go hither and thither, Norm. *treuler*, idle, lazy), prob. < MHG. *trollen*, G. *trollen*, roll, troll, run, dial. (Swiss) *trohlen*, roll, *tröhlen*, roll, bowl, = MD. *drollen* = LG. *drulen*, roll, troll. Cf. W. *troelli*, turn, wheel, whirl, *troell*, a whirl, wheel, reel, pulley, windlass, screw, *trolian*, *trwlian*, troll, roll, *trolio*, *trwlio*, roll, *trolyn*, a roller, *trol*, a roller, etc.; Bret. *tróel*, a winding plant, *tró*, a circle. The relation of the Teut. and Celtic forms is uncertain. Cf. *troll*[1], *n.*, and *trolley*.] **I.** *trans.* **1.** To roll; turn round.

To dress, and *troll* the tongue, and roll the eye.
Milton, P. L., xi. 620.

2. To circulate; pass or send round, as a vessel of liquor at table.

Troll about the bridal bowl.
B. Jonson, Love's Welcome at Welbeck.

3. To sing in the manner of a catch or round; also, to sing in a full, jovial voice.

Who still led the rustic ging,
And could *troll* a roundelay
That would make the fields to ring.
Drayton, Shepherd's Sirena.

4. To angle or fish for; especially, to angle for in a particular manner. See *trolling*. Hence—**5.** To allure; entice; draw on.

He . . . *trowls* and baits him with a nobler prey.
Hammond, Works, IV. viii.

6. To angle or fish in.

With patient angle *trolls* the finny deep.
Goldsmith, Traveller, l. 187.

II. *intrans.* **1.** To roll; roll in.

This little ape gets money by the sack-full,
It *trolls* upon her.
Middleton and Rowley, Spanish Gypsy, i. 5.

2. To go round; pass; circulate: sometimes with an indefinite *it*. *Middleton*, Chaste Maid, iii. 2.

The Bells a ringing, and the Bowls a *trowling*, the Fidlers fumbling and Tumbling. *Brome*, Queens Exchange, ii.

3. To stroll; ramble.

This thretty wynter, as I wene, hath he gone and preched; . . .
And thus hath he *trolled* forth this two and thretty wynter.
Piers Plowman (B), xviii. 296.

We at last *trolled* off, as cheery and merry a set of youngsters as the sun ever looked upon in a dewy June morning.
H. B. Stowe, Oldtown, p. 414.

4. To wag; move glibly.

Fill him but a boule, it will make his tongue *troule*.
F. Beaumont, Ex-Ale-Tation of Ale.

5. To take part in a catch or round; sing catches or rounds. *Quarles*, Emblems, ii. 11.—**6.** To angle or fish in a particular manner. See *trolling*.—Syn. **6.** See *trawl*.

troll[1] (trōl), *n.* [< *troll*[1], *v.* Cf. MD. *drol*, a top, little ball, etc., = MLG. *drol*, *drul*, anything round.] **1.** A going or moving round; roll; routine; repetition.

The *troll* of their categorical table might have informed them that there was something else in the intellectual world besides substance and quantity.
Burke, Rev. in France.

2. A song the parts of which are sung in succession; a round.—**3.** A reel on a fishing-rod.—**4.** Same as *trolley*, 1.—**5.** An artificial lure used in trolling.—**6.** Any long unshapely thing that trails on the ground; any long thing. [Scotch.]—**Feathered troll**, a metal troll of oval or fish-like form revolving at the head of the shank of the hook, and having feathers attached to attract the fish: used by anglers. Sometimes hair, as deer's, is used instead of feathers. The metals used are silver, copper, brass, etc., or a combination of these.

troll[2] (trōl), *n.* [< Icel. *troll* = Sw. *troll* = Dan. *trold*, a troll, = D. *drol* = LG. *droll*, a troll, a humorous fellow, droll, = G. *droll*, *troll*, a troll, etc.: see *droll*.] In *Northern myth.*, a supernatural being, in old Icelandic literature represented as a kind of giant, but in modern Scandinavia regarded as of diminutive size and inhabiting a fine dwelling in the interior of some hill or mound, answering in some respects to the brownie of Scotland. The trolls are described as obliging and neighborly, lending and borrowing freely, and otherwise keeping up a friendly intercourse with mankind. But they have a sad propensity to thieving, stealing not only provisions, but even women and children. They can make themselves invisible, can confer personal strength and prosperity upon men, can foresee future events, etc. *Keightley*.

troller (trō'lėr), *n.* [< *troll*[1] + *-er*[1].] One who fishes by the method known as trolling.

trolley, trolly (trol'i), *n.* [< *troll*[1] + *-ey*, *-y*[2]; or from one of the Celtic nouns mentioned under *troll*[1].] **1.** A narrow cart used by costermongers, and pushed by hand or drawn by a donkey. Also *troll*.—**2.** A small truck or car for running on tracks in a rolling-mill or furnace. It is used to move heavy materials, and can be used as a tip-car.—**3.** In *Eng. lace-making*, lace the pattern of which is outlined with a thicker thread, or a flat narrow border made up of several such threads. The ground is usually a double ground, showing hexagonal and triangular meshes.—**4.** A metallic wheel or pulley, carried by an electric car or locomotive, in contact with a suspended conductor from which it collects the current for the propulsion of the car. In the overhead trolley system the trolley is pressed from below against the conductor, or trolley-wire, and carried by a flexible pole, the trolley-pole, which is pressed upward by a spring. In the underground trolley system the trolley runs on the conductors supported in a slotted conduit beneath the road-bed.—**Honiton trolley**, Honiton lace made with a trolley ground.—**Trolley system**, the system of electrical railway in which the current is taken from the conductor by means of a small wheel or trolley. The conductor or insulated electrode is usually suspended overhead above the cars, or in a passage beneath the tracks.

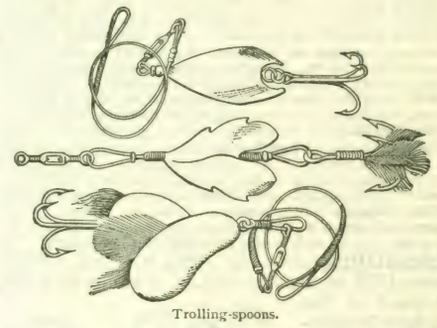
trolley-car (trol'i-kär), *n.* A car used on an electric trolley-road.

trolley-line (trol'i-līn), *n.* A line of electric cars run on the trolley system.

trolley-pole (trol'i-pōl), *n.* In *electric rail.*, a pole, carrying a conducting wire, connected with a street-railway car by a universal joint, and having at the upper end a trolley for conducting the current into the circuit of the motor on the car.

troll-flower (trōl'flou″ėr), *n.* [< *troll*[2] + *flower*.] The globe-flower, *Trollius Europeus*. See *globe-flower*.

trolling (trō'ling), *n.* [Verbal n. of *troll*[1], *v.*] In *fishing*: (*a*) The method of dragging or trailing a fishing-line and hook behind a boat, at or near the surface of the water; trawling. The tackle consists of a strong hand-line from 25 to 75 yards long, and a spoon-hook, or one of the many kinds of spinning-baits, trolling-spoons, propellers, etc. Trolling is also sometimes practised from the shore with a rod. The hook may be baited, as with a minnow, but artificial lures are most used. (*b*) In Great Britain, a mode of fishing for pike with a rod and line, and with a dead bait, used chiefly when the water is full of weeds, rushes, etc. A gudgeon is the best bait, and is used by running longitudinally through it a piece of twisted brass wire, weighted with a long piece of lead, and having two hooks attached. The bait is dropped into holes, and is worked up and down by the lifting and falling of the rod-point. Compare *trawling*.



trolling-bait (trō'ling-bāt), *n.* A metallic revolving bait or lure used in trolling; a spoon-bait; a trolling-spoon. It is made of many shapes and sizes as variations of the trolling-spoon.

Trollinger (trō'ling-ėr), *n.* A kind of grape. See *Hamburg*, 1.

trolling-hook (trō'ling-hůk), *n.* A fish-hook used in trolling.

trolling-rod (trō'ling-rod), *n.* A rod used in trolling, usually made of undressed bamboo, and about nine feet in length.

trolling-spoon (trō'ling-spön), *n.* A trolling-bait or spoon-bait, fashioned like the bowl of a

Trolling-spoons.

spoon, with a hook or hooks at one end, and the line attached at the other.

Trollius (trol'i-us), *n.* [NL. (Rivinus, 1690; first used by C. Gesner, about 1555); < *torolya*, the Hung. name?] A genus of polypetalous plants, of the family *Ranunculaceæ*, tribe *Helleboreæ*, and subtribe *Caltheæ*. It is characterized by small narrow entire petals destitute of scales, and by palmately lobed or dissected leaves. There are about 12 species, natives of north temperate and cold regions. They are erect herbs from a perennial root, with alternate leaves, and large yellow or lilac-colored flowers usually with numerous regular deciduous colored sepals, and fewer elongated linear clawed petals, each bearing a nectariferous gland. The fruit is a head of separate follicles. Several are cultivated, and are known as *globe-flower*, especially *T. Europeus*, also known as *globe-ranunculus* and *troll-flower*, and in England as *golden-ball* and *butter-basket*, and northward as *lockin gowan* and *lapper gowan*. For *T. laxus*, see *spreading globe-flower*, under *spread*.

troll-madam† (trōl'mad″am), *n.* [An accom. form of OF. *trou-madame*, a game so called.] An old English game: same as *pigeonholes*. Also called *trunks*.

A fellow, sir, that I have known to go about with *troll-my-dames*. *Shak.*, W. T., iv. 3. 92.

trollol (trol'lol'), *v.* [< *trol lol*, like *tra la*, *fol de rol*, and other mere syllables used in singing.] To troll; sing in a jovial, rollicking way.

They got drunk and *trolloll'd* it bravely.
Roger North, Examen, p. 101. (*Davies.*)

trollop (trol'ǫp), *v. i.* [An extension of *troll*[1]; for the termination, cf. *wallop*, *gallop*. Cf. *trollop*, *n.*] **1.** To draggle; hang in a wet state.—**2.** To walk or work in a slovenly manner. *Wedgwood*. [Scotch in both senses.]

trollop (trol'ǫp), *n.* [< *trollop*, *v.*] **1.** A loose, hanging rag. [Scotch.]—**2.** A woman who is slovenly in dress, appearance, or habits; a slattern; a draggletail; also, a woman morally loose.

Does it not argue rather the lascivious promptnesse of his own fancy, who from the harmelesse mention of a Sleekstone could neigh out the remembrance of his old conversation among the Viraginian *trollops*?
Milton, Apology for Smectymnuus

trollopee† (trol-ǫ-pē'), *n.* [< *trollop* + *-ee*[2].] A loose dress for women.

There goes Mrs. Roundabout: I mean the fat lady in the lutestring *trollopee*. *Goldsmith*, On Dress.

trolloping (trol'o̤p-ing), *a.* [< *trollop* + *-ing*2.] Slovenly; sluttish; trollopish.

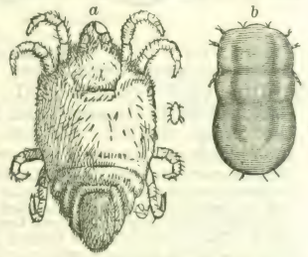
"Saw ever ony body the like o' that?" "Yes, you abominable woman," vociferated the traveller, "many have seen the like of it, and all will see the like of it that have anything to do with your *trolloping* sex!" *Scott*, Antiquary, i.

trollopish (trol'o̤p-ish), *a.* [< *trollop* + *-ish*1.] Like a trollop, especially in the sense of loosely or carelessly dressed, or accustomed to dress carelessly and without neatness; slovenly and loose in habit: noting a woman.

trollopy (trol'o̤p-i), *a.* [< *trollop* + *-y*1.] Same as *trollopish*. *Jane Austen*, Mansfield Park, xxxviii.

troll-plate (trōl'plāt), *n.* In *mach.*, a rotating disk employed to effect the simultaneous convergence or divergence of a number of objects, such as screw-dies in a stock, or the jaws of a universal chuck. *E. H. Knight.*

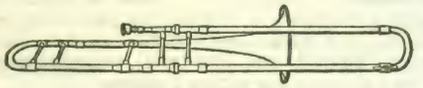
trolly, *n.* See *trolley*.



tromba (trom'bä), *n.* [It.: see *trump*1.] Same as *trumpet*.—**Tromba marina.** Same as *sea-trumpet*, 1.

trombidiid (trom-bid'i-id), *a.* and *n.* **I.** *a.* Pertaining to the *Trombidiidæ;* related to or resembling a harvest-mite.

II. *n.* A mite of the family *Trombidiidæ;* a harvest-mite.



Trombidiidæ (trom-bi-dī'i-dē), *n. pl.* [NL. (Leach, 1814, as *Trombidides*), < *Trombidium* + *-idæ*.] A family of tracheate acarids, whose type genus is *Trombidium;* the ground-, garden-, harvest-, or soldier-mites, which have the palpi converted into raptorial organs. They are closely related to the *Tetranychidæ*, or spinning-mites, but are larger, velvety and opaque, and usually of brilliant colors, as scarlet or vermilion. They also differ in being predaceous and carnivorous, the spinning-mites being vegetable-feeders. Several genera and many species have been described, and the family is represented in all parts of the world. *Trombidium fasciculatum* of the East Indies, one third of an inch long, is the largest acarid known. The *Trombidiidæ* are strictly predatory in the adult stage, but their larvæ, although originally no more parasitic than a gnat or a leech, will yet attach themselves to the bodies of animals, or even to man himself, and are usually separated only by death or artificial means, causing considerable irritation while present. Some are known by the name of *harvest-bug* in England, and *rouget* in France, being the *Leptus autumnalis* of earlier entomologists.

Trombidium (trom-bid'i-um), *n.* [NL. (Fabricius, 1776, as *Trombidion*).] A genus of mites, typical of the family *Trombidiidæ*. The body is divided into two parts. The small anterior and inferior part bears the eyes, mouth, and first two pairs of legs; the other, much larger, swollen and velvety, bears the last two pairs of legs. These mites are mainly parasitic, and many of them are bright-red. *T. locustarum* feeds upon the eggs of the Rocky Mountain locust or hateful grasshopper, *Caloptenus* (or *Melanoplus*) *spretus*. See also cut under *harvest-tick*.

Locust Mite (*Trombidium locustarum*). *a*, mature mite, natural size in outline; *b*, larva, same relative enlargement.

trombone (trom'bōn), *n.* [< F. *trombone*, < It. *trombone*, trombone, trumpet, sackbut, < *tromba*, a trump, trumpet: see *trump*1.] A large musical instrument of the trumpet family. It has a long tube twice bent upon itself, and one of the loops is double, so that the outer tube, or slide, can be slipped over the inner like a sheath. When the slide is extended, the length of the tube is increased and its proper tone lowered. Since a full set of harmonics can be produced from any of many positions of the slide, the compass is long, and the intonation may be made very precise. The tone is peculiarly rich and solemn. Exceedingly fine harmonic effects may be produced by combining trombones of different sizes and fundamental pitches, which are called *alto*, *tenor*, and *bass* trombones respectively. The trombone is thought to have been known in ancient times. It is now a regular constituent of the orchestra and of the military band. For the latter it is sometimes made with valves or keys instead of a slide, but its characteristic tone and its flexibility of intonation are thus lost.

Trombone, with Slide.

trombonist (trom'bō-nist), *n.* [< *trombone* + *-ist*.] A player on the trombone.

trommel (trom'el), *n.* [< G. *trommel*, a drum: see *drum*.] In *mining*, a revolving cylindrical sieve for cleaning or sizing ore. Also called *sizing-trommel* and *washing-drum* or *washing-trommel*, according as it is used for sizing or for cleaning ores. See *sizing*1, 3.

A *trommel* is a barrel in the form of a cylinder or of a truncated cone, horizontal or slightly inclined, turning round its own axis. It is the machine employed for similar purposes in most other industries; the only wonder is that so long a time elapsed before it was adopted in dressing ores, for it furnishes the best possible means not only of cleaning the ore, but also of sizing it. *Callon*, Lectures on Mining (trans.).

tromometer (trō-mom'e-tėr), *n.* [< Gr. τρόμος, a trembling (< τρέμειν = L. *tremere*, tremble: see *tremble*), + μέτρον, measure.] An instrument for measuring very slight earthquake-shocks, or vibrations of the earth's surface such as are sometimes called earth-tremors; a microseismograph. Numerous arrangements have been tried for this purpose, most of which combine the pendulum with some form of micrometric apparatus.

tromometric (trom-ō-met'rik), *a.* [< *tromometer* + *-ic*.] Of or pertaining to the tromometer. *Nature*, XLIII. 520.

trompt, trompe1**†.** Obsolete forms of *trump*1.

trompe2 (tromp), *n.* [F. *trompe*, lit. a trump: see *trump*1.] The apparatus by which the blast is produced in the Catalan forge. It is a simple, effective, and ingenious contrivance for producing a continuous and equable blast, but its use is restricted to localities where a fall of water from a height of several yards can be obtained. The principle is that water can be made to fall through a pipe in such a way that it will draw in through side openings a considerable amount of air, which by a simple and ingenious arrangement can be utilized as a constant current or blast, and which has the merit of costing almost nothing. It has been utilized to a limited extent elsewhere than in the department of Ariège, in the south of France, where it was formerly very generally employed. Iron has been made in that district for more than 600 years, but the use of the trompe was not introduced until the end of the seventeenth century. *François.*

trompille (trom-pēl'), *n.* [F.] One of the two long conical tubes through which the air enters the so-called "tree" (*arbre*) or air-pipe of the trompe, according to a method sometimes adopted. In general, however, the air finds admittance through two similar rectangular holes at the top of the tree, opposite each other, and inclining downward at an angle of about 40°.

trompourt, trompert, *n.* Obsolete forms of *trumper*.

tron (tron), *n.* [A var. of *trone*1.] **1.** A wooden pillar or post set up in a market-place and supporting a horizontal beam on which were hung the town scales for weighing wool and other articles: hence the phrases *tron weight*, *tron stone*, *tron pound*, etc. Also *trone*.—**2.** A wooden air-shaft in a mine.—**Tron weight,** a standard of weight formerly in use in Scotland, for weighing wool, cheese, butter, and other home productions. The tron pound ranged, in different counties, from 21 to 28 ounces avoirdupois. The later tron stone contained 16 tron pounds of 1.3747 pounds avoirdupois each.

trona (trō'nä), *n.* [Prob. a North African form ult. connected with *natron*.] The native soda of Egypt, a hydrous carbonate of sodium, $Na_2CO_3.HNaCO_3 + 2H_2O$. It also occurs at Borax Lake, San Bernardino county, California, in Churchill county, Nevada, and elsewhere. Urao, from a lake in Venezuela, is the same compound.

tronage (tron'āj), *n.* [< *tron* + *-age*.] **1.** A royal tax upon wool. See *tronator*.—**2.** See the quotation.

Next unto this stockes is the parish church of S. Mary Woll-Church, so called of a beame placed in the churchyard which was thereof called Wooll church-haw, of the *tronage*, or weighing of wooll there used. *Stowe*, Survey of London (ed. 1633), p. 244.

tronator (tron'ā-tor), *n.* [ML., < *trona*, a tron: see *tron*, *trone*1.] An official whose duty it was to weigh wool and receive the custom or toll termed *tronage*. *Archæol. Inst. Jour.*, XVII. 165.

tronchon1**†, tronchount,** *n.* Obsolete forms of *truncheon*.

tronchon2**†,** *n.* See *trunchon*2.

tronçonnée (F. pron. trôn-so-nā'), *a.* [F. *tronçonné*, < *tronçon*, a stump: see *truncheon*.] In *her.*, same as *shivered:* noting a tilting-lance.

trone1 (tron or trōn), *n.* [< OF. *trone* (ML. *trona*), a weighing-machine, < Icel. *trana*, *trani*, m., = Dan. *trane*, a crane: see *crane*2.] **1.** Same as *tron*, 1.

And frae his body taken the head,
And quarter'd him upon a *trone*.
The Gallant Grahams (Child's Ballads, VII. 143).

2†. A market or market-place.—**Trone weight.** Same as *tron weight* (which see, under *tron*).

trone2 (trōn), *n.* A small drain. [Prov. Eng.]

trone3**†,** *n.* and *v.* A Middle English form of *throne*.

troolie-palm (trö'li-päm), *n.* [< Tupi *tururi* + E. *palm*.] A name of the bussu-palm.

troop (tröp), *n.* [Formerly also *troope*, *troupe* (still used in some senses); < F. *troupe*, OF. *trope*, *trupe* = Pr. *trop* = Sp. Pg. *tropa* = It. *truppa* (ML. *troppus*, *tropus*), a company, troop; origin unknown. According to Diez, a change, in the mouth of Germans, from L. *turba* into **trupa*, whence, by change of gender, *tropus*, *troppus*. Cf. *tropel*.] **1.** An assemblage of people; a multitude; a company; a band.

We come by *troops* to the place of assembly, that, being banded as it were together, we may be supplicants enough to besiege God with our prayers. *Tertullian*, quoted in Hooker's Eccles. Polity, v. 24.

Honour, love, obedience, *troops* of friends, I must not look to have. *Shak.*, Macbeth, v. 3. 25.

There was a *troup* o' gentlemen
Came riding merrilie by.
The Broom of Cowdenknows (Child's Ballads, IV. 45).

2. A body of soldiers: generally used in the plural, signifying soldiers in general, whether more or less numerous, and whether belonging to the infantry, cavalry, or artillery.

Farewell the plumed *troop*, and the big wars,
That make ambition virtue!
Shak., Othello, iii. 3. 349.

Colonel Prendergast, the commandant of the station, had but 800 *troops*, of whom 200 only were Europeans, to meet a force of overwhelming superiority in numbers. *Cornhill Mag.*, Oct., 1888, p. 380.

3. In United States cavalry, the unit of formation, consisting of from 60 to 100 enlisted men commanded by a captain, and corresponding to a company of infantry.

When a *troop* dismounts and acts on foot, it is still called by that name. *Stocqueler.*

Hence—**4.** The command by commission and rank of such a troop of horse.

His papa would have purchased him a *troop*—nay, a lieutenant-colonelcy—some day, but for his fatal excesses. *Thackeray*, Fitz-Boodle's Confessions.

5. A band or company of performers; a troupe.—**6.** A particular roll or call of the drum; a signal for marching.

Tony's beat of the *troop* was the signal for the soldiers to assemble. *S. Judd*, Margaret, i. 13.

7. A herd or flock of beasts or birds: as, a *troop* of antelopes or sparrows.—**Household troops.** See *household*.—**Subsidiary troops.** See *subsidiary*.

troop (tröp), *v.* [< *troop*, *n.*] **I.** *intrans.* **1.** To assemble or gather in crowds; flock together.

What would ye, soldiers? wherefore *troop* ye
Like mutinous madmen thus?
Fletcher, Loyal Subject, iv. 7.

Now from the roost . . .
Come *trooping* at the housewife's well-known call
The feather'd tribes domestic. *Cowper*, Task, v. 61.

The Maids of Nazareth, as they *trooped* to fill
Their balanced urns beside the mountain rill.
O. W. Holmes, The Mother's Secret.

2. To march; to march in or form part of a troop or company.

Nor do I as an enemy to peace
Troop in the throngs of military men.
Shak., 2 Hen. IV., iv. 1. 62.

3. To march off in haste.

. . . Aurora's harbinger,
At whose approach, ghosts, wandering here and there,
Troop home to churchyards. *Shak.*, M. N. D., iii. 2. 382

But, whatever she had to say for herself, she was at last forced to *troop* off. *Addison*, Spectator, No. 464.

He was generally seen *trooping* like a colt at his mother's heels. *Irving*, Sketch-Book, p. 48.

4†. To associate or consort.

A snowy dove *trooping* with crows.
Shak., R. and J., i. 5. 50.

II. *trans.* **1.** To associate as in a troop or company.

To *troope* my selfe with such a crew of men
As shall so fill the downes of Affrica.
Greene, Orlando Furioso, l. 213.

2. To form into troops, as a regiment.—**Trooping the color,** in the British army, an elaborate ceremony performed at the public mounting of garrison guards.

troop-bird (tröp'bėrd), *n.* A troopial.

trooper (trö'pėr), *n.* [= F. *troupier;* as *troop* + *-er*1.] **1.** A private soldier in a body of cavalry; a horse-soldier.

The *troopers*, according to custom, fired without having dismounted. *Scott*, Old Mortality, xvi.

2. A cavalry horse; a troop-horse.—**3.** A troopship.—**Native trooper,** in Australia, a member of a body of mounted police recruited from the aborigines and officered by white men.—**Trooper's damn.** See *damn*.

troop-fowl (tröp'foul), *n.* The American scaup: same as *flocking-fowl*. *F. C. Browne.* [Massachusetts.]

troop-horse (tröp'hôrs), *n.* A cavalry horse.

How superlatively happy, however, must he have been in the possession of one of these wonderful horses!—warranted chargers—*troop-horses*, every one! *J. Ashton*, Social Life in Reign of Queen Anne, I. 11.

troopial (trö'pi-al), *n.* [Also *troupial;* < F. *troupiale*, < *troupe*, troop: see *troop*.] A book-

name, originating with French naturalists, of those American blackbirds (*Icteridæ*) which go in flocks. They are mostly the marsh-blackbirds, of the subfamilies *Agelæinæ* and *Quiscalinæ*, as the cow-troopial, red-winged blackbird, and crow-blackbird or pur-

Common Troopial (*Icterus vulgaris*).

ple grackle. The term extends to the whole family, and thus includes the American orioles or hangnests, as the Baltimore and the orchard orioles. The bird here figured is one of the orioles; it is *le troupiale* of Brisson, the type species of his genus *Icterus* (see *Icterus*, 3), from which the family *Icteridæ* is named. The male is jet-black and rich-yellow in large massed areas, varied with white on the wings. This troopial is native of tropical America, and is often seen in cages. See also cuts under *Agelæinæ*, *cow-bird*, *crow-blackbird*, and *rusty*.

troop-meal† (tröp'mēl), *adv.* [< *troop* + *-meal* as in *piecemeal*, etc.] By troops; in crowds.

So *troope-meale* Troy pursu'd awhile, laying on with swords and darts. *Chapman*, Iliad, xvii. 634.

troop-ship (tröp'ship), *n.* A ship for the conveyance of troops; a transport.

In that terrible storm off the Cape, in September, 1824, . . . I certainly did suffer most cruelly on that horrible ★*troop-ship*. *Thackeray*, Philip, xvi.

troostite (trös'tīt), *n.* [Named from Dr. G. *Troost*, of Nashville, Tennessee.] A variety of the zinc silicate willemite, occurring in hexagonal crystals of a reddish color It contains considerable manganese.

tropæolin (trō-pē'ō-lin), *n.* [< *Tropæolum* + *-in*[2].] The general name of a number of orange dyes of very complex composition. They are sulphonic acids.

Tropæolum (trō-pē'ō-lum), *n.* [NL. (Linnæus, 1737), < Gr. *τρόπαιον*, trophy, < *τροπή*, turning, defeat: see *trophy*.] A genus of dicotyledonous choripetalous plants, of the family *Tropæolaceæ*, distinguished from the *Geraniaceæ* by not having a pronounced column between the parts of the fruit when they separate. There are about 55 species, all natives of South America or Mexico. They are climbers or rarely diffuse herbs, bearing alternate lobed or dissected leaves which are peltate or palmately angled. The flowers are red, orange, or yellow, rarely purple or blue. They are solitary in the axils, often on long peduncles, and are followed by a fruit of three rugose indehiscent carpels, pervaded by a pungent principle, as is the whole plant, and sometimes used as pickles. Many species are cultivated for ornament under the name *nasturtium*, especially *T. majus*, also known as *Indian cress* and *lark's-heel*. For *T. peregrinum*, see *canary-bird flower*, under *canary-bird*. See *nasturtium*, 2, and cut under *spur*, 3 (*l*).

troparion (trō-pā'ri-on), *n.*; pl. *troparia* (-ä). [< LGr. *τροπάριον*, a modulation, short hymn, stanza, dim. of *τρόπος*, a musical mode.] In the *Gr. Ch.*, a short hymn or a stanza of a hymn. This name is given to the stanzas of the odes of a canon (an initial and model stanza being, however, called a *hirmos*), and in general to any of the short hymns which abound in the offices of the Greek Church.

trope (trōp), *n.* [< F. *trope* = Sp. Pg. It. *tropo*, < L. *tropus*, a figure in rhetoric, a song, ML. a versicle, < Gr. *τρόπος*, a turn, way, manner, style, a trope or figure of speech, a mode in music, a mode or mood in logic, < *τρέπειν*, turn, = L. **trepere* (*trepit*), turn. Cf. *troper*, *trover*, *troubadour*.] 1. In *rhet.*, a figurative use of a word; a word or expression used in a different sense from that which properly belongs to it, or a word changed from its original signification to another for the sake of giving spirit or emphasis to an idea, as when we call a stupid fellow an ass, or a shrewd man a fox. Tropes are chiefly of four kinds: metaphor, metonymy, synecdoche, and irony; but to these may be added allegory, prosopopœia, hyperbole, antonomasia, and some others. Tropes are included under figures in the wider sense of that word. In a narrower sense, a trope is a change of meaning, and a figure any ornament except what becomes so by such change.

Is not the trope of music, to avoid or slide from the close or cadence, common with the *trope* of rhetoric, of deceiving expectation?
Bacon, Advancement of Learning, ii.

Wee acknowledge and beleeve the Catholick reformed Church, and if any man be dispos'd to use a *trope* or figure, as Saint Paul once did in calling her the common Mother of us all, let him doe as his owne rethorick shall perswade him. *Milton*, On Def. of Humb. Remonst.

Your occasional *tropes* and flowers suit the general coarseness of your style as tambour sprigs would a ground of linsey-woolsey. *Sheridan*, Critic, i 1.

Tropes are good to clothe a naked truth,
And make it look more seemly.
Tennyson, Queen Mary, iii. 4.

2. In *Gregorian music*, a short cadence or closing formula by which particular melodies are distinguished. Also called *differentia* and *distinctio*.—3. In *liturgics*, a phrase, sentence, or verse occasionally accompanying or interpolated in the introit, Kyrie, Gloria in Excelsis, Sanctus, and Agnus Dei in different parts of the Western Church. Since the sixteenth century tropes have no longer been used.—4. A geometrical singularity, the reciprocal of a node. In the case of a plane curve, it is a multiple tangent; in the case of a torse, a multiple plane; in the case of a surface, either a plane having a conic of contact or a torse bearing two or more lines of contact. =Syn. 1. See *simile*.

tropel†, *n.* [ME. *tropel*, < OF. *tropel*, later *troupeau*, a troop, dim. of *trope*, troop: see *troop*.] A troop. *Barbour*, Bruce, xiii. 275.

troper (trō'pėr), *n.* [< ME. *tropere*, < AS. *tropere*, < ML. *troparium*, *troparion* (also *troparius*), a book of tropes, < *tropus*, a trope, versicle: see *trope*, 3.] An office-book formerly used in the Western Church, containing the tropes and sequences. See *trope*, 3. Also *tropary*, *troperium*.

Tropere (or ympner, H. or an hymnar, P.), Troparius (hymnarius, P.). *Prompt. Parv.*, p. 503.

trophesial (trō-fē'si-al), *a.* [< *trophesy* + *-al*.] Noting disorder of the nervous function which regulates nutrition.

trophesy (trof'e-si), *n.*; pl. *trophesies* (-siz). [Irreg. < Gr. *τροφή*, nourishment, + *-sy*, appar. taken from *dropsy*, *palsy*, etc., with a vague notion that it denotes a morbid state.] The result of a disorder of the nerve-force regulating nutrition.

Excessive thought, without anxiety, uses up the materials subservient to sensory excitation. . . . But excessive thought, with mental anxiety, care, and pain, as grief, is much more exhausting, and therefore more commonly followed by *trophesies*. *E. C. Mann*, Psychol. Med., p. 349.

trophi (trō'fi), *n. pl.* [NL., < Gr. *τροφός*, a feeder, nurse, < *τρέφειν*, nourish, feed.] 1. In *entom.*, those mouth-parts which are employed in taking food and preparing it for swallowing. The trophi include the labium, labrum, maxillæ, mandibles, and lingua. They were formerly called *instrumenta cibaria*.

2. The teeth of the mastax or pharynx of rotifers; the calcareous mastacial armature of wheel-animalcules. They are diversiform and often complicated structures. Named parts of the trophi are a median incudal piece, or incus, consisting of a central fulcrum and a pair of rami, and two hammer-like pieces, the malleoli, each consisting of a handle or manubrium and a head or uncus, which is often pectinate.

trophic (trof'ik), *a.* [< Gr. *τροφή*, nourishment, nutrition, food (< *τρέφειν*, nourish), + *-ic*.] Of or pertaining to nourishment or nutrition; concerned in nutritive processes.

If the *trophic* series be abnormal, the kinetic series is apt to be abnormal. *F. Warner*, Physical Expression, p. 278.

The ganglia upon the dorsal roots of the myelonal nerve trunks seem to preside in some way over the nutrition of those roots, and are therefore said to have a *trophic* action. *Wilder and Gage*, Anat. Tech., p. 371.

Trophic center, a nerve-center that regulates nutrition. —**Trophic nerve**, a nerve which directly influences the nutrition of the tissue to which it goes.

trophical (trof'i-kal), *a.* [< *trophic* + *-al*.] Same as *trophic*. [Rare.]

trophied (trō'fid), *a.* [< *trophy* + *-ed*[2].] Adorned with trophies.

Some greedy minion, or imperious wife,
The *trophied* arches, storied halls invade,
And haunt their slumbers in the pompous shade.
Pope, Essay on Man, iv. 303.

Trophis (trō'fis), *n.* [NL. (Patrick Brown, 1756), so named because its leaves and twigs are used in Jamaica as fodder; < Gr. *τρόφις*, well-fed, < *τρέφειν*, nourish, feed.] A genus of dicotyledonous apetalous plants, of the family *Moraceæ* and tribe *Moreæ*. It is characterized by dicœcious flowers, the female tubular and disposed in few-flowered spikes, the male in loose or interrupted spikes. There are 5 or 6 species, all American, occurring in the West Indies, Mexico, and the Andes. They are trees or shrubs with alternate petioled leaves, which are finely and conspicuously feather-veined and reticulated. The flowers are sessile or nearly so, their spikes solitary or twin in the axils, the fertile followed by a globose fleshy fruit closely united with the perianth-tube and crowned by its minute border.

trophoblast (trof'ō-blast), *n.* [< Gr. *τροφή*, nourishment, + *βλαστός*, a germ.] An external epiblastic layer that does not enter into the formation of the embryo, but does take an active part in nutritional processes intended for it; the blastocystic ectoderm.

If we agree to drop all these [old names] where the lower mammals are concerned, and henceforth to designate the outer layer alone as *trophoblast*, the outer layer plus a thin layer of somatic mesoblast without blood-vessels as diplotrophoblast (= V. Baer's serous envelop), the portion of the diplotrophoblast against which the yolk-sac with its area vasculosa adheres as omphaloidean diplotrophoblast, that against which the allantois does the same as allantoidean diplotrophoblast, then we have avoided misunderstandings that might arise from the indiscriminate use of the term chorion.
Hubrecht, Quart. Jour. Micros. Sci., N. S., XXX. 383.

trophoblastic (trof-ō-blas'tik), *a.* [< *trophoblast* + *-ic*.] Of the nature of a trophoblast; pertaining to trophoblasts. *Quart. Jour. Micros. Sci.*, N. S., XXX. 301.

trophocalyx (trof'ō-kā-liks), *n.* [< Gr. *τροφή*, nourishment, + *κάλυξ*, a calyx: see *calyx*.] See *trophosphere*.

trophodisk (trof'ō-disk), *n.* [< Gr. *τροφή*, nourishment, + *δίσκος*, a quoit, disk: see *disk*.] See *trophosphere*.

tropholecithal (trof-ō-les'i-thal), *a.* [< *trophol-ecithus* + *-al*.] Of the nature of or pertaining to the tropholecithus; trophic or nutritive, as yolk.

tropholecithus (trof-ō-les'i-thus), *n.* [NL., < Gr. *τροφή*, nourishment, + *λέκιθος*, the yolk of an egg.] In *embryol.*, the food-yolk, or nutritive yolk; the vitellus nutritivus of a meroblastic egg, not undergoing segmentation, as distinguished from the *morpholecithus*, or true formative yolk.

The nutritive yelk, . . . or *tropholecithus*, . . . is a mere appendage of the true egg-cell, and contains hoarded food-substance, so that it forms a sort of storehouse for the embryo in the course of its evolution.
Haeckel, Evol. of Man (trans.), I. 216.

trophoneurosis (trof″ō-nū-rō'sis), *n.*; pl. *trophoneuroses* (-sēz). [NL., < Gr. *τροφή*, nourishment, + NL. *neurosis*, q. v.] The disturbance of the nutrition of a part through derangement of the trophic action of nerves supplying it. See *trophopathy* and *trophesy*.—**Romberg's trophoneurosis**, facial hemiatrophy.

trophoneurotic (trof″ō-nū-rot'ik), *a.* [< *trophoneurosis* (*-ot-*) + *-ic*.] Pertaining to or of the ★nature of trophoneurosis.

Trophonian (trō-fō'ni-an), *a.* [< Gr. *Τροφώνιος*, Trophonius (see def.), + *-an*.] Pertaining to Trophonius, a mythical Grecian architect, or his cave or his architecture. Trophonius was said to be the inspired builder of the original temple of Apollo at Delphi, and part of the structure of the adytum of the historical temple was held to have survived from his work. After his death he was worshiped as a god, and had a famous oracle in a cavern near Lebadia in Bœotia.

trophopathy (trō-fop'a-thi), *n.* [< Gr. *τροφή*, nourishment, + *πάθος*, suffering.] Perversion of the nutrition of some tissue.

trophophore (trof'ō-fōr), *n.* [< Gr. *τροφή*, nourishment, + *φέρειν* = E. *bear*[1].] One of the wandering nutritive amœbiform cells of sponges which accumulate in the inhalent passages and ciliated chambers of the sponge, and from which gemmules or embryos are formed.

trophophorous (trō-fof'ō-rus), *a.* [< *trophophore* + *-ous*.] Of the nature of trophophores; pertaining to trophophores.

trophoplast (trof'ō-plast), *n.* [< Gr. *τροφή*, nourishment, + *πλαστός*, verbal adj. of *πλάσσειν*, mold or form in clay, wax, etc.: see *plastic*.] In *bot.*, a plastid. *Meyer*.

Each protoplast possesses the organs necessary for continuous transmission: the nucleus for new nuclei, the *trophoplasts* for new granules of all kinds, according to the needs of the plant. *Science*, XIV. 355.

trophosomal (trof'ō-sō-mal), *a.* [< *trophosome* + *-al*.] Nutritive, as an aggregate of gastrozoöids; forming or pertaining to a trophosome.

trophosome (trof'ō-sōm), *n.* [< Gr. *τροφή*, nourishment, + *σῶμα*, body.] The body of nutritive zoöids of any hydrozoan; an aggregate of gastrozoöids forming a colony of polypites which do not develop free generative persons: distinguished from *gonosome*, both being among the parts of an entire hydrosome. *Allman*.

trophosperm (trof'ō-spėrm), *n.* [< Gr. *τροφή*, nourishment, + *σπέρμα*, seed.] In *bot.*, same as *trophospermium*.

trophospermium (trof-ō-spėr'mi-um), *n.* [NL.: see *trophosperm*.] In *bot.*, same as *placenta*, 4. *Richard*.

trophosphere (trof'ō-sfēr), *n.* [< Gr. *τροφή*, nourishment, + *σφαῖρα*, a sphere.] In *embryol.*, a zone of modified cellular tissue interposed between the decidual stroma and the blastocyst, formed of the trophoblastic (embryonal) and trophospongian (maternal) layers. It is so called in *Erinaceus*, where it is of a spherical shape, but in other mammals it may be called *trophodisk*, *trophocalyx*,

etc., according to its shape. *Quart. Jour. Micros. Sci.*, N. S., XXX. 322.

trophospongia (trof-ō-spon'ji-ą), *n.* [< Gr. τροφή, nourishment, + σπογγιά, a sponge.] In *embryol.*, a compact cell-layer between the trophoblast and the decidual tissue; the maternal layer of the trophosphere in *Erinaceus*, or ★of a corresponding part in other *Mammalia*.

trophotropic (trof-ō-trop'ik), *a.* [< Gr. τροφή, nourishment, + τρέπειν, turn.] In *bot.*, exhibiting or characterized by trophotropism.

trophotropism (trof'ō-trō-pizm), *n.* [< *trophotrop-ic* + *-ism*.] In *bot.*, the phenomena induced in a growing organ by the influence of the chemical nature of its environment, as when plasmodia that are spread out on surfaces which yield little or no nutriment move toward bodies which contain nutrient substances. *De Bary*.

trophozoöid (trof-ō-zō'oid), *n.* [< Gr. τροφή, nourishment, + E. *zoöid*.] A nutritive zoöid of any organism; a gastrozoöid. See *trophosome*. *Encyc. Brit.*, XXIII. 615.

trophy (trō'fi), *n.*; pl. *trophies* (-fiz). [Early mod. E. *trophie*, *trophee*, < OF. *trophee*, F. *trophée* = Pg. *tropheo* = Sp. It. *trofeo*, < L. *trophæum*, prop. *tropæum*, a sign of victory, a victory, a mark, sign, monument, < Gr. τρόπαιον, a monument of an enemy's defeat, a trophy, neut. of τροπαῖος, Attic τρόπαιος, of defeat, of change or turning, < τροπή, defeat, rout, putting to flight, lit. 'a turning' (hence also the solstice), < τρέπειν, turn: see *trope*, *tropic*.] **1.** In *antiq.*, a monument or memorial in commemoration of a victory. It consisted of some of the arms and other spoils of the vanquished enemy hung upon the trunk of a tree or a pillar or upright by the victor, either on the field of battle or in his home city. If for a naval victory, the trophy was set up on the nearest land. The custom of erecting trophies was most general among the Greeks, but it passed at length to the Romans. It was the practice also to have representations of trophies carved in stone, bronze, etc. In modern times trophies have been dedicated (see def. 2), in churches and other public buildings, to commemorate victories. See cut under *Nike*.

> And thou thy selfe (O Saul), whose Conquering hand
> Had yerst with *Tropheis* filled all the Land,
> As far as Tigris, from the Iaphean Sea.
> *Sylvester*, tr. of Du Bartas's Weeks, ii., The Trophies.

> And *trophies*, reared of spoiled enemies,
> Whose tops pierced through the clouds and hit the skies.
> *B. Jonson*, Prince Henry's Barriers.

2. Anything taken and preserved as a memorial of victory, as arms, flags, or standards captured from an enemy.

> And for a *trophy* brought the Giant's coat away,
> Made of the beards of Kings.
> *Drayton*, Polyolbion, iv. 317.

> Over the chimney-piece was a small mirror, and above that the *trophy* of a fox's brush.
> *Bulwer*, Kenelm Chillingly, ii. 9.

3. Something regarded as a memorial or evidence of victory; a prize.

> This is that famoused *trophy* which Philip would have his son Alexander in the games of Olympus to wrestle for.
> *Ford*, Honour Triumphant, ii.

4. A memorial; a memento.

> The mere word 's a slave
> Debosh'd on every tomb, on every grave
> A lying *trophy*. *Shak.*, All's Well, ii. 3. 146.

> At one point we met a party, women among them, bringing off various *trophies* they had picked up on the battle field. *O. W. Holmes*, Old Vol. of Life, p. 40.

5. An ornamental group of objects, such as weapons, memorials of the chase, or flags, arranged on a wall, or a symbolic or typical grouping of exhibits at an exposition or the like; also, in *decoration*, a representation of such a group. See *trophy decoration*, under *decoration*.

> His gorget, sash, and sabre of the Horse Marines, with his boot-hooks underneath in a *trophy*.
> *Thackeray*, Book of Snobs, [xxvi.

> Confiding customers lent them silver plate, and women's taste and a few ribbons make a gorgeous *trophy*.
> *J. Ashton*, Social Life in Reign [of Queen Anne, II. 160.

Trophy.—From the Porte St. Denis, Paris; end of 17th century.

trophy-cress (trō'fi-kres), *n.* Same as *trophy-wort*.

trophy-lock (trō'fi-lok), *n.* A lock of hair cut from the head of a slain enemy, used to adorn a weapon or shield.

trophy-money (trō'fi-mun″i), *n.* A duty formerly paid annually in England by housekeepers toward providing harness, drums, colors, etc., for the militia.

trophy-wort (trō'fi-wėrt), *n.* The Indian cress, ★*Tropæolum*. Also *trophy-cress*.

tropic (trop'ik), *a.* and *n.* [< OF. (and F.) *tropique* = Pr. *tropic* = Sp. *trópico* = Pg. It. *tropico* (cf. D. G. *tropisch* = Sw. Dan. *tropisk*, a.), < LL. *tropicus*, of or pertaining to the solstice (*Capricornus tropicus*, the tropic of Capricorn), as a noun, one of the tropics; < Gr. τροπικός, of or pertaining to a turn or change, or the solstice, or a trope or figure, tropic, tropical; as a noun, ὁ τροπικός (sc. κύκλος), the solstice, pl. οἱ τροπικοί (sc. κύκλοι), the tropic circles; < τροπή, a turn, turning, solstice, trope: see *trope*.] **I.** *a.* Pertaining to the tropics (the regions so called); tropical.

II. *n.* **1†.** The turning-point; a solstitial point.

> This signe of Capricorne is also cleped the *tropik* of wyntur, for thanne bygynneth the sonne to come agayn to us-ward. *Chaucer*, Astrolabe, I. 17.

> How that the Sun performing his course in the winter *Tropick*, and exhaling much moysture from Nilus, diminisheth him contrary to his nature. *Sandys*, Travailes, p. 77.

2. In *astron.*, one of two circles on the celestial sphere whose distances from the equator are each equal to the obliquity of the ecliptic, or 23½° nearly. The northern one touches the ecliptic at the sign Cancer, and is thence called the *tropic of Cancer*, the southern one being for a similar reason called the *tropic of Capricorn*. The sun's annual path in the heavens is bounded by these two circles, and they are called *tropics* because when the sun, in his journey northward or southward, reaches either of them, he, as it were, turns back, and travels in an opposite direction in regard to north and south.

3. In *geog.*, one of two parallels of latitude, each at the same distance from the terrestrial equator as the celestial tropics are from the celestial equator — that is, about 23½°. The one north of the equator is called the *tropic of Cancer*, and that south of the equator the *tropic of Capricorn*. Over these circles the sun is vertical when his declination is greatest, and they include the part of the globe called the torrid zone—a zone 47° in width, having the equator for its central line.

4. *pl.* With the definite article: the regions lying between the tropics of Cancer and Capricorn, or near them on either side.—**Malignant ★fever of the tropics.** See *fever*[1].

tropical (trop'i-kąl), *a.* [< *tropic* + *-al*.] **1.** Of or pertaining to the tropics; being within the tropics; characteristic of the tropics or of the climate of the tropics.—**2.** In *zoögeog.*, inhabiting the tropics; tropicopolitan.—**3.** Incident to the tropics: as, *tropical* diseases.—**4.** [< *trope*.] Figurative; rhetorically changed from its proper or original sense.

> There are many things delivered rhetorically, many expressions therein merely *tropical*.
> *Sir T. Browne*, Religio Medici, Pref.

Tropical abscess, abscess of the liver, occurring as a result of long residence in the tropics.—**Tropical diseases**, diseases met with, as a rule, solely in the tropics.—**Tropical duckweed.** See *Pistia*.—**Tropical grape.** Same as *sea-grape* (which see, under *grape*[1]).—**Tropical homonym.** See *homonym*.—**Tropical lichen**, in *pathol.*, prickly heat. *Encyc. Dict.*—**Tropical month.** See *month*, 1 (*c*).—**Tropical year.** See *year*.

Tropicalia (trop-i-kā'li-ą), *n.* [NL., < Gr. τροπικός, tropic, + ἅλς, sea.] In *zoögeog.*, the tropical marine realm, one of the prime zoölogical divisions of the seas of the globe, between the isocrymes of 68° F. north and south: same as Dana's torrid-zone or coral-reef seas.

Tropicalian (trop-i-kā'li-ąn), *a.* [< *Tropicalia* + *-an*.] Of or pertaining to Tropicalia.

tropically (trop'i-kąl-i), *adv.* In a tropical or figurative manner.

> The Mouse-trap. Marry, how? *Tropically*.
> *Shak.*, Hamlet, iii. 2. 247.

tropic-bird (trop'ik-bėrd), *n.* One of several natatorial totipalmate birds of the family *Phaëthontidæ*: so called because usually seen in tropical regions. They are beautiful birds of buoyant and dashing flight, resembling sea-swallows or terns, but with the two middle tail-feathers filamentous and long-exserted beyond the rest. They are somewhat larger than pigeons, white variously marked with black on the upper parts, and tinted with pink or salmon-color, especially on the long tail-feathers, and when adult have the bill red or yellow. The feet are small, and all four toes are united by webs. The two best-known species are the yellow-billed and the red-billed, *Phaëthon flavirostris* and *P. æthereus*. Though resembling terns, they belong to a different order of birds, their nearest relatives being the frigate-pelicans or man-of-war birds. See cut under *Phaëthon*.

tropicopolitan (trop″i-kō-pol'i-tąn), *a.* [< *tropic* + Gr. πολίτης, a citizen. Cf. *cosmopolitan*.] In *zoögeog.*, belonging to the tropics; found only within the tropics; common to the whole of the tropics.

Among birds and reptiles we have several families which, from being found only within the tropics of Asia, Africa, and America, have been termed *tropicopolitan* groups.
A. R. Wallace.

tropides, *n.* Plural of *tropis*.

tropidial (trō-pid'i-ąl), *a.* [< *tropis* (*-id-*) + *-ial*.] Of or pertaining to a tropis, or keel of a cymba: as, *tropidial* pteres. See *ptere*. *Encyc. Brit.*, XXII. 417.

This lovely boy . . . bestrid a Scythian steed,
Trotting the ring, and tilting at a glove.
Marlowe, Tamburlaine, II., i. 3.

He made him turn, and stop, and bound,
To gallop and to *trot* the round;
He scarce could stand on any ground,
He was so full of mettle.
Drayton, Nymphidia.

3. To use a "pony" or some similar means in studying; "pony": as, to *trot* a lesson. [College slang, U. S.]—**To trot out**, to cause to trot, as a horse, to show his paces; hence, to bring or draw out for exhibition. [Colloq.]

They would sit for hours solemnly *trotting out* for one another's admiration their commonplaces of the philosophical copy-book, until I tingled from head to foot.
D. Christie Murray, Weaker Vessel, xiii.

trot[1] (trot), *n.* [< ME. *trot*, < OF. *trot* = Pr. *trot* = Sp. Pg. *trote* = It. *trotto* (G. *trott*); from the verb.] **1.** Quick, steady movement; "go": as, to keep one on the *trot* all day. [Now colloq.]—**2.** A gait faster than the walk and slower than the run. In the trot of bipeds both feet are alternately off the ground at the same time for an interval in each step; in that of quadrupeds, in a very slow trot there is always one foot on the ground, a part of the time two feet, and a part of the time three. If fast, there are two intervals in each stride when all the feet are off the ground (the stride being the distance in time or space between the successive points on the ground touched by the same foot), the horse leaving the ground from the hind feet in succession, while in the run he leaves the ground from a fore foot. In the trot the limbs move in pairs, diagonally but not quite simultaneously, even in the "square trot." If the difference becomes considerable, it constitutes "single-footing"; if the difference becomes so great that the action is reversed, and the pair of limbs on the same side move together, it becomes "pacing." While the trot is naturally a slower gait than the run, it has become the instinctive fast gait in certain breeds of horses. See *trotter*, and cut in preceding column.

The canter is to the gallop very much what the walk is to the *trot*. *Youatt*, The Horse (Treatise on Draught).

In those days, the Star Cambridge Coach, which left the Belle Sauvage Yard in Ludgate Hill about 4 P. M., threaded all the streets between its starting-point and Shoreditch Church at a *trot*. *Quarterly Rev.*, CXLVI. 198.

of early poets who first appeared in Provence, France. The troubadours were considered the inventors of a species of lyrical poetry, characterized by an almost entire devotion to the subject of chivalric love, and generally very complicated in regard to meter and rime. They flourished from the eleventh to the latter part of the thirteenth century, principally in the south of France, Catalonia, Aragon, and northern Italy. The most renowned among the troubadours were knights who cultivated music and poetry as a polite accomplishment; but the art declined, and in its later days was chiefly cultivated by an inferior class of minstrels. See *trouvère*.

Those fair bates these *trouble-states* still use
(Pretence of common good, the king's ill course)
Must be cast forth. *Daniel*, Civil Wars, III.

Soul-boiling rage and *trouble-state* sedition.
Quarles, Emblems, v. 14.

troublous (trub'lus), *a.* [< *trouble* + *-ous*.] 1. Agitated; disturbed.

As a tall ship tossed in *troublous* seas,
Whom raging windes, threatning to make the pray
Of the rough rockes, doe diversly disease.
Spenser, F. Q., II. ii. 24.

The street shall be built again, and the wall, even in *troublous* times. Dan. ix. 25.

2. Restless; unsettled.

His flowing toung and *troublous* spright.
Spenser, F. Q., II. iii. 4.

Some were *troublous* and adventurous spirits, men of broken fortunes, extravagant habits, and boundless desires. *Motley*, Dutch Republic, I. 501.

3. Disturbing; disquieting.

They winced and kicked at him, and accused him to Ahab the king that he was a seditious fellow, and a *troublous* preacher. *Latimer*, Sermon bef. Edw. VI., 1550.

My *troublous* dream this night doth make me sad.
Shak., 2 Hen. VI., i. 2. 22.

troublyt (trub'li), *a.* [< ME. *troubly*, *trowbly*, *trobly*, *trubyly*, *trouble*, *trowble*, < OF. *troublé*, *troblé*, pp. of *troubler*, *trobler*, trouble: see *trouble*, *v.*] 1. Turbid; stirred up; muddy; murky.

In Ethiope alle the Ryveres and alle the Watres ben *trouble*, and thei ben somdelle salte, for the gret hete that is there. *Mandeville*, Travels, p. 156.

2. Troubled; confused; distraught.

It may fall sumtyme that the *trubylyere* that thou hase bene owtwarde with actyfe werkes, the mare brynnande desyre thou sall hafe to Godd.
Hampole, Prose Treatises (E. E. T. S.), p. 31.

The *trowbly* erroure of oure ignoraunce.
Chaucer, Boëthius, iv. meter 5.

3. Turbulent; tempestuous; stormy.

The *trowble* wynde that hyht Auster.
Chaucer, Boëthius, i. meter 7.

trouflyngt, *n.* A Middle English form of *trifling*.

trough (trôf), *n.* [< ME. *trough*, *trogh*, *trou*, < ★AS. *trog*, *troh*, a trough, a small boat (*trohscip*, *trochscip*, a cock-boat), = D. *trog* = OHG. MHG. *troc* (*trog-*), G. *trog* = Icel. *trog* = Dan. *trug* = Sw. *tråg*, a trough; cf. It. *truogo*, a trough, < Teut.; lit. 'a thing of wood,' or perhaps 'a log' (sc. hollowed out); from the root of E. *tree*, AS. *treów*, etc.: see *tree*. Cf. *trow*[2], *trogue*, and *tray*[1].] 1. An open receptacle, generally long and narrow, as for water. Specifically—(*a*) A wooden receptacle or basin in which to knead dough.

She lifted the mass of dough out of the *trough* before her, and let it sink softly upon the board.
Howells, Annie Kilburn, xiv.

(*b*) A large vessel, usually oblong, designed to hold water or food for animals.

One meets everywhere in the roads [of Switzerland] with fountains continually running into huge *troughs* that stand underneath them, which is wonderfully commodious in a country that so much abounds with horses and cattle.
Addison, Remarks on Italy (Works, ed. Bohn, I. 519).

(*c*) A conduit for rain-water, placed under the eaves of a building; an eaves-trough. (*d*) In *printing:* (1) A watertight box in which paper is dipped to dampen it for the press. (2) The iron or metal-lined box in which inking-rollers are cleaned and forms are washed. (*e*) In *fish-culture*, a hatching-trough.

2†. A small boat; a canoe or dug-out.

If none had proceeded further then the inuentions of our predecessors, we had had nothyng in the Poets aboue Andronicus, and nothing in histories aboue the Annales or Cronicles of Bysshoppes, and had yet haue sayled in *troughes* or in boates.
R. Eden (First Books on America, ed. Arber, p. xlviii.).

There is a great caue or ditch of water . . . where come every morning at the break of day twentie or thirtie canoas or *troughes* of the Indians. *Hakluyt's Voyages*, III. 454.

3. A concavity or hollow; a depression between two ridges or between two waves; an oblong basin-shaped hollow: as, the *trough* of the sea.—**4.** The array of connected cells of a voltaic battery, in which the copper and zinc plates of each pair are on opposite sides of the partition.—**5.** In *chem.*, a vat or pan containing water over which gas is collected.—**6.** In *electroplating*, a tray or vat which holds the metallic solution. *E. H. Knight.*— **Glass trough.** (*a*) A deep and narrow box of clear glass for holding objects for microscopic study in their natural liquids. (*b*) A similar device for holding the developing or fixing bath in dry-plate photography, in order that the changes in the plate submerged in the bath can be observed.— **Pneumatic trough.** See *pneumatic*. —**Trough of barometric depression,** a long narrow area of low pressure; sometimes nearly stationary, as the equatorial belt of low pressure, sometimes moving slowly, as those that develop and stretch from Mexico or Texas to Manitoba. Generally the southern or western end of such a trough develops a whirl and an oval or circular

low area out of which grows a decided storm area while the rest of the trough temporarily fills up and disappears. A trough may often be considered as the axis of a V-shaped depression.

trough (trôf), *v.* [< *trough*, *n.*] **I.** *intrans.* To feed grossly, as a hog from a trough. *Richardson*, Clarissa Harlowe, VIII. 168.

II. *trans.* To make into a trough, or into the shape of a trough. *Proc. Soc. Psychical Research*, III. 461.

trough-battery (trôf'bat″ėr-i), *n.* A form of voltaic battery in which the glass or porcelain cells are replaced by a trough of wood or other insulating material divided into sections by insulating plates. Cruikshank's trough-battery consists of a trough of baked wood divided into cells by metallic partitions consisting of a plate of zinc and a plate of copper soldered back to back.

trough-fault (trôf'fâlt), *n.* In *geol.*, two faults having nearly the same direction, but dipping toward each other, so that the mass of rock included between them has more or less of the form of a wedge. The fault-block in such cases is triangular in cross-section, instead of being rectangular, as it would be if the faults both had the same dip.

trough-gutter (trôf'gut″ėr), *n.* A trough-shaped gutter below the eaves of buildings.

trough-room (trôf'röm), *n.* In *fish-culture*, a hatching-house.

trough-shell (trôf'shel), *n.* A round clam; a member of the *Mactridæ* (where see cut), especially the British *Mactra solida* and *M. stultorum*. These have a shell of nearly triangular form, with thick opaque valves covered with brownish epidermis, V-shaped cardinal tooth is in one valve, with a long lateral tooth on each side, fitting into deep grooves of the opposite valve. Both species live buried in the sand near low-water mark. In some places they are esteemed for the table, and in the Netherlands the shells are much used for making roads and paths.

troul† (trōl), *v.* and *n.* An obsolete form of *troll*[1].

trounce (trouns), *v. t.*; pret. and pp. *trounced*, ppr. *trouncing*. [Early mod. E. *trounse;* < OF. *troncer*, cut, mutilate, = Sp. *tronzar*, shatter, < OF. *tronce*, a piece of timber, *tronche*, a great piece of timber, a stump; cf. OF. *tronc*, trunk; cf. also *tronçon*, *tronson*, a truncheon; < L. *truncus*, a trunk: see *trunk* and *truncheon*.] To punish or beat severely; thrash or whip smartly; castigate. [Now colloq.]

The Lord *trounsed* [discomfited. R. V.] Sisara and all his charettes. *Bible of* 1551, Judges iv. 15.

Well, sir, you'll dearly answer this:
My master's constable; he'll *trounce* you for 't.
Beau. and Fl. (?), Faithful Friends, i. 2.

troupe (tröp), *n.* [< F. *troupe*, a troop, a company: see *troop*.] A troop; a company; particularly, a company of players, operatic performers, dancers, acrobats, etc.

She showed me a *troupe* of faire ladies, every one her lover colling and kissing, chinning and embracing.
Breton, Dreame of Strange Effects, p. 17.

troupial, *n.* See *troopial*.

trous-de-loup (trö'dė-lö'), *n. pl.* [F.: *trous*, pl. of *trou*, hole; *de*, of; *loup* (< L. *lupus*), wolf: see *wolf*.] Trap-holes or pits dug in the ground, in the form of inverted cones or pyramids, each with a pointed stake in the middle, to serve as obstacles to an enemy.

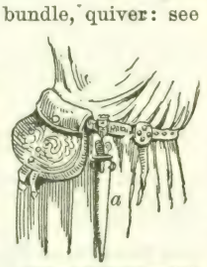
trouse† (trouz), *n.* [Also *trews*, q. v.; < OF. *trousse:* see *trousers*, *truss*.] Trousers; trews.

[Ventidius] served as a footman in his single *trouses* and grieues. *Holland*, tr. of Pliny, I. 177.

troused† (trouzd), *a.* [< *trouse* + *-ed*[2].] Wearing trousers; clothed with trousers. *Drayton*, Polyolbion, xxii. Also *trowsed*.

trousering (trou'zėr-ing), *n.* [< *trousers* + *-ing*[1].] Cloth for making trousers, especially material made for the purpose.

trousers (trou'zėrs), *n. pl.* [Formerly also *trowsers*, *trowzers*, *trossers;* a later form, with appar. accidental intrusion of *r*, of *trouses*, *trowses* (also *trooze*, *trews*), < OF. *trousses*, pl., trunk-hose, breeches, pl. of *trousse*, bundle, package: see *truss*, of which *trousers* is thus ult. a differentiated plural.] A garment for men, extending from the waist to the ankles, covering the lower part of the trunk and each leg separately; originally, tightly fitting drawers; pantaloons. See *strossers*. In the early part of the nineteenth century long frilled drawers reaching to the ankles were worn by girls and women, and called *trousers*.



The youth and people of fashion, when in the country, wear *trowsers*, with shoes and stockings.
Pococke, Description of the East, II. ii. 10.

Trousers (braccæ) were not worn till after the Parthian and Celtic wars, and even then only by soldiers who were exposed to northern climates. *Encyc. Brit.*, VI. 457.

On the abandonment of the latter [bases] these large breeches or sloppes became an important and splendid part of apparell; and while the long hose were either supplanted by or new christened the *trauses* [read *trouses*], the upper stock or the breeches worn over them received the name of trunk hose. *Planché.*

=**Syn.** *Breeches*, *Trousers*, *Pantaloons*. *Breeches* are properly short clothes, reaching just below the knee; the use of the word for *trousers* is erroneous and vulgar. *Trousers* is the old word for the garment common in Occidental nations to cover the legs of men; many, especially in England, still insist upon the word, and confine *pantaloons* to its historical sense. Many, however, especially in America, are satisfied with *pantaloons* (colloquially, *pants*) for *trousers*.

trousse (trös), *n.* [F., a bundle, quiver: see *truss*.] A number of small utensils carried in a case or sheath together; especially, such a sheath with knives, tweezers, and the like, hung from the girdle, and worn during the middle ages. Compare *étui*, *equipage*[1], 4. The trousse is now rather a collection of tools or implements for serious work, and for men rather than for women: as, a surgeon's *trousse*.

Trousse, from a French illumination of 1350. *a*, the trousse. (From Viollet-le-Duc's "Dict. du Mobilier français.")

trousseau (trö-sō'), *n.*; pl. *trousseaux* (-sōz'). [< F. *trousseau*, a bundle, kit, bride's outfit, trousseau, OF. *trousseau*, *torseau*, a little truss or bundle (cf. It. *torsello* = Pr. *trossel* = Sp. *torzal*), dim. of *trousse*, a bundle, truss: see *truss*. Cf. *trousers*.] 1. A bundle.

There [in the 'scrutoire] lay the total keys, in one massive *trousseau*, of that fortress impregnable even to armies from without. *De Quincey*, Spanish Nun, § 5.

2. The clothes and other outfit of a bride which she brings with her from her former home.

trout[1] (trout), *n.* [< ME. *troute*, *trowte*, < AS. *truht*, < OF. *truite*, < L. *tructa*, also *tructus* (ML. *trutta*, *trotta*), < Gr. τρώκτης, a sea-fish, < τρώγειν, gnaw, eat.] 1. A fish of the family *Salmonidæ*, *Salmo trutta*, with blackish spots, common in the colder fresh waters of Europe, and highly esteemed as a food-fish and game-fish; any species of the same section of *Salmo* (see *Salmo* (*b*)); a river-salmon, salmon-trout, or lake-trout. (*a*) In Europe, under the names *S. trutta* and *S. fario*, numerous forms have been alternately combined and then separated into subspecies and varieties, or accorded full specific rank. Day considers that there are but two species of British *Salmonidæ*—the salmon, *Salmo salar*, and the trout, *S. trutta*. Others divide the latter into *S. trutta* and *S. fario*, and these again into others, as *S. cambricus*, the sewin; *S. gallivensis*, the Galway trout; *S. stomachicus*, the Gillaroo trout; *S. levenensis*, the Loch Leven trout; etc. (*b*) In America there are several black-spotted trouts, specifically distinct from the European *S. trutta*, but belonging to the same section of the genus *Salmo*, commonly called *trout*, with or without a qualifying term (like the species of *Salvelinus:* see def. 2). All these inhabit western portions of the continent. Such are *S. gairdneri*, with moderate-sized scales, 120 to 150 in a row, and 10 anal rays, of the Pacific slope waters; the rainbow-trout, *S. irideus* (see cut under *rainbow-trout*), closely related to the foregoing, native of streams west of the Sierra Nevada, and now much diffused by pisciculture; the Rocky Mountain trout, *S. purpuratus* (see *lake-trout*, 1, and cut under *Salmo*).

European Trout (*Salmo trutta*).

And now, having caught three brace of *Trouts*. I will tell you a short tale as we walk towards our breakfast.
I. Walton, Complete Angler, p. 99.

2. A fish of the family *Salmonidæ* and genus *Salvelinus* (with its section *Cristivomer*), resembling those called in Europe *char*. See *Salvelinus*, and cuts under *char*[4] and *lake-trout*, 2. All the American chars are called *trout*, with or without a qualifying term. These are red-spotted. The leading forms are the common speckled trout, or brook-trout, of eastern North America, *S. fontinalis;* the blue-backed trout, *S. oquassa*, of Maine, Vermont, etc.; the Dolly Varden trout of the Pacific slope, *S. malma*, whose red spots are very large; together with the great lake-trout, *S. (Cristivomer) namaycush*. See phrases following.

3. Any fish of the family *Galaxiidæ* (which see).—4. With a qualifying word, one of several fishes, not of the family *Salmonidæ*, resembling or suggesting a trout. See phrases below.—**Bastard trout**, the weakfish *Cynoscion nothus*. [Charleston, U. S.]—**Bear-trout**, the great lake-trout. [Lake Superior.]—**Black-finned trout**, *Salmo nigripinnis* of England.—**Black-spotted trout**, *Salmo clarki*, the silver or mountain trout of western North America: specified as *S. pleuriticus*.—**Black trout**, the Lake Tahoe trout: specified as *Salmo henshawi*.—**Blue-backed trout**, *Salmo oquassa;* the oquassa.—**Brook-trout**. (*a*) The common American char, *Salvelinus fontinalis*. See cut under *char*. [Eastern North America.] (*b*) One of several different trouts (not chars) of the western parts of North America, of the genus *Salmo*. See def. 1 (*b*).—**Brown trout**, the common European trout, *Salmo fario*, introduced into the United States.—**Californian brook-trout**, the rainbow-trout, *Salmo irideus*.—**Cutthroat trout**, the Rocky Mountain brook-trout, *S. clarki*.—**Deep-water trout**. (*a*) The Great Lake trout. [Great Lakes.] (*b*) A weakfish or sea-trout, *Cynoscion thalassinus*. [U. S.]—**Dolly Varden trout**, a Californian char, *Salvelinus malma*.—**Galway trout**, *Salmo gallivensis* of England.—**Gillaroo trout**, *Salmo stomachicus* of England.—**Golden trout**, the rainbow-trout.—**Gray trout**, a sea-trout—the squeteague. See cut under *Cynoscion*.—**Great Lake trout**. (*a*) *Salvelinus namaycush*. See def. 2. (*b*) *Salmo ferox* of England.—**Ground-trout**, a malformed common trout (*Salmo fario*) of Penygant in Yorkshire, England, having a singular protrusion of the under jaw.—**Lake Tahoe trout**, *S. henshawi*, found in Lake Tahoe, Pyramid Lake, and streams of the Sierra Nevada. Also called locally *silver trout* and *black trout*.—**Loch Leven trout**, *Salmo levenensis* of Great Britain.—**Loch Stennis trout**, *Salmo orcadensis* of Great Britain.—**Mackinaw trout**, the Great Lake trout. See cut under *lake-trout*, 2.—**Malma trout**, the Dolly Varden trout.—**Mountain-trout**. (*a*) The black-spotted trout. (*b*) The black-bass, *Micropterus salmoides*. [Local, U. S.]—**Ocean trout**. See *ocean*.—**Pot-bellied trout**, the Great Lake trout.—**Red-spotted trout**. (*a*) Same as *brook-trout* (*a*). (*b*) The Dolly Varden trout.—**Red trout**, the Great Lake trout.—**Reef-trout**, the Great Lake trout.—**Rio Grande trout**, *Salmo spilurus*, inhabiting also the streams of the Utah basin.—**River-trout**, the common European trout, *Salmo fario*.—**Rocky Mountain brook-trout**, *Salmo clarki*, the Yellowstone trout, or salmon-trout of the Columbia river. See cut under *Salmo*.—**St. Mary's trout**, the three-bearded rockling. [Local, British (Penryn).]—**Salt-water trout**, a sea-trout—the squeteague, or a related species of *Cynoscion*. See *Cynoscion*, and cut under *weakfish*.—**Schoodic trout**, the Great Lake trout.—**Sebago trout**, the Great Lake trout.—**Shad-trout**, the trout-shad or squeteague.—**Shoal-water trout**, the Great Lake trout.—**Silver trout**. (*a*) A malformed common trout (*S. fario*) of Malham Tarn in Yorkshire, England, having a defective gill-cover. (*b*) A deep-water variant of *S. henshawi*, known as var. *tahoensis*.—**Speckled trout**, the brook-trout.—**Spotted trout**. (*a*) One of different American trouts spotted (1) with black (see def. 1 (*b*)); (2) with red—a speckled trout (see def. 2). (*b*) The weakfish or sea-trout, *Cynoscion nebulosus*.—**Sun-trout**, the squeteague, *Cynoscion regalis*.—**Waha Lake trout**, a local variety of *Salmo clarki*, found in Waha Lake, Washington.—**White trout**. (*a*) A variety of *Salmo fario*. See *finnac*. (*b*) The bastard trout.—**Yellowstone trout**, *Salmo clarki*, the Rocky Mountain brook-trout. See cut under *Salmo*.—**Yellow trout**, a malformed trout with the same defect as the silver trout (*a*). (See also *bull-trout*, *lake-trout*, *rainbow-trout*, *rock-trout*, *salmon-trout*, *sea-trout*.)

Cotton, in Walton's Angler, ii. 231.

trouvère (trö-vâr'), *n.* [F., < *trouver*, find: see *troubadour*.] One of the medieval poets of northern France, whose productions partake of a narrative or epic character, and thus contrast broadly with the lyrical, amatory, and more polished effusions of the troubadours. The works of the trouvères include the chansons de geste, the fabliaux, poems of the Round Table cycle, the "Romance of the Rose," "Reynard the Fox," etc. Also *trouveur*.

It is to the North of France and to the *Trouvères* that we are to look for the true origins of our modern literature. *Lowell*, Study Windows, p. 242.

trover (trō'vėr), *n.* [< OF. *trover*, F. *trouver* = Pr. *trobar* = Sp. Pg. *trovar* = It. *trovare*, find, invent, < ML. **tropare*, compose, sing. Cf. *troubadour*, *trouvère*, and *treasure-trove*.] Properly, the finding of anything; specifically, in *law*: (*a*) the gaining possession of personal property, whether by finding or otherwise; (*b*) a common-law action for damages for the wrongful taking or detention of goods from the possession of another. Originally this action was based on the finding by defendant of the plaintiff's goods and converting them to his own use. In course of time, however, the suggestion of the finding became mere matter of form, and all that had to be proved was that the goods were the plaintiff's and that the defendant had converted them to his own use. In this action the plaintiff could not recover the specific chattel, but only damages for its conversion. The action for such damages is now called an *action for conversion*.

trow[1] (trō), *v. t.* [< ME. *trowen*, *trouwen*, *treuwen*, *treowen*, < AS. *treówian*, *trūwian*, believe, trust, confide, also show to be true, justify, = OS. *trūōn* = OFries. *trouwa* = D. *vertrouwen*, trust (*trouwen*, marry), = MLG. *trūwen* = OHG. *triūwēn*, *trūwēn*, *trūēn*, MHG. *trūwen*, *trūen*, *trouwen*, *trowen*, G. *trauen*, hope, believe, trust, = Icel. *trūa* = Sw. troy (troi), *n.* Short for *troy weight*.

troy weight (troi wāt). [Early mod. E. also *Troie weight*, earlier *weight of Troy* (*weyght of Troyes*, Arnold's Chron., p. 108): so called with ref. to *Troyes*, a town in France, southeast of Paris, of considerable importance in the fourteenth century. Nearly all the principal towns or seats of commerce in the middle ages had their own weights and measures, the pound, foot, gallon, etc., varying from one town to another, sometimes even from one quarter to another. The pound of Troyes in the early part of the fourteenth century was adopted to some extent in other places and in England, but was then specifically designated as "of Troyes" (E. *of Troy*). Later, *troy weight* losing recognized connection with a locality, the first element became a mere attributive, and the phrase was thus generally reduced to *troy*.] A weight chiefly used in weighing bread, silk, gold, silver, and articles of jewelry, but now only for gold and silver. It was brought into England in the latter part of the reign of Edward III., and was adopted for the coinage in 1527. The table of troy weight is as follows:

Pound.		Ounces.		Pennyweights.		Grains.
1	=	12	=	240	=	5,760
		1	=	20	=	480
				1	=	24

The pound avoirdupois is equal to 7,000 grains troy. See *avoirdupois* and *weight*.

(*b*) The produce of a market-garden. [U. S.]—**Truck Act.** (*a*) An English statute of 1831 (1 and 2 Wm. IV., c. 37) requiring wages of workmen to be paid in coin or current money instead of goods. (*b*) A statute of 1870 (33 and 34 Vict., c. 105), also called the *Truck Commission Act*, which appointed a commission to inquire into the working of the act of 1831.—**Truck system,** the practice of paying the wages of workmen in goods instead of money. This practice has prevailed in Great Britain and elsewhere, particularly in the mining and manufacturing districts, the masters establishing warehouses or shops on which the workmen in their employment receive orders from time to time for supplies of provisions, etc., the rest of their wages, if any, being paid in money at the end of the month, or in orders which may be discounted at the store. In some instances the workmen receive payment of their wages in money on a tacit or express understanding that they are to resort to the premises of their masters for such necessaries as they require. Under this system the workmen have often to pay exorbitant prices for their goods, and from the great facility afforded to them of procuring liberal supplies of goods in anticipation of wages, they are apt to be led into debt. The system was prohibited in Great Britain in 1831. It has also been prohibited in many of the States of the American Union. It, however, still flourishes more or less openly.

★**truck**[2] (truk), *n.* [Appar. (by corruption of *trochus* to **truckus, trucks*, whence the assumed singular *truck*?) < L. *trochus*, a hoop, ML. a wheel, top, etc., < Gr. τροχός, a wheel, disk: see *trochus.* Cf. *truckle.*] **1.** A small wooden wheel not bound with iron; a cylinder.—**2.** A wheeled vehicle,

'pipe' or 'tube,' but commonly regarded (as with many other terms denoting sound or instruments of sound) as ult. imitative. The Teut. forms are supposed to be derived from the Rom. forms, and, according to Diez, are prob. from L. *tuba*, tube, pipe (cf. OF. *trufe, truffe*, < L. *tubera:* see *truffle*). Cf. Russ. *truba*, a tube, trumpet, = Lith. *truba*, a horn. The sense 'tube' in E., however, is prob. not original. Hence *trumpet*.] **1**†. A tube; pipe.

But hoolsumest and best is to have made
Trumpes of cley by potters in thaire gise,
And iche of hem II finger thicke assise.
Palladius, Husbondrie (E. E. T. S.), p. 177.

2. A musical wind-instrument; a trumpet: as, the *trump* of doom; the last *trump* (the summons to final judgment). [Obsolete or archaic.]

As when his Tritons' *trumps* do them to battle call
Within his surging lists to combat with the whale.
Drayton, Polyolbion, v. 99.

We shall not all sleep, but we shall all be changed, in a moment, in the twinkling of an eye, at the last *trump*.
1 Cor. xv. 51, 52.

And will you think Pride speaks the word, if here
I tell you Fame's *Trump* breath'd my History?
J. Beaumont, Psyche, ii. 55.

3†. A trumpeter; a herald. See *trumpet*, 3.

Alexander the Great . . . sighed and saide: Oh the most fortunate, which haste founde suche a *trompe* to magnifi thi doinges!
R. Eden, First Books on America (ed. Arber, p. 5).

4. A jews'-harp. [Scotch.]

He has two large Lochaber *trumps*, for Lochaber *trumps* were to the highlands what Cremona violins were to musical Europe. He secures the end of each with his teeth, and, grasping them with his hands so that the tiny instruments are invisible, he applies the little finger of each hand to their vibrating steel tongues.
N. Macleod, Life in a Highland Bothy.

Great court trump, the burghmote horn, or other horn or trumpet used by a town or corporation.—**The tongue of the trump.** See *tongue*.—**Trump marine**†. Same as *trumpet marine*, or *sea-trumpet*.

We in to see a Frenchman, . . . one Monsieur Prin, play on the *trump marine*, which he do beyond belief.
Pepys, Diary, III. 288.

trump[1]† (trump), *v. i.* [< ME. *trumpen;* < *trump*[1], *n.*] To blow a trumpet.

Ther herde I *trumpen* Messenus.
Chaucer, House of Fame, l. 1243.

Qwhene they tristely had tretyd, thay *trumppede* up aftyre,
Descendyd doune with a daunce of dukes and erles.
Morte Arthure (E. E. T. S.), l. 407.

trump[2] (trump), *v. t.* [Formerly also *tromp;* = MD. *trômpen*, < F. *tromper*, deceive, dupe, lit. play on the trump or trumpet, hence *se tromper de quelqu'un*, play with any one, mock, beguile, cheat, etc.: see *trump*[1], and cf. *trump*[3].] **1**†. To impose upon; dupe; deceive; gull.

When she [Fortune] is pleased to trick or *tromp* Mankind,
Some may be Coats, as in the Cards; but then
Some must be Knaves, some Varlets, Bauds, and Ostlers,
As Aces, Duzies, Cards o' ten, to face it
Out i' the Game, which all the World is.
B. Jonson, New Inn, i. 3.

2. To obtrude or impose unfairly.

Authors have been *trumped* upon us, interpolated and corrupted. *C. Leslie*, Short Method with Deists.

To trump up, to devise; forge; fabricate; seek and collect from every quarter: as, to *trump up* a story.

Hang honesty!
Trump me not *up* with honesty.
Fletcher and Massinger, A Very Woman, ii. 3.

★ **trump**[3] (trump), *n.* [Formerly also *triumph;* = D. *troef* = G. *trumpf* = Sw. Dan. *trumf*, < F. *triomphe* = It. *trionfo*, a game of cards so called, ruff or trump, also a triumph, < L. *triumphus*, triumph: see *triumph*. The word was in part confused with *trump*[2], < F. *tromper*, deceive: see *trump*[2].] **1.** One card of that suit which for the time being outranks the other suits, and which is generally determined by turning up the last card in dealing, but in some games by choice or otherwise; also, the suit which thus outranks the others (a loose use, for the plural *trumps*).

Hearts is *trump*, as I said before.
Latimer, Sermons on the Card, i.

Come hether, Dol; Dol, sit downe and play this game,
And as thou sawest me do, see thou do even the same;
There is five *trumps* besides the queen, the hindmost thou shalt find her;
Take hede of Sim Glover's wife, she hath an eie behind her. *Bp. Still*, Gammer Gurton's Needle, ii. 2.

What's *Trumpes?*
Heywood, Woman Killed with Kindness (Works, ed. 1874, II. 123).

O Martin, if dirt were *trumps*, what a hand you would hold! *Lamb*, in Barry Cornwall, vii.

Ugliness being *trump*, I wonder more people don't win.
C. D. Warner, Backlog Studies, p. 133.

2†. An old game at cards, also called *ruff* (see *ruff*[4]), the original of the modern game of whist. See *triumph*, 7.—**3.** A person upon whom one can depend; one who spontaneously does the right thing in any emergency; a good fellow. [Colloq.]

I wish I may die if you're not a *trump*, Pip.
Dickens, Martin Chuzzlewit, xxviii.

Tom . . . took his three tosses without a kick or a cry, and was called a young *trump* for his pains.
T. Hughes, Tom Brown at Rugby, i. 6.

Call for trumps, in *whist-playing*, a conventional signal indicating that the player wishes his partner to lead trumps. See *peter*[2], *n.* and *v.*—**To put one's trump or trumps**, to reduce to the last expedient, or to call for the utmost exertion of power: a figure borrowed from games at cards.

Ay, there's a card that *puts us to our trump*.
Peele, Edward I., iv.

trump[3] (trump), *v.* [< *trump*[3], *n.*] **I.** *trans.* To put a trump-card upon; take with a trump.

When Baynes got an opportunity of speaking unobserved, as he thought, to Madame, you may be sure the guilty wretch asked her how his little Charlotte was. Mrs. Baynes *trumped* her partner's best heart at that moment, but pretended to observe or overhear nothing.
Thackeray, Philip, xxviii.

II. *intrans.* In *card-playing*, to play a trump-card when another suit has been led.

trump-card (trump'kärd), *n.* **1.** The turned-up card which determines the suit of trumps.—**2.** One of the suit of cards which outranks the other suits; a trump.

trumped-up (trumpt'up), *a.* Fabricated out of nothing or deceitfully; forged; false; worthless.

Its neglect will cause a *trumped-up* claim to have the appearance of a true one neglected.
Edinburgh Rev., CLXVI. 399.

trumper† (trum'pėr), *n.* [< ME. *trumper, trumpour, trumpowre*, < OF. **trompour*, < *tromper*, blow a trump, < *trompe*, trump: see *trump*[1], *v.*] One who blows a trump; a trumpeter.

trumpery (trum'pėr-i), *n.* and *a.* [< F. *tromperie*, < *tromper*, deceive: see *trump*[2].] **I.** *n.* **1**†. Deceit; fraud. *Sir J. Harington.*—**2.** A showy thing of no intrinsic value; something intended to deceive by false show; worthless finery.

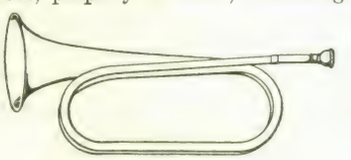
The *trumpery* in my house go bring hither,
For stale to catch these thieves.
Shak., Tempest, iv. 1. 186.

3. Useless stuff; rubbish; trash.

Here to repeate the partes that I haue playd
Were to vnrippe a trusse of *trumpery*.
Mir. for Mags., I. 397.

If I was as Mr. Jones, I should look a little higher than such *trumpery* as Molly Seagrim. *Fielding*, Tom Jones, v. 4.

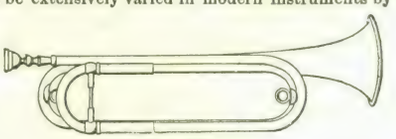
4. Nonsense; false or idle talk; foolishness.



All the *Trumpery* of the Mass, and Follies of their [Church of Rome's] Worship, are by no means Superstitious, because required by the Church.
Stillingfleet, Sermons, II. viii.

Extinct be the fairies and fairy *trumpery* of legendary fabling. *Lamb*, Old Benchers.

II. *a.* Showy, but useless or unsubstantial; hence, trifling; worthless: as, *trumpery* ornaments.



A very *trumpery* case it is altogether, that I must admit.
T. Hook, Gilbert Gurney, II. i.

★ **trumpet** (trum'pet), *n.* [< ME. *trumpet, trumpette* = MD. *trompette*, D. *trompet* = G. *trompete* = Sw. *trumpet* = Dan. *trompet*, < OF. (and F.) *trompette* = Pr. *trompeta* = Sp. *trompeta* = Pg. *trombeta* = It. *trombetta* (ML. *trompeta*), a trumpet, dim. of OF. *trompe*, etc., a trump: see *trump*[1].] **1.** A musical wind-instrument, properly of metal, consisting of a

Cavalry-trumpet.

cup-shaped mouthpiece, a long cylindrical or a short conical tube, and a flaring bell. The tones are produced by the vibrations of the player's lips. The fundamental tone of the tube depends on its length, but by varying the force of the breath and the method of embouchure, a considerable series of harmonics can also be produced, so that the compass of the instrument extends to about four octaves, the tones in the upper part of the series lying close together. By the addition of a slide, like that of the trombone, or of valves, as in the cornet-à-pistons, or of finger-holes and keys, as in the key-bugle and the serpent, a large number of other tones can be secured, so as to give a very full and continuous compass, well adjusted as to intonation. The fundamental tone can be extensively varied in modern instruments by the

Orchestral Trumpet.

use of crooks. The trumpet is the typical instrument of a very numerous family of instruments, of which the horn, the bugle, the cornet, the trombone, the tuba, the euphonium, and the serpent are prominent members. The name *trumpet* itself has been applied to a large number of different instruments at different times. In ancient times two varieties were important—the one straight (the *tuba*), and the other curved (the *lituus*), the latter being often made of wood or horn. In the medieval period the evolution of a great number of variants was rapid, with little emphasis on any one distinctively known as the trumpet. In the eighteenth century, and early in the nineteenth, the present orchestral trumpet reached its full development in a twice-doubled tube about five and a half feet long (or with the longest crook eight feet), without keys or valves, but with a short slide for correcting the intonation of certain of the upper tones and for adding intermediate tones. The artistic value of this instrument is great; but in most cases music written for it is now generally given to valve-instruments of the cornet kind, whose tone can never be as pure and true. The use of the trumpet was frequent with Bach and Handel, under the names *clarino* and *principale*. The instrument is most common now in works of a martial or festal character, but it is also useful for adding color to various combinations, especially with other wind-instruments. Music for the trumpet is traditionally written in the key of C, and the intended fundamental tone (to be obtained by the use of the appropriate crook) is indicated at the beginning, as "*clarino* in F" or "*tromba* in E." Instruments of the trumpet class have always been used for military purposes, especially for signaling and in military bands.

Trumpet, or a lytylle trumpe, that clepythe to mete, or men togedur. Sistrum. *Prompt. Parv.*, p. 504.

2. In *organ-building*, a powerful reed-stop, having a tone somewhat resembling that of a trumpet.—**3**†. A trumpeter; one who sounds a trumpet, either literally or figuratively.

And att every Corse the *Trumpettes* and the mynystrellys com inne a for them.
Torkington, Diarie of Eng. Travell, p. 12.

To be the *trumpet* of his own virtues.
Shak., Much Ado, v. 2. 87.

4. A sound like that of a trumpet; a loud cry, especially that of the elephant.

The elephant curled up his trunk, gave one shrill *trumpet*, and made off into the bush. *St. Nicholas*, XVII. 845.

5. A funnel- or trumpet-shaped conductor or guide used in many forms of drawing, doubling, spinning, or other machines to guide the slivers, rovings, yarns, wire, or other materials to the machine, and at once to compact them. It is made in many shapes, but in all the flaring trumpet-mouth is suggested.—6. The flaring mouth of a draw-head of a railway-car, serving to guide the coupling to the pin or other fastening.—7. A trumpet-shell or sea-trumpet; a triton. See cuts under *chank*[2] and *Triton*.—8. One of the pitcher-plants, *Sarracenia flava*. See *trumpetleaf*.—**Feast of trumpets**, a feast among the Jews, enjoined by the law of Moses, held, as a celebration of the New Year, on the first and second days of the month Tisri, the seventh month of the Jewish civil year and the first of the ecclesiastical year. It derived its name from the especial use of trumpets in its solemnities.—**Flourish of trumpets**. See *flourish*.—**Hearing-trumpet**. Same as *ear-trumpet*.—**Marine trumpet**. Same as *sea-trumpet*.—**Speaking trumpet**. See *speaking-trumpet*.—**To blow one's own trumpet**. See *blow*[1].—**Trumpet marine**. Same as *sea-trumpet*.

trumpet (trum'pet), *v.* [< F. *trompeter* = Sp. *trompetear* = It. *trombettare;* from the noun.] **I.** *trans.* 1. To publish by sound of trumpet; hence, to blaze or noise abroad; proclaim; celebrate.

So tart a favour
To *trumpet* such good tidings!
Shak., A. and C., ii. 5. 39.

2. To form with a swell or in the shape of a bell or funnel.

Their ends [of wire] were passed into two small *trumpeted* holes in a stout brass plate and soldered to the back of the plate. *Philos. Mag.*, 5th ser., XXVIII. 95.

II. *intrans.* To sound a trumpet; also, to emit a loud trumpet-like sound or cry, as an elephant.

They [elephants] became confused and huddled, and jostled each other until one old bull, furiously *trumpeting*, led the way to the shore. *St. Nicholas*, XVII. 763.

trumpet-animalcule (trum'pet-an-i-mal″kūl), *n.* A stentor. See cuts under *Folliculina* and *Stentor*.

trumpet-ash (trum'pet-ash), *n.* See *trumpet-creeper*.

trumpet-banner (trum'pet-ban″ėr), *n.* A small flag attached to a trumpet so as to hang down and be displayed when the trumpet is sounded. In the middle ages it was customary to depict upon the flag the arms of the noble in whose service the trumpet was sounded.

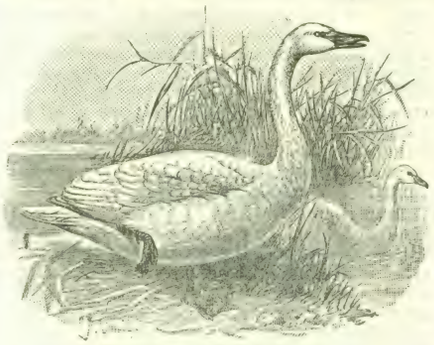
trumpet-call (trum'pet-kâl), *n.* A call by the sound of the trumpet; hence, any loud or imperative summons to action.

trumpet-conch (trum'pet-kongk), *n.* A trumpet-shell; a member of the *Tritonidæ*. See cut under *Triton*.

trumpet-creeper (trum'pet-krē″pėr), *n.* A woody climbing vine, *Campsis radicans*, native in the south of the United States, and cultivated elsewhere for ornament. It bears pinnate leaves with nine- or eleven-toothed leaflets, and flowers with a tubular funnelform corolla approaching 3 inches in length. It is quite hardy and a vigorous grower, climbing high trees, or covering walls, by means of aërial rootlets. It is at its best in alluvial soils southward. More often, but less specifically, called *trumpet-flower*, sometimes *trumpet-vine* ★and *trumpet-ash*. See cut under *Bignoniaceæ*.

trumpeter (trum'pet-ėr), *n.* [= D. *trompetter* = G. Dan. *trompeter* = Sw. *trumpetare;* as *trumpet* + *-er*[1]. Cf. OF. *trompeteur, trompetteur;* also Sp. *trompetero* = Pg. *trombeteiro* = It. *trombettiere*.] 1. One who sounds a trumpet.

Trumpeters,
With brazen din blast you the city's ear.
Shak., A. and C., iv. 8. 36.



2. One who proclaims or publishes.

Is it not meant damnable in us, to be *trumpeters* of our unlawful intents? *Shak.*, All's Well, iv. 3. 32.

3. A breed of domestic pigeons, so called from the peculiarity of their cooing. There are several color-varieties.—4. A South American bird of the genus *Psophia* or family *Psophiidæ*. The common or gold-breasted trumpeter is *P. crepitans;* there are several others. See cut under *agami*.

5. The trumpeter-swan, *Olor buccinator*, the largest swan of North America, distinguished from the common swan, or whistler, by having no yellow spot on the bill, which is also differently shaped, the nostrils occupying a different relative position, as well as by its notably larger size. It inhabits chiefly western parts of the continent, but has been seen in Canada. See cut in next column, and compare *hooper*[2], a name of an English swan.

6. A large food-fish of New Zealand and Australian waters, *Latris hecateia*, of the family *Cirrhitidæ*, which attains a weight of about 60 pounds.—**Sergeant trumpeter**. See *sergeant*.—**Trumpeter's muscle**, in *anat.*, the buccinator.—**Trumpeter-swan**. See def. 5.

Trumpeter-swan (*Olor buccinator*).

trumpet-fish (trum'pet-fish), *n.* 1. A fish of the family *Macrorhamphosus*, as *M. scolopax;* a bellows-fish or sea-snipe: so called from the long tubular snout. See cut under *snipe-fish*. —2. A fish of the family *Fistulariidæ;* a tobacco-pipe fish.

trumpet-flower (trum'pet-flou″ėr), *n.* 1. A plant of the genus *Campsis*, or of several allied genera: so called with reference to the shape of the flowers. The best-known, perhaps, is *Campsis radicans*, the trumpet-creeper. *C. grandiflora*, the great trumpet-flower of China and Japan, is a less hardy and less high-climbing, but even more showy vine, having orange-scarlet bell-shaped flowers 3 inches broad, borne in clusters, each flower drooping. *Stenolobium stans*, the shrubby trumpet-flower, is a neat shrub 4 feet high with lemon-yellow flowers in large clusters, hardy only southward. Greenhouse species are *Tecomaria Capensis* of South Africa with curved orange flowers, and *Pandorea jasminoides* of Australia with white flowers purple in the throat. *Bignonia crucigera* of the southern United States, the cross-vine or quarter-vine (see both words), or tendriled trumpet-flower, has large reddish-yellow flowers borne singly, and is moderately hardy in the north. *Pyrostegia ignea* from Brazil is a gorgeous greenhouse climber with scarlet flowers.

2. One of various plants of other genera, as *Ceratina, Brunsfelsia, Catalpa* (West Indies), and *Datura*, especially *D. suaveolens* and other South American species, being trees with pendent blossoms.—**Evergreen trumpet-flower**, the yellow jasmine, *Gelsemium sempervirens*, once classed in the genus *Bignonia*.—**Peach-colored trumpet-flower**, *Ceratina grandiflora*.—**Shrubby trumpet-flower**. See def. 1.—**Tendriled trumpet-flower**. See def. 1.—**Virginian trumpet-flower**, the trumpet-creeper.

trumpet-fly (trum'pet-flī), *n.* Same as *gray-fly*.

trumpet-gall (trum'pet-gâl), *n.* A small trumpet-shaped gall occurring commonly upon grape-vines in the United States. The adult fly is not known, but from the gall alone the species has been called by Osten Sacken *Cecidomyia vitis-viticola*.

trumpet-gourd (trum'pet-gōrd), *n.* See *gourd*, 1.

trumpet-honeysuckle (trum'pet-hun″i-suk-l), *n.* See *honeysuckle*, 1.

trumpeting (trum'pet-ing), *n.* [< *trumpet* + *-ing*[1].] 1. The act of sounding a trumpet, of emitting a trumpet-like sound, or of publishing by or as by sounding a trumpet.—2. In *coal-mining*, a division made in a shaft for ventilation or other purposes. What is generally called *trumpeting* is a compartment or passageway built vertically along one corner of the shaft by an arched brattice of brick.

trumpet-jasmine (trum'pet-jas″min), *n.* A woody climbing plant of Australia.

trumpet-keck (trum'pet-kek), *n.* See *keck*[3].

trumpet-lamp (trum'pet-lamp), *n.* The name given by coal-miners in England to the Mueseler or Belgian safety-lamp. See *safety-lamp*.

trumpetleaf (trum'pet-lēf), *n.* One of several species of *Sarracenia* or pitcher-plant, found in the southern United States, with leaves more like trumpets than like pitchers. Of these *S. flava*, yellow trumpetleaf or trumpets, has yellow flowers, and erect leaves from 1 to 3 feet long with an open mouth and erect hood; *S. variolaris*, spotted trumpetleaf, also yellow-flowered, has the leaves spotted toward the end, broadly winged, with an ovate hood overarching the mouth; *S. rubra*, red-flowered trumpetleaf, has crimson flowers and slender leaves, with an erect hood around the mouth; and *S. Drummondii*, great trumpetleaf, has similar but longer leaves, with the hood variegated and purple-veined, the flowers deep-purple and very large.

trumpet-lily (trum'pet-lil″i), *n.* The calla-lily, *Aroides Æthiopicum;* also, *Lilium longiflorum*, and some other true lilies.

trumpet-major (trum'pet-mā″jor), *n.* A head trumpeter in a band or regiment.

trumpet-milkweed (trum'pet-milk″wēd), *n.* Same as *wild lettuce* (*b*) (which see, under *lettuce*). Also *trumpetweed*.

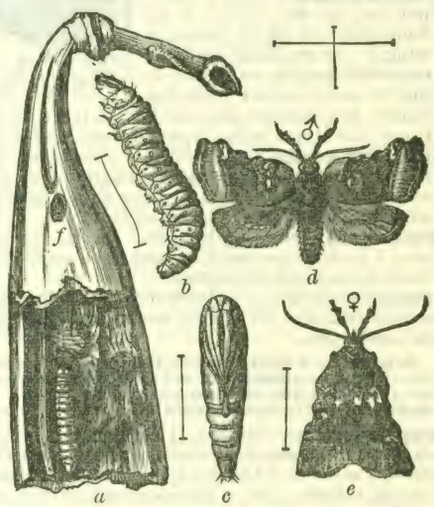
trumpet-reed (trum'pet-rēd), *n.* See *reed*[1].

trumpetry (trum'pet-ri), *n.* [< *trumpet* + *-(e)ry*.] Trumpets collectively. [Rare.]

A prodigious annual pageant, chariot, progress, and flourish of *trumpetry*.
Thackeray, Roundabout Papers, Thorns in the Cushion.

trumpet-shaped (trum'pet-shāpt), *a.* Formed like a trumpet; specifically, in *zoöl.* and *bot.*, tubular with one end dilated, like a trumpet.

trumpet-shell (trum'pet-shel), *n.* A shell of the genus *Triton*, as *T. tritonis;* any one of the *Tritonidæ;* a triton; a sea-trumpet. These conchs attain a large size, some being a foot or more in length, and are used for blowing upon like trumpets. The name extends to any conchs which are or may be blown. See cuts under *chank*[2] and *Triton*.



trumpet-tone (trum'pet-tōn), *n.* The sound or sounding of a trumpet; hence, a loud voice: generally in the plural: as, proclaim the truth in *trumpet-tones*.

trumpet-tongued (trum'pet-tungd), *a.* Having a tongue vociferous as a trumpet.

His virtues
Will plead like angels, *trumpet-tongued*, against
The deep damnation of his taking-off.
Shak., Macbeth, i. 7. 19.

trumpet-tree (trum'pet-trē), *n.* A tree, *Cecropia peltata*, having very large peltate leaves with hollow petioles, which are used as trumpets. Also *trumpetwood* and *snakewood*.

trumpet-vine (trum'pet-vīn), *n.* Same as *trumpet-creeper*.—**Trumpet-vine seed-worm**, the larva of

Trumpet-vine Seed-worm (*Clydonopteron tecomæ*).

a, part of pod broken so as to show larva, natural size; *b*, larva, side view; *c*, pupa, ventral view; *d*, male moth expanded; *e*, female moth at rest; *f*, hole from which moth issued. (Hair-lines show natural sizes.)

a pyralid moth, *Clydonopteron tecomæ*, which lives in the seed-pods of the trumpet-creeper, *Campsis radicans*.

trumpetweed (trum'pet-wēd), *n.* 1. A large South African seaweed: same as *sea-trumpet*, 2. —2. The joepye-weed or gravelroot, *Eupatorium purpureum:* so called from the use to which the stems are put by children.

They were hidden and shaded by the broad-leaved horse- and *trumpet-weeds* in the fence-row.
The Century, XXXVI. 80.

3. Same as *wild lettuce* (*b*) (which see, under *lettuce*).

trumpetwood (trum'pet-wůd), *n.* Same as *trumpet-tree*.

trumpie (trum'pi), *n.* [Origin obscure.] A skua-gull or jäger. See cuts under *skua* and *Stercorarius*. [Orkneys.]

truncal (trung'kal), *a.* [< L. *truncus*, trunk, + *-al*.] Of or pertaining to the truncus or trunk ★of the body.

truncate (trung'kāt), *v. t.*; pret. and pp. *truncated*, ppr. *truncating*. [< L. *truncatus*, pp. of *truncare*, cut off, reduce to a trunk: see *trunk*, *v.*] 1. To reduce in size or quantity by cutting; cut down; maim.

The examples are too often injudiciously *truncated*.
Johnson, Dict., Pref.

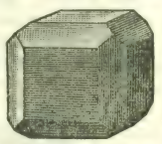
2. In *crystal.*, to cut off an angle or edge by a plane section.

The faces of the one set mutually *truncate* the edges of the other. If a rhombohedron be positioned so as to rest upon one of its apices, the faces of one hexagonal prism would *truncate* the lateral edges of the rhombohedron, while the faces of the other hexagonal prism would *truncate* its lateral solid angles. *Encyc. Brit.*, XVI. 348.

Truncated cone or **pyramid**, a cone or pyramid whose

apex is cut off by a plane.—**Truncated cube, cuboctahedron, dodecahedron, icosahedron, icosidodecahedron, octahedron, tetrahedron.** See the nouns.

truncate (trung'kāt), *a.* [< L. *truncatus*, pp.: see the verb.] Truncated. Specifically—(*a*) In *bot.*, appearing as if cut short at the tip by a transverse line, as the leaf of the tulip-tree, *Liriodendron Tulipifera*. (*b*) In *zoöl.* and *anat.*, cut off; cut short; shortened by the removal of a part from either end. Especially—(1) Cut squarely off; cut straight across; hence, square, straight, or even at the end, as if so cut: as, the *truncate* tail of a fish or a bird. (2) In *conch.*, broken off, as the apex of a conical or spiral shell; having lost the point of the spire.—**Truncate elytra**, those elytra which are cut off squarely at the apex, leaving the tip of the abdomen exposed. See *Truncatipennes*.



Truncate Leaf of Tulip-tree.

truncately (trung'kāt-li), *adv.* In a truncate manner; so as to be or to seem truncated.

truncation (trung-kā'shọn), *n.* [< LL. *truncatio(n-)*, < L. *truncare*, pp. *truncatus*, cut off: see *truncate*.] 1. The act of truncating, or the state of being truncated; also, a truncated part.

Decreeing judgment of death or *truncation* of members. *Prynne*, Huntley's Breviate (1637), p. 48.

2. In *crystal.*, the replacement of an angle (or edge) by a crystalline face. In truncation proper, the replacing face makes equal angles with the adjacent faces; otherwise it is said to be *oblique*.

Truncation of the Edges of a Cube by Dodecahedral Planes.

Truncatipennes (trung-kā-ti-pen'ēz), *n. pl.* [NL., < L. *truncatus*, cut off, + *penna*, a wing.] An artificial group of caraboid beetles, corresponding to some extent with the family *Brachinidæ:* so called from the truncation of the elytra in the typical forms. *Latreille.*

truncatosinuate (trung-kā-tō-sin'ū-āt), *a.* [< L. *truncatus*, truncate, + *sinuatus*, sinuate.] In *entom.*, truncate, with a sinus or slight inward curve on the edge of the truncation.

truncature (trung'kā-tūr), *n.* [= It. *troncatura*, < L. *truncare*, pp. *truncatus:* see *truncate*.] In *zoöl.*, same as *truncation*.

trunch† (trunch), *n.* [Also *tronch;* < OF. *tronche*, a fem. form of *tronc*, trunk: see *trunk*.] A stake or small post.

In the midst of them were four little *tronches* knocked into the ground, and small sticks laid over, on which they hung their pots, and what they had to seeth. *Mourt's Journal*, in New England's Memorial, App., p. 352.

truncheon (trun'chọn), *n.* [Formerly also *trunchion;* < ME. *trunchon, trunchone, trunchyne, tronchon, tronchoun*, < OF. *tronçon, tronson*, a truncheon, a thick slice, a piece cut off, F. *tronçon* (= Pr. *tronso, troncho, trenson* = Sp. *troncón* = It. *troncone*), dim. of *tronc*, a stump, trunk: see *trunk*.] 1. A trunk, stock, or stump, as of a tree; hence, a tree the branches of which have been lopped off to produce rapid growth.

And tho bowis grewen out of stockis or *tronchons*, and the *tronchons* or schaftis grewen out of the roote. *Bp. Pecock*, Repressor, i. 6.

2. The shaft of a spear or lance.

He foyneth on his feet with his *tronchoun*. *Chaucer*, Knight's Tale, l. 1757.

They carry also the *truncheons* of their Lances with their Standards and Ensignes trailing along the ground. *Purchas*, Pilgrimage, p. 304.

3. A short staff; a club; a cudgel. *Prompt. Parv.*, p. 504.

One with a broken *truncheon* deals his blows. *Dryden*, Pal. and Arc., iii. 612.

★**trunk** (trungk), *n.* [< ME. *trunke, truncke* = MD. *tronck*, D. *tronk*, < OF. (and F.) *tronc*, the trunk, stock, or body of a tree, a trunk or headless body, also the alms-box in churches, = Pr. *tronc* = Sp. Pg. It. *tronco*, < L. *truncus*, a stock, trunk, < *truncus*, OL. *troncus*, cut off, maimed, mutilated. Hence ult. (< L. *truncus*) E. *truncate, trunch, truncheon*, etc. Cf. Lith. *trinka*, block, log.] 1. The woody stem of a tree, from which the branches spring.

Lowe on the *truncke* as wounde him in the rynde,
A lite humoure whenne oute of it is ronne,
With chaved cley the wounde ayein to bynde. *Palladius*, Husbondrie (E. E. T. S.), p. 212.

2. In *arch.*, the shaft of a column; the part between the base and the capital. The term is sometimes used to signify the die or body of a pedestal. See cut under *column*.—3. The main part or stem of a branching organ or system of organs, considered apart from its ramifications: as, the *trunk* of an artery, a vein, or a nerve; the *trunk* of a zoöphyte or coral. Also *truncus*.—4. The human body or that of an animal without the head and limbs, and, in animals, the tail, or considered apart from these; in literary use, the body. In entomology the trunk is the body exclusive of the head, legs, wings, and elytra: the word was used by the older entomologists in describing those insects which have the thorax closely united to the abdomen, as the beetles and grasshoppers. The trunk was said to be *distinct* when it was separated from the head. Some entomologists, following Fabricius, restrict *trunk* to the thorax (in which sense also *truncus*).

To hold opinion with Pythagoras,
That souls of animals infuse themselves
Into the *trunks* of men. *Shak.*, M. of V., iv. 1. 133.

What new friend have I found, that dares deliver
This loaden *trunk* from his afflictions? *Fletcher*, Double Marriage, iv. 3.

Now his troops
Covered that earth they had fought on with their *trunks*. *B. Jonson*, Catiline, v. 6.

Nashe, Pierce Penilesse, p. 20.

Gasp. Canst be close?
Gorg. As . . . a pair of *trusses* to an Irishman's buttocks. *Shirley*, Love Tricks, i. 1.

7. In *building*, a stiff frame; a combination of timbers, of iron parts, or of timbers and ironwork, so arranged as to constitute an unyielding frame. The simplest example of a truss is the principal or main couple of a roof (see cuts under *roof*[1] and *queen-post*), in which the tie-beam is suspended in the middle by the king-post to the apex of the angle formed by the meeting of the rafters. The feet of the rafters being tied together by the beam, and being thus incapable of yielding in the direction of their length, their apex becomes a fixed point, to which the beam is trussed or tied up to prevent its sagging, and to prevent the rafters from sagging struts are inserted. There are other forms of truss suited to different purposes, but the conditions are the same in all—namely, the establishing of fixed points to which the tie-beam is trussed. Two points of attachment are sometimes substituted for the single one, and two suspending posts are required these are called *queen-posts*, and the truss is called a *queen-post truss*. The principle of the truss is of very wide application in bridge-building. Trusses of various forms are much used in iron-construction.

8. In *arch.*, a large corbel or modillion supporting a mural monument or any object projecting from the face of a wall. See *crosset*, 1 (*a*), with cut.—**9.** In *ship-building*, a short piece of carved work fitted under the taffrail: chiefly used in small ships.—**10.** A heavy iron fitting by which the lower yards of vessels are secured to the lower mast and on which they swing. Formerly yards were kept in place by trusses of rope which passed round the yard and mast and were kept taut by truss-tackles which were hooked to the truss-pendants.—**Howe truss**, a beam-truss having its oblique members in compression and with vertical tie-rods. The counter-

braces pass between the main obliques.—**Linville truss**, a beam-truss of which the web-members are composed of vertical posts and diagonal rods or bars extending from the head of one post to the foot of the second post beyond.—**McCallum inflexible arch-truss**, a beam-truss with an arched upper chord, and inclined struts extending from it to the abutment end of the lower chord. It has posts and diagonals, the distance between the former diminishing from the middle toward the ends. See fifth cut under *bridge*[1].—**Mocmain truss.** See *mocmain*.—**Pratt truss**, a beam-truss having vertical posts and inclined tension-members. See fig. *a*, above.—**Rider truss.** See *rider*.—**Truss-arch bridge.** See *trussed-arch bridge*, under *bridge*[1].

truss (trus), *a.* [< *truss*, *n.*] Bunchy; stumpy; stocky; round and thick.

The tiger-cat is about the bigness of a bull-dog, with short legs, and a *truss* body, shaped much like a mastiff.
Dampier, Voyages, an. 1676.

truss-beam (trus'bēm), *n.* A wooden beam reinforced by a tie-rod, or a compound wooden beam composed of two or more wooden members and reinforced by means of a tie-rod, or a built-up beam of iron arranged in the form of a truss. The most simple form is a single piece of timber having an iron tie-rod on the under side secured at

Truss-beams.
a, with cast-iron strut; *b*, with wrought-iron tension-rod.

each end of the beam, serving to resist the strain of tension on the under side of the beam when carrying a load. The lower beams of a railroad passenger-car are a good example. Another and less common form is a wooden beam having cast-iron struts to resist the strain of compression. Several beams united and reinforced by a tie-rod may form a compound truss-beam. Iron truss-beams have usually only tie-rods of wrought-iron, with sometimes box-beams for the upper chord. Truss-beams are used in car-building, in roofs of all kinds, and for short bridges. See *beam*, *truss*, and *bridge*[1].

truss-block (trus'blok), *n.* A block between a truss-rod and the compression-member of a trussed beam. It keeps the two at their proper distance apart.

truss-bridge (trus'brij), *n.* A bridge which depends for its stability upon an application of the principle of the truss. See *bridge*[1].

trussed (trust), *a.* [< *truss* + *-ed*[2].] **1.** Provided with some form of truss: as, a *trussed* roof; a *trussed* beam.—**2.** In *her.*, same as *close*[2], 10 (*f*): used of a bird.—**Trussed-arch bridge.** See *bridge*[1].—**Trussed girder.** See *girder*[1], 2.

trussel[1]† (trus'el), *n.* [ME. *trussel*, < OF. *trousseł*, F. *trousseau*, a bundle, dim. of *trousse*, a bundle: see *truss*, and cf. *trousseau*.] A bundle.

trussel[2] (trus'l), *n.* Same as *trestle*[1].

trusseltree (trus'l-trē), *n.* Same as *trestletree*.

trusser (trus'ėr), *n.* One who or that which ★trusses.

Hay and straw *trussers*. *The Engineer*, LXVII. 292.

trussest, *n. pl.* See *truss*, 6.

truss-hoop (trus'höp), *n.* In *coopering*, a ★temporary hoop which may be placed around a barrel and tightened, to draw the staves snugly together or to hold them in position while one that has become broken or decayed is being replaced. *E. H. Knight.*

trussing (trus'ing), *n.* [Verbal n. of *truss*, *v.*] In *building*, the timbers, etc., which form a truss.—**Diagonal trussing**, in *ship-building*, a particular method of binding a vessel internally or externally, or both, by means of a series of wooden or iron braces laid diagonally on the framing from one end of the ship to the other.

trussing-bed† (trus'ing-bed), *n.* A bed which could be packed, as in a chest, for traveling. *Halliwell.*

trussing-machine (trus'ing-ma-shēn′), *n.* In *coopering*, a machine for forcing truss-hoops upon casks. *E. H. Knight.*

truss-piece (trus'pēs), *n.* A filling piece between the compartments of a framed truss. *E. H. Knight.*

truss-plank (trus'plangk), *n.* In a railway passenger-car, a wide piece of timber fastened on the inside of the car to the posts of the frame directly above the sills.

truss-rod (trus'rod), *n.* A tie-rod fastened to the ends of a beam and bearing against a king-post at the middle, or against queen-posts or truss-blocks between the rod and the beam at intermediate points. It serves to resist deflection of the beam.

truss-tackle (trus'tak′l), *n.* A tackle formerly used with rope trusses for lower yards to ★truss the yard close in to the mast.

trust[1] (trust), *n.* and *a.* [Also, in a sense now differentiated, *tryst*, q. v.; < ME. *trust*, *trost*, also *trist*, *tryst*, *trest* (not found in AS., and in part of Scand. origin); = OFries. *trāst*, comfort, = MD. D. *troost*, comfort, consolation, = MLG. *trōst*, consolation, confidence, trust, = OHG. MHG. *trōst*, G. *trost*, trust, help, protection, = Goth. *trausti*, covenant, treaty, = Icel. *traust*, trust, protection, shelter, confidence, reliance, = Sw. Dan. *tröst*, comfort, consolation; cf. OS. *getrōst*, a following, ML. *trustis*, a pledge, a following; Icel. *traustr*, adj., safe, strong, firm; akin to AS. *treówe*, etc., true, *treówian*, believe, trow, from the Teut. √ *tru*: see *true*, *trow*[1].] **I.** *n.* **1.** Reliance on the veracity, integrity, justice, friendship, or other virtue or sound principle of another; a firm reliance on promises or on laws or principles; confidence; belief.

Always han fulle *trust* and beleeve in God oure Sovereyn Lord. *Mandeville*, Travels, p. 167.

Gramercy! for on you is al my *triste*.
Chaucer, Troilus, iii. 1305.

I hope a true and plain relation of my misfortunes may be of use and warning to credulous maids, never to put too much *trust* in deceitful men.
Swift, Story of the Injured Lady.

There did not seem a sufficient number of men worthy of *trust* to assist the king with their councils, or fill with any degree of dignity the places that were vacant.
Bruce, Source of the Nile, II. 121.

2. Confident expectation; assured anticipation; dependence upon something future or contingent as if present or actual; hope.

To desperation turn my *trust* and hope!
Shak., Hamlet, iii. 2. 228.

His *trust* was with th' Eternal to be deem'd
Equal in strength. *Milton*, P. L., ii. 46.

Sustained and soothed
By an unfaltering *trust*, approach thy grave,
Like one who wraps the drapery of his couch
About him, and lies down to pleasant dreams.
Bryant, Thanatopsis.

3. That on which one relies or in which he confides; ground of reliance, confidence, or hope.

Blessed is that man that maketh the Lord his *trust*.
Ps. xl. 4.

Who in the fear of God didst bear
The sword of power, a nation's *trust*.
Bryant, Abraham Lincoln.

4. Credit. (*a*) Mere reliance on the character or reputation of a person or thing, without investigation or evidence: preceded by *on*: as, to take opinions or statements *on trust*.

For we live in an age so sceptical that, as it determines little, so it takes nothing from antiquity *on trust*.
Dryden, Def. of Epil. to 2d pt. Conq. of Granada.

Some . . . taking things *upon trust*, misemploy their power of assent by lazily enslaving their minds to the dictates and dominion of others.
Locke, Human Understanding, I. iv. § 22.

(*b*) Confidence in the ability and intention of one who does not pay ready money to pay at some definite or indefinite time in the future: as, to buy or sell on *trust*.

Ev'n such is time; which takes in *trust*
Our youth, our joys, our all we have!
And pays us nought but age and dust.
Raleigh, Ellis's Spec. of Early Eng. Poetry, II. 224.

I fear you must be forced, like the rest of your sisters, to run in *trust*, and pay for it out of your wages.
Swift, Advice to Servants (Waiting-Maid).

5. In *law*: (*a*) A confidence reposed in a person by making him the nominal owner of property which he is to hold, use, or dispose of for the benefit of another. (*b*) The right on the part of such other to enjoy the use or the profits or to require a disposal of the property for his benefit. (*c*) The relation between persons and property which arises when the legal ownership is given to one person, called the *trustee*, and the beneficial enjoyment or advantages of ownership are given or reserved to another, the *cestui que trust* or *beneficiary*. Property is sometimes said to be held in *trust* when the possession of it is intrusted to one person while another remains both legal and beneficial owner; but this is not technically a *trust*, although the person so intrusted in some respects may be held to the same duty and accountability as a trustee, and is sometimes spoken of as such.

The fictitious entities characterised by the two abstract terms *trust* and condition are not subalternate but disparate. To speak with perfect precision, we should say that he who is invested with a *trust* is, on that account, spoken of as being invested with a condition: viz. the condition of a trustee.
Bentham, Introd. to Morals and Legislation, xvi. 26, note.

6. That which is committed or intrusted to one, as for safe-keeping or use. (*a*) That which has been committed to one's care for profitable use or for safe-keeping, of which an account must be rendered.

Although the advantages one man possesseth more than another may be called his property with respect to other men, yet with respect to God they are only a *trust*. *Swift.*

The English doctrine that all power is a *trust* for the public good [was] . . . making rapid progress.
Macaulay, Walpole's Letters.

Public office is a public *trust*.
Dorman B. Eaton, in Cyc. Polit. Science, I. 479 (1881).

(*b*) Something confided to one's faith; a charge given or received in confidence; something which one is bound in duty and in honor to keep inviolate; a duty incumbent on one.

To violate the sacred *trust* of silence
Deposited within thee. *Milton*, S. A., l. 428.

Humility obliges no Man to desert his *Trust*, to throw up his Privilege, and prove false to his Character.
Jeremy Collier, Short View (ed. 1698), p. 137.

"If men accept *trusts* they must fulfill them, my dear," cries the master of the house. *Thackeray*, Philip, xv.

7. Specifically, in *mod. com. usage*, an organization for the control of several corporations under one direction by the device of a transfer by the stockholders in each corporation of at least a majority of the stock to a central committee or board of trustees, who issue in return to such stockholders respectively certificates showing in effect that, although they have parted with their stock and the consequent voting power, they are still entitled to dividends or to share in the profits—the object being to enable the trustees to elect directors in all the corporations, to control and suspend at pleasure the work of any, and thus to economize expenses, regulate production, and defeat competition. In a looser sense the term is applied to any combination of establishments in the same line of business for securing the same ends by holding the individual interests of each subservient to a common authority for the common interests of all. It is against public policy for a stockholder to divest himself of his voting power; hence such a transfer of stock if made is revocable at the pleasure of the maker. So far as the object of such a combination is shown to be the control of prices of and the prevention of competition in the necessaries or conveniences of life, it is held a criminal act upon the principles which rendered engrossing and forestalling punishable; and a corporation which by corporate act surrenders its powers to the control of a trust thereby affords ground for a forfeiture of its charter by the state.

8. The state of being confided in and relied on; the state of one to whom something is intrusted.

I do profess to be no less than I seem; to serve him truly that will put me in *trust*. *Shak.*, Lear, i. 4. 15.

It seemes when he was deputy in Ireland, not long before, he had ben much wronged by one he left in *trust* with his affaires. *Evelyn*, Diary, Oct. 27, 1675.

9. The state of being confided to another's care or guard; charge.

His seal'd commission, left in *trust* with me,
Doth speak sufficiently he 's gone to travel.
Shak., Pericles, i. 3. 13.

10. Keeping; care.

That which is committed to thy *trust*. 1 Tim. vi. 20.

11†. Trustworthiness.

A man he is of honesty and *trust*.
Shak., Othello, i. 3. 285.

In suits which a man doth not well understand, it is good to refer them to some friend of *trust* and judgment.
Bacon, Suitors (ed. 1887).

There is not
In any court of Christendom a man
For quality or *trust* more absolute.
Ford, Love's Sacrifice, i. 2.

Active or **special trust** (in *Scots law* called *accessory trust*), a trust in which the trustee is clothed with some actual power of disposition or management which cannot be properly exercised without his having the legal estate and right of actual possession: as distinguished from a *simple trust*, *naked trust*, or *passive trust* (in *Scots law* called *proprietary trust*), where the trustee is intended to be merely a figurehead to hold the apparent title, leaving the use or control to the beneficiary. Naked or passive trusts in land are now generally superseded by the rule (introduced originally by the statute of uses (see *use*), and extended in the United States by statutes of trusts) that, when a person attempts to create such a trust, no estate vests in the trustee, but the entire and absolute estate vests in the intended beneficiary.—**Breach of trust.** See *breach*.—**Charitable Trusts Acts.** See *charitable*.—**Constructive trust**, the legal relation similar to an express trust which arises upon circumstances which ought in equity to be dealt with as if there were a trust, irrespective of whether one was intended or not: thus, where a guardian transfers property of the ward without receiving an equivalent, the person receiving it may be made accountable as holding in trust for the ward by construction of law, irrespective of whether he intended to receive it for the ward's benefit or not.—**Declaration of trust.** See *declaration*.—**Deed of trust.** See *deed*.—**Executed trust.** (*a*) Technically, an express trust the objects and administration of which are so fully designated as to require no further act on the part of the creator of the trust to define the duty of the trustee, as distinguished from an *executory trust*, or one in which the instrument of creation reserves the declaration of the uses or some part thereof for further instructions. (*b*) A trust is also said to be *executed* when the trustee has performed his entire duty. (*c*) When the instrument creating a trust in land has the effect by virtue of the statute of uses of vesting the entire estate in the intended beneficiary, the trust is said to be *executed* by the statute.—**Express trust**, a trust which is created or declared in express terms, and usually, but not always, in writing, as distinguished from an *implied trust*, or one the existence of which is inferred from the conduct of the parties or the circumstances of the case. The phrase *implied trust* is sometimes loosely, but not improperly, applied to those constructive trusts in which there may be circumstances indicating that perhaps the parties intended a trust rather than a fraud.—**Implied trust.** See *express trust*.—**In trust,** as a trust; as a charge; for safe-keeping, or for the use of another to whom account is due.—**Loan and trust company.** See *bank*[2], 4.—**Naked trust,** a nominal or ostensible trust; a trust in which the trustee is not clothed with the right of possession or control. By the statute of uses, such trusts in land are executed, that is to say, the legal title is declared by law to be in the beneficiary, who has the right of possession and control, notwithstanding the contrary intent of the instrument creating the trust.—**On trust,** on credit; without present payment or security for payment: as, to buy *on trust;* to conduct one's business *on trust*.—**Passive trust.** See *active trust*.—**Private trusts.** See *private*.—**Proprietary trust.** See *active trust*.—**Public trust.** See *public*.—**Resulting trust,** a trust which is conclusively implied by rules of law from given circumstances; more specifically, that species of constructive trust which arises in favor of one who pays the price for real property on its conveyance to another. When one person obtained title to land for a consideration paid by another, the courts of chancery thus held the former to be a trustee of the property for the latter. By statute in many of the United States this result is precluded, except where the person paying is ignorant that the title is so taken, or where the claim to reach the property is made by his creditors.—**Special trust.** See *special*.—**Spendthrift trust,** a trust authorizing the trustees to pay the income for life to one person, the principal being given over to another on his death: so called under systems of law, as in Pennsylvania, which protect such income against claims of creditors.—**To run in trust**†, to run in debt; get credit. *Webster*.—**Trust certificate,** one of the certificates issued by the committee of trustees formed for the control of several corporations, showing the interest on profits accepted by one who was a stockholder in one of such corporations, upon surrendering his stock. See def. 7.—**Trust deed,** a conveyance in trust. More specifically—(*a*) A deed by a debtor conveying property to a person as trustee for payment of his debts. (*b*) A deed conveying property to a creditor in trust to sell and pay himself and restore the residue: a kind of mortgage.—**Trust estate,** an estate under the management of a trustee or trustees; or an estate given to be held in trust.—**Trust ex maleficio,** any constructive trust arising by reason of wrong-doing or intentional fraud on the part of the person charged as trustee, as where an attorney obtains title to his client's property in violation of duty.=**Syn. 1** and **2.** Faith, credence, assurance, dependence, expectation.

II. *a.* Held in trust: as, *trust* property; *trust* money.

trust[1] (trust), *v.* [Also, in a sense now differentiated, *tryst*, q. v.; < ME. *trusten*, *trosten*, also *tristen*, *trysten*, *tresten*, *traisten* (<Icel.) = OFries. *trāsta* = MD. Cenerydes (E. E. T. S.), l. 1624.

I have a mistress, and she has a heart,
She says; but, *trust* me, it is stone, no better.
Beau. and Fl., Maid's Tragedy, i. 1.

You would have *trusted* me
Once, but the time is alter'd.
Beau. and Fl., Maid's Tragedy, iv. 2.

To him thus Nestor: *Trust* the pow'rs above,
Nor think proud Hector's hopes confirm'd by Jove.
Pope, Iliad, x. 114.

The lower races . . . can seldom be *trusted* in their stories of long-past ages. *E. B. Tylor*, Prim. Culture, I. 35.

2. To believe; credit; receive with credence, as a statement, assertion, or the like.

Whos *tristeth* this Y holde him wode [mad].
Palladius, Husbondrie (E. E. T. S.), p. 31.

If he be credulous and *trust* my tale,
I'll make him glad to seem Vincentio.
Shak., T. of the S., iv. 2. 67.

3. To intrust: with *with* before the object confided.

I will rather *trust* a Flemming *with* my butter.
Shak., M. W. of W., ii. 2. 316.

Whom *with* your power and fortune, sir, you *trust*,
Now to suspect is vain. *Dryden*.

4. To commit, consign, or allow with confidence; permit to be in some place, position, or company, or to do some particular thing, without misgiving or fear of consequences: as, to *trust* one's self to another's guidance.

I wonder men dare *trust* themselves with men.
Shak., T. of A., i. 2. 44.

Fool'd and beguiled; by him thou, I by thee,
To *trust* thee from my side. *Milton*, P. L., x. 881.

I did not choose to *trust* these letters with our boatman.
Bruce, Source of the Nile, I. 103.

Merchants were not willing to *trust* precious cargoes to any custody but that of a man-of-war. *Macaulay*.

5. To give credit to; supply with goods or something of value in the expectation of future payment.

He that is a great gamester may be *trusted* for a quarter's board at all times. *Dekker*, Gull's Hornbook, p. 126.

It was your old mercer Shortyard, that you turned off a year ago, because he would *trust* you no longer.
Vanbrugh, Journey to London, iv. 1.

6. To entertain a lively hope; feel sure; expect confidently: followed by a clause.

And we *trusted* to haue reched to ye Yle of Melyda for our herboroughe the same nyght, but the wynde was so scarse that we were put bak to the Yle of Medzo.
Sir R. Guylforde, Pylgrymage, p. 74.

Oh yet we *trust* that somehow good
Will be the final goal of ill.
Tennyson, In Memoriam, liv.

II. *intrans.* **1.** To repose confidence; place faith or reliance; rely: with *on* or *in*.

But who may beste bigile if hym liste
Than he *on* whom men weneth best to *triste*.
Chaucer, Troilus, v. 1267.

He is a more foole then any mute best
That *trustith on* the [fortune], or *in* thy behest!
Rom. of Partenay (E. E. T. S.), l. 270.

Trust in the Lord, and do good. Ps. xxxvii. 3.

Alb. Well, you may fear too far.
Gon. Safer than *trust* too far.
Shak., Lear, i. 4. 351.

2. To give credit for something due; sell on credit: as, to *trust* recklessly.

Should we see the value of a German prince's ransom gorgeously attiring each of our belle-dames, if neither merchant, butcher, brewer, . . . would *trust?*
Brooke, Fool of Quality, xvi.

To trust to (or **unto**), to depend or rely on; have confidence in.

The men of Israel . . . *trusted unto* the liers in wait.
Judges xx. 36.

The mouse that always *trusts to* one poor hole
Can never be a mouse of any soul.
Pope, Wife of Bath, l. 298.

Bunyan had a trade *to* which he could *trust*, and the young woman had been trained up in the way she should go. *Southey*, Bunyan, p. 14.

trust[2]†. An obsolete spelling of *trussed*, preterit and past participle of *truss*.

trustee (trus-tē′), *n.* [< *trust*[1] + *-ee*[1].] **1.** A person to whom property or funds have been committed in the belief and trust that he will hold and apply the same for the benefit of those who are entitled, according to an expressed intention, either by the parties themselves, or by the deed, will, settlement, or arrangement of another; also, by extension, a person held accountable as if he were expressly a trustee in law. Compare *guardian*, 2.

I have made over all my Wealth to these
Honest Gentlemen; they are my *Trustees*.
Etherege, Love in a Tub, Epil.

Philip's mother's *trustee* was answerable to Philip for his property. *Thackeray*, Philip, xvi.

Their [the clergy's] gigantic wealth was in a great degree due to the legacies of those who regarded them as the *trustees* of the poor. *Lecky*, Europ. Morals, II. 89.

2. In the United States, a person in whose hands the effects of another are attached in a *trustee process* (see the phrase below).—**Trustee Churches Act.** See *church*.—**Trustee of bankrupt's estate.** Same as *assignee in bankruptcy* (which see, under *assignee*).—**Trustee process,** a species of attachment of rights of action of a debtor or property belonging to him in the hands of a third person, by making the debtor to him or the third person, as the case may be, a party to the proceedings, so as to charge him with the money or the property as a trust for the attaching creditor of the debtor (equivalent to the process known in English law as *foreign attachment*). It is called *trustee process* in some jurisdictions, as distinguishing it from attachments which go to the length of taking the said property or fund into the actual custody of the law by seizure.

trustee (trus-tē′), *v. t.* [< *trustee*, *n.*] To attach by a trustee process. See *trustee*, *n.*, 3.

trusteeship (trus-tē′ship), *n.* [< *trustee* + *-ship*.] The office or functions of a trustee.

truster (trus′tėr), *n.* [< *trust*[1] + *-er*[1].] **1.** One who trusts or relies, or who accepts a thing as true; a believer.

Nor shall you do mine ear that violence
To make it *truster* of your own report
Against yourself. *Shak.*, Hamlet, i. 2. 172.

2. One who trusts or gives credit; a creditor.

Bankrupts, hold fast;
Rather than render back, out with your knives,
And cut your *trusters'* throats!
Shak., T. of A., iv. 1. 10.

3. In *Scots law*, one who grants a trust deed: the correlative of *trustee*.

trustful (trust′fůl), *a.* [< *trust*[1] + *-ful*.] **1.** Full of trust; confiding: as, a person of a *trustful* disposition.

Consider, again, how much that is loveable and praiseworthy and energetic for good in individuals springs from the *trustful* and affectionate element in our nature.
H. N. Oxenham, Short Studies, p. 263.

2†. Worthy of trust; faithful; trusty. *Stanihurst*.

As he had vow'd, some small continuance
He there did make. *Spenser*, F. Q., VI. iii. 19.

(*b*†) On trustworthy information; with certainty.

Then I sent for the printer of this book, . . . requiring him that I might have some servant of his to watch him [a suspected person] faithfully that day, that I might understand *trustily* to what place he would repair at night unto. *Harman*, Caveat for Cursetors, p. 59.

(*c*†) Courageously; stoutly.

Than turned thei titli ayen & *trustili* gon fiȝt.
William of Palerne (E. E. T. S.), l. 3904.

trustiness (trus′ti-nes), *n.* The quality of being trusty; especially, that quality of a person by which he deserves the confidence of others; fidelity; faithfulness; honesty.

If the good qualities which lie dispersed among other creatures, innocence in a sheep, *trustiness* in a dog, are singly commendable, how excellent is the mind which ennobles them into virtues! *N. Grew*, Cosmologia Sacra.

trusting (trus′ting), *p. a.* Trustful; confiding.

trustingly (trus′ting-li), *adv.* In a trusting manner; with trust or implicit confidence.

trustless (trust′les), *a.* [< *trust*[1] + *-less*.] Not worthy of trust; unfaithful; delusive; treacherous.

To catche ech *trustlesse* traytor, see thou faythfull doe remayne. *Babees Book* (E. E. T. S.), p. 101.

O! *trustlesse* state of miserable men,
That builde your blis on hope of earthly thing.
Spenser, Ruins of Time, l. 197.

The *trustless* wings of false desire. *Shak.*, Lucrece, l. 2.

trustlessness (trust′les-nes), *n.* The state or character of being trustless; unworthiness of trust.

trustworthiness (trust′wėr″ŦHi-nes), *n.* The state or character of being trustworthy.

The properties which constitute *trustworthiness* in a mass of evidence are two, correctness and completeness.
Bentham, Judicial Evidence, I. ii.

In the trial of Reason versus Perception, Reason claims superior *trustworthiness*.
H. Spencer, Prin. of Psychol., § 391.

trustworthy (trust′wėr″ŦHi), *a.* [< *trust*[1] + *worthy*.] Worthy of trust or confidence; trusty; reliable; that may be relied on.

The greatest advantage which a government can possess is to be the one *trustworthy* government in the midst of governments which nobody can trust.
Macaulay, Lord Clive.

=**Syn.** Faithful, honest.

trusty (trus′ti), *a.* and *n.* [< ME. *trusty*, *trosty*, *tristy*, *tresty* (= Dan. *tröstig*, confident); < *trust*[1]

+ *-y*[1].] **I.** *a.* **1.** True; trustworthy; faithful; that may be implicitly confided in: applied to persons: as, a *trusty* servant.

Use careful watch, choose *trusty* sentinels.
Shak., Rich. III., v. 3. 54.

2. Not liable to fail; that may be relied upon, as in an emergency; strong; firm: applied to things: as, a *trusty* sword.

The neighing steeds are to the chariots tied,
The *trusty* weapon sits on every side.
Dryden, Æneid, vii. 886.

3†. Trusting; trustful.

He [who is born under Mercury] wilbe (soe his state there-by may mend)
Apt to deceive even his most *trusty* friend.
Times' Whistle (E. E. T. S.), p. 115.

4. Involving trust and responsibility. [Rare.]

It were fit you knew him, lest . . . he might at some great and *trusty* business in a main danger fail you.
Shak., All's Well, iii. 6. 16.

II. *n.*; pl. *trusties* (-tiz). A trusty person; specifically, a well-behaved and trustworthy convict to whom special privileges are granted.

By far the greater number of criminals confined in the jails of the far West are there for a class of offenses peculiar to the country. They are men dangerous in one direction, perhaps, but generally not depraved. The *trusties* are often domesticated upon ranches near the town, and apparently are unwatched, and on the best of terms with the ranchman's family. *The Century*, XXXVII. 448.

trut, *interj.* [ME. *trut*, also *ptrupt*, *ptrot*, < OF. *trut*, an interj. of contempt. Cf. *tut*[4].] An interjection of contempt. *Prompt. Parv.*, p. 415.

truth (tröth), *n.* [Also, in a form now differentiated, *troth*, q. v.; < ME. *truthe*, *treuthe*, *trewthe*, *treuwethe*, *treouthe*, *treowthe*, etc., also *trouthe*, *trowthe*, < AS. *treówthu*, *treówth* (*treówth-*, *treóth-*) (= OHG. **triuwida*, in comp., = Icel. *tryggth*), truth, faith; with formative *-th*, < *treówe*, true: see *true*.] **1.** The state or character of being true; trueness. (*a*) Conformity of thought with fact; conformity of a judgment, statement, or belief with the reality; exact correspondence of subjective and objective relations.

All admit that by *truth* is understood a harmony, an agreement, a correspondence between our thought and that which we think about. This definition we owe to the schoolmen. "Veritas intellectus," says Aquinas, "est adæquatio intellectus et rei, secundum quod intellectus dicit esse quod est, vel non esse quod non est."
Sir W. Hamilton, Logic, xxvii.

In common life we call *truth* the agreement between an object and our conception of the object. We thus presuppose an object to which our conception must conform. In the philosophical sense of the word, on the other hand, *truth* may be described, in a general and one-sided way, as the agreement of the subject-matter of thought with itself. *Hegel*, Logic (tr. by Wallace), p. 43.

(*b*) The state of being made true or exact; exact conformity to a model, rule, or plan; accuracy of adjustment; exact adaptation.

Ploughs, to go true, depend much on the *truth* of the iron-work. *Mortimer*, Husbandry.

Most gun-stocks are twisted over — that is to say, the toe of the butt is more out of *truth* with the barrels than the heel. *W. W. Greener*, The Gun, p. 432.

(*c*) In the *fine arts*, the proper and correct representation of any object in nature, or of whatever subject may be under treatment; specifically, in *arch.*, avoidance of deceits in construction or decoration, as of non-concordance of apparent and real structure, or of imitation of stone or marble in paint or plaster.

The agony of the Laocoon, the action of the Discobulus, the upspringing of the Mercury, are all apparently real in their action by the innate *truth* of their conformation. . . . *Truth* is therefore the highest quality in Art.
Fairholt, Dict. Terms of Art.

In *truth* and skill of modelling even the sculptures of Chartres and St. Denis, which are a century earlier in date, surpass those of Wells.
C. H. Moore, Gothic Architecture, p. 286.

(*d*) Habitual disposition to speak only what is true; veracity; purity from falsehood; truthfulness; sincerity; uprightness; honesty: as, a man of *truth*.

For als longe as zee ben bounden to gedere in places — that is to seyne, in Love, in *Trouthe*, and in gode Accord — no man schalle ben of powere to greve zou.
Mandeville, Travels, p. 229.

Love is all *truth*. *Shak.*, Venus and Adonis, l. 804.

(*e*) Disposition to be faithful; fidelity; constancy.

Long since we were resolved of your *truth*.
Shak., 1 Hen. VI., iii. 4. 20.

Now I shall try thy *truth*. If thou dost love me,
Thou weigh'st not any thing compar'd with me.
Beau. and Fl., Maid's Tragedy, ii. 1.

Alas! they had been friends in youth;
But whispering tongues can poison *truth*.
Coleridge, Christabel, ii.

(*f*) The state of not being counterfeited or adulterated; genuineness; purity.

The *truth* of thy love to me.
Shak., As you Like it, i. 2. 13.

2. That which is true. (*a*) Fact; reality; verity: as, a lover of *truth*: often personified.

"Sygrem," he seid, "to yow I will not leyne,
I shall yow telle the *trouth* of this mater."
Generydes (E. E. T. S.), l. 2284.

Deame thee best in euery doute
Tyl the *trouthe* be tryed oute.
Babees Book (E. E. T. S.), p. 332.

You peradventure think aptness and ableness all one; whereas the *truth* is that, had we kept our first ableness, grace should not need. *Hooker*, Eccles. Polity, v., App. 1.

For my mouth shall speak *truth*. Prov. viii. 7.

For *truth* is *truth*
To the end of reckoning. *Shak.*, M. for M., v. 1. 45.

Oh, *Truth*, thou art a mighty conqueress!
Fletcher (*and another*), Queen of Corinth, iv. 3.

Truth is the most unbending and uncompliable, the most necessary, firm, immutable, and adamantine thing in the world. *Cudworth*, Morality, IV. v. § 3.

Kant regards it as a duty owed to oneself to speak the *truth*, because "a lie is an abandonment or, as it were, annihilation of the dignity of man."
H. Sidgwick, Methods of Ethics, p. 292.

(*b*) A verified fact; a true statement or proposition; an established principle, fixed law, or the like.

Fundamental *truths*, . . . like the lights of heaven, are not only beautiful and entertaining in themselves, but give light and evidence to other things that without them could not be seen.
Locke, Conduct of the Understanding, § 43.

(*c*) That which is righteous or in accordance with the divine standard.

He that doeth *truth* cometh to the light, that his deeds may be made manifest, that they are wrought in God.
John iii. 21.

3†. Faith pledged; pledge; troth. See *troth*.

I'll give thee the *truth* of my right hand;
The *truth* of it I'll freely gie.
Young Beichan and Susie Pye (Child's Ballads, IV. 4).

Trypeta (trī-pē'tä), *n.* [NL. (Meigen, 1803), < Gr. τρυπητής, a borer, < τρυπᾶν, bore: see *trepan*[1].] A notable genus of flies, typical of the family *Trypetidæ*, of medium size, and yellowish-gray or greenish-yellow in color, with banded, spotted, or clear wings. It is a large and wide-spread genus, the species of which mainly breed in the flower-heads of composite plants, often making gall-like deformations.

Apple-maggot (*Trypeta pomonella*) and Fly, enlarged four times.

The larva of *T. pomonella* is the common apple-maggot or railroad-worm of the United States; it often does great damage to the apple-crop, particularly in the northeastern States. *T. ludens* in the larval state bores into oranges in Mexico. About 25 species occur in Europe, while more than 80 are known in North America. The genus has been divided into a large number of subgenera.

Trypethelium (trip-ē-thē'li-um), *n.* [NL. (Sprengel, 1804), < Gr. τρυπᾶν, bore, + θηλή, nipple.] A genus of verrucariaceous lichens, having immersed apothecia and ellipsoidal (usually four- or eight-celled) spores. About 30 species are known, mostly of intertropical regions, there being but 3 in North America.

Trypetidæ (trī-pet'i-dē), *n. pl.* [NL. (Loew, 1862), < *Trypeta* + *-idæ*.] A family of acalyptrate flies, typified by the genus *Trypeta*. They have the neuration complete, the front on each side with two rows of bristles, the border of the mouth with no vibrissæ, and only the middle tibiæ spurred. The ovipositor is horny, consisting of three elongated retractile segments, the last of which ends in a simple point. See cut under *Trypeta*.

trypographic (trip-ō-graf'ik), *a.* [< Gr. τρυπᾶν, bore, perforate, + γράφειν, write.] Pertaining to or produced by trypographic printing: as, a *trypographic* stencil, circular, or letter.—**Trypographic printing,** a method of printing by the use of paper stencils, in which the stencils are formed by placing the paper sheets on a flat steel surface, uniformly cut after the manner of a file, and writing upon them with a stylus. The paper is thus minutely perforated under the marks made by the stylus. The stencils are used in the same way as ordinary stencils for reproducing the written text.

try-pot (trī'pot), *n.* In *whaling*, the vessel in which blubber is tried out.

Trypoxylon (trī-pok′si-lon), *n.* [NL. (Latreille, 1804), < Gr. τρυπᾶν, bore, + ξύλον, wood.] A genus of fossorial hymenopterous insects, of the family *Crabronidæ*, composed of small solitary wasps having the eyes deeply emarginate within, the abdomen long and clavate, the marginal cell long, pointed at the apex, and the neuration of the posterior wings complete. They are noted for adapting the old nests of other species to their own use. *T. albitarse* is found abundantly in the old cells of wasps of the genus *Pelopœus* in the United States. Eight European and twenty-five North American species are known.

Trypoxylon albitarse. (Line shows natural size.)

trypsin (trip′sin), *n.* [Prob. for *tripsine*, so called because it was first obtained by rubbing down the pancreas with glycerin; < Gr. τρῖψις, a rubbing (< τρίβειν, rub), + *-in*2.] The proteolytic ferment of the pancreatic juice. It is active in neutral or slightly alkaline solution, and is capable of rapidly digesting albumins to peptones. The so-called hemi-group of the albuminous molecule is broken down to the stage of the amido-acids, viz., leucin, tyrosin, asparaginic acid, etc.

trypsinogen (trip-sin′ō-jen), *n.* [< *trypsin* + *-gen*.] A granular substance in the cells of the ★pancreas which is the antecedent of trypsin.

tryptic (trip′tik), *a.* [< *tryps-in* (*trypt-*) + *-ic*.] Of or pertaining to trypsin: as, *tryptic* action.

tryptone (trip′tōn), *n.* [< *trypt-ic* + *-one*.] A term analogous to *peptone;* the end-product of ★tryptic digestion.

trysail (trī′sāl or trī′sl), *n.* A fore-and-aft sail set with a gaff and sometimes with a boom on the foremast and mainmast of ships, or on a small mast called a *trysail-mast*. See *mast*1.

try-square (trī′skwār), *n.* A carpenters' square. Also *trial-square* and *trying-square*. See *square*1, 5.

tryst (trist), *n.* [< ME. *trist, tryst*, a variant of *trust:* see *trust*1. The present spelling *tryst* instead of *trist* is due to Scotch use.] 1†. Same as *trust*1, in various senses.—2. An appointment to meet; an appointed meeting: as, to keep *tryst;* to break *tryst*.

There was a knight and a lady bright
Had a true *tryst* at the broom.
The Broomfield Hill (Child's Ballads, I. 131).

Wae 's me for the time, Willie,
That our first *tryst* was set!
Motherwell, My Heid is Like to Rend, Willie.

3. An appointed place of meeting; a rendezvous.

Lo, holde the at thy *tryste* cloos, and I
Shal wel the deere unto thy bowe dryve.
Chaucer, Troilus, ii. 1534.

4. An appointed meeting for the exchange of commodities; a market: as, Falkirk *tryst* (a noted horse- and cattle-market held at Falkirk in Scotland).

I neither dought to buy nor sell,
At fair or *tryst* where I may be.
Thomas the Rhymer (Child's Ballads, I. 112).

To bide tryst, to wait at the appointed time and place to meet one according to engagement or agreement.

"You walk late," said I. . . . "I *bide tryste*," was the reply, "and so, I think, do you, Mr. Osbaldistone."
Scott, Rob Roy, xxi.

tryst (trist), *v.* [< ME. *tristen, trysten;* var. of *trust*1. Cf. *tryst, n.*] **I.** *trans.* 1. Same as *trust*1, in various senses.—2. To make an appointment to meet at a given time and place; engage to meet.

Sae cunningly 's I *trysted* her
Unto yon shade o' broom.
William Guiseman (Child's Ballads, III. 51).

Why did ye *tryst* me here?
The Hireman Chiel (Child's Ballads, VIII. 238).

II. *intrans.* To agree to meet at any particular time or place. [Scotch.]

trystell-treet, *n.* [Formerly also *tristil;* < **trystell* for *tryster*2 + *tree*.] A tree at which a meeting is appointed.

Welcome be thou, gentill knyght,
Under my *trystell tree*.
Lytell Geste of Robyn Hode (Child's Ballads, V. 92).

tryster1 (trīs′tėr), *n.* [< *tryst* + *-er*1.] 1. One who trysts; one who sets or makes a tryst; one who fixes a time and place of meeting.—2. One who attends a tryst or market.

tryster2†, *n.* [< ME. *tryster, trister, tristre, trystor, tristur;* < OF. *tristre*, perhaps a var. of *tertre*, a piece of ground, a mound; confused in ME. with *tryst*.] An appointed place; a station; a rendezvous.

Thenne watz he went, er he wyst, to a wale *tryster*.
Sir Gawayne and the Green Knight (E. E. T. S.), l. 1712.

trystily†, *adv.* A Middle English form of *trustily*.

trysting (trīs′ting), *n.* [Verbal n. of *tryst, v.*] The act of appointing a meeting; an appointed meeting.

trysting-day (trīs′ting-dā), *n.* An appointed day of meeting or assembling, as of military followers, friends, etc.

By the nine gods he swore it,
And named a *trysting day*.
Macaulay, Horatius.

trysting-place (trīs′ting-plās), *n.* An arranged meeting-place; a place where a tryst or appointment is to be kept.

At our *trysting-place* for a certain space
I must wander to and fro. *Scott*, Eve of St. John.

try-works (trī′wėrks), *n. sing.* and *pl.* The boilers and furnaces, either on board a whaleship or on shore, for converting blubber into oil.

It was also necessary to build *try-works*, as they are called, being furnaces for melting the blubber.
Fisheries of U. S., V. ii. 210.

★**t. s.** An abbreviation of *tasto solo*.

Tsabian, *n.* See *Sabian*1.

tsamba (tsam′bä), *n.* [Tibetan.] The principal cereal product of Tatary, Tibet, and parts of China.

The principal grain is tsing-kou or black barley, from which the *tsamba*, the principal aliment of the whole population [of Tibet], rich or poor, is made.
Huc, Travels (trans. 1852), II. 153.

Fortunately I bought enough *tsamba* and butter to last for a day or two, for on the morrow the courtyard was deserted. *The Century*, XLI. 720.

tsar, tsarevitch, etc. See *czar, czarevitch*, etc.

tsatlee (tsat′lē), *n.* [< Chinese *Tsat-li*, the name of a place noted for the production of this kind of silk, < *tsat*, a dialectal form of *ts'ih*, seven, + *li*, a mile.] A variety of Chinese raw silk, said to be the finest known.

tscheffkinite (chef′kin-īt), *n.* [Named from Gen. *Tscheffkin*, chief of the Mining Department of Russia.] A rare mineral occurring in massive forms of a velvet-black color. It is a silicate containing titanium, iron, the cerium metals, and other elements; its exact composition is doubtful.

tschermigite (chėr′mi-gīt), *n.* Same as *ammonialum*.

Tschudi, Tschudic. See *Chudi, Chudic*.

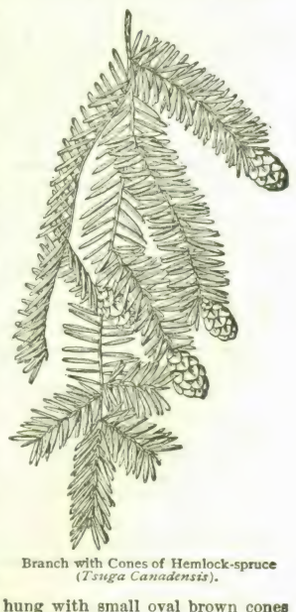
Tsech, *n.* See *Czech*.

tse-hong (tse′hong), *n.* [Chinese, < *tse, tsz'*, beautiful, fascinating, + *hong, hung*, red.] A purplish-red pigment, consisting of white lead with alumina, ferric oxid, and silica, used by the Chinese for painting on porcelain.

tsetse (tset′se), *n.* [Also *tsetze, tzetze, tzetse;* Sechuana.] A fly of the genus *Glossina* found only in tropical Africa and Arabia. It is instrumental in the spread of the germs of nagana, of sleeping-sickness, and possibly of other trypanosome diseases in man and beast. Also *tsetse-fly*.

Tsetse (*Glossina morsitans*), four times natural size.

tsien (chen), *n.* See *cash*3, 1.



T-square (tē′skwār), *n.* A ruler or guide used in mechanical and architectural drawing. It consists of two wooden arms joined together at right angles like the letter T, the shorter arm, called the *helve*, projecting so that it can slide along the edge of the drawing-table, which serves as a guide, and the longer arm or blade serving as a ruler. Some squares have additional members, in the form of a shifting helve or a pivoted protractor, for adjusting the blade at different angles on the drawing-table. See *square*1, 5.

tsuba (tsö′bä), *n.* [Jap.] The guard of a Japanese sword. It is a flat disk of metal, of rounded or irregular form, and is typically treated as an independent work of art, being in general pierced with fretwork, decorated with low relief, engraving, damaskeening, or the like.

Japanese Tsuba of Pierced Work.

Tsuga (tsū′gä), *n.* [NL. (Carrière, 1855), < Jap. *tsuga*, the name of *T. Araragi*, lit. 'yew-leafed' or 'evergreen.'] 1. A genus of coniferous trees, of the tribe *Abietæ*, including the hemlocks, and intermediate between *Picea*, the spruce, and *Abies*, the fir. Its staminate flowers and its seemingly two-ranked flat linear leaves resemble those of *Abies*, but it agrees with *Picea* instead in its persistent petiole-bases and in its reflexed cones with persistent scales. The 6 species are evergreens with slender flat or often pendulous branchlets, and narrowly linear leaves, flat above (convex or keeled in *T. Mertensiana*), and spirally inserted, but spreading in two ranks. The main branches are mostly horizontal, and are irregularly inserted, not whorled as in the fir and spruce. They are tall trees (excepting *T. Caroliniana*), reaching 80 to 100 feet high, with large cylindrical trunks and thick brown bark, which is deep-red within. The cones are small and brown, an inch or less long, or in *T. Mertensiana* cylindrical and 2 or 3 inches long; in this and in *T. heterophylla* they are bright-purple until ripe. Two species are found on the Atlantic and 2 on the Pacific side of North America. In each case one of the two species is interior, alpine, and more or less local, while the other is more wide-spread, and approaches the coast. *T. Canadensis*, the hemlock-spruce, is most highly developed in the Alleghany range, extending south to Alabama, and forming the larger part of the dense forests northward. Its trunk is often 3, sometimes 6, feet in diameter, forming in the oldest trees a nearly uniform shaft for two thirds of its length. It furnishes the principal tan-bark of the eastern United States, and a coarse wood, the red and the white hemlock of lumbermen. It is the source of hemlock-pitch, used in stimulating plasters, and of a fluid extract sometimes used as an astringent. It is now planted for hedges and to ornament lawns in the eastern States, also in Europe and Australia, and is much admired in its earlier growth for its delicate spray with light-green leaves silvery beneath, and hung with small oval brown cones about the ends of the branches. (See cut under *imbricate*.) In middle life the long-persistent dead lower branches often render it unsightly, and impair the value of the wood. *T. Caroliniana* is the Carolina hemlock, a small and rare tree of dry rocky ridges in the Carolinas, having larger, glossier, blunter leaves, and larger cones with wide-spreading scales. *T. heterophylla*, the western hemlock, forms large forests in Oregon, extending to Montana and Alaska; it yields the principal tanning-material of the northwestern States and a coarse inferior lumber; it excels the eastern species in its size, being sometimes 150 feet high and 12 feet in diameter. *T. Mertensiana*, the alpine spruce, occurring locally from British Columbia to California, sometimes 7 feet in diameter, peculiar in the deflexed base of its spreading branches and its finer satiny wood, is exceptional in the genus in its scattered quadrangular leaves, with the persistent petiole-base hardly prominent, two-lobed pollen-grains like those of pines, and large leather-brown cones with their scales reflexed. It is therefore separated by Lemmon (1890) as a genus, *Hesperopeuce*. *T. Tsuga* of Japan, the original species, forms large forests on Fusiyama and other mountains, is

Branch with Cones of Hemlock-spruce (*Tsuga Canadensis*).

planted about temples, and yields a fine-grained yellowish timber, much used by the Japanese and Chinese for turning and for furniture. A dwarf variety of this species 2 or 3 feet high, known as *fime tsuga*, is there a favorite garden shrub. *T. dumosa*, the tang-sing of Bhutan — a tall tree with graceful drooping branchlets, used for incense by the Hindus — is one of the handsomest forest-trees of the Himalayas, often growing to from 6 to 8 feet in diameter.

2. [*l. c.*] A tree of this genus.

tsun (tsun), *n.* [Chin.] The tenth of a chih; from $1\frac{1}{8}$ to $1\frac{1}{3}$ inches.

tsung-tuh (tsung'tu'), *n. sing.* and *pl.* [Chinese, < *tsung*, general, + *tuh*, overseer.] The highest provincial officer in China; a viceroy or governor-general, having the general control of all civil and military affairs of one or more provinces, and subject only to the throne. The eighteen provinces of China proper are governed by eight tsung-tuh or viceroys, and sixteen futai or governors.

tuart, *n.* See *tooart*.

tuatara (tō-a-tä'rä), *n.* [Maori.] The peculiar lizard of New Zealand, *Hatteria* (or *Sphenodon*) *punctata*. See cut under *Hatteria*.

tuath (tō'äth), *n.* [< Ir. *tūath*, people: see *Dutch*.] An Irish territorial division, or an association of persons. See the quotation.

The term *Tuath* was at the same time genealogical and geographical, having been applied to the people occupying a district which had a complete political and legal administration, a chief or Rig, and could bring into the field a battalion of seven hundred men. The word was also applied, however, to a larger division, consisting of three or four, or even more, *Tuaths*, called a Mór *Tuath*, or great *Tuath*, which were associated together for certain legal and legislative purposes, and the troops of which were united together in war under one commander.

tub (tub), *n.* [< ME. *tubbe*, < MD. D. *tobbe* = MLG. *tubbe*, *tobbe*, LG. *tubbe*, a tub; origin unknown. Some suppose, against phonetic probability, a connection with LG. *tōver* = OHG. *zubar*, MHG. *zuber*, *zober*, G. *zuber*, *zober*, a vessel, a contracted form of OHG. *zwibar*, *zuipar*, a vessel with two handles (cf. OHG. *einbar*, MHG. *einber*, *eimber*, G. *eimer*, a vessel with one handle); < LG. *to*, OHG. *zwei*, *zwi-*, two, + *-bar*, connected with E. *bear*[1] (see *amber*[1]).] 1. An open wooden vessel made of staves, held together by hoops, surrounding a bottom: as, a wash-*tub*; a butter-*tub*; the *tub* in which the tow-line is coiled in a whale-boat. — 2. The contents of a tub; as much as a tub will hold; as a measure of capacity, sometimes erroneously confounded with *firkin*. A tub of butter, by a statute of George III., was 84 pounds or $1\frac{1}{2}$ firkins, but locally still larger. As a measure of corn, by a statute of George II., the tub was 4 bushels. A tub of tea is 60 pounds.

3. Any wooden structure shaped like or resembling a tub. (*a*) A pulpit: used contemptuously. Compare *tub-preacher*, *tub-thumper*. [Slang, Eng.]

> High on a gorgeous seat, that far out-shone
> Henley's gilt *tub*, or Flecknoe's Irish throne.
> *Pope*, Dunciad, ii. 2.

> "The Rev. Moses Barraclough: t' *tub* orator you call him sometimes, I think." "Ah!" said the Rector. . . . "He's a tailor by trade." *Charlotte Brontë*, Shirley, viii.

(*b*) A clumsy, slow boat or vessel: so called in contempt.

> There is no uglier vessel than a real old north-country Geordie or coalman, with the run of a sugar-box. . . . The name of this deep and wallowing *tub* was the Richard and Ann. *W. C. Russell*, A Sea Queen, xvi.

(*c*) A boat used for practice-rowing.

> The freshmen are put into harness in *tub*-pairs or four-oars. *Dickens's Dict. Oxford*, p. 17.

> Practice in gigs, or more technically styled *tubs* (small boats to hold a pair of oarsmen, and in the stern of which the coach steers and advises the rowers). *Daily Telegraph*, Feb. 9, 1887. (*Encyc. Dict.*)

4. A small cask for holding liquor, especially in the eighteenth century, and before the change in English revenue laws; such a cask in which brandy, gin, or the like was smuggled from the Continent.

> I made three seizures, besides sweeping up those thirty-seven *tubs*. *Marryat*, Three Cutters, ii.

5. A receptacle for water or other liquid for bathing the person. See *bath-tub*.

> The retiring bower,
> So furnish'd as might force the Persian's envy,
> The silver bathing-*tub*, the cambric rubbers.
> *Massinger*, Guardian, ii. 5.

6. Hence, the act or process of bathing in a tub; specifically, a sponge-bath taken while standing in a tub. [Colloq.]

> From early morn till dewy eve, when she had it out of him in the cold *tub* before putting him to bed.
> *T. Hughes*, Tom Brown at Rugby, i. 2.

7†. Sweating in a heated tub, formerly the common mode of treatment of lues venerea. Compare *powdering-tub*, 2. — 8. In *mining*: (*a*) A bucket for raising ore from a mine. (*b*) A box, wagon, or tram for conveying coal from the working-face to the pit-bottom or gangway, or for underground haulage in general. The names given to the various vehicles or receptacles used for transporting coal, as well as their shape and size and the material of which they are made, vary considerably in different English collieries. See *buggy*[3]. (*c*) Same as *keeve*. — 9. The top of a malt-kiln. *Halliwell*. [Prov. Eng.] — 10. The gurnet. *Halliwell*. [Prov. Eng.] — **Cat under a tub** (*naut.*), a supposed hindrance or obstacle; an accidental unavoidable delay. Thus, when a vessel is prevented from sailing by unavoidable circumstances, it is said that some one has a *cat under a tub*, it being a superstition that if a cat is put under a tub it will hinder the vessel from sailing. [New Eng.] — **Cullingtub**, a receptacle into which mackerel are thrown to be sorted. — **Grog-tub** (*naut.*), a tub for holding the grog which used to form part of the crew's rations. — **Powdering tub.** See *powdering-tub*. — **Quenching-tub.** See *quenching*. — **Tale of a tub,** an idle or silly fiction; a cock-and-bull story.

> Ye say they follow your law,
> And vary not a shaw,
> Which is a *tale of a tub*.
> *Bp. Bale*, Comedy Concerning Three Laws. (*Nares.*)

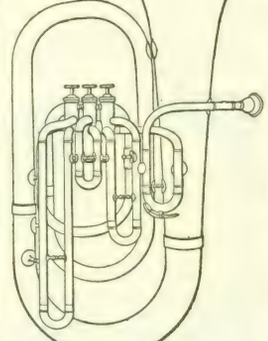
> You shall see in us that we preached no lyes, nor *tales of tubs*, but even the true word of God. *Coverdale.*

To throw a tub to a whale, to create a diversion in order to avoid a danger. — **Tub-camphor.** See the quotation.

> Japanese camphor is distinguished from Formosan by being coarser grained, clearer, of pinker hue, and by subliming at a lower temperature. It is also known as "Dutch" or "*tub*" *camphor*, the latter name arising from its being imported to Europe in tubs covered with matting, each placed within a second tub secured on the outside by hoops of twisted cane. *Spons' Encyc. Manuf.*, p. 574.

tub (tub), *v.*; pret. and pp. *tubbed*, ppr. *tubbing*. [< *tub*, *n.*] **I.** *trans.* 1. To plant or set in a tub: as, to *tub* plants. — 2. To bathe in a tub or bath.

> You shall be soaked, and stroked, and *tubbed*, and rubbed. *B. Jonson*, Alchemist, iv. 1.



3. In *mining*, to line (a shaft) with a casing of wood or iron. See *tubbing*.

II. *intrans.* 1. To bathe or wash the person in a bathing-tub; especially, in colloquial use, to take the morning bath. [Eng.]

> We all *tub* in England. *Spectator.*

★2. To row in a tub; practise in a tub. See *tub*, *n.*

tuba (tū'bä), *n.*; pl. *tubæ*, *tubas* (-bē, -bäs). [L., a trumpet: see *tube*.] 1. A musical instrument of the trumpet family, of very large size and low pitch. It is essentially similar to the bombardon, though not always made in the same shape. Its compass is nearly four octaves, including, by means of three or five valves, all the chromatic tones. The fundamental tone is usually the third F or E♭ below middle C. Lower varieties are often called *bass* or *contra-bass tubas*. The tuba is much used in military bands, and is more or less common in the orchestra, where it is used in conjunction with the trombones.

Tuba.

2. In *organ-building*, a reed-stop of large scale, so connected with a separate bellows with extra weights that the tones are of exceptional power and majesty. Usually called *tuba mirabilis*. — 3. In *anat.* and *zoöl.*, a tube or tubular part or organ; specifically, the Eustachian tube, or salpinx. See *hydra tuba* (under *hydra*), and cut under *scyphistoma*. — **Bass tuba,** a musical instrument, the largest of the trumpet family, and the deepest and most sonorous member of the brass wind division of the orchestra, having a large and long metal tube and five valves: its compass is about four octaves from the fourth A below middle C. It was invented in 1835. — **Dilatator tubæ.** See *dilatator*.

tubage (tū'bāj), *n.* [< *tube* + *-age*.] 1. In *gun.*, the act or process of lining a heavy gun by inserting a tube of wrought-iron, bronze, or steel.

> The present short steel tube has been the result of the essays in the *tubage* of guns.
> *Report of Chief of Ordnance*, 1882, p. 244.

2. In *med.*, the insertion of a tube into one of the passages, usually the esophagus or larynx; intubation. — **Tubage of the glottis.** Same as *intubation of the larynx* (which see, under *intubation*).

tubal (tū'bal), *a.* [< *tube* + *-al*.] In *med.*, of or relating to one of the passages called tubes in the body, more commonly the Fallopian tube. — **Tubal dropsy,** dropsy of one or both Fallopian tubes. — **Tubal nephritis,** Bright's disease of the kidneys. — **Tubal pregnancy,** the development of the embyro to some extent within the Fallopian tube instead of the uterus.

tubar (tū'bär), *a.* [< *tube* + *-ar*[3].] Same as *tubal*: as, *tubar* pregnancy.

tubarium (tū-bā'ri-um), *n.*; pl. *tubaria* (-ä). [NL., < L. *tubus*, pipe, tube: see *tube*.] A tube or system of tubes secreted and inhabited by polypides or polypites; a tubular zoœcium or zoöthecium.

tubate (tū'bāt), *a.* [< NL. **tubatus*, < L. *tubus*, tube: see *tube*.] Forming a tube; tubiform; tubar; tubular; also, provided with a tube or tubes; tubulate.

tubbeck (tub'ek), *n.* [Burmese.] A sash of silk, or silk and cotton, usually red, worn by women in Burma.

tubber (tub'ėr), *n.* [< *tub* + *-er*[1].] 1. A cooper. *Halliwell*. [Prov. Eng.] — 2. In *mining*, a sort of pickax. Also called *beele*.

tubber-man (tub'ėr-man), *n.* In *mining*, the man who uses a tubber. Also called *beele-man*.

tubbing (tub'ing), *n.* [Verbal n. of *tub*, *v.*] 1. The art of making tubs. — 2. Material for tubs. — 3. In *mining*, a method of keeping out the water in sinking a shaft in very watery ground; also, the material employed for this. It consists in providing a water-tight lining for the shaft, which is inserted piece by piece as the sinking progresses, thus reducing the extent of surface from which the water enters the shaft as quickly and as completely as is possible. Tubbing was formerly usually made of oak timber in France, where this method of sinking was first introduced; but iron has been employed in England, in the form both of segments of cylinders and of complete rings. Tubbing of masonry has also been used in England and Germany. 4. The act or process of bathing or of being bathed in a tub; a tub-bath.

> In spite of all the *tubbing*, rubbing, scrubbing,
> The routing and the grubbing,
> The Blacks, confound them! were as black as ever!
> *Hood*, A Black Job.

5. The act of racing in tubs. See *tub-race*.

> A good deal of *tubbing* has been got through in the mornings. *The Field*, March 5, 1887. (*Encyc. Dict.*)

tubbing-wedge (tub'ing-wej), *n.* A wedge of yellow pine, about 4 inches in length. Wedges of this kind are driven in between the joints of tubbing in order to make them water-tight.

tubbish (tub'ish), *a.* [< *tub* + *-ish*[1].] Like a tub; tubby; round and fat.

> He was a short, round, large-faced, *tubbish* sort of man. *Dickens*, Sketches, Characters, vii.

> You look for men whose heads are rather *tubbish*,
> Or drum-like, better formed for sound than sense.
> *Wolcot* (Peter Pindar), Works, p. 136. (*Davies.*)

tubby (tub'i), *a.* [< *tub* + *-y*[1].] 1. Tub-shaped; round like a tub or barrel.

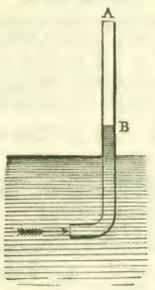
> We had seen him coming up to Covent Garden in his green chaise-cart with the fat, *tubby* little horse.
> *Dickens*, Sketches, Scenes, vi.

2. Having a sound like that of an empty tub when struck; sounding dull and without resonance: applied to stringed musical instruments.

tub-drubber† (tub'drub″ėr), *n.* A tub-thumper or tub-preacher. [Slang.]

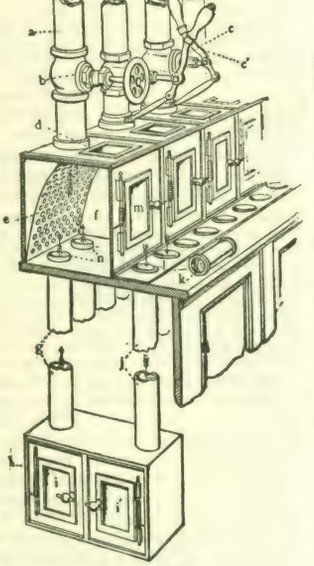
> Business and poetry agree as ill together as faith and reason: which two latter, as has been judiciously observ'd by the fam'd *tub-drubber* of Covent Garden, can never be brought to set their horses together.
> *Tom Brown*, Works, III. 198. (*Davies.*)

★**tube** (tūb), *n.* [< F. *tube* = Sp. Pg. It. *tubo*, < L. *tubus*, a pipe, tube; cf. *tuba*, a trumpet.] 1. A pipe or hollow cylinder, especially when of small size and used as a conduit for liquids, or for containing liquids, as in some forms of scientific apparatus. Mechanically there is no distinction between a *pipe* and a *tube*; but in use the two words are often somewhat arbitrarily distinguished. Thus, when the form of the thing is chiefly considered, *tube* is regularly used: as, a steam-boiler having the shape of a large *tube* — not *pipe*; so, also, with reference to certain mechanical uses one word or the other is exclusively used: as, a gas-*pipe*, a drain-*pipe*, a test-*tube*. The words are also distinguished in use, but less clearly, according to the material employed: as, an iron *pipe*, a rubber *tube*, a brass *tube*, etc.



> He lifts the *tube* [a gun], and levels with his eye;
> Straight a short thunder breaks the frozen sky.
> *Pope*, Windsor Forest, l. 129.

2. Specifically, the main body of a musical instrument of either the wood wind or the brass wind group. The bore of such instruments is usually conical, but sometimes cylindrical. — 3. In *anat.* and *zoöl.*, a hollow tubular organ; a pipe, canal, or duct conveying fluid or gas; especially, a pipe which seems to be empty — that is, conveys air: as, the bronchial *tubes*; the Eustachian *tube*. An artery or a vein is a tube, but nearly if not all the structures which convey special fluids receive distinctive names. See *tuba*, *tubule*. 4. In *bot.*, any hollow elongated body or part of an organ: applied especially to a gamopetalous corolla or gamosepalous calyx, also to a united circle of stamens (see cut 9 under *stamen*). — 5. A priming-tube. — 6. A telescope, or that part of it into which the lenses are fitted.



A spot like which, perhaps,
Astronomer in the sun's lucent orb
Through his glazed optic *tube* yet never saw.
Milton, P. L., iii. 590.

Philosophic *tube*,
That brings the planets home into the eye
Of Observation. *Cowper*, Task, iii. 229.

7. The barrel of a chain-pump.—**8.** A small receptacle of drawn lead, of approximately tubular form, closed at the bottom by bending it over twice or three times on itself, and having a screw-cap at the top, used to hold pigments or similar matter in a semifluid condition.—**Auricular tube.** See *auricular*.—**Bellini's tubes,** the excretory tubes of the kidneys, opening on the papilla.—**Bowman's corneal tubes.** See *corneal*.—**Bronchial tubes.** See *bronchial*.—**Capillary, cardiac, cerebromedullary, conarial tube.** See the adjectives.—**Circulating tubes,** tubes placed in steam-generators to afford or establish a circulation of the water.—**Conversation-tube.** See *conversation*.—**Crookes tubes.** See *vacuum-tube*.—**Dentinal, detonating, diffusion tube.** See the qualifying words.—**Esophageal tube.** Same as *stomach-tube*.—**Eustachian, Fallopian, gelatinous, hepatic tube.** See the qualifying words.—**Feeding-tube,** an elastic tube passed into the stomach, through which food is introduced.—**Geissler's tube,** an apparatus in which light is produced by an electric discharge through rarefied gases. It is used with the induction-coil, and consists of a sealed tube with platinum connections at each end, through which the electric spark is transmitted. The color and intensity of the light depend upon the nature of the gas with which the tube is charged.—**Impregnating-tube.** See *impregnate*.—**Intubation tube,** a short hollow cylinder of peculiar shape, having a flange at its upper extremity, which is inserted between the vocal cords in cases of laryngeal obstruction, especially in croup.—**Laryngeal tube,** a tube which is passed between the vocal cords, for insufflation in cases of asphyxia of the new-born.—**Leiter's tube or coil,** a long flexible tube made into a coil surrounding the body or a limb, through which hot or cold water is allowed to flow in order to raise or lower the temperature of the part.—**Lightning-tube.** Same as *fulgurite*.—**Lobular bronchial tube, Malpighian tubes, medullary tube.** See *lobular, Malpighian, medullary*.—**Milk-testing tubes,** a form of lactometer containing a number of tubes graduated alike, in which different samples of milk can be put for comparison under identical conditions.—**Muscular, nasal, pericentral tube.** See the adjectives.—**Pitot's tube,** in *hydraulics*, an instrument for ascertaining the velocity of water in rivers, etc.; a current-meter. It consists in its simplest form of a bent glass tube *A*, which is held in the water in such a manner that its lower end is horizontal, and opposed to the direction of the flowing water. In consequence of the momentum of the moving fluid, the level rises within the tube to a height *B*, proportional to the velocity of the stream.—**Pneumatic despatch tube.** See *pneumatic*.—**Pneumatic tube,** a tube through which packets of merchandise, or messages, as telegraphic despatches or items of news inclosed in suitable boxes, are rapidly transmitted from one point to another by means of air-pressure. The difference of pressure necessary to effect the desired movement may be produced by forcing air in behind the carrier-box, after placing the latter in the tube, or by exhausting air from the space in front; or both these methods may be employed.—**Postal tube, pyloric tube, receiving tubes of the kidney.** See the qualifying words.—**Rectal tube,** an elastic rubber tube introduced into the rectum to give exit to the intestinal gases, or to facilitate the giving of enemata.—**Resistance-tube,** in *elect.*, a tube containing powdered carbon, water, or other conducting material used for introducing resistance into an electric circuit. The resistance is usually made adjustable either by changing the distance between the terminal plates in the case of a fluid, or by compressing the conducting material in the case of a powder.—**Respiratory bronchial tube.** Same as *lobular bronchial tube*.—**Respiratory tube.** See *respiratory*.—**Salivary tubes of Pflueger.** See *salivary*.—**Test tube.** See *test-tube*.—**Torricellian tube.** See *Torricellian*.—**Tracheal tube,** the trachea or windpipe. See *trachea*.—**Tracheotomy-tube.** See *tracheotomy*.—**Tube of force,** in *elect.* and *magnetism*, a space bounded by a number of lines of force. The total electric force is constant across any section of a tube of force.—**Tube of safety.** Same as *safety-tube*.—**Tubes of Ferrein.** Same as *tubuli of Ferrein*.—**Uterine tubes,** the Fallopian tubes. See *Fallopian* and *uterus*.—**Visceral, vocal tube.** See the adjectives. (See also *air-tube, blowing-tube, breathing-tube, drainage-tube, stomach-tube, test-tube, vacuum-tube*.)

Pitot's Tube.
A, tube; *B*, line to which water is raised by the force of the current.

Pneumatic Tubes.
a, one of the exhaust-pipes connecting exhaust-fan apparatus with series of transmitting boxes of central station, one of which is shown in section at *f*; *b*, valve; *c*, different style of valve; *c'*, valve closed; *d*, window in top of box; *e*, perforated screen covering entrance to *a*; *g*, *f*, transmitting-tubes; *h*, single office-box consisting of two compartments, *i*, for sending, *i'*, for receiving messages, separated by perforated partition; *k*, carrier-box of leather of diameter to fit tubes, and adapted to contain message; *l*, open tubes for receiving and sending the carrier-boxes; *m*, door to box *f*, where messages are received through tubes *n*.

tube (tūb), *v. t.*; pret. and pp. *tubed*, ppr. *tubing*. [< *tube*, *n.*] **1.** To furnish with a tube or tubes.—**2.** To receive or inclose in a tube.

A recent improvement in the spinner *tubes* the yarn, rendering it smoother and more even than any process yet devised, leaving little to be desired in the manufacture of rope. *Luce*, Seamanship, p. 598.

tube-bearing (tūb′bâr″ing), *a.* In *entom.*, tubuliferous: specifically noting the *Tubulifera*.

tube-board (tūb′bōrd), *n.* See the quotation.

The channels, the resonators above the reeds, are not varied in size or shape [in the American reed-organ] as in the harmonium; they exactly correspond with the reeds, and are collectively known as the *tube-board*.
Encyc. Brit., XI. 483.

tube-breather (tūb′brē″ᴛʜĕr), *n.* Any animal which breathes through tubes, tracheæ, or spiracles; a tracheate, as an insect: distinguished from *gill-breather*.

tube-brush (tūb′brush), *n.* A cylindrical or spiral wire brush used to clean the flues of a steam-boiler.

tube-cast (tūb′kȧst), *n.* A minute cylinder found in the urine in certain forms of Bright's disease. They are formed in the tubules of the kidneys. See *renal cast*, under *cast*[1].

tube-clamp (tūb′klamp), *n.* **1.** A clamp for engaging by compression and frictional contact the outer surface of a tube or pipe. Also *tube-clip*.—**2.** In *well-boring*, a tool for lifting well-tubing and drawing it up. It consists of two jaws which can be clamped securely on the tube, each jaw having a bail in which the tackle-hook engages. *E. H. Knight*.

tube-cleaner (tūb′klē″nėr), *n.* An instrument for scraping or brushing out the interiors of tubes, as a steel brush, a combination of steel springs arranged spirally about an axis, etc.

tube-clip (tūb′klip), *n.* **1.** A form of tongs used by chemists, etc., for holding heated tubes or similar objects. *E. H. Knight*.—**2.** Same as *tube-clamp*, 1.

tube-cock (tūb′kok), *n.* A cock consisting of a nozle within which is inserted an india-rubber tube with a screw-valve to compress it when the opening is to be closed.

tube-colors (tūb′kul″ọrz), *n. pl.* See *color*.

tube-compass (tūb′kum″pas), *n.* A draftsmen's compass, having tubular legs containing sliding extension-pieces adjustable to any required length by means of set-screws.

tube-coral (tūb′kor″al), *n.* Tubipore.

tube-cutter (tūb′kut″ėr), *n.* A tool for cutting metallic tubes. The usual forms have a jaw to grasp the pipe, and an adjustable rotary cutter. *E. H. Knight*.

tube-door (tūb′dōr), *n.* In a steam-boiler setting, a door in the outer plate of a smoke-chamber, affording access to the tubes for examination and cleaning. *E. H. Knight*.

tube-drawing (tūb′drâ″ing), *n.* The forming of tubes by drawing them down from thick cylinders.

tube-ferrule (tūb′fer″il), *n.* In a steam-boiler, a short slightly tapered copper sleeve driven over the end of a tube between the tube and the tube-sheet which supports the end, to make the joint tight by the compression of the softer metal when the tube is expanded in place.

tube-filter (tūb′fil″tėr), *n.* A chamber with porous or perforated walls, placed at the bottom of a driven well-tube or a pump suction-tube, to exclude gravel and other foreign matter.

tube-flower (tūb′flou″ėr), *n.* An ornamental shrub, *Siphonanthus Indica*, native in the East Indies, widely cultivated in the tropics. It is an erect plant with few straight branches, and bears panicled white flowers with a very long curving corolla-tube (whence the name).

tube-flue (tūb′flö), *n.* In a furnace, a tube through which flame passes. *E. H. Knight*.

tube-foot (tūb′fůt), *n.*; pl. *tube-feet* (-fēt). One of the numerous tubular locomotory pedicels of the ambulacra of echinoderms, as star-fishes and sea-urchins; a water-foot.

tube-form (tūb′fôrm), *a.* Same as *tubiform*.

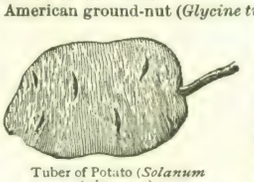
tube-germination (tūb′jėr-mi-nā″shọn), *n.* In *bot.*, the germination of a spore which first produces a germ-tube.

tube-hearted (tūb′härʺted), *a.* Having a simple tubular heart: specifying the *Leptocardia*.

tube-machine (tūb′ma-shēnʺ), *n.* A machine for making tubes or pipes; a tube-drawing machine.

tube-nosed (tūb′nōzd), *a.* Having tubular nostrils, as a petrel; tubinarial. See *Tubinares*.

tube-plate (tūb′plāt), *n.* In steam-boilers, same as *flue-plate*.



tube-plug (tūb′plug), *n.* In locomotive boilers, a plug for driving into the end of defective tubes.

tube-pouch (tūb′pouch), *n.* A pouch for holding priming-tubes.

tuber (tū′bėr), *n.* [< L. *tuber*, a bump, swelling, tumor, knob on plants, truffle, etc.; perhaps < √ *tu* in *tumere*, swell. Hence ult. prob. *truffle*.] **1.** In *bot.*, a subterranean body, usually of an oblong or rounded form, consisting morphologically of a stolon-like branch of a rhizome, much thickened, commonly at the end, and beset with "eyes," which are properly modified axillary buds. Some of these buds normally sprout the second season, giving rise to a new plant, for the nourishment of which the tuber is richly stored with starch. Typical examples are the common potato and the Jerusalem artichoke (see *Helianthus*, with cut); less familiar are the tubers of the dwarf dandelion (*Krigia Dandelion*), the American ground-nut (*Glycine tuberosa*), and the ground-nut of Great Britain, *Conopodium majus*. Moniliform tubers occur, as in *Equisetum fluviatile* (see *moniliform*) and *Hydrocotyle Americana* (see *Hydrocotyle*). Strictly, the tuber is to be distinguished from the tubercle (see *tubercle* (*d*) (3)) and the tuberous root (see *tuberous*); but the term often embraces these, especially the former.

The rhizome of *Krigia Dandelion*, showing the tubers, *T*, at the end of the long stolons, *S*, and one larger tuber from which the plant has been developed; *C*, stem, underground; *R*, roots.

Tuber of Potato (*Solanum tuberosum*).

2. [*cap.*] [NL.] A genus of subterranean discomycetous fungi, the truffles, having the peridium warty or tubercled, without definite base, the asci ovoid or globose, and one- to three- or (rarely) four-spored. About 50 species are known. *T. æstivum* is the common truffle. See *truffle* (with cut).—**3.** In *pathol.*, *anat.*, and *zoöl.*, some rounded swelling part; a tuberosity; a tubercle; a knot or swelling which is not the result of disease: used chiefly as a Latin word (with Latin plural *tubera*).—**Olfactory tuber.** Same as *caruncula mammillaris* (which see, under *caruncula*).—**Tuber annulare,** the annular tuber of the brain; the pons Varolii.—**Tuber calcis,** the tuberosity of the calcaneum; the backward projection of the bone of the heel.—**Tuber cinereum,** a conical projection from the lower part of the cerebrum, just behind the optic chiasma and in front of the corpora albicantia.—**Tuber cochleæ,** the promontory of the tympanum. See *promontory*, 2 (*b*).—**Tuber ischii.** See *ischium*.—**Tuber radii,** the tuberosity of the radius, for the attachment of the biceps

Tuberaceæ (tū-bẹ-rā′sẹ̄-ē), *n. pl.* [NL., < L. *tuber*, a tuber, + *-aceæ*.] A family of hypogeal or subepigeal discomycetous fungi, typified by the genus *Tuber*, having the gleba traversed by veins, and one- to eight-spored asci.

Serpent Tuberated.

tuberated (tū′bẹ-rā-ted), *a.* [< LL. *tuberatus*, covered with knots or bosses (< L. *tuber*, a knob, boss: see *tuber*), + *-ed*[2].] In *her.*, having a rounded projection, or more than one. A serpent *tuberated* is tied in a knot or a close coil near the middle of the body.

tubercle (tū′bėr-kl), *n.* [< OF. *tubercle*, F. *tubercule* = Sp. *tubérculo* = Pg. It. *tuberculo*, < L. *tuberculum*, a small swelling, a pimple, tubercle, dim. of *tuber*, a swelling: see *tuber*.] A little tuber, or tubercule; a small tuberosity; especially, a small projection of a bone, for the attachment of a ligament or tendon, as of the femur, hyoid, scaphoid, ulna, tibia, zygoma,

etc. See *tuberculum* and *tuberosity*. (*a*) A small rough elevation of the surface; a wart or pimple; a hard papilla; a little swelling: as, *tubercles* about the base of the bill of a bird, or on a toad's back. (*b*) In *Echinidæ*, one of the numerous small rounded elevations of the body-wall to which the spines are articulated. See *Echinidæ*, and cuts under *Echinus*, *Echinoidea*, and *semita*. (*c*) In *pathol.*: (1) A hard, circumscribed, rounded elevation or nodule on the surface of the body or an organ. (2) A nodular mass of varying size, composed of granulation-cells, which often undergo caseation: the characteristic lesion of tuberculosis. (3) The affection called tuberculosis. (*d*) In *bot.*: (1) Any wart-like or knob-like excrescence. (2) A very small tuber. (3) A root-growth resembling a tuberous root (see *tuberous*), except that it bears adventitious buds, especially near the top, thus approaching a tuber, whose buds, however, are normal: the sweet potato is an example; also, a tumefied kind of root produced by species of *Orchis* and related genera, definite in number and shape, apparently developed from the base of buds on the lower end of the stem, as in *Orchis maculata* and *Arachnites apifera* (see cuts under *palmate* and *Ophrys*). Compare *tubercule*. (*e*) In *entom.*, same as *supplementary eye* (which see, under *supplementary*). —**Acoustic, amygdaloid, carotid tubercle.** See the adjectives.—**Anatomical tubercle,** in *pathol.*, a wart-like growth often seen on the hands of those who constantly dissect or make post-mortem examinations.—**Conoid tubercle,** a roughness of the clavicle for the attachment of the conoid ligament.—**Cuneate tubercle,** the slight eminence of the cuneate funiculus on a level with the adjoining clava.—**Cuneiform tubercles.** See *cuneiform*.—**Darwin's tubercle,** a nodule on the edge of the helix of the human ear, believed to be the vestige of the point of a pointed ear, such as is attributed to the fauns and satyrs of classic mythology, and as man may have had in an early stage of evolution of the human species.—**Deltoid tubercle.** (*a*) A roughness on the clavicle for the attachment of the deltoid ligament. (*b*) A roughness on the humerus for the insertion of the deltoid muscle: usually called *deltoid ridge*.—**Genial tubercles.** See *genial*[2].—**Genital tubercle,** the first appearance of the external organs of generation in the fetus.—**Lacrymal tubercle,** a small projection of the superior maxillary bone, at the beginning of the lacrymal duct: a guide to the surgeon in operations upon the duct.—**Laminated tubercle.** Same as *nodule* (*a*).—**Madreporic tubercles.** See *madreporic*.—**Mammillary tubercle.** See *mammillary*.—**Mental tubercles.** Same as *genial tubercles*.—**Miliary tubercle.** Same as *grutum*.—**Ocular tubercle.** Same as *eye-eminence*.—**Olfactory tubercle.** Same as *caruncula mammillaris* (which see, under *caruncula*).—**Optic tubercles.** See *optic*.—**Pearly tubercle.** Same as *grutum*.—**Pharyngeal, plantar, scalene tubercle.** See the adjectives.—**Posterior tubercle of the thalamus.** Same as *pulvinar*, 2.—**Supra-anal tubercle.** See *supra-anal*.—**Tubercle-bacillus,** the bacillus characteristic of tuberculosis. See cut under *tuberculosis*.—**Tubercle of a rib,** the shoulder of a rib, which articulates with the transprocess of the corresponding vertebra; a tuberculum.—**Tubercle of Lower,** a prominence, not constant, between the orifices of the superior and inferior venæ cavæ in the right auricle.—**Tubercle of Rolando.** Same as *tuberculum cinereum Rolandi* (which see, under *tuberculum*).—**Tubercle of the epiglottis.** See *cushion of the epiglottis*, under *epiglottis*.—**Tubercle of the ulna,** the rough area at the base of the coronoid process, for the attachment of the brachialis anticus muscle.

tubercled (tū'bėr-kld), *a.* [< *tubercle* + *-ed*[2].] In *bot.*, *zoöl.*, and *pathol.*, tuberculate; provided with or affected by tubercles.

tubercula, *n.* Plural of *tuberculum*.

tubercular (tū-bėr'kū-lăr), *a.* [= F. *tuberculaire* = Sp. *tubercular*, < NL. **tubercularis*, < L. *tuberculum*, tubercle: see *tubercle*.] 1. Formed like a tubercle; forming a tubercle; shaped into a little tuber or tuberosity: as, *tubercular* elevations.—2. Having tubercles; tuberculate.—3. In *pathol.*, commonly used as synonymous with *tuberculous*; more precisely, physically resembling tubercles.—**Tubercular consumption,** tuberculosis of the lungs.—**Tubercular laryngitis,** tuberculosis of the larynx; laryngeal phthisis.—**Tubercular leprosy,** a form of leprosy characterized by the presence of maculæ or of nodules of varying size on the surface of the body, especially the face; leontiasis; elephantiasis Græcorum.—**Tubercular meningitis,** an inflammation of the meninges of the brain, usually in children, due to the action of the tuberculous poison; acute hydrocephalus.—**Tubercular peritonitis.** See *peritonitis*.—**Tubercular phthisis,** tuberculosis, especially tuberculosis of the lungs.—**Tubercular process,** an elevation on the transverse process of a vertebra supporting the facet that articulates with the tubercle of the corresponding rib.—**Tubercular sputum,** the sputum of one suffering from pulmonary tuberculosis, usually containing large numbers of the tubercle-bacilli. It is a common means of spreading the contagion of tuberculosis.

Tubercularia (tū-bėr-kū-lā'ri-ą), *n.* [NL. (Tode, 1790), < L. *tuberculum*, tubercle: see *tubercle*.] A genus of hyphomycetous fungi, having the conidia on filiform, usually branched sporophores, which are ovoid or oblong, hyaline, and typically solitary. About 70 species have been described. Some of them are known to be the conidial condition of certain species of *Nectria*. *T. vulgaris* is common on dead branches.

Tuberculariæ (tū-bėr″kū-lā-rī'ē-ē), *n. pl.* [NL. (Ehrenberg, 1818), < *Tubercularia* + *-æ*.] A family of hyphomycetous fungi, with tuberculate fruiting bodies.

tubercularize (tū-bėr'kū-lăr-īz), *v. t.*; pret. and pp. *tubercularized*, ppr. *tubercularizing*. [< *tubercular* + *-ize*.] To infect with tuberculosis.

Spittoons should always be emptied into the fire, and cleansed with boiling water. They should never be emptied on dung heaps, on garden soil (where they may *tuberculize* fowl) . . . *Science*, XIV. 177.

tubercul© arly (tū-bėr'kū-lăr-li), *adv.* With regard to a tubercle or tubercles; so as to exhibit tubercles. *Pop. Sci. Mo.*, XXXVI. 260.

tuberculate (tū-bėr'kū-lāt), *a.* [< NL. *tuberculatus*, < L. *tuberculum*, tubercle: see *tubercle*.] Same as *tubercular*.

tuberculated (tū-bėr'kū-lā-ted), *a.* [< *tuberculate* + *-ed*[2].] Same as *tuberculate*.

tuberculation (tū-bėr-kū-lā'shọn), *n.* [< *tuberculate* + *-ion*.] The formation of tubercles; the disposition or arrangement of a set of tubercles; a tubercular part, organ, or system.

tubercule (tū'bėr-kūl), *n.* [< F. *tubercule*, < L. *tuberculum*: see *tubercle*.] 1. A tubercle or tuberculum.—2. In *bot.*, any root of a class embracing both tuberous roots and tubercles: used specifically by Lindley.—**Cineritious tubercule.** (*a*) The tuber cinereum. (*b*) The tuberculum cinereum of Rolando.

tuberculi, *n.* Plural of *tuberculus*.

tuberculiform (tū-bėr'kū-li-fôrm), *a.* [< L. *tuberculum*, tubercle, + *forma*, form.] Like a ★tubercle in form; tubercular.

tuberculin (tū-bėr'kū-lin), *n.* [< *tuberculum* + *-in*[2].] 1. A liquid prepared by Koch (first in 1890) from cultures of tubercle-bacillus, administered by hypodermic injection in tuberculosis as a therapeutic or diagnostic measure. Also called *Koch's lymph*, *Koch's specific*, and *paratoloid*.—2. A toxin formed during the growth of the tubercle bacillus.

tuberculization (tū-bėr″kū-li-zā'shọn), *n.* [= F. *tuberculisation*; as *tubercule* + *-ize* + *-ation*.] In *pathol.*, the formation of tubercles, or the condition of becoming tubercled.

tuberculize (tū-bėr'kū-līz), *v. t.*; pret. and pp. *tuberculized*, ppr. *tuberculizing*. [< *tubercule* + *-ize*.] Same as *tubercularize*. *Medical News*, LIII. 187.

tuberculoid (tū-bėr'kū-loid), *a.* [< *tubercule* + *-oid*.] In *zoöl.*, having the appearance or shape of a tubercle; tuberculiform.

tuberculose (tū-bėr'kū-lōs), *a.* [< NL. *tuberculosus*: see *tuberculous*.] Tuberculate.

tuberculosed (tū-bėr'kū-lōst), *a.* [< *tuberculosis* + *-ed*[2].] In *pathol.*, affected with tuber-★culosis. *Medical News*, LIII. 216.

tuberculosis (tū-bėr-kū-lō'sis), *n.* [NL., < L. *tuberculum*, tubercle, + *-osis*.] A specific disease affecting most of the tissues of the body, characterized by the formation of tubercles and the presence in the diseased parts of the tubercle-bacillus.—**Acute miliary tuberculosis,** an acute affection characterized by the deposit of large numbers of minute tubercules in various organs of the body, accompanied by high fever, rapid pulse, and marked prostration; galloping or quick consumption. The disease is almost always rapidly fatal.—**Laryngeal tuberculosis.** Same as *tubercular laryngitis* (which see, under *tubercular*).—**Pulmonary tuberculosis,** tuberculosis of the lungs, popularly called consumption.

Bacillus tuberculosis, very highly magnified.

tuberculous (tū-bėr'kū-lus), *a.* [= F. *tuberculeux* = Sp. Pg. *tuberculoso* = It. *tubercoloso*, < ML. **tuberculosus*, < L. *tuberculum*, a tubercle: see *tubercle*.] 1. Tubercular; tuberculate.—2. In *pathol.*, affected by tubercles; exhibiting or containing tubercles.—3. Pertaining to or of the nature of tuberculosis.

Greek elephantiasis . . . is a *tuberculous* disease affecting especially the skin, the mouth, and the nasal fossæ, and the organs of voice and respiration.
J. M. Carnochan, Operative Surgery, p. 39.

Tuberculous arthritis, tuberculosis of a joint.—**Tuberculous inflammation,** inflammation caused by the ★presence of the tubercle-bacillus.

tuberculum (tū-bėr'kū-lum), *n.*; pl. *tubercula* (-lą). [L.: see *tubercle*.] 1. A little tuber; a small tuberosity.—2. In *pathol.*: (*a*) A hard, circumscribed, rounded elevation of small size on the surface of the body or an organ. (*b*) A nodule, of varying size, composed chiefly of granulation-cells: the characteristic lesion of tuberculosis.—**Tubercula quadrigemina,** the corpora quadrigemina. See *corpus*.—**Tuberculum annulare,** the pons Varolii.—**Tuberculum cinereum Rolandi,** an eminence between the cuneate funiculus and the posterolateral groove of the oblongata, formed by the approach of the caput cornu posterioris to the surface.—**Tuberculum dolorosum,** a small painful nodule; neuroma.—**Tuberculum hypoglossi.** Same as *trigonum hypoglossi*.—**Tuberculum mallei.** Same as *short process of malleus* (which see, under *process*).—**Tuberculum of a rib,** the protuberance or shoulder by which a rib abuts against a transverse process of a vertebra, as opposed to its head or capitulum. See cut under *endoskeleton*.—**Tuberculum pubis, tuberculum pubicum.** Same as *pubic spine* (which see, under *pubic*).—**Tuberculum sellæ,** the olivary eminence. See *olivary*.

tuberculus (tū-bėr'kū-lus), *n.*; pl. *tuberculi* (-lī). [NL.: see *tuberculum*, *tubercle*.] In *entom.*, same as *supplementary eye* (which see, under *supplementary*).

tube-retort (tūb'rẹ-tôrt″), *n.* A chemical retort consisting of a glass tube having one end closed, and sometimes made with an enlarged bulb. *E. H. Knight.*

tuberiferous (tū-bẹ-rif'e-rus), *a.* [< L. *tuber*, a tuber, + *ferre* = E. *bear*[1].] Producing or bearing tubers: as, a *tuberiferous* root. See cut under *moniliform*.

tuberiform (tū'bėr-i-fôrm), *a.* [< L. *tuber*, a tuber, + *forma*, form.] In *bot.*, tuber-shaped.

tuberon† (tū'bėr-ọn), *n.* [< OF. *tiburon*, < Sp. *tiburón*, a shark.] A shark.

There waited on our ship fishes as long as a man, which they call *Tuberones*.
T. Stevens, 1579 (Arber's Eng. Garner, I. 133). (*Davies.*)

tuberose[1] (tū'bẹ-rōs), *a.* [< L. *tuberosus*, tuberous: see *tuberous*.] Tuberous; having knobs or tubers.

tuberose[2] (tū'bẹ-rōs or tūb'rōz: see the etymology), *n.* [= F. *tubéreuse* = Sp. Pg. *tuberosa* = It. *tuberoso* = G. *tuberose*, < NL. *tuberosa*, the specific name of *Polianthes tuberosa*; prop. fem. of L. *tuberosus*, tuberous: see *tuberose*[1], *tuberous*. The name has become popularly confused with *rose*, and is, though prop. pronounced tū'bẹ-rōs, commonly pronounced tūb'rōz, as if < *tube* + *rose*[1].] A garden and greenhouse bulb, *Polianthes tuberosa*, much cultivated for its creamy-white, exceedingly fragrant flowers. These have a funnel-shaped perianth with thick lobes, often doubled, and are racemed at the summit of a wand-like stem 2 or 3 feet high. An American variety called the *pearl* has a much lower stem with larger flowers, and is preferred for forcing. In northern latitudes the bulbs are imported—in Europe, from France and Italy, and in the northern United States, formerly from Europe, but they are now grown in North Carolina or even in New Jersey. Where the season is short, the bulb is sprouted under cover before setting out. The tuberose affords a perfumers' oil.
★—**Wild tuberose.** See *Spiranthes*.

tuberosity (tū-bẹ-ros'i-ti), *n.*; pl. *tuberosities* (-tiz). [< F. *tubérosité* = Sp. *tuberosidad* = Pg. *tuberosidade* = It. *tuberosità*, < ML. **tuberosita(t-)s*, < L. *tuberosus*, tuberous: see *tuberous*.] 1. The state of being tuberous.—2. A swelling or prominence; especially, in *anat.* and *zoöl.*, a large rough projection or protuberance of bone; a bony tuber, generally serving for the attachment of a muscle: as, the *tuberosity* of the ischium, or tuber ischii; the greater and lesser *tuberosities* of the humerus. Small tuberosities of bone are generally called *tubercles*. See cuts under *crus*, *femur*, *humerus*, and *innominatum*.

Whether he . . . swell out in starched ruffs, buckram stuffings, and monstrous *tuberosities*.
Carlyle, Sartor Resartus, i. 5.

Gluteal tuberosity. Same as *gluteal ridge* (which see, under *gluteal*).

tuberous (tū'bėr-us), *a.* [< OF. *tubereux*, F. *tubéreux* = Sp. Pg. It. *tuberoso*, < L. *tuberosus*, full of lumps or protuberances, < *tuber*, a knob, lump: see *tuber*.] 1. Covered with knobby or wart-like prominences; knobbed.—2. In *bot.*, of the nature of or resembling a tuber; bearing tubers.—**Tuberous angioma,** a subcutaneous form of angioma, resembling at times lipoma.—**Tuberous pea.** Same as *heath-pea*. See also *knapperts*.—**Tuberous root,** a true root, commonly one of a fascicle, so thickened by the storage of nutriment as to resemble a tuber. It bears no buds itself, but nourishes those produced on the persistent base of the stem. The root of the dahlia is an example. See cut under *root*[1].

tuberously (tū'bėr-us-li), *adv.* With tubers or with tuberosity. *Bull. of Ill. State Laboratory*, II. 28.

tuberousness (tū'bėr-us-nes), *n.* The state or character of being tuberous; tuberosity.

tuberous-rooted (tū'bėr-us-rö″ted), *a.* An epithet properly of plants with tuberous roots, but more often applied to those bearing true tubers.

tube-scaler (tūb'skā″lėr), *n.* A tube-cleaner for cleansing the interior of steam-boiler flues from soot and incrustations. *E. H. Knight.*

tube-scraper (tūb'skrā″pėr), *n.* A tube-cleaner; especially, one with springs or blades, as distinguished from one made of wire.

tube-sheet (tūb'shēt), *n.* Same as *flue-plate*.—**Tube-sheet cutter,** a tool for cutting holes to receive the tubes in the tube-sheets of boilers. *E. H. Knight.*

tube-shell (tūb'shel), *n.* A bivalve mollusk of the family *Gastrochænidæ* in a broad sense, or

Tubicolidæ, as the watering-pot shell and related forms. They agree in secreting a shelly tube about the long siphons, and in extreme cases this formation makes them look very unlike ordinary bivalves. The case is like that of the related teredos or ship-worms. Both valves may be of considerable size and separate from the tube (see cut under *Gastrochæna*), or one may be free from the tube and the other fixed to it, as in *Clavagella;* or both may be very small and soldered to a large tube of singular construction, as in the true watering-pots. See cut under *watering-pot.*

tube-spinner (tūb'spin″ėr), *n.* A tube-weaver.

tube-valve (tūb'valv), *n.* A valve which is made by causing a hollow tube with beveled edges to fit into the top of an opening in a pipe, the opening being formed in the seat for such a hollow valve.

tube-vise (tūb'vīs), *n.* A vise especially adapted for seizing tubes or pipes; a pipe-vise.

tube-weaver (tūb'wē″vėr), *n.* Any spider of the group *Tubicolæ* or *Tubitelæ;* a tube-spinner. ★Compare *orb-weaver, tunnel-weaver,* etc.

tube-well (tūb'wel), *n.* A device for obtaining water from beneath the ground, consisting of a wrought-iron pipe armed with a sharp point, and having a series of perforations at the lower end above the point. It is driven into the soft ground until water is reached. For many localities, where water is comparatively near the surface, a tube-well answers for all domestic purposes. In soils where the water is abundant near the surface, four or more tube-wells may be driven a few feet apart and united at the top by branch pipes, and may serve to supply a steam fire-engine, etc., by a direct connection, or to feed a steam-pump. It is commonly called, in the United States, a *driven well,* or *drive-well.*

tube-worm (tūb'wėrm), *n.* A tubicolous worm; one of the sedentary annelids which live in cases; especially, a serpula. See *Tubicolæ*, 2 (*b*).

tub-wrench (tūb'rench), *n.* A pipe-wrench.

tub-fake (tub'fāk), *n.* A coil of tow-line in the line-tub of a whale-boat. *J. W. Collins.*

tubfast† (tub'fȧst), *n.* A process of treatment for the cure of venereal disease by sweating in a heated tub for a considerable time, during which strict abstinence had to be observed.

> Bring down rose-cheeked youth
> To the *tub-fast* and the diet.
> *Shak.*, T. of A., iv. 3. 87.

tub-fish (tub'fish), *n.* The sapphirine gurnard, *Trigla hirundo.* See *gurnard.* [Local, Eng.]

tubful (tub'fůl), *n.* [< *tub* + *-ful.*] A quantity sufficient to fill a tub; as much as a tub will hold.

tub-gig (tub'gig), *n.* A Welsh car. See the quotation.

> The brothers [Carlyle] went in a steamer from Liverpool to Bangor, and thence to Llanberis, again in a *tub-gig,* or Welsh car. *Froude,* Carlyle (Life in London, xi.).

tubi, *n.* Plural of *tubus.*

tubicen (tū'bi-sen), *n.* [L., a trumpeter, < *tuba,* trumpet, + *canere,* sing, play.] A trumpeter.

tubicinate (tū-bis'i-nāt), *v. i.*; pret. and pp. *tubicinated,* ppr. *tubicinating.* [< L. *tubicen* (*-cin-*), a trumpeter (see *tubicen*), + *-ate*[1].] To blow a trumpet. [Rare.]

Tubicolæ (tū-bik'ō-lē), *n. pl.* [NL., pl. of *tubicola:* see *tubicole.*] **1.** A group of spiders which spin and inhabit a tubular web of silk, often strengthened outside with leaves or other materials; the tube-spinners. Compare *Tubitelæ.* —**2.** A group of annelids. (*a*†) In Cuvier's classification, the first order of *Annelides,* consisting of such genera as *Serpula, Sabella, Terebella, Amphitrite,* and *Dentalium:* thus a heterogeneous association of certain mollusks and worms. (*b*) Now, the sedentary or tubicolous annelids, or those worms which live in tubes. They comprise a part of the polychætous annelids, and include several families, as *Serpulidæ, Sabellidæ, Terebellidæ, Amphictenidæ,* and others. They are also called *Sedentaria,* from their habits (as distinguished from *Errantia*), and *Cephalobranchia* or *Capitibranchia,* for the reason that the branchial organs are confined to the head or anterior part of the body. These are the processes which project so conspicuously from the tube. The tubes are of various substance and texture; they may be calcareous secretions of the animal, as in the serpulas, or composed of sandy and shelly or stony grit agglutinated together by a viscid secretion, as in the terebellas and others, or simply membranous. The tubes are straight or curved, sometimes spirally coiled, and usually form a complete case or covering into which the animal can withdraw for protection. Also *Tubicolidæ.* See also cuts under *Protula* and *Serpula.*

A Serpula, one of the *Tubicolæ*, withdrawn from its tube, which is shown separately.

tubicolar (tū-bik'ō-lȧr), *a.* [< *tubicole* + *-ar*[3].] Same as *tubicolous.*

> Spirorbis and other *tubicolar* annelids occur as early as the Silurian period. *Pascoe,* Zoöl. Class., p. 62.

tubicole (tū'bi-kōl), *a.* and *n.* [< NL. *tubicola,* living in a tube (i. e. in a tubular web), < L. *tubus,* tube, + *colere,* dwell, inhabit.] **I.** *a.* Inhabiting a tube or a tubular web, as a spider; tubicolar or tubicolous, as an annelid.

II. *n.* A tubicolous annelid.

Tubicolidæ (tū-bi-kol'i-dē), *n. pl.* [NL., < *Tubicolæ* + *-idæ.*] **1.** In *conch.*, a family of bivalves: same as *Gastrochænidæ.* See *tube-shell.* —**2.** Same as *Tubicolæ*, 2 (*b*).

tubicolous (tū-bik'ō-lus), *a.* [< *tubicole* + *-ous.*] In *zoöl.*, inhabiting a tube; tubicole; tubicolar; spinning a tubular web, as a spider; secreting a tubular case, as an annelid or a rotifer; having a tubular or fistulous shell, as a mollusk. See *Tubicolæ, tube-shell,* and cuts under *Protula* and *Serpula.* —**Tubicolous rotifers,** those wheel-animalcules, as distinguished from the free forms, which are inclosed in gelatinous cases which they secrete. The elongated body ends behind in an adhesive disk, by which the animalcules, singly or several together, are fixed. The foot or peduncle, by which they are attached, is a process of the neural side of the body, and thus differs from the foot of most free rotifers, which is a median process from the opposite side of the body, usually segmented and ending in a pair of movable stylets.

tubicorn (tū'bi-kôrn), *a.* and *n.* [< L. *tubus,* tube, + *cornu,* horn.] **I.** *a.* Hollow-horned, as a ruminant; cavicorn.

II. *n.* A tubicorn or cavicorn ruminant.

Tubicornia (tū-bi-kôr'ni-ȧ), *n. pl.* [NL.: see *tubicorn.*] The hollow-horned ruminants: same as *Cavicornia.*

tubifacient (tū-bi-fā'shient), *a.* [< L. *tubus,* tube, + *facien(t-)s,* ppr. of *facere,* make.] Constructing a tube in which to dwell; tubicolous.

tubifer (tū'bi-fėr), *n.* [< L. *tubus,* tube, + *ferre* = E. *bear*[1].] That which bears a tube, as a tubicolous annelid.

tubiflorous (tū'bi-flō-rus), *a.* [< L. *tubus,* tube, + *flos* (*flor-*), flower.] In *bot.*, having tubular flowers or florets.

tubiform (tū'bi-fôrm), *a.* [= F. *tubiforme,* < L. *tubus,* tube, + *forma,* form.] Tubular; canalicular; having the form or character of a tube. Also *tubæform.*

tubilingual (tū-bi-ling'gwȧl), *a.* [< L. *tubus,* tube, + *lingua,* tongue: see *lingual.*] Having a tubular tongue, as various honey-suckers and other birds.

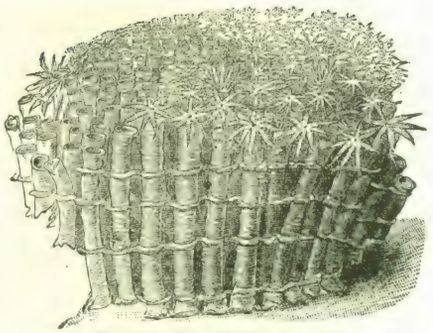
Tubilingues (tū-bi-ling'gwēz), *n. pl.* [NL.: see *tubilingual.*] In *ornith.*, in Sundevall's system, a synonym of *Cinnyrimorphæ:* so named because the long extensile tongue constitutes a tubular suctorial organ.

Tubinares (tū-bi-nā'rēz), *n. pl.* [NL. (Illiger, 1811), < L. *tubus,* tube, + *nares,* nostrils.] The tube-nosed or tubinarial water-birds, having the nostrils formed into a tube which lies upon the base of the culmen, as in the petrels, or into a pair of tubes, one on each side of the base of the bill, as in the albatrosses; the petrel family, or *Procellariidæ.* Also called *Nasutæ.* See cuts under *albatross, fulmar, hagden,* and *Œstrelata.*

tubinarial (tū-bi-nā'ri-ȧl), *a.* [As *Tubinares* + *-ial.*] Having tubular nostrils, as a petrel; ★tube-nosed; of or pertaining to the *Tubinares.*

tubing (tū'bing), *n.* [Verbal n. of *tube, v.*] **1.** The act of making tubes, or providing with tubes. —**2.** A tube or tubes collectively: as, ten feet of *tubing.* —**Rubber tubing,** flexible tubing made of caoutchouc. Such tubing is made impervious to coal-gas by coating it with a solution of sodium silicate, or water-glass.

Tübingen school. See *school*[1].



tubiparous (tū-bip'ȧ-rus), *a.* [< L. *tubus,* tube, + *parere,* produce.] Giving rise to tubes or tubules: as, a *tubiparous* gland. *Micros. Sci.,* XXXI. 186.

Tubipora (tū-bip'ō-rȧ), *n.* [NL. (Linnæus, 1748), < L. *tubus,* tube, + *porus,* pore, passage.] The leading genus of *Tubiporidæ,* or organ-pipe corals. *T. musica* is the best-known species. See cut in next column.

Tubiporaceæ (tū″bi-pō-rā'sē-ē), *n. pl.* [NL., neut. pl. of *tubiporaceus:* see *tubiporaceous.*] An order of alcyonarian polyps, containing the *Tubiporidæ* or organ-pipe corals.

tubiporacean (tū″bi-pō-rā'sē-ȧn), *a.* and *n.* [< *tubiporace-ous* + *-an.*] Same as *tubipore.*

tubiporaceous (tū″bi-pō-rā'shius), *a.* [< L. *tubus,* tube, + *porus,* pore, passage, + *-aceous.*] Having the character of organ-pipe coral; belonging to the *Tubiporaceæ.*

Organ-pipe Coral (*Tubipora musica*).

tubipore (tū'bi-pōr), *a.* and *n.* [< L. *tubus,* tube, + *porus,* poro, passage.] **I.** *a.* Having tubular corallites, each one of which opens by a pore; tubiporaceous; belonging to the *Tubiporidæ.*

II. *n.* An organ-pipe coral.

Tubiporidæ (tū-bi-por'i-dē), *n. pl.* [NL., < *Tubipora* + *-idæ.*] A family of alcyonarian polyps, typified by the genus *Tubipora,* which secrete a hard corallum in the form of tubular thecæ bound together by epithecæ and without internal septa; the organ-pipe corals. The polyps have eight pinnately fringed tentacles, and are therefore octocoralline, not hexacoralline as most corals. They are completely retractile within their tubes, and are of a violet or grass-green color. The coral grows in large masses, usually red or purplish, and is found in the Indian and Pacific oceans. See cut under *Tubipora.*

tubiporite (tū'bi-pō-rīt), *n.* [< *Tubipora* + *-ite*[2].] A fossil organ-pipe coral, or some similar organism.

Tubiporites (tū″bi-pō-rī'tēz), *n.* [NL. (Schlotheim): see *tubiporite.*] A genus of tubiporites.

tubiporous (tū'bi-pō-rus), *a.* [As *tubipore* + *-ous.*] Same as *tubipore.*

Tubitelæ (tū-bi-tē'lē), *n. pl.* [NL., < L. *tubus,* tube, + *tela,* a web.] A group of rectigrade spiders, the tapestry-weavers, which have cylindrical spinnerets and spin tubular webs, as the genera *Agelena, Tegenaria,* and others: opposed to *Inequitelæ, Orbitelæ,* etc.

tubitelar (tū-bi-tē'lȧr), *a.* [< *Tubitelæ* + *-ar*[3].] Of or pertaining to the *Tubitelæ.*

Tubitelariæ (tū″bi-tē-lā'ri-ē), *n. pl.* [NL.: see *Tubitelæ.*] Same as *Tubitelæ.*

tubitelarian (tū″bi-tē-lā'ri-ȧn), *a.* and *n.* [< *Tubitelariæ* + *-an.*] **I.** *a.* Of or pertaining to the *Tubitelariæ;* tubitelar.

II. *n.* A spider of the division *Tubitelariæ.*

tubivalve (tū'bi-valv), *n.* and *a.* [< L. *tubus,* tube, + *valva,* door: see *valve.*] **I.** *n.* A bivalve mollusk with tubular siphonal sheath; a tube-shell.

II. *a.* Having a tubular or fistulous shell.

tubman (tub'mȧn), *n.*; pl. *tubmen* (-men). A barrister in the Court of Exchequer in England who had a precedence in motions. See *postman*[1].

tubo-abdominal (tū″bō-ab-dom'i-nȧl), *a.* [< L. *tubus,* tube, + *abdomen* (*-min-*), abdomen, + *-al.*] Pertaining to a Fallopian tube and to the cavity of the abdomen. —**Tubo-abdominal pregnancy,** a form of extra-uterine pregnancy in which the ovum is arrested near the fimbriated extremity of the Fallopian tube, projecting thence in the course of its development into the abdominal cavity.

tub-oar (tub'ōr), *n.* In *whale-fishing,* the oar which is pulled opposite the line-tub; also, the tub-oarsman.

tub-oarsman (tub'ōrz″mȧn), *n.* In *whale-fishing,* a man whose place in a whale-boat is near the tub containing the whale-line, and whose business is to see that no entanglement of the line takes place.

tubo-ovarian (tū″bō-ō-vā'ri-ȧn), *a.* [< L. *tubus,* tube, + *ovarium,* ovary, + *-an.*] Pertaining to the ovary and to the Fallopian tube.

tubovarian (tū-bō-vā'ri-ȧn), *a.* Same as *tubo-ovarian.*

tub-preacher (tub'prē″chėr), *n.* [< *tub,* a kind of pulpit, + *preacher.*] A contemptuous term for a dissenting minister; hence, a ranting, ignorant preacher. Also *tubster.*

> Here are your lawful ministers present, to whom of late you do not resort, I hear, but to *tub-preachers* in conventicles. *Bp. Hacket,* Abp. Williams, ii. 165. (*Davies.*)

tub-race (tub'rās), *n.* A race in which the contestants paddle with the hands in tubs.

tu-brugge†, *n.* [ME., < *tu,* a form of *tow*[1], + *brugge,* bridge: see *tow*[1] and *bridge*[1].] A drawbridge. *Halliwell.*

Nou stont the heved above the *tu-brugge*
Faste bi Waleis.
Execution of Sir Simon Fraser (Child's Ballads, VI. 282).

tub-saw (tub′sâ), *n.* A cylindrical saw which cuts staves from a block, and rounds them transversely: same as *annular saw* (*a*) (which see, under *saw*[1]). *E. H. Knight.*

tub-size (tub′sīz), *v. t.* See the quotation.

If paper is to be *tub-sized* as well as engine-sized, an animal size, made by soaking out the gelatine from clippings of horns, hides, etc., is mixed with dissolved alum and placed in a tub or vat, through which the web of paper is run after leaving the first set of driers.
Harper's Mag., LXXV. 124.

tubster† (tub′stėr), *n.* [< *tub* + *-ster*[1].] Same as *tub-preacher.*

He (says the *tubster*) that would be rich according to the practice of this wicked age must play the thief or the cheat. *Tom Brown*, Works, III. 68. (*Davies.*)

tub-sugar (tub′shůg″ăr), *n.* Sugar packed in chests, and covered over with fine clay.

tub-thumper (tub′thum″pėr), *n.* A violent or gesticulating preacher; one who employs violent action to give the effect or appearance of earnestness to his sermons. [Slang.]

tub-thumping (tub′thum″ping), *a.* Ranting. [Slang.]

Very modest gifts, belonging to what may be called the *tub-thumping* school of oratory, have been known to fill a large church with eager congregations.
Contemporary Rev., LIV. 253.

★**tubular** (tū′bū-lăr), *a.* [= F. *tubulaire* = Sp. Pg. *tubular* = It. *tubulare, tubolare,* < NL. **tubularis,* < L. *tubulus,* a small pipe: see *tubule.*] 1. Having the form of a tube or pipe, without reference to size; tubuliform; tubiform; tubar; fistulous.—2. In *bot.*, tube-like; tube-shaped; having a tube; tubulous: as, a *tubular* corolla or calyx.

Tubular filiform very fine colourless rootlets.
Le Maout and Decaisne, Botany (trans.), p. 917.

3. As applied to respiratory sounds, noting a sound like that produced by a current of air through a tube.—**Horizontal tubular steam-boiler.** See *steam-boiler.*—**Rotary tubular steam-boiler.** See *rotary.*—**Tubular-arch bridge.** See *bridge*[1].—**Tubular bridge.** See *bridge*[1].—**Tubular car,** a car of which the sills and floor-framing are made of iron gas-pipe.—**Tubular crane,** a crane with a hollow or tubular jib. Large tubular cranes sometimes have jibs made of boiler-plate rolled into tubular form and joined with rivets.—**Tubular floating dock,** a dock formed of capacious tubes, which may be sunk or floated, according as the tubular spaces are filled with water or with air.—**Tubular girder,** any hollow girder of metal, whatever the form in section. See *girder*[1].—**Tubular glands,** compound glands in which the divisions of the secreting cavity assume a tubular form.—**Tubular lantern,** a lantern having no guards except a rectangular frame of tubes through which the air-supply is carried. *Car-Builder's Dict.*—**Tubular respiration.** See *respiration.*—**Tubular retort.** Same as *tube-retort.*—**Tubular steam-boiler.** See *steam-boiler.*—**Tubular surface,** in *geom.* See *surface.*

Tubularia (tū-bū-lā′ri-ą), *n.* [NL. (Linnæus, 1755), neut. pl. of **tubularis,* tubular: see *tubular.*] An old genus of tubularian hydroids, now restricted as the type of a family *Tubulariidæ. T. indivisa* is an example.

Tubularian Polyp (*Tubularia indivisa*).
1, group of polypites, half natural size; 2, single hydranth, enlarged; *a*, mouth, surrounded by tentacles; *o*, sporosacs.

Tubulariæ (tū-bū-lā′ri-ē), *n. pl.* [NL.: see *Tubularia.*] The tubularian hydroids, or gymnoblastic hydromedusans; the *Athecata* or *Gymnoblastea.*

tubularian (tū-bū-lā′ri-ąn), *a.* and *n.* [< *Tubularia* + *-an.*] **I.** *a.* Hydriform in tubular shape with a wide disk, a manubrium, and solid tentacles; of or pertaining to the *Tubulariæ,* or gymnoblastic hydrozoans.—**Tubularian hydroids,** the *Gymnoblastea.*

II. *n.* A member of the *Tubulariæ.* The tubularian polyps form an extensive series, by some authors divided into many families. Some of them resemble slender-stemmed composite flowers, as a dandelion, for example. In the usual forms the hydranth is flower-like and borne upon the end of a slender stalk (hydrocaul), several of which may unite below into a root-like part (hydrorhiza). The hydranth bears the gonophores upon stalks (blastostyles); these may be permanently attached (sporosacs), or may become detached and float off as free medusoids. Both hydranths and gonophores are naked (gymnoblastic or athecate).

tubularidan (tū-bū-lar′i-dąn), *a.* and *n.* Same as *tubularian.*

Tubulariidæ (tū″bū-lā-rī′i-dē), *n. pl.* [NL., < *Tubularia* + *-idæ.*] A restricted family of tubularian hydromedusans, represented by the genus *Tubularia,* having the polyp-stock invested with a hard perisarc. Also *Tubularidæ.* See cut under *Tubularia.*

tubularity (tū-bū-lar′i-ti), *n.* [< *tubular* + *-ity.*] The quality of a tubular sound. See *tubular,* 3.

tubularly (tū′bū-lăr-li), *adv.* In the form of a tube.

Cells, either expanded or *tubularly* or vesicularly concreted. *H. C. Wood*, Fresh-Water Algæ, p. 182.

tubulate (tū′bū-lāt), *a.* [= F. *tubulé* = Pg. *tubulado,* < L. *tubulatus,* formed like a pipe, < *tubulus,* a small pipe, a tube: see *tubule.*] Formed like a tube; tubulated.

tubulate (tū′bū-lāt), *v. t.*; pret. and pp. *tubulated,* ppr. *tubulating.* [< *tubulate, a.*] To form into a tube; also, to furnish with a tube. *Elect. Rev.* (Amer.), XV. xxv. 2.

A *tubulated* glass shade with a metal base.
Atkinson, tr. of Ganot's Physics, § 763.

Tubulated retort, a retort having a small tube, furnished with a stopper, so placed above the bulb that substances can be introduced into the retort without soiling the neck. A receiver with a similar tube and stopper is called a *tubulated receiver.*

tubulation (tū-bū-lā′shọn), *n.* [< *tubulate* + *-ion.*] The formation of a tube or tubule; the disposition or arrangement of a set of tubes.

tubulature (tū′bū-lą-tūr), *n.* [< *tubulate* + *-ure.*] The mouth or short neck at the upper ★part of a tubulated retort.

tubule (tū′būl), *n.* [= F. *tubule* = It. *tubolo,* < L. *tubulus,* a small pipe, a water-pipe, < *tubus,* a pipe, tube: see *tube.*] A small tube or pipe: as, the uriniferous or seminiferous *tubules.* See *tubulus,* and cut under *Malpighian.*

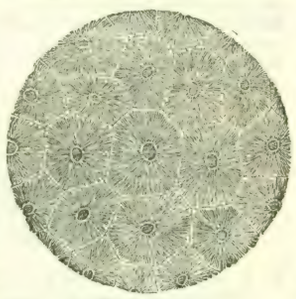
tubuli, *n.* Plural of *tubulus.*

tubulibranch (tū′bū-li-brangk), *a.* and *n.* [< L. *tubulus,* a tube, + *branchiæ,* gills.] **I.** *a.* Of or pertaining to the *Tubulibranchiata;* tubulibranchian; tubulibranchiate.

II. *n.* A member of the *Tubulibranchiata.*

tubulibranchian (tū″bū-li-brang′ki-ąn), *a.* and *n.* [As *Tubulibranchi(ata)* + *-an.*] Same as *tubulibranch.*

Tubulibranchiata† (tū″bū-li-brang-ki-ā′tą), *n. pl.* [NL., neut. pl. of *tubulibranchiatus:* see *tubulibranchiate.*] In Cuvier's classification, the seventh order of gastropods, having a more or less irregularly tubular shell, and consisting of 3 genera—*Vermetus, Magilus,* and *Siliquaria:* an artificial group. See cuts under the generic names.



tubulibranchiate (tū″bū-li-brang′ki-āt), *a.* and *n.* [< NL. *tubulibranchiatus,* < L. *tubulus,* tube, + *branchiæ,* gills.] Same as *tubulibranch.*

Tubulicolæ (tū-bū-lik′ọ-lē), *n. pl.* [NL., pl. of **tubulicola:* see *tubulicole.*] In Cuvier's classification, an order of polyps, including the tubularians.

tubulicole (tū′bū-li-kōl), *a.* and *n.* [< NL. **tubulicola,* inhabiting a tube, < L. *tubulus,* a tube, + *colere,* dwell, inhabit. Cf. *tubicole.*] **I.** *a.* Inhabiting a tubule, as a polyp; belonging to the *Tubulicolæ.*

II. *n.* A polyp of the group *Tubulicolæ.*

Tubulidentata (tū″bū-li-den-tā′tą), *n. pl.* [NL., neut. pl. of **tubulidentatus:* see *tubulidentate.*] One of the groups of the *Entomophaga,* or insectivorous *Edentata,* represented by the aardvark, or Cape ant-eater of South Africa, *Orycteropus capensis.* They furnish the only instance known among mammals of truly compound teeth, these organs being composed of bundles of parallel upright denticles, so that their substance is traversed by a number of parallel vertical canals. See also cut under *aardvark.*

Tubulidentata.
Part of Tooth of Aardvark (*Orycteropus capensis*), in cross-section, highly magnified.

tubulidentate (tū″bū-li-den′tāt), *a.* [< NL. **tubulidentatus,* < L. *tubulus,* a tube, + *dentatus,* toothed: see *dentate.*] Having compound teeth composed of tubular bundles of denticles; of or pertaining to the *Tubulidentata.*

Tubulifera (tū-bū-lif′ę-rą), *n. pl.* [NL. (Latreille, 1807), neut. pl. of **tubulifer:* see *tubuliferous.*] 1. In Latreille's system, the second tribe of hymenopterous insects, including the families *Proctotrupii* and *Chrysidides,* by MacLeay and Westwood restricted to the family *Chrysididæ:* opposed to *Securifera.*—2. A stirps of the order *Thysanoptera,* including the genus *Phlœothrips. Haliday*, 1836.

tubuliferous (tū-bū-lif′ę-rus), *a.* [< NL. **tubulifer,* < L. *tubulus,* tube, + *ferre* = E. *bear*[1].] In *entom.*, having a tube-like ovipositor (see *tubulus,* 2); of or pertaining to the family *Chrysididæ* or suborder *Tubulifera.*

Tubulifloræ (tū″bū-li-flō′rē), *n. pl.* [NL., fem. pl. of **tubuliflorus:* see *tubuliflorous.*] The name given by A. P. de Candolle in 1836 to all composite plants having tubular corollas in the disk flowers, as distinguished from those having ligulate corollas only. These two groups now practically constitute the families *Asteraceæ* and *Cichoriaceæ,* respectively. They are regarded as subfamilies by those authors who still retain the name *Compositæ* for all composite plants. See *Ligulifloræ.*

tubuliflorous (tū″bū-li-flō′rus), *a.* [< NL. **tubuliflorus,* < L. *tubulus,* tube, + *flos* (*flor-*), flower.] In *bot.*, having the flowers of the disk (in composite plants) all with tubular corollas; of or pertaining to the *Tubulifloræ.*

tubuliform (tū′bū-li-fôrm), *a.* [< L. *tubulus,* tube, + *forma,* form.] Having the form of a small tube or tubule; tubular. *Huxley*, Anat. Invert., p. 381.

Tubulipora (tū-bū-lip′ọ-rą), *n.* [NL. (Lamarck), < L. *tubulus,* a tube, + *porus,* pore.] The typical genus of *Tubuliporidæ,* containing such species as *T. serpens.*

tubulipore (tū′bū-li-pōr), *n.* [< NL. *Tubulipora.*] A polyzoan of the family *Tubuliporidæ.*

tufa (tö'fä), *n.* [< It. *tufa*, calcareous rock, tufa: see *tuff*[3].] A rock having a rough or cellular texture, a calcareous deposit from springs; also loosely used for tuff, a fragmental, volcanic rock. The word *tufa* should only be used for the calcareous deposit of limy springs, when it has the same meaning as the *tophus* of Vergil and Pliny, or the *travertino* of the modern Italians. See *travertin* and *tuff*[3].

Calcareous *tufa*, travertine, pisolite, osteocolla, &c., are deposits formed by the chemical precipitation of carbonate of lime from waters holding bicarbonate of lime in solution. *Rutley*, Study of Rocks, xiv.

tufaceous (tö-fā'shius), *a.* [< It. *tufaceo*, < L. *tofaceus*, *tofacius*, < *tofus*, sandstone: see *tuff*[3], *tufa*, *toph.*] Made up of tufa, or resembling it in a greater or less degree.

tuff[1] (tuf), *n.* [< ME. **tuffe* (cf. *tuft*), < OF. *tuffe*, F. *touffe*, aggregation or bunch of trees, flowers, feathers, etc., prob. < OHG. *zopf*, MHG. G. *zopf*, top, tuft, = LG. *topp* = D. *top* = E. *top*: see *top*[1]. Cf. OF. *top* (= Sp. *tope* = It. *toppo*), F. dim. *toupet* (> E. *toupet*, *toupee*), tuft, crest, bunch of hair; from the LG. forms of the same word. Hence *tuft*[2], q. v.] Same as *tuft*[2]. *Halliwell.*

tuff[2]† (tuf), *a.* An old spelling of *tough.*

tuff[3] (tuf), *n.* [< F. *tuf*, formerly also *tuffe*, soft stone, < It. *tufo*, soft stone, *tufa*, tufa, < L. *tophus*, *tofus*, a soft sandy stone. Cf. *toph*, *tufa.*] A volcanic fragmental rock, varying from coarse deposits made of materials resembling fine gravel in size to those which are like the finest sand. Corsi defines *tufo* as being similar in composition to *peperino*, but bearing the marks of having been transported by and deposited from water. The *tophus* of Vitruvius and Columella was of volcanic origin; that of Virgil and Pliny was calcareous. The *tufo* of the Italians, at the present time, is volcanic, and is the same rock which was designated by the Romans as *lapis ruber*; it closely resembles *peperino* (the *lapis Albanus* of the Romans), and

does not differ, except in color and degree of compactness, from the modern *sperone* (*lapis Gabinus*), or from the so-called *manziana* (*lapis Anitianus*). These are all fragmental rocks made up of more or less firmly compacted volcanic cinders and ashes, and are all included under the term *tuff* as used by English geologists.

tuff-cone (tuf'kōn), *n.* A conical elevation made up of ashes or other fragmentary eruptive material accumulated around a volcanic orifice.

The materials of a *tuff-cone* are arranged in more or less regularly stratified beds.
Geikie, Text-Book of Geol. (2d ed.), p. 227.

Tufnell's bandage. An immovable bandage stiffened with a paste of white of egg and flour. Also called *egg-and-flour bandage*.

tuft[1] (tuft), *n.* [< ME. *toft*, a piece of ground, < AS. *toft*, < Icel. *topt*, *tupt*, *toft*, *tuft*, *tomt*, a piece of ground: see *toft*[1].] 1. A green knoll. See *toft*[1].—2. A grove; a plantation; a clump.

If you will know my house,
'Tis at the *tuft* of olives, here hard by.
Shak., As you Like it, iii. 5. 75.

Yon *tuft* of hazel-trees. *Wordsworth*, Green Linnet.

tuft[1] (tuft), *v. t.* [< *tuft*[1], *n.*] To beat up (a thicket or covert) in stag-hunting.

With his hounds
The labouring hunter *tufts* the thick unbarbéd grounds
Where harbour'd is the Hart.
Drayton, Polyolbion, xiii. 112.

★ **tuft**[2] (tuft), *n.* [Also *tuff*; < ME. *tuft*, *toft*, a later form (with unorig. *-t*, prob. due in part to confusion with *tuft*[1]) of *tuff*[1]: see *tuff*[1].] 1. A bunch of soft and flexible things fixed at the base with the upper part loose, especially when the whole is small: as, a *tuft* of feathers.

Upon the cop right of his nose he hade
A werte, and thereon stood a *tuft* of heres.
Chaucer, Gen. Prol. to C. T., l. 555.

With a knoppe, othirwyse callyd a *tuft*, of blak sylke,
Bury Wills (ed. Tymms), p. 36 (in a will of 1463).

A light-green *tuft* of plumes she bore,
Closed in a golden ring.
Tennyson, Launcelot and Guinevere.

2†. A turban.

Tiara, a Turkish *tuffe*, such as the Turkes weare at this day on their head. *Nomenclator*, 1585. (*Nares.*)

Antonius, being brought to the king where hee wintered, was gladly received, and graced with the promotion to weare a *tuffe* or turbant (which honour they enjoy that be allowed to sit at the kings boord, and who for good desert among the Persians may open their mouthes in solemne assemblies, to persuade and deliver their minds).
Ammianus Marcellinus (1609). (*Nares.*)

3†. A crest.

He is my nephew, and my chief, the point,
Tip, top, and *tuft* of all our family!
B. Jonson, Staple of News, ii. 1.

tula (tō′lä), *n.* [Mex. (?).] Same as *istle*.

tulasi (tō′la-si), *n.* [Telugu.] Same as *toolsi*.

tula-work (tō′lä-wėrk), *n.* Niello; niello-work; a kind of decorative work somewhat similar to enameling, done chiefly on silver. Niello-work has been long known, and is described by Pliny, by whom its invention is attributed to the Egyptians. It differs from enamel in that this latter is a vitreous compound, while niello is a combination of sulphur with silver, copper, and lead, the relative proportion of the ingredients, as given by different authors, varying greatly. The composition of niello, according to Pliny, is three parts of silver with one of copper, and no lead. All the more modern recipes demand less silver and some lead, the quantity of the precious metal diminishing from century to century. Benvenuto Cellini gives one sixth silver, one third copper, and one half lead as the composition of niello. The above has reference to the metallic ingredients of this article; in its manufacture sulphur is generally added in excess, that which is not taken up by the metals being volatilized in the process, which is performed in a crucible, a little sal ammoniac being used as a flux. Niello-work has been done in Russia for many years, and especially at Tula, which is the best-known locality for this branch of decorative art, although it is said that more artistic specimens are turned out at other places in that country. Niello is called in Russia "black silver." See *niello*.

tulchan, tulchin (tul′ċhan, -ċhin), *n.* [Origin obscure.] A calf's skin stuffed with straw, and set beside a cow, to make her give her milk: used formerly in Scotland.—**Tulchan bishops**, a name derisively applied to the persons appointed as titular bishops to the Scottish sees immediately after the Reformation, in whose names the revenues of the sees were drawn by the lay barons who had impropriated them. *Carlyle*, Cromwell's Letters and Speeches, Int., iv. [Scotch.]

tule (tō′le), *n.* [Amer. Sp., < Nahuatl *tullin*.] A bulrush or club-rush of either of two species which in California and adjacent regions occupy overflowed bottom-land and marsh. One of these is the common bulrush, *Scirpus lacustris*, which there, in the subspecies *occidentalis*, becomes sometimes 8 or 10 feet high and an inch or more thick at the base. The other species is *S. Californicus*, found eastward to Louisiana, and also in tropical America. See *Scirpus* (with cut).

tule-wren (tō′le-ren), *n.* A kind of marsh-wren, *Cistothorus* or *Telmatodytes palustris*, var. *paludicola*, which abounds in the tule-marshes of California.

tulip (tū′lip), *n.* [Formerly also *tulipe, tulipie*, also *tulipa*; = MD. *tulpe*, D. *tulp* = G. *tulpe* = Ir. *tulp*, < OF. *tulipe, tulippe*, F. *tulipe* = OSp. *tulipa* = Pg. *tulipa* = It. *tulipa* (NL. *tulipa*); also MD. *tulpaan* = Dan. *tulipan* = Sw. *tulpan*, < OF. *tulipan* = Sp. *tulipán* = It. *tulipano*, a tulip; so called from its likeness to a turban: a particular use of OF. **tulipan, tulipant, tulpant*, etc., > E. *tulipant*, etc., NL. *tulipa*, etc., a turban: see *turban*.] 1. A plant of the genus *Tulipa*, of which several species are well-known garden bulbs with highly colored bell-shaped flowers, blooming in spring. The common garden tulips are derived chiefly from *T. Gesneriana*, a native of central and southern Europe and adjacent parts of Asia, having shining scarlet flowers with purple-black spots at the base of the divisions, or a partly yellow claw. Varieties of this species have been developed with great care, especially in the Netherlands, the seat at one time of a "tulipomania." The catalogue of a Haarlem florist of recent date offered 1,800 varieties. They are divided into four classes: namely, "breeders" or "self-flowers," with the natural plain color; "bizarres," having a clear yellow ground with red, brownish, maroon, or purple markings; "byblœmens," with a white background marked prevailingly with red or shades of purple; and "roses," with white background variegated with shades of rose-color, deep-red, or scarlet. It is said that when a self-tulip once "breaks," the new variety remains always the same. Another long-cultivated tulip is the Duc Van Thol, *T. suaveolens*, with fragrant scarlet, yellow, or variegated flowers, early, and especially suited for pot-culture and forcing. *T. præcox*, having scarlet flowers with large black-purple spots surrounded with yellow near the base, also affords varieties. Less conspicuous or less known species are *T. Oculus-solis*, the sun's-eye tulip, with a brilliant scarlet perianth, having black spots at the base of the segments; *T. australis* (*T. Celsiana*), with bright-yellow flowers smaller than the common kinds; *T. Clusiana*, low and delicate, having the three inner divisions pure-white, the three outer stained with pink; *T. pulchella*, type of a group of very pretty dwarf species; and *T. Greigi*, the Turkestan tulip, one of the most showy and desirable of all known tulips, bearing goblet-shaped flowers, commonly of a vivid orange-scarlet hue, also purple or yellow, from 4 to 6 inches broad when fully expanded.

2. In *ordnance*, a bell-shaped outward swell of the muzzle of a gun, as a rule abandoned in modern ordnance.

> The armament of the Collingwood consists of four 45-ton steel breech-loading guns, 27 ft. 4 in. long, and gradually tapering from a diameter of 4 ft. 7 in. at the breech to 17 in. near the muzzle, which possesses what artillerists call a *tulip* or "swell." *The Engineer*, LXVIII. 314.

African tulip, a plant of the genus *Hæmanthus*.—**Butterfly-tulip**, the mariposa-lily or pretty-grass, *Calochortus*, of California.—**Cape tulip**. (*a*) See *Hæmanthus*. (*b*) A liliaceous plant, *Bæometra Breyniana*, of the Cape of Good Hope.—**Checkered tulip, drooping tulip**. See *wild tulip* (*a*), below.—**Duc Van Thol tulip**. See def. 1.—**Parrot-tulip**, a name given to varieties of *Tulipa acuminata*, of a dwarf habit, with the petals curved and fantastically fringed, variegated, partly green, the form and color suggesting the name; also, a variety of the common tulip: the former sometimes distinguished as *Florentine parrot-tulip*.—**Sun's-eye tulip**. See def. 1.—**Turkestan tulip**. See def. 1.—**Van Thol tulip**. Short for *Duc Van Thol tulip*. See above.—**Wild tulip**. (*a*) In England, *Tulipa sylvestris*, the only native species; also, provincially, the guinea-hen plant, *Fritillaria Meleagris*, similarly called *checkered* and *drooping tulip*. (*b*) In California, same as *butterfly-tulip*: see above.

Tulipa (tū′li-pä), *n.* [NL. (Malpighi, 1675; earlier by Lobel, 1576): see *tulip*.] 1. A genus of liliaceous plants, the tulips, type of the tribe *Tulipeæ*. It is characterized by flowers which are usually erect, bell-shaped, and marked by spots near the base, but without nectar-bearing glands; and by oblong, linear, erect, basifixed anthers. There are about 50 species, natives of Europe and Asia, extending from England to Japan, and southward into northern Africa. They are bulbous plants, with a simple stem bearing few leaves, linear or broader, and a handsome solitary flower, rarely two or three. See *tulip*.

2†. [*l. c.*] A tulip.

tulipant†, *n.* An obsolete form of *turban*.

Tulipeæ (tū-lip′ē-ē), *n. pl.* [NL. (Koch, 1837), < *Tulipa* + *-eæ*.] A tribe of liliaceous plants, characterized by tulip-like flowers, and coated or scaly bulbs. It includes nearly 200 species belonging to 8 genera, of which *Tulipa* is the type. They are natives of north temperate regions, usually producing large and handsome flowers. The tribe includes the lily, crown-imperial, tulip, dog-tooth violet or adder's-tongue, and mariposa-lily. The genera *Lilium, Erythronium*, and *Lloydia* are partly American, and *Calochortus* wholly so; for the others, see *Fritillaria, Gagea*, and *Tulipa*.

tulip-ear (tū′lip-ēr), *n.* An upright or prick-ear in dogs. *Shaw.*

tulip-eared (tū′lip-ērd), *a.* Prick-eared, as a dog.

tulipie†, *n.* An obsolete form of *tulip*.

tulipist (tū′lip-ist), *n.* [< *tulip* + *-ist*.] A cultivator of tulips. *Sir T. Browne*, Urn-burial, Ep. Ded.

tulipomania (tū″li-pō-mā′ni-ą), *n.* [= F. *tulipomanie* (Ménage); as E. *tulip* + Gr. *μανία*, madness: see *mania*. The D. term is *tulpenhandel*, tulip-trade.] A craze for the cultivation or acquisition of tulips; specifically, that which arose in the Netherlands about the year 1634, seized on all classes like an epidemic, and led to disasters such as result from great financial catastrophes. Tulip-marts were established in various towns, where roots were sold and resold as stocks on the exchange. A single root of *Semper Augustus* was sold for 13,000 florins. After several years the government found it necessary to interfere.

tulipomaniac (tū″li-pō-mā′ni-ak), *n.* [< *tulipomania* + *-ac*.] One who is affected with tulipomania. *H. Spencer*, Education, p. 66.

tulip-poplar (tū′lip-pop″lăr), *n.* Same as *tulip-tree*.

tulip-root (tū′lip-röt), *n.* A disease of oats, caused by a nematoid worm of the family *Anguillulidæ, Tylenchus devastatrix*, which causes the base of the stem to swell until it somewhat resembles a tulip-bulb.

tulip-shell (tu′lip-shel), *n.* A shell of the family *Fasciolariidæ*; specifically, *Fasciolaria tulipa*. See cut under *Fasciolaria*.

tulip-tree (tū′lip-trē), *n.* A tree, *Liriodendron Tulipifera*, found in North America, where, among deciduous trees, it is surpassed in size only by the sycamore (*Platanus occidentalis*) and the bald cypress (*Taxodium distichum*). A tree believed to be identical with it is found in China. The wood is soft, fine, and straight-grained, and is easily worked; it is used in construction and for inside finish, cabinet-work, pumps, woodenware, etc. The bark, especially of the root, is acrid and bitter, and is used domestically as a stimulant tonic. The tulip-tree is quite hardy, and is a much-admired shade and ornamental tree. Its timber, or the tree itself, is known as *whitewood*, though the wood turns yellowish on exposure, and as *poplar, tulip-poplar*, or *yellow poplar*. An old name, *saddletree* or *saddle-leaf*, refers to the form of the leaf; another, *canoe-wood*, to the use in which it was found among the Indians. The present name (the best of the common names) has reference to the flowers, which in form and size resemble a large tulip, the petals greenish-yellow marked with orange. See *Liriodendron* (with cut).

> The large *tulip tree*, which we call a poplar.
> *Beverley*, Hist. Virginia, iv. § 18.

tumbak, *n.* Same as *tombac*.

tumbeki (töm'bek-i), *n.* [Turk.: see *tobacco*.] A kind of tobacco exported from Persia. Also written *toumbeki*.

tumbester† (tum'bes-tėr), *n.* [ME. also *tombester*, *tombestere*, *tymbester*, *tymbestere*, *timbestere*; < *tumb* + *-ster*.] A female tumbler or dancer.

As the professional dancers of medieval times were usually also tumblers or acrobats, the words for dance and tumble were commonly used as synonymous. (Compare *hop*, dance, *hopster*, a female dancer, Latin *saltator*, *saltatrix*, a dancer, literally 'leaper.') The daughter of Herodias, who danced before Herod, is often pictured in medieval art as tumbling, walking on her hands, or standing on her head. Compare *tumble*, 5.

Herodias dou3ter, that was a *tumbestere*, and tumblede byfore him [Herod] and other grete lordes of that contre, he grantede to 3eve hure whatevere he wolde bydde.
MS. Harl. 1701, f. 8. (*Halliwell.*)

And ryght anon than comen *tombesteres*
Fetys and smale, . . .
Whiche ben the verray deueles officeres
To kindle and blowe the fyr of [lecherye].
Chaucer, Pardoner's Tale, l. 15.

[In this passage the word is the same as the above, but it is an erroneous translation of the Old French *tymberesse*, a female player on the tambour (*tymbre*).]

tumble (tum'bl), *v.*; pret. and pp. *tumbled*, ppr. *tumbling*. [E. dial. also *tummle*; < ME. *tumblen*, *tomblen*, *tumlen* = MD. *tumelen*, *tummelen*, *tommelen*, D. *tuimelen* = MLG. *tumelen* = OHG. *tūmilōn*, MHG. *tümeln*, *tumeln*, G. *taumeln*, *tummeln* = Sw. *tumla* = Dan. *tumle*, tumble, stagger, wallow; freq. of ME. *tumben*, *tomben*, < AS. *tumbian* = OHG. *tūmōn*, MHG. *tumen* = Icel. *tumba*, dance: see *tumb*.] **I.** *intrans.* 1. (*b*) To turn in; go to bed.—**To tumble to,** to recognize or understand; be up to: as, to *tumble to* another's scheme or game; also, to go at (work and the like) vigorously. [Slang.]

The high words in a tragedy we call jaw-breakers, and say we can't *tumble to* that barrikin.
Mayhew, London Labour and London Poor, I. 15.

To tumble up. (*a*) To get out of bed; get up. [Slang.]

Mr. Bailey . . . opened the coach door, let down the steps, and, giving Jonas a shake, cried, "We've got home, my flower! *Tumble up* then!"
Dickens, Martin Chuzzlewit, xxviii.

(*b*) *Naut.*, to come up hastily and in a scrambling way through the hatchway on a ship's deck, as a sailor or a number of sailors together: as, the starboard watch *tumbled up*.

II. *trans.* 1. To turn over; toss about as for examination or search; revolve in one's mind: usually with *over*.

Tumbling it *over* and *over* in his thoughts, . . . he lost all patience. *Bacon*, Hist. Hen. VII., p. 95.

They *tumbled* all their little Quivers *o'er*
To chuse propitious Shafts.
Prior, Henry and Emma.

2. To disorder; rumple: as, to *tumble* bedclothes.

She had her bonnet in her hand (a bruised muslin one, with *tumbled* satin strings).
E. S. Sheppard, Charles Auchester, i. 11.

3. To throw by chance or with violence; fling; pitch.

With it a blow that laid him full low,
And *tumbl'd* him into the brook.

Scarabæidæ. It has been noted from remote antiquity, as in the case of the Egyptian tumble-bugs, and has given rise to some famous myths and symbols. See also cuts under *scarab*, *Scarabæus*, *Copris*, and *galea*. [U. S.]

tumble-car (tum'bl-kär), *n.* A cart drawn by a single horse: probably so named from the axle being made fast to the wheels and turning round with them. *Halliwell.*

tumble-down (tum'bl-doun), *a.* In a falling state; dilapidated; decayed; ruinous.

A *tumble-down* old Lutheran church.
Longfellow, Hyperion, ii. 9.

A few dirty-looking men assemble at the door of a *tumble-down* building standing against the ruined castle.
E. A. Freeman, Venice, p. 340.

tumble-dung (tum'bl-dung), *n.* [< *tumble*, *v.*, + obj. *dung*.] A tumble-bug.

tumble-home (tum'bl-hōm), *n.* *Naut.*, the part of a ship which inclines inward above the extreme breadth. [Rare.]

tumbler (tum'blėr), *n.* [< ME. *tumbler*, *tombeler*, *tumlare* (cf. AS. *tumbere*) (= MLG. *tumeler*); < *tumble* + *-er*[1].] 1. One who tumbles; one who performs by turning somersaults, walking on the hands, etc., as a mountebank.

There is no *tumbler*
Runs through his hoop with more dexterity
Than I about this business.
Fletcher (*and another*), Noble Gentleman, ii. 1.

The *tumbler* is walking upon his hands.
Strutt, Sports and Pastimes, p. 288.

2. [*cap.*] One of the religious sect known as Dunkers. See *Dunker*[1].—3. A breed of domestic pigeons which perform certain aërial evolutions called *tumbling*, during which they fall through the air for a distance before making play with their wings. This performance is an exaggeration of the sweeping or gyrating flight characteristic of wild pigeons, and an approach to it may be shown by any pigeons, when, for example, a hawk dashes into a flock. Tumblers have a short round head with high forehead and very short beak.

They are classed in two series, those bred to flight and those bred to color. The former are the ordinary or flying tumblers, most noted for their performances in mid air: some are even trained to tumble in a room. Some tumblers, known as *Oriental rollers*, are noted for leaving the flock individually and rising to execute the movement. Tumblers bred to color without special reference to their flight are of many strains, known by color-names, *black red*, or *yellow mottle, red* or *yellow agate, almond-splash*, etc.

4. A kind of greyhound formerly used in coursing rabbits: so called in allusion to his characteristic motions and springs.

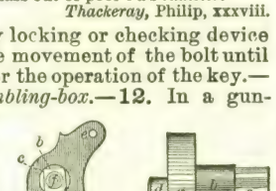
I have seene
A nimble *tumbler* on a burrow'd greene
Bend cleane awry his course, yet give a checke
And throw himselfe upon a rabbit's necke.
W. Browne, Britannia's Pastorals, ii. 4.

5. A porpoise. [Scotch.]

Delphinus Phocæna, . . . Scot. Pellock. *Tumbler.* Mereswine.
Dr. Walker, Essays on Nat. Hist., p. 532. (*Jamieson.*)

6. The aquatic larva of a mosquito, gnat, or other member of the *Culicidæ;* a wriggler: so called from the manner in which they roll over and over in the water. [Local, U. S.]—**7.** A figure or toy representing a fat person, usually a mandarin, sitting with crossed legs. The base of the figure is rounded, so as to rock at a touch.

Her legs tucked up mysteriously under her gown into a round ball, so that her figure resembled in shape the plaster *tumblers* sold by the Italians.
Mayhew, London Labour and London Poor, II. 570.



8†. One of a band of London reckless profligates in the early part of the eighteenth century.

A third sort [of Mohocks] are the *tumblers*, whose office it is to set women on their heads
Steele, Spectator, No. 324.

9. A drinking-glass. (*a*) One with a rounded or pointed bottom, so that it may not be set down without being emptied and inverted. (*b*) One without stem or foot, simply cylindrical or conical in form.

She . . . reminds him of days which he must remember, when she had a wine-glass out of poor Pa's *tumbler*.
Thackeray, Philip, xxxviii.

10. In a lock, any locking or checking device used to prevent the movement of the bolt until it is released under the operation of the key.—**11.** Same as *tumbling-box*.—**12.** In a gun-lock, a piece of the nature of a lever, attached to the pivot of the hammer of the lock, and swiveled to the tip of the main-spring, which, when the hammer is released by pulling the trigger, forces the hammer violently forward, causing it to strike and explode the charge. See also cut under *gun-lock*.—**13.** A form of printing-machine which rocks or tumbles to the impression-surface. [Eng.]—**14.** *Naut.*, one of the movable pins for the engagement of the cat-head stopper and shank-painter. These pins, moving simultaneously, release the ends of the cat-stopper and shank-painter, thus letting go the anchor.

Tumbler.
a, body; *b*, arbor; *c*, square; *d*, pivot; *e*, swivel-arm and pinhole; *f*, tumbler-screw hole; *g*, cock-notch; *h*, half-cock notch.

15. In *weaving*, any one of a set of levers (also called *coupers*) from which in some forms of loom the heddles are suspended.—**16.** Same as *tumbrel*, 1.

Behind them [the gipsies] followed the train of laden asses, and small carts, or *tumblers*, as they were called in that country [south of Scotland].
Scott, Guy Mannering, viii.

tumbler-brush (tum'blėr-brush), *n.* A brush made for the special purpose of cleaning the inside of a tumbler or drinking-glass.

tumbler-cart (tum'blėr-kärt), *n.* Same as *tumbrel*, 1.

More recently *tumbler carts* with solid wheels, mere slabs of timber, were substituted.
Quarterly Rev., CXLVI. 38.

tumbler-dog (tum'blėr-dog), *n.* A catch to hold the hasp of a padlock locked except when it enters the tumbler. *Car-Builder's Dict.*

tumbler-drum (tum'blėr-drum), *n.* Same as *tumbling-box*.

The skins are either trodden in it with the feet, or put into a *tumbler-drum*. *Workshop Receipts*, 2d ser., p. 373.

tumblerful (tum'blėr-fůl), *n.* [< *tumbler* + *-ful*.] The quantity of liquid which fills or nearly fills a tumbler: as, to drink a *tumblerful* of water.

tumbler-glass (tum'blėr-glȧs), *n.* Same as *tumbler*, 9.

tumbler-holder (tum'blėr-hōl″dėr), *n.* A circular frame of metal with a handle, into which a glass of soda-water, etc., is set, for convenience in drinking.

tumbler-lock (tum'blėr-lok), *n.* A lock having a set of disks or latches which must be arranged in some particular way with reference to one another before the bolt can be shot. It is a form of permutation-lock. See cut under *lock*.

tumbler-punch (tum'blėr-punch), *n.* In *gunsmithing*, a small punch with two blades, used, in taking a gun apart, to remove the arbor of the tumbler, etc.

tumbler-stand (tum'blėr-stand), *n.* A tray for tumblers, used with a soda-water fountain, etc. Some are fitted with appliances for washing the tumblers. Compare *tumbler-washer*.

tumbler-tank (tum'blėr-tangk), *n.* In *plumbing*, a flush-tank in which an oblong tilting receiving vessel pivoted midwise, and having a midwise partition, is fitted and poised in such manner that when water runs into one of the compartments of the vessel a quantity must accumulate before it can tilt and discharge its contents, and in such manner that the tilt brings the opposite compartment into position to be filled. A considerable volume of water is thus suddenly discharged at each tilting of the receiving vessel, although the stream affording the supply may be small.

tumbler-washer (tum'blėr-wosh″ėr), *n.* A tumbler-stand so contrived as to wash automatically the tumblers placed upon it. A usual form consists of a basin fitted with upright projecting pipes, on which the tumblers are hung bottom up, and from which jets of water escape into the tumblers, used with soda-water fountains, etc.

tumbleweed (tum'bl-wēd), *n.* A branching plant whose top assumes a globular figure and in autumn is detached and rolled over the plains by the wind, scattering its seed. The name is given to several such plants in the western United States. Species so called are *Amaranthus græcizans* (compare *ghost-plant*) and *A. blitoides*, *Psoralea lanceolata* (Dakota and Montana), the bug-seed, *Corispermum hyssopifolium*, and the winged pigweed, *Cycloloma atriplicifolium*. Also called *rolling-weed*.

The list of plants having the habit of rounding up their stems and branches so as to form a nearly spherical plant body, which at the end of the season breaks away at the root, thus forming a *tumble-weed*, must be increased by adding the winged pig-weed. *Amer. Nat.*, XXI. 929.

tumbling (tum'bling), *n.* [Verbal n. of *tumble*, *v.*] The act of falling; also, the act of turning somersaults, and the like; specifically, the action of the tumbler pigeon in flight.

tumbling (tum'bling), *a.* [< ME. *towmblynge;* ppr. of *tumble*.] Falling; fleeting; passing; transitory.

Wolthow thanne trusten in the *towmblynge* fortunes of men? *Chaucer*, Boëthius, ii. meter 3.

tumbling-barrel (tum'bling-bar″el), *n.* See *barrel*.

tumbling-bay (tum'bling-bā), *n.* In *hydraulic engin.*, that part of a weir in which the surface of the outflowing water assumes a downwardly directed curvilinear form.

tumbling-bob (tum'bling-bob), *n.* In *mach.*, a weighted arm or lever which, when moved to a certain point, reacts and by its weight produces movements in other parts of the machine.

tumbling-box (tum'bling-boks), *n.* A box or cylindrical vessel of wood or iron, pivoted at each end or at two corners, so that it can be made to revolve. Small castings, shot, pens, needles, buttons, and similar objects are placed in the box, with a quantity of loose emery-powder, sand, sawdust, or other abradant, and when the box revolves the abradant and the objects fall or tumble over, rubbing against each other and becoming quickly cleaned or polished. The device is largely used in many manufactories to save labor in cleaning and polishing material of all kinds, and in mixing or dissolving gums, etc. Also called, in various forms, *tumbler* or *cleansing-mill, tumble, tumbler-drum, tumbling-wheel, rolling-barrel, scouring-barrel*.

tumbling-net (tum'bling-net), *n.* A trammel-net.

tumbling-shaft (tum'bling-shȧft), *n.* The camshaft used in stamping-mills, threshing-machines, etc. *E. H. Knight.*

tumbling-trough (tum'bling-trôf), *n.* In the manufacture of sulphuric acid in the so-called cascade apparatus, a trough or box of pipe-clay constructed on the principle of the tumbler-tank for conveying nitric acid into the leaden chambers.

tumbling-wheel (tum'bling-hwēl), *n.* In *mach.*, a variety of the tumbling-box, used especially for polishing wooden bobbins, shoe-pegs, etc.

tumbly (tum'bli), *a.* [< *tumble* + *-y*1.] Uneven, rough, humpy, or lumpy, as if full of debris which has tumbled upon it; covered with loose rocks, as a sea-bottom or fishing-ground.

tumbrel (tum'brel), *n.* [Also *tumbril*, and formerly *tumbrell, tumrell;* < ME. *tomberel, tomerel, tumrel,* < OF. *tumbrell, tumberel, tomberel, tumbreau, tumbereau, tombereau*, F. *tombereau*, a dump-cart, < *tomber*, fall, tumble: see *tumb, tumble*.] **1.** A low cart used by farmers for the removal of dung, etc.; a dung-cart. The body of the cart was a separate box, sometimes called a *which* (see *which*1), in which the dung or other load was placed, to be dumped by upsetting the box. The name is often given to the carts used to convey the victims of the French Revolution to the guillotine, but contemporary plates represent these as large four-wheeled wagons.

What stinking scavenger (if so he will,
Though streets be fair) but may right easily fill
His dungy *tumbrel?* *Marston*, Satires, iv. 13.

Along the Paris streets the death-carts rumble hollow and harsh. Six *tumbrils* carry the day's wine to La Guillotine. *Dickens*, Tale of Two Cities, iii. 15.

A yoke of starveling steers, in a *tumbril* cart, the wheels of which were formed from a solid block of wood.
S. Judd, Margaret, i. 4.

2. A covered cart with two wheels, which accompanies artillery, for the conveyance of tools, ammunition, etc.—**3.** A chair fixed on a pair of wheels and having very long shafts, used to punish scolds. On its being wheeled into a pond backward, and suddenly tilted up, the woman was plunged into the water. Compare *cucking-stool* and *ducking-stool*.

In this town [Shepton-Mallet, Whitstone, Somersetshire] was anciently a *tumbrell* or cucking-stool, set up . . . in the time of Henry III. for the correction of unquiet women.
J. Collinson, Hist. Somersetshire (ed. 1791), III. 460.

4. A sort of circular cage or crib, made of osiers or twigs, used in some parts of England for holding food for sheep in winter.

tumefacient (tū-mē-fā′shient), *a.* Swelling; swollen.

The infant . . . had grown unctuous and *tumefacient* under the kisses and embraces of half the hotel.
Bret Harte, By Shore and Sedge, p. 73.

tumefaction (tū-mē-fak′shon), *n.* [< F. *tuméfaction* = Sp. *tumefacción*, < L. *tumefacere*, pp. *tumefactus*, swell: see *tumefy*.] **1.** The act or process of swelling or rising into a tumor; also, the condition of being tumefied or swollen.—**2.** That which is tumefied or swollen; a tumid part; a tumor.

The common signs and effects of weak fibres are paleness, a weak pulse, *tumefactions* in the whole body or parts.
Arbuthnot, Aliments, vi.

tumefy (tū′mē-fī), *v.*; pret. and pp. *tumefied*, ppr. *tumefying*. [< F. *tuméfier*, cause to swell, < LL. **tumeficare*, < L. *tumefacere*, cause to swell, < *tumere*, swell, + *facere*, make: see *tumid* and *-fy*.] **I.** *trans.* To swell, or cause to swell or be tumid.

To swell, *tumefy*, stiffen, not the diction only, but the tenor of the thought. *De Quincey.*

II. *intrans.* To swell; become tumid.

tumescence (tū-mes′ens), *n.* [< *tumescen*(*t*) + *-ce*.] **1.** The state of growing tumid; tumefaction.—**2.** A swelling, tumid part, or tumor; an intumescence.

tumescent (tū-mes′ent), *a.* [< L. *tumescen*(*t*-)*s*, ppr. of *tumescere*, begin to swell or swell up, inceptive of *tumere*, swell: see *tumid*.] **1.** Swelling; tumefying; forming into a tumor; intumescent.—**2.** In *bot.*, slightly tumid or swollen.

tumid (tū′mid), *a.* [= Sp. *túmido* = Pg. It. *tumido*, < L. *tumidus*, swollen, swelling, < *tumere*, swell; cf. *tumulus*, a mound (see *tumulus*), Gr. *τύμβος*, a mound (see *tomb*), Skt. *tumra*, swelling, standing out, √ *tu*, swell, increase.] **1.** Swollen; slightly inflated; tumefied: as, a *tumid* leg; *tumid* flesh.—**2.** Protuberant; rising above the level.

So high as heaved the *tumid* hills, so low
Down sunk a hollow bottom broad and deep,
Capacious bed of waters. *Milton*, P. L., vii. 288.

3. Swelling in sound or sense; pompous; bombastic; inflated: as, a *tumid* expression; a *tumid* style.

A mind no way *tumid*, light, effeminate, confused, or melancholic. *Bacon*, Political Fables, v., Expl.

The real poet, who is not driven by failing language or thought into frigid or *tumid* absurdities.
R. W. Church, Spenser, ii.

Tumid wing, in *entom.*, a wing in which the membrane of every cell is larger than the cell itself, so that it projects slightly, as in some saw-flies.

tumidity (tū-mid′i-ti), *n.* [< LL. *tumidita*(*t*-)*s*, a swelling, a tumor, < L. *tumidus*, swollen: see *tumid*.] **1.** The state or character of being tumid or swollen.

The swelling diction of Æschylus and Isaiah resembles that of Almanzor and Maximin no more than the *tumidity* of a muscle resembles the *tumidity* of a boil. The former is symptomatic of health and strength, the latter of debility and disease. *Macaulay*, Dryden.

Hence—2. A pompous or bombastic style; turgidness; fustian.

tumidly (tū'mid-li), *adv.* In a tumid manner or form.

tumidness (tū'mid-nes), *n.* The state of being tumid, in any sense. =Syn. *Bathos, Fustian*, etc. See *bombast*.

tumika-oil (tö'mi-kä-oil), *n.* A concrete fixed oil from the seeds of the wild mangosteen, *Diospyros Embryopteris*.

Tumion (tū'mi-on), *n.* See *Torreya*.

tummer (tum'ėr), *n.* A connecting cylinder in a carding-machine.

The carding engines [in cotton-manufacture] are often made with two main cylinders and a connecting cylinder called the *tummer* *Encyc. Brit.*, VI. 494.

tumogo, *n.* [African.] An African antelope, ★the water-buck, *Kobus ellipsiprymnus*.

tumor, tumour (tū'mọr), *n.* [< F. *tumeur* = Sp. Pg. *tumor* = It. *tumore*, < L. *tumor*, a swelling, the state of being swollen, < *tumere*, swell: see *tumid*.] 1. A swell or rise of any kind. [Rare.]

One *tumour* drown'd another, billows strove
To outswell ambition, water air outdrove.
B. Jonson, Prince Henry's Barriers.

2. In *med.*: (*a*) A swelling; one of the four necessary accompaniments, according to the older pathologists, of inflammation—namely, *calor, dolor, rubor, et tumor* (heat, pain, redness, and swelling). (*b*) An abnormal prominence existing upon any of the cutaneous, mucous, or serous surfaces in any part of the body, and not due to acute inflammation. A tumor is usually a new formation of tissue foreign to the part in which it exists, and is thus distinguished in general from *hypertrophy*, though a hypertrophy may occasionally be so localized as to constitute a true tumor. A neoplasm is called a tumor when it forms a prominence on any surface. A swelling may be acute or chronic, and may be circumscribed or diffuse; a tumor is a chronic circumscribed swelling.

3. A swelling port or style; tumidity; bombast.

She satisfies and fills the mind, without *tumour* and ostentation. *Evelyn*, True Religion, II. 174.

Adipose tumor, a lipoma.—**Aneurismal tumor**, an aneurism.—**Apostoli's method for the treatment of fibroid tumor of the uterus**, destruction of the tumor by electrolysis.—**Benign tumor**, a tumor which does not recur, as a rule, after removal, and is not inimical to the life of the patient.—**Cavernous tumor**, a tumor formed of loosely reticulated tissue.—**Dermatoid** or **dermoid tumor**, a cystic tumor the inner wall of which is composed of cutaneous tissue, and which often contains some of the appendages of the skin, such as hair, nails, or even teeth.—**Encysted tumor.** See *encyst*.—**Erectile tumor**, a tumor composed of a vascular tissue resembling erectile tissue.—**Fibroid tumor**, a tumor composed of fibrous tissue: usually referring to a fibromuscular tumor of the uterus.—**Fibroplastic tumor**†. See *spindle-celled sarcoma*, under *sarcoma*.—**Floating tumor**, a movable body within the abdomen, usually the spleen or a kidney, which has loose attachments, allowing of change of position of the organ.—**Gubler's tumor**, a prominence on the back of the wrist, seen in cases of wrist-drop from lead-poisoning.—**Histoid tumor**, a tumor composed of connective tissue.—**Malignant tumor**, a tumor which tends to recur after removal, and eventually to cause the patient's death.—**Margaroid tumor**, cholesteatoma.—**Mixed tumor**, a tumor composed of more than one kind of tissue.—**Ovarian tumor.** See *ovarian*.—**Phantom tumor**, a circumscribed abdominal swelling, occurring usually in hysterical women, due to muscular contraction or to an accumulation of intestinal gases. The swelling commonly disappears when the patient is asleep or under the influence of an anesthetic. It is sometimes very deceptive in its appearance, and has not infrequently been mistaken for pregnancy.—**Sand tumor**, psammoma: so called because of the sand-like calcareous matter which it contains.—**Teratoid tumor.** Same as *teratoma*.—**Thomas's operation for the removal of uterine fibroid tumors.** See *operation*.—**Transition tumor.** See *transition*.—**Tumor albus**, tuberculous synovitis, especially of the knee-joint; white-swelling.—**Vascular tumor.** See *vascular*.—**Warty tumor.** See *warty*.

tumored, tumoured (tū'mọrd), *a.* [< *tumor* + *-ed*[2].] Affected with a tumor or tumors; swollen; tumid; distended. [Rare.]

I might behold his legs *tumor'd* and swel'd.
Heywood, Hierarchy of Angels, p. 362.

tumorous† (tū'mọr-us), *a.* [= Pg. It. *tumoroso*, < LL. *tumorosus*, swollen, inflated, bloated, < L. *tumor*, a swelling: see *tumor*.] 1. Swelling; protuberant.

Who ever saw any cypress or pine small below and above and *tumorous* in the middle, unless some diseased plant? *Sir H. Wotton.*

2. Vainly pompous; bombastic, as language or style; fustian.

According to their subject these styles vary; . . . for that which is high and lofty, declaring excellent matter, becomes vast and *tumorous*, speaking of petty and inferior things. *B. Jonson*, Discoveries.

tumour, tumoured. See *tumor, tumored*.

tump (tump), *n.* [< W. *twmp*, a round mass, a hillock; cf. L. *tumulus*, a mound: see *tumulus, tomb*.] A little hillock; a heap; a clump.

He stopped his little nag short of the crest, and got off and looked ahead of him from behind a *tump* of whortles. *R. D. Blackmore*, Lorna Doone, xxxi.

tump (tump), *v. t.* [< *tump*, *n.*] In *hort.*, to form a mass of earth or a hillock round (a plant): as, to *tump* teazel.

tump-line (tump'lin), *n.* [Prob. of Algonkian origin: compare Abnaki *madumbi*, *matumpi*, a pack-strap, or burden-strap. *Jour. Amer. Folk-lore*, April–June, 1903, p. 128.] A strap by which a pack is carried across a portage or through the woods. It crosses the forehead, the advantage being that its use in this position leaves the hands free for clearing the way with an ax or otherwise; it is frequently shifted in position so as to cross the breast, for temporary relief. This method of carrying is common through the St. Lawrence valley and to the farthest Northwest, alike among whites, half-breeds, and Indians. The term is used in Maine and on its borders: elsewhere the strap is called *portage-strap* or *pack-strap*.

tumpy (tum'pi), *a.* [< *tump* + *-y*[1].] Abounding in tumps or hillocks; uneven. *Halliwell.* [Prov. Eng.]

tum-tum (tum'tum), *n.* [Appar. ult. imitative of the beating of a drum; cf. *tum*[2] and *tom-tom*.] 1. A favorite dish in the West Indies, made by beating boiled plantains quite soft in a wooden mortar. It is eaten like a potato-pudding, or made into round cakes and fried.—2. Same as *tom-tom*.

tumular (tū'mū-lär), *a.* [< F. *tumulaire*, as if < L. **tumularis*, < *tumulus*, a mound: see *tumulus*.] Same as *tumulary*. *Pinkerton.*

tumulary (tū'mū-lā-ri), *a.* [As *tumular*, q. v.] Consisting in a heap; formed or being in a heap or hillock.

tumulate[1] (tū'mū-lāt), *v. t.*; pret. and pp. *tumulated*, ppr. *tumulating*. [< L. *tumulatus*, pp. of *tumulare*, cover with a mound, entomb, < *tumulus*, a mound: see *tumulus*.] To cover with a mound; bury.

tumulate[2]† (tū'mū-lāt), *v. i.*; pret. and pp. *tumulated*, ppr. *tumulating*. [Irreg. (after *tumulus*, a mound) < L. *tumere*, swell: see *tumid*.] To swell.

His heart begins to rise, and his passions to *tumulate* and ferment into a storm. *Bp. Wilkins*, Nat. Religion, i. 17.

tumuli, *n.* Plural of *tumulus*.

tumulose, tumulous (tū'mū-lōs, -lus), *a.* [< L. *tumulosus*, full of mounds or hills, < *tumulus*, a mound: see *tumulus*.] Full of mounds or hills. *Bailey*, 1727. [Rare.]

tumulosity (tū-mū-los'i-ti), *n.* [< *tumulose* + *-ity*.] The state of being tumulous. *Bailey*, 1727. [Rare.]

tumulous, *a.* See *tumulose*.

tumult (tū'mult), *n.* [< F. *tumulte* = Pr. *tumult* = Sp. Pg. It. *tumulto*, < L. *tumultus*, commotion, disturbance, tumult, < *tumere*, swell, be excited: see *tumid*.] 1. The commotion, disturbance, or agitation of a multitude, usually accompanied with great noise, uproar, and confused talking; an uproar; hence, a noisy uprising, as of a mob.

What meaneth the noise of this *tumult?* 1 Sam. iv. 14.

There is this difference between the *tumults* here [in Cairo] and those at Constantinople, that the latter are commonly begun by some resolute fellows among the janizaries, whereas here the mob is generally raised by some great man, who envies one that is a rival to him.
Pococke, Description of the East, I. 169.

2. Violent commotion or agitation, with confusion of sounds.

In this piece of poetry, what can be nobler than the idea it gives us of the Supreme Being thus raising a *tumult* among the elements, and recovering them out of their confusion, thus troubling and becalming nature?
Addison, Spectator, No. 489.

3. Agitation; high excitement; irregular or confused motion.

The *tumult* in her mind seemed not yet abated.
Goldsmith, Vicar, xix.

=Syn. Disturbance, turbulence, confusion, hubbub, ferment, outbreak, mêlée.

tumult† (tū'mult), *v. i.* [< *tumult*, *n.* Cf. *tumultuate*.] To make a tumult; be in great commotion. *Milton*, Hist. Eng., vi.

tumultuarily (tū-mul'tụ-ā-ri-li), *adv.* 1. In a tumultuary or disorderly manner.

Divers thousands of the Jews *tumultuarily* resisted.
Sandys, Christ's Passion (1640), notes, p. 95.

2. Without system or order.

I have, according to your desire, putt in writing these Minutes of Lives *tumultuarily*, as they occur'd to my thoughts, or as occasionally I had information of them.
Aubrey, Lives, Int. Ep.

tumultuariness (tū-mul'tụ-ā-ri-nes), *n.* Disorderly or tumultuous conduct; turbulence; disposition to tumult. *Eikon Basilike.*

tumultuary (tū-mul'tụ-ā-ri), *a.* [< F. *tumultuaire* = Sp. Pg. It. *tumultuario*, < L. *tumultuarius*, full of tumult, hurried, < *tumultus*, tumult: see *tumult*.] 1. Disorderly; riotous; promiscuous; confused: as, a *tumultuary* conflict.

It would be too long to relate the *tumultuary* insurrections of the inhabitants of Constantinople, Antioch, and Alexandria. *Milton*, Ans. to Salmasius, iv.

2. Restless; agitated; unquiet.

Men who live without religion live always in a *tumultuary* and restless state. *Bp. Atterbury.*

tumultuate† (tū-mul'tụ-āt), *v. i.* [< L. *tumultuatus*, pp. of *tumultuari* (> It. *tumultuare* = Sp. Pg. *tumultuar*), make a tumult, < *tumultus*, a tumult: see *tumult*.] To make a tumult. *Milton*, Ans. to Salmasius, x.

And in this seat of peace *tumultuous* wars
Shall kin with kin and kind with kind confound.
Shak., Rich. II., iv. 1. 140.

2. Characterized by uproar, noise, confusion, or the like: as, a *tumultuous* assembly.

Strange the far-off rooks' sweet *tumultuous* voice.
William Morris, Earthly Paradise, III. 114.

3. Agitated; disturbed, as by passion.

His dire attempt, which, nigh the birth,
Now rolling boils in his *tumultuous* breast.
Milton, P. L., iv. 16.

4. Turbulent; violent.

Furiously running in upon him, with *tumultuous* speech, he violently raught from his head his rich cap of sables.
Knolles.

=Syn. 2. Uproarious, riotous.

tumultuously (tū-mul'tụ-us-li), *adv.* In a tumultuous manner; with tumult or turbulence; by a disorderly multitude.

tumultuousness (tū-mul'tụ-us-nes), *n.* The state of being tumultuous, in any sense; disorder; commotion.

tumultus (tū-mul'tus), *n.* [L., commotion, tumult: see *tumult*.] Commotion; irregular action.—**Tumultus cordis**, irregular action of the heart.—**Tumultus sermonis**, a form of aphasia in which the patient stutters when reading aloud.

tumulus (tū'mū-lus), *n.*; pl. *tumuli* (-lī). [< L. *tumulus*, a mound, < *tumere*, swell: see *tumid*. Cf. *tump*[1] and *tomb*.] A sepulchral mound, as the famous Mound of Marathon raised over the bodies of those Athenians who fell in repelling the invading Persians; a barrow; very frequently, a mound covering and inclosing a more or less elaborate structure of masonry. The raising of mounds over the tombs of the dead, particularly of distinguished persons, or those slain in battle, was a usual practice among very many peoples from the most remote antiquity.

tun[1] (tun), *n.* [Also *ton* (now used only in the sense of a measure); early mod. E. *tunne, tonne*, < ME. *tunne, tonne*, < AS. *tunne* = MD. *tonne*, D. *ton* = OHG. *tunna*, MHG. *tunne*, G. *tonne* = Icel. *tunna* = Sw. *tunna*, OSw. *tynna* = Dan. *tönde*; cf. F. *tonne* (dim. *tonneau*, OF. *tonnel* = Pr. Sp. Pg. dim. *tonel*), ML. *tunna*, Ir. and Gael. *tunna*; root unknown; it is uncertain whether the Teut. or the Celtic forms are original. Hence *tunnel*.] 1. A large cask for holding liquids, especially wine, ale, or beer. See *ton*[1].

As who so filled a *tonne* of a fresshe ryuer,
And went forth with that water to woke with [add water to] Themese. *Piers Plowman* (B), xv. 331.

Take four and twenty bucks and ewes,
And ten *tun* of the wine.
Childe Vyet (Child's Ballads, II. 75).

The tallow to be saponified is placed in a large, slightly conical, wooden *tun*, which is made of oak or cedar, and is tightly bound with iron hoops.
W. L. Carpenter, Soap and Candles, p. 254.

Wel ofter of the welle than of the *tonne*
She drank. *Chaucer*, Clerk's Tale, l. 159.

3. In a brewery, the fermenting-vat or -tank. *E. H. Knight.*—4. A measure of capacity, equal by old statutes to 252 wine-gallons. There was a local tun of beer in London of 2 butts, and a customary tun of sweet oil was 236 gallons, and of syrup 3½ barrels. As all measures of capacity are regarded by metrologists as having been defined first by weight, some have supposed the tun was originally a short ton weight of water. 5. In *conch.*, a shell of the genus *Dolium* or family *Doliidæ*; a tun-shell.—6. The upper

part of a chimney; also, the chimney itself. *Halliwell.* [Prov. Eng.]

My newe hous with the iij. *tunnys* of chemeneyis.
Bury Wills (ed. Tymms), p. 20.

Bolt and tun, in *her.* See *bolt*[1].

tun[1] (tun), *v. t.*; pret. and pp. *tunned*, ppr. *tunning*. [< *tun*[1], *n.*] 1. To store in a tun or tuns, as wine or malt liquor; hence, to store in vessels of any sort for keeping.

Amongst the rest with the apples of Adam; the juice whereof they *tun* up and send into Turky.
Sandys, Travailes, p. 175.

2†. To fill as if a tun.

A vale of tears, a vessel *tunn'd* with breath,
By sickness broach'd, to be drawn out by death.
Quarles, Emblems, iii. 8.

3. To mingle with liquor when it is stored, as for the purpose of flavoring it, or making it keep better.

The women of our northern parts do *tun* the herb alehouve into their ale.
Gerard's Herball (1579), quoted by Bickerdyke, p. 63.

tun[2]†, *n.* An obsolete form of *town*.

tuna[1] (tō′nä), *n.* A fish. See *Thynnus*, *Sarda*, ★*Orcynus*, and *tunny*.

tuna[2] (tū′nä), *n.* A species of prickly-pear, *Opuntia Tuna*, or its fruit. It grows erect, sometimes 20 feet high, is spiny, and is much used for hedges in southern Europe. Its fruit, which is barrel shaped and 2 or 3 inches long, is much eaten, fresh and dried. It is one of the foremost cochineal-plants, and is said to be the only species used for this production in the Canaries.

tunable (tū′na-bl), *a.* [Also *tuneable*; < *tune* + *-able*.] 1. Capable of being put in tune, or made harmonious.

God ringing the changes on all accidents, and making them *tunable* to His glory.
Fuller, Holy State, IV. xiii. 12.

2. Harmonious; musical; tuneful. [Rare.]

More *tuneable* than lark to shepherd's ear.
Shak., M. N. D., i. 1. 184.

Shak., M. for M., iii. 2. 182.

★**tundra** (tön′drä), *n.* [Also *toondra*; < Russ. *tundra*, a marshy plain.] In the northern part of Russia (both in Europe and in Asia), one of the nearly level treeless areas which occupy most of that region, and which usually differ from steppes, in having the ground frozen beneath the surface even in summer. The climate and vegetation of the tundra are more decidedly arctic than those of the country to the south, with a corresponding increase in the number of small lakes and morasses.

A short distance south of Yefremov Kamen begins the veritable *tundra*, a woodless plain, interrupted by no mountain heights, with small lakes scattered over it, and narrow valleys crossing it.
Nordenskjöld, Voyage of the Vega (trans.), I. 377.

tundun (tun′dun), *n.* A toy: same as *bull-roarer*.

tune (tūn), *n.* [< ME. *tune*, < OF. *ton*, F. *ton* = ★Pr. *ton* = Sp. *ton*, *tono* = It. *tuono*, < L. *tonus*, < Gr. τόνος, a tone: see *tone*[1], of which *tune* is a doublet.] 1. A sound, especially a musical tone.

Leave your betraying smiles,
And change the *tunes* of your enticing tongue
To penitential prayers.
Fletcher (*and another*), Love's Cure, iii. 3.

Whose senses in so evil consort their stepdame Nature lays
That ravishing delight in them most sweet *tunes* doth not raise.
Sir P. Sidney (Arber's Eng. Garner, I. 570).

2. A well-rounded and pleasing succession of tones; an air; a melody; especially, a brief melodic piece in simple metrical form. The term is often extended to include the harmony with which such a melody is accompanied. Specifically—3. A musical setting of a hymn, usually in four-part harmony, intended for use in public worship; a hymn-tune; chorale.—4. Same as *entr'acte*. Sometimes called an *act-tune*.—5. Correct intonation in singing or playing on an instrument; capacity for producing tones in correct intonation; the proper construction or adjustment of a musical instrument with reference to such intonation; mutual adaptation of voices or instruments in pitch and temperament.

Like sweet bells jangled, out of *tune* and harsh.
Shak., Hamlet, iii. 1. 166.

A continual Parliament (I thought) would but keep the Common-weal in *tune*, by preserving Laws in their due execution and vigour. *Eikon Basilike*, p. 27.

6. Frame of mind; mood; temper, especially temper for the time being: as, to be in *tune* (to be in the right disposition, or fit temper or humor).

The poor distressed Lear 's i' the town;
Who sometime, in his better *tune*, remembers
What we are come about. *Shak.*, Lear, iv. 3. 41.

7. In *phren.*, one of the perceptive faculties, of which the organ is said to be situated above the external angle of the orbit of the eye, as high as the middle of the forehead, on each side of the temporal ridge. This faculty is claimed to give the perception of melody or harmony. See *phrenology*.—**In tune,** in correct or properly adjusted intonation; harmonious.—**Out of tune,** in incorrect or improperly adjusted intonation; inharmonious.—**To change one's tune,** to alter one's manner and way of talking.

O gin I live and bruik my life,
I'll gar ye *change your tune*.
Wedding of Robin Hood and Little John (Child's Ballads, [V. 184).

To sing another tune. See *sing*.—**To the tune of,** to the sum or amount of. [Colloq.]

Will Hazard has got the hipps, having lost *to the tune of* five hundr'd pound, tho' he understands play very well, no body better. *Swift*, Tatler, No. 230.

★**tune** (tūn), *v.*; pret. and pp. *tuned*, ppr. *tuning*. [< *tune*, *n.* Cf. *attune*.] **I.** *trans.* 1. To adjust the tones of (a voice or a musical instrument) with reference to a correct or given standard of pitch or temperament. See *tuning*.

Tune your harps,
Ye angels, to that sound.
Dryden, Spanish Friar, ii. 1.

2. To play upon; produce melody or harmony from.

When Orpheus *tuned* his lyre with pleasing woe,
Rivers forgot to run, and winds to blow.
Addison, Epil. to Granville's British Enchanters.

3. To express by means of melody or harmony; celebrate in music.

Fountains, and ye that warble, as ye flow,
Melodious murmurs, warbling *tune* his praise.
Milton, P. L., v. 196.

4. To give a special tone or character to; attune.

To that high-sounding Lyre I *tune* my Strains.
Congreve, Pindaric Odes, i.

In peace, Love *tunes* the shepherd's reed.
Scott, L. of L. M., iii. 2.

5. To put into a state proper for any purpose, or adapted to produce a particular effect.

Come, let me *tune* you; glaze not thus your eyes
With self-love of a vow'd virginity.
Massinger and Dekker, Virgin-Martyr, ii. 3.

6. To bring into uniformity or harmony.

Elizabeth might silence or *tune* the pulpits; but it was impossible for her to silence or *tune* the great preachers of justice, and mercy, and truth.
J. R. Green, Short Hist. Eng., p. 456.

II. *intrans.* 1. To give forth musical sound.

Tuning to the water's fall,
The small birds sang to her.
Drayton, Quest of Cynthia.

2. To accord with some correct or given standard of pitch or temperament.—3. To utter inarticulate musical sounds with the voice; sing without using words; hum a tune. *Imp. Dict.* [Rare.]—**To tune up,** to begin to sing or play: as, birds *tune up* after a shower. [Colloq.]

tuneable, tuneableness, etc. See *tunable*, etc.

tuned (tūnd), *a.* [< *tune* + *-ed*[2].] Toned: usu-★ally in composition: as, a shrill-*tuned* bell.

tuneful (tūn′fûl), *a.* [< *tune* + *-ful*.] Full of melody or tune. (*a*) Melodious; sweet of sound.

The *tuneful* voice was heard from high.
Dryden, Song for St. Cecilia's Day.

(*b*) Producing sweet sounds; musical.

The Minstrel was infirm and old; . . .
His *tuneful* brethren all were dead.
Scott, L. of L. M., Int.

tunefully (tūn′fûl-i), *adv.* In a tuneful manner; harmoniously; musically.

tunefulness (tūn′fûl-nes), *n.* The state or character of being tuneful.

tuneless (tūn′les), *a.* [< *tune* + *-less*.] 1. Unmusical; inharmonious.

How often have I led thy sportive choir,
With *tuneless* pipe, beside the murmuring Loire!
Goldsmith, Traveller, l. 244.

2. Not employed in or not capable of making music.

When in hand my *tunelesse* harp I take,
Then doe I more augment my foes despight.
Spenser, Sonnets, xliv.

3. Not expressed rhythmically or musically; silent; without voice or utterance.

On thy voiceless shore
The heroic lay is *tuneless* now;
The heroic bosom beats no more!
Byron, Don Juan, iii. 86.

tuner (tū′nėr), *n.* [< *tune* + *-er*[1].] 1. One who tunes or puts in tune; also, one who makes music or sings.

The pox of such antic, lisping, affecting fantasticoes, these new *tuners* of accents! *Shak.*, R. and J., ii. 4. 30.

Our mournful Philomel,
That rarest *tuner*.
Drayton, Shepherd's Sirena.

Specifically—2. One whose occupation it is to put musical instruments in proper tune and repair.

There are a good many blind *tuners*.
J. H. Ewing, Story of a Short Life, viii.

3. In *organ-building*, an adjustable flap or opening near the top of a flue-pipe, whereby the effective length of the air-column may be altered, so as to alter the pitch of the tone.

tung†, *n.* An old spelling of *tongue*.

tung-oil (tung′oil), *n.* [< Chinese *t'ung* + E. *oil*.] A fixed oil obtained from the seeds of the tung-tree, *Aleurites cordata*, forming 35 per cent. of their weight. It is produced in immense quantities in China, where it is universally employed for calking and painting junks and boats, and for varnishing and preserving all kinds of woodwork. In drying quality it surpasses all other known oils. It is also used for lighting, but is inferior for the purpose to tea-oil. It is not known in European commerce. Also *tree-oil* or *wood-oil*. *Spons' Encyc. Manuf.*

tun-great† (tun′grāt), *a.* [ME. *tonne greet*; < *tun*[1] + *great*.] Having a circumference of the size of a tun.

Every piler, the temple to sustene,
Was *tonne-greet*, of iren bright and shene.
Chaucer, Knight's Tale, l. 1136.

tungstate (tung′stāt), *n.* [< *tungst(ic)* + *-ate*[1].] A salt of tungstic acid: as, *tungstate* of lime.—**Sodium tungstate,** a crystalline salt prepared by roasting wolfram with soda-ash. It is used as a mordant, and ★to render fabrics uninflammable.

tungsten (tung′sten), *n.* [= F. *tungstène* = Sp. Pg. It. *tungsteno* = G. *tungstein*, < Sw. *tungsten* (= Dan. *tungsteen*), < *tung*, heavy, = Dan. *tung* = Icel. *thungr*, heavy (cf. *thungi*, a load, *thunga*, load), + *sten*, stone, = Dan. *steen* = G. *stein* = E. *stone*, q. v.] 1. Chemical symbol, W; atomic weight, 184.0. A metal some of whose ores have long been known (see *wolfram* and *scheelite*), but they were supposed to be compounds of tin. That scheelite (tungstate of lime) was a compound of lime with a peculiar metallic acid was proved by Scheele and Bergman in 1781, and the composition of wolfram was also determined by the brothers D'Elhujar a few years later. Metallic tungsten, as obtained by the reduction of the trioxid, is a gray powder having a metallic luster and a specific gravity of 19.129 (Roscoe). The most interesting fact in regard to tungsten is that tungsteniferous minerals, especially wolfram, are very frequent associates of the ores of tin. (See *wolfram*.) Tungsten has been experimented with in various ways, as in improving the quality of steel by being added to it in small quantity; but no alloy containing tungsten has come into general use. (See *tungsten steel*, under *steel*[1].) A new alloy called *sideraphite*, containing a large percentage of iron, with some nickel, aluminium, and copper, together with 4 per cent. of tungsten, has recently been introduced; this is said to resemble silver, and to be very ductile and malleable and not easily attacked by acids. Another alloy called *minargent*, consisting chiefly of copper and nickel, is said sometimes to contain a small percentage of tungsten. Tungsten is chemically related to molybdenum and uranium. Certain chemically remarkable compounds of tungsten (tungstates with tungsten dioxid) have been employed as substitutes for bronze-powder.

2. The native tungstate of lime.—**Tungsten steel.** See *steel*[1].

tungstenic (tung-sten′ik), *a.* [< *tungsten* + *-ic*.] Of or pertaining to or procured from tungsten; tungstic.

tungsteniferous (tung-sten-if′e-rus), *a.* Containing tungsten.

tungstic (tung′stik), *a.* [< *tungst(en)* + *-ic*.] Of or pertaining to or obtained from tungsten.—**Tungstic acid,** an acid obtained by precipitating a solution of tungstic oxid in an alkali by the addition of an acid. It is dibasic, having the composition H_2WO_4.—**Tungstic ocher.** Same as *tungstite*.

tungstite (tung′stīt), *n.* [< *tungst(en)* + *-ite*[2].] Native oxid of tungsten, occurring in pulverulent form, of a bright-yellow color, usually in connection with wolfram, the tungstate of iron and manganese. Also called *tungstic ocher*.

tungstous (tung'stus), *a.* Same as *tungstic.*

tung-tree (tung'trē), *n.* [< Chinese *t'ung* + E. *tree.*] The Chinese varnish- or oil-tree, *Aleurites cordata*, extensively grown in China for its oil product. See *tung-oil.*

Tungusic (tun-gō'sik), *a.* A designation applied to a group of Ural-Altaic or Scythian tongues spoken by tribes in the northeast of Asia. The most prominent dialect is the Manchu, spoken by the tribes who conquered China in 1644.

tunhoof (tun'höf), *n.* The ground-ivy, *Glecoma hederacea.*

tunic (tū'nik), *n.* [< ME. **tunike* (?) (cf. *tunicle*) (cf. AS. *tunice, tunicæ* = OHG. *tunihhā*); < OF. (and F.) *tunique* = Pr. Sp. Pg. *tunica* = It. *tonica*, < L. *tunica*, a tunic.] **1.** In *Rom. antiq.*, a garment like a shirt or gown worn by either sex, very often an undergarment: hence a general term applied to garments, of all periods and materials, which are worn depending from the neck, whether girded at the waist or not, or kept in place by other garments worn outside of them, and whether such garments are long and full or short and scant. Thus, the name is given to the Greek chiton in its various forms, to the early English garment worn under the cloak, and even to the hauberk of mail. In the breast of the tunic of the ancient Roman senator a broad vertical stripe of purple (called *latus clavus*) was woven; the equites wore two narrow parallel stripes (called *angusti clavi*) extending from the shoulders to the bottom of the tunic. Hence the terms *laticlavii* and *angusticlavii* applied to persons of these orders. See also cut under *stola.*

Tunic or Chiton of Ionian form (over it is girded the Dionysiac nebris or fawn-skin), from a Greek amphora of the 4th century B. C., found at Perugia. (From "Monumenti dell' Instituto.")

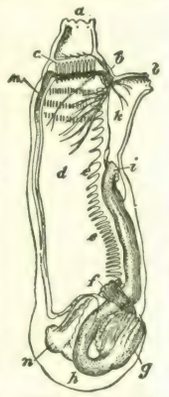
Tunick or Tunicat, a Jerkin, Jacket, or sleeveless coat, formerly worn by Princes. *Blount*, Glossographia (1670).

2. At the present time, a garment generally loose, but gathered or girded at the waist, worn by women, usually an outer garment; a sort of wrap or coat for street wear.

Her Majesty wore a white satin petticoat, over which was a silver llama *tunic*, trimmed with silver and white blonde lace. *First Year of a Silken Reign*, p. 230.

3. *Eccles.*, a vestment worn over the alb in the Roman Catholic Church and in some Anglican churches by the subdeacon or epistler at the celebration of the mass or holy communion. It is similar in shape and color to the dalmatic, but sometimes smaller and with less ornamentation. The bishop's tunic is worn under the dalmatic, and is shorter than the subdeacon's. See *tunicle.*

4. A military surcoat.—**5.** In the British army, the ordinary fatigue-coat: applied usually to the coat of a private, but sometimes to that of an officer. [Colloq.]



"Please show me your Victoria Cross." "It's on my *tunic*, and that 's in my quarters in camp."
J. H. Ewing, Story of a Short Life, vii.

6. A natural covering; an integument. Specifically—(*a*) In *anat.*, a covering or investing part; a tunicle; a coat, as of the eyeball, the stomach, or an artery. See *tunica.* (*b*) In *zoöl.*, one of the layers forming the covering of an ascidian. See *Tunicata* (with cut), and cut under *Ascidia.* (*c*) In *bot.*, any loose membranous skin not formed from epidermis the skin of a seed; also, the peridium of certain fungi.—**Albugineous tunic.** Same as *albuginea.*—**Arachnoid tunic.** Same as *arachnoid*, 3.—**Inner tunic**, in *bot.*, a membrane, more or less colored, which surrounds the nucleus or hymenium in the genus *Verrucaria*, situated immediately beneath the perithecium. *Leighton*, Brit. Lichens.—**Ruyschian tunic.** Same as *choriocapillaris.*—**Talaric tunic.** See *talaric*, and *Ionic chiton*, under *chiton.*—**Vaginal tunic.** See *vaginal* and ★*eye*[1], 1.

tunica (tū'ni-kä), *n.*; pl. *tunicæ* (-sē). [NL., < L. *tunica*, tunic: see *tunic.*] Same as *tunic.*—**Tunica abdominalis**, the aponeuroses of the abdominal muscles of some animals, as the horse, forming a strong fascia or sheet for the support of the abdominal viscera.—**Tunica adnata**, one of the coats of the eyeball, lying between the sclerotic proper and the conjunctiva. It is the expansion of fibrous tissue, or aponeurosis, whereby the muscles of the eyeball are inserted into the sclerotic. Also called *adnata, tunica albuginea.*—**Tunica adventitia.** See *adventitia.*—**Tunica albuginea.** Same as *albuginea.*—**Tunica arachnoidea.** (*a*) The arachnoid membrane, a thin membrane forming one of the coverings of the brain and spinal cord. (*b*) One of the layers of the choroid coat of the eye.—**Tunica choriocapillaris.** Same as *choriocapillaris.*—**Tunica conjunctiva.** Same as *conjunctiva*, 1.—**Tunica cornea pellucida.** Same as *cornea*, 1.—**Tunica granulosa**, the granular lining of the cavity of a Graafian follicle.—**Tunica intima.** Same as *intima.*—**Tunica muscularis mucosæ**, a thin and at places incomplete layer of smooth muscle-fibers in the mucous membrane of the alimentary canal. Also called simply *muscularis mucosæ.*—**Tunica propria**, in *anat.*: (*a*) The proper coat of some structure, as an artery; the layer which specially constitutes such a structure, as distinguished from other layers which may form a part of it by investing or lining it. The tunica propria of the spleen is a strong elastic connective-tissue coat lying immediately beneath the serous coat; that of the testis is defined under *tunica vaginalis testis.* (*b*) Specifically, the membrane lining the bony labyrinth of the ear; the walls of the membranous labyrinth.—**Tunica reflexa**, the outer wall of the tunica vaginalis testis.—**Tunica Ruyschiana.** Same as *choriocapillaris.*—**Tunica vaginalis oculi**, a sheathing fascia which surrounds the optic nerve and part of the eyeball, formed of fascia.—**Tunica vaginalis testis**, the serous investment of the testicle, formed of a pouch or process of the peritoneum, usually a shut sac: it has two walls, the tunica propria, upon the testis itself, and the tunica reflexa, separated from this by the cavity.—**Tunica vasculosa Halleri.** Same as *choriocapillaris.*—**Tunica vasculosa testis**, the pia mater of the testicle, a vascular layer underlying the tunica albuginea.

tunicary (tū'ni-kā-ri), *n.*; pl. *tunicaries* (-riz). [< *tunic* + *-ary.*] A tunicate.

Tunicata (tū-ni-kā'tä), *n. pl.* [NL., neut. pl. of *tunicatus*, clothed with a tunic: see *tunicate.*] A class, superclass, or phylum of animals intermediate between and connecting the invertebrates with the true vertebrates, now made a prime division (*Urochorda*) of chordate animals; the ascidians, tunicaries, or sea-squirts. The evidence of vertebrate affinity or character is chiefly in the larval state, when there is a sort of notochord, the urochord (see *Urochorda*), which in one group persists in the adult (see *Appendiculariidæ*). The tunicates are so called from the thick, tough, leathery integument or tunic, the name having been given by Lamarck in 1816 to the forms then known, and the class having been placed in his system between the worms and the radiates. The tunicates had before been regarded as polyps or even as sponges; with Cuvier they formed a division (*Nuda*) of mollusks; afterward and for many years they were considered as m lluscoids, and associated with or approximated to the brachiopods and polyzoans. The discovery of the urochord by Kowalevsky in 1866 gave the first evidence of their proper position among chordate animals, and consequently of their vertebrate affinity. They were thereupon regarded as the "ancestors" of the vertebrates, of which, however, they appear rather to represent a degenerate or retrograde side-shoot. The developmental history is intricate and perplexing. Alternation of generation has been determined for the whole group, and some members of it occur under two distinct forms. One of the most remarkable peculiarities of *Tunicata* is the presence in the integument of tunicin, a kind of animal cellulose—cellulose having been supposed to be peculiar to plants. Tunicates are very dissimilar to one another in outward appearance, though they conform to a type of structure most parts of which can be clearly homologized with those of vertebrates. An ordinary simple ascidian resembles a leathern bottle fixed at the base, and provided with two openings, through one of which water is indrawn, and through the other of which it can be expelled with some force when the animal contracts, whence the name *sea-squirt;* other fanciful names are *sea-pear, sea-peach, sea-pork*, and *sea-potato.* Other tunicates, also fixed, are social, aggregate, or colonial; some are free-swimming, or fixed and free at different stages of their development, and of the free forms some are simple and others are linked in chains. The salps and pyrosomes are phosphorescent. All tunicates are marine; most live on the shore or surface, but some at great depths. Their classification has been almost as changeable as their location in the system. The arrangement of H. Milne Edwards (1826, and long current with little modification) has been entirely remodeled. According to a late system, *Tunicata* rank as a class divided into three orders: (*a*) *Larvacea*, tailed when adult, represented by the family *Appendiculariidæ* (see cut under *Appendicularia*); (*b*) *Thaliacea*, free-swimming, simple or compound, without a tail in the adult, and either cyclomyarian (*Doliolidæ*) or hemimyarian (*Salpidæ* and *Octacnemidæ*) (see cuts under *Doliolidæ* and *Salpa*); and (*c*) *Ascidiacea*, of which there are three groups or suborders—(1) *Simplices*, resembling salps in being free-swimming, colonial, and luminous, with one family, *Pyrosomatidæ;* (2) *Compositæ*, fixed, reproducing by gemmation and so forming compound organisms, with seven families, of which *Botryllidæ* is the best-known, a member of it having been described in 1756; and (3) *Simplices*, fixed (exceptionally free) and solitary (rarely social—that is, imperfectly composite), with four families, *Molgulidæ, Cynthiidæ, Ascidiidæ*, and *Clavellinidæ.* The last named are the social ascidians; the second and third families are each divided into subfamilies ranked as families by some writers, and are also the largest families, represented by the numerous genera and species which come most frequently under observation, and to which the common name *ascidian* is specially pertinent. (See cuts under *Ascidia* and *gastrulation.*) A former broader arrangement, which ignored the peculiarities of the *Larvacea*, was into two orders, by means of which the salps and the doliolids on the one hand were contrasted with all other tunicates on the other; and each of these orders had a number of different names. Also called *Ascidioida.*

Phallusia mentula, one of the *Tunicata*, the test removed; the cut is in effect a longitudinal section.

a, oral aperture; *b*, ganglion; *c*, circlet of tentacles; *d*, branchial sac, the three rows of marks at its upper part indicating the stigmata; *e*, languets; *f*, esophageal opening; *g*, stomach; *h*, intestine; *i*, anus; *k*, atrium; *l*, atrial orifice; *m*, endostyle; *n*, heart.

tunicate (tū'ni-kāt), *a.* and *n.* [< L. *tunicatus*, pp. of *tunicare*, clothe with a tunic, < *tunica*, tunic: see *tunic.*] **I.** *a.* **1.** In *zoöl.*, coated; covered with tunics or integuments; specifically, enveloped in membranous integuments or tunics, as an ascidian; of or pertaining to the *Tunicata;* tunicated.—**2.** In *entom.*, covered one by another, like a set of thimbles, as the joints of some antennæ.—**3.** In *bot.*, covered with a tunic or membrane; coated.—**Tunicate club** or **capitulum** of an antenna, a club or capitulum formed of tunicate joints, the outer joints being visible only at the end.—**Tunicate joints**, in *entom.*, joints set one into another like funnels.

II. *n.* 1†. A tunic. *Blount.*—**2.** An ascidian, tunicary, or sea-squirt; any member of the *Tunicata.*

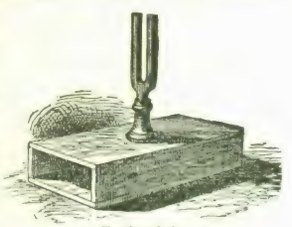
tunicated (tū'ni-kā-ted), *a.* [< *tunicate* + *-ed*[2].] Same as *tunicate.*—**Tunicated bulb**, a bulb composed of numerous concentric coats, as an onion.

tunicin (tū'ni-sin), *n.* [< *tunic(ate)* + *-in*[2].] The peculiar substance, resembling if not identical with vegetable cellulose, found in the integument of the tunicates; animal cellulose. *Encyc. Brit.*, XXIII. 609.

tunicle (tū'ni-kl), *n.* [< ME. *tunicle*, < OF. **tunicle*, < L. *tunicula*, dim. of *tunica*, tunic: see *tunic.*] **1.** A tunic; especially, a fine, thin, or delicate tunic; a slight coat or covering.

The humours and *tunicles* [of the eye] are transparent, to let in colours, and therefore tinctured with none themselves. *Evelyn*, True Religion, I. 34.

2. *Eccles.*, same as *tunic*, 3. When used in the plural it signifies both the dalmatic and the tunic. Also spelled *tunacle.*

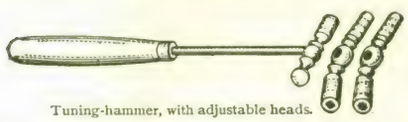


Where there be many Priestes, or Decons, there so many shalbe ready to help the Priest . . . as shalbe requisite: And shall haue upon theim lykewise the vestures appointed for their ministery—that is to saye, Albes, with *tunacles.*
Book of Common Prayer, Edw. VI., 1549 (ed. Pickering), fol. [ci. (The Supper of the Lord).

★**tuning** (tū'ning), *n.* [Verbal n. of *tune*, *v.*] The act, process, or result of adjusting the intonation of a musical instrument. The process varies with the mechanical construction of the instrument. In stringed instruments, like the pianoforte, violin, harp, etc., it consists in adjusting the tension of the strings by means of tuning-pins or -pegs. In wind-instruments, like the flute, clarinet, trumpet, etc., it consists in adjusting the length of the tube by means of some kind of sliding joint or crook, so that the fundamental tone of the tube shall be correct. In a bell it consists in adjusting the thickness of the sound-bow. In the organ it consists in various ad ustments of the effective length of the air-column in flue-pipes, or of the vibrating part of the reed in reed-pipes. The intricacy of the process depends chiefly on the number of separate tones whose intonation is fixed, and is most conspicuous in instruments with a keyboard, like the organ and the pianoforte. On these instruments some system of compromise temperament is a necessity, if freedom of modulation is desired. Accordingly, great pains is taken to set the temperament in a single central octave, and all other octaves are then adjusted thereto. Tuning is much facilitated by the phenomenon of beats, especially in the case of the organ. See *temperament* and *beat*[1].—**Flat** or **French flat tuning**, one of the methods of tuning a lute: so called because the French pitch was lower than that elsewhere used.—**Pythagorean tuning.** See *Pythagorean.*

tuning-cone (tū'ning-kōn), *n.* A cone of brass, usually hollow, used in tuning metal organ-pipes. When the pitch is to be raised the point of the cone is driven into the top of the pipe so as to increase its flare, and when the pitch is to be lowered the base of the cone is driven over the top of the pipe so as to decrease its flare. Also *tuning-horn.*

tuning-crook (tū'ning-krůk), *n.* In musical instruments of the brass wind group, a crook or loop of tube which may be inserted to change the fundamental tone of the tube.



tuning-fork (tū'ning-fôrk), *n.* A steel instrument with two prongs, designed to produce, when struck, a musical tone of some particular pitch. Its invention is ascribed to John Shore, in the middle of the eighteenth century. Tuning-forks are particularly useful because their tone is comparatively free from harmonics, and because their pitch is not disturbed by ordinary changes of temperature. They are therefore much employed in acoustical investigation and

Tuning-fork.

to furnish convenient standards of pitch. Compare *tonometer*, and see *pitch*[1].

tuning-hammer (tū′ning-ham″ėr), *n.* A wrench used in tuning the pianoforte, consisting of a

Tuning-hammer, with adjustable heads.

long wooden handle with two hollow metal heads made to fit over the tuning-pins: so called because of its general shape.

tuning-horn (tū′ning-hôrn), *n.* Same as *tuning-cone*.

tuning-key (tū′ning-kē), *n.* See *key*[1].

tuning-knife (tū′ning-nīf), *n.* Same as *reed-knife*.

tuning-lever (tū′ning-lev″ėr), *n.* Same as *tuning-hammer*.

tuning-peg (tū′ning-peg), *n.* See *peg*, 1 (*c*).

tuning-pin (tū′ning-pin), *n.* Same as *tuning-peg*.

tuning-slide (tū′ning-slīd), *n.* See *slide*, 9 (*c*), and *horn*, 4 (*c*).

tuning-wire (tū′ning-wīr), *n.* See *pipe*[1], 2 (*b*).

Tunisian (tū-nis′i-an), *a.* and *n.* [= F. *tunisien*; as *Tunis* + *-ian*.] **I.** *a.* Pertaining to Tunis, a regency and protectorate of France, in northern Africa, or to Tunis, its principal city.

II. *n.* A native or an inhabitant of Tunis.

tunist (tū′nist), *n.* A tuner. *Sedley Taylor*, Science of Music, p. 132. [Rare.]

tunk (tungk), *n.* [Cf. *thump*.] A blow; a stroke; a hit. [Prov. Eng. and New Eng.]

Tunker, *n.* See *Dunker*[1].

tun-moot (tun′möt), *n.* [Repr. AS. *tūngemōt*, < *tūn*, town, + *gemōt*, meeting: see *moot*[1].] In *early Eng. hist.*, an assembly, court, or place of meeting of the town or village. See *moot*[1].

There is no ground for believing that the *tun-moot* was a judicial court. Its work was the ordering of the village life and the village industry; and traces of this still survive in our institutions.

J. R. Green, Making of England, p. 187.

tunnage (tun′āj), *n.* [< *tun*[1] + *-age*. Cf. *tonnage*.] A tax or duty of so much per tun formerly imposed in England upon all imported wines. Sometimes spelled *tonnage*, and used chiefly in the phrase *tunnage* (or *tonnage*) *and poundage*. See *poundage*[1], 1.

The parliament, which met on the 4th of November under Bedford, signalised its gratitude by granting . . . *tunnage and poundage* for life. *Stubbs*, Const. Hist., § 326.

tunnegar (tun′e-gär), *n.* A funnel. *Halliwell.*

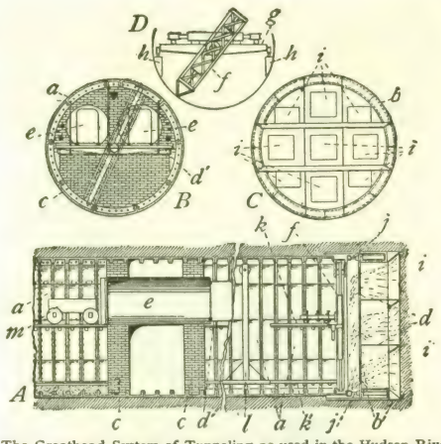
tunnel (tun′el), *n.* [Early mod. E. also *tonnel*, *tonnell*; < ME. *tonnell*, < OF. *tonnel*, later *tonneau*, m., a tun, cask, pipe, a tunnel for partridges (F. *tonneau*, a tun, cask, ton), also OF. *tonnelle*, F. *tonnelle*, f., an arbor, arched vault, a tunnel for partridges, etc., dim. of *tonne*, a tun, cask, pipe: see *tun*. Hence F. *tunnel*, a tunnel (def. 7).] **1.** The opening of a chimney for the passage of smoke; a flue.

One great chimney, whose long *tonnell* thence
The smoke forth threw. *Spenser*, F. Q., II. ix. 29.

2. Hence, figuratively, a nostril. [Rare.]

He does take this same filthy roguish tobacco, the finest and cleanliest! it would do a man good to see the fume come forth at 's *tonnels*.

B. Jonson, Every Man in his Humour, i. 3.



3. A funnel. See *funnel*, 1.

His [a vainglorious man's] barrel hath a continual spigot, but no *tunnel*; and, like an unthrift, he spends more than he gets. *Rev. T. Adams*, Works, I. 501.

4†. A long pipe-like passage made of wire, into which partridges were decoyed.

Tonnelle, a *tunnell* or staulking horse for partridges . . . *Tonneller*, to take Partridges with a *Tunnell* or Staulking horse. *Cotgrave.*

5. A tunnel-net.—**6.** An arched drain. [Prov. Eng.]—**7.** A gallery, passage, or roadway beneath the ground, under the bed of a stream, or through a hill or mountain. Tunnels are used in military operations, in mining, in conveying water, and as passageways for vehicles and railway-trains. They are of various construction, according to the character of the soil or rock through which they pass. In soft silt or sand, as in subways beneath a stream, the interior of the tunnel is lined with brickwork, with, in some instances, a shield of plate-iron outside the bricks. In soil, soft rock, or quicksands, heavy masonry lining is sometimes required. In solid rock, a simple excavation is generally sufficient, as in many of the shorter railroad-tunnels. The section of a tunnel is usually a cylindrical or elliptical arch, with sometimes, in soft soils, an inverted arch below. The earlier modern tunnels were excavated by hand-drilling and blasting; but machine-drilling, by means of compressed air, has been brought to great perfection, and the rate of progression has been increased and the cost of excavation reduced. In the Greathead system of tunneling, the tunnel is made by

The Greathead System of Tunneling as used in the Hudson River Tunnel at New York.

A, longitudinal vertical section; *B*, transverse section, looking toward bulkhead; *C*, elevation of shield, looking toward the face; *D*, detail view of the erector: *a*, shell; *b*, shield; *c*, brick bulkhead; *d*, platforms in shield; *d′*, platform at bulkhead; *e*, air-locks; *f*, Moir's erector, whereby the heavy cast-iron segments of the shell are lifted or carried into position; *g*, support for the erector, resting on the brackets *h*; *i*, openings in the face of the shield, through which the silt is caused to flow by pressure (as shown in *A*); *j*, jacks, by which the shield is pressed forward into the silt; *k*, *k′*, railway-tracks, the upper for the erector, the lower for transporting excavated material to the elevator *l*, at the bulkhead; *m*, car, by which the excavated material passed through the air-locks is received for removal.

the use of a cylindrical shield driven forward by hydraulic pressure; the excavation is lined with a cast-iron shell, and the interspace between the shell and the sides of the excavation is lined with grout forced in by air-pressure. The shell is made of segments bolted together. Silt and mud are forced through doors in the face of the shield, and excavated material is taken out through air-locks in the bulkhead of the tunnel. The longest railroad-tunnel is the St. Gotthard, through the Alps (about 9 miles); the longest in the United States is the Hoosac tunnel, in western Massachusetts (4¾ miles).

8. In *mining*, any level or drift in a mine open at one end, or which may serve for an adit. See *adit*, 1.—**9.** In *zoöl.*, the underground burrow of some animals, when long and tortuous, as of the mole or of the gopher.—**Pilot tunnel,** a device for directing a tunnel in the prescribed grade, consisting of a flanged tube made up of interchangeable plates, which can be bolted to the shield and forced concentrically into the silt in advance of the face of the heading. From this measurements in any direction can be made to limit the cutting to the proper dimensions and distance from the center.—**Tunnel of Corti,** in *anat.*, a canal, triangular in section, between the inner and outer sets of the slanting Cortian rods, filled with endolymph. Also *Cortian tunnel*.

tunnel (tun′el), *v.*; pret. and pp. *tunneled*, *tunnelled*, ppr. *tunneling*, *tunnelling*. [< *tunnel*, *n.*] **I.** *trans.* **1.** To form, cut, or dig a tunnel through or under.—**2.** To form like a tunnel; hollow out in length.

Some foreign birds . . . plat and weave the fibrous parts of vegetables together, and curiously *tunnel* them, and commodiously form them into nests.

Derham, Physico-Theol., iv. 13.

3. To catch in a tunnel-net.

II. *intrans.* To form, cut, or drive a tunnel.

tunnel-disease (tun′el-di-zēz″), *n.* A form of anemia caused by the parasite *Dochmius*.

The Italians who died from cholera in digging the Suez Canal, or from *tunnel-disease* in the St. Gothard Tunnel. *Nineteenth Century*, XXII. 150.

tunneled (tun′eld), *a.* [< *tunnel* + *-ed*[2].] Provided with a tunnel.—**Tunneled sound,** in *surg.*, a metallic sound having a central cavity or bore by means of which it can be passed over a more slender instrument previously introduced, called a *guide*: used when it is desired to effect an entrance through a very narrow passage, as in tight stricture of the urethra. See *sound*[4], *n.*

tunnel-head (tun′el-hed), *n.* In *metal.*, the top of a blast- or shaft-furnace.

tunnel-hole (tun′el-hōl), *n.* The throat of a blast-furnace.

tunnel-kiln (tun′el-kil), *n.* A lime-kiln in which the fuel used is coal, as distinguished from a *flame-kiln*, in which wood is used. *E. H. Knight.*

tunnel-net (tun′el-net), *n.* **1.** A fishing-net with a wide mouth and narrow at the opposite end.—**2.** A part of a pound-net through which fish pass into the bowl. [Lake Michigan.]

tunnel-pit (tun′el-pit), *n.* Same as *tunnel-shaft*.

tunnel-shaft (tun′el-shȧft), *n.* A shaft sunk from the top of the ground to meet a tunnel at a point between its ends.

tunnel-vault (tun′el-vâlt), *n.* In *arch.*, a barrel- or cradle-vault; a semicircular vault. See *cylindrical vaulting*, under *cylindric*.

tunnel-weaver (tun′el-wē″vėr), *n.* Any spider of the group *Territelariæ*: distinguished from *orb-weaver*.

tunning (tun′ing), *n.* [Verbal n. of *tun*[1], *v.*] **1.** The act of brewing; also, that which is brewed at one time.

You have some plot now,
Upon a *tunning* of ale, to stale the yeast.
B. Jonson, Devil is an Ass, i. 1.

2. The process of being put into a cask or tun.

So Skelton-laureat was of Elinour Rumming,
But she the subject of the rout and *tunning*.
B. Jonson, Tale of a Tub, v. 3.

tunning-cask (tun′ing-kȧsk), *n.* A cask in which fermented ale is stored when racked off. See *tun*[1], *v. t.*

tunning-dish (tun′ing-dish), *n.* **1†.** Same as *tun-dish*.—**2.** A wooden dish used in dairies. ★*Halliwell.* [Prov. Eng.]

tunny (tun′i), *n.*; pl. *tunnies* (-iz). [Formerly also *tunnie*, *tuny*, *tonny*, sometimes *thunny*; appar. a dim. form of what would reg. be **ton*, < OF. *ton*, *thon*, F. *thon* = Pr. *thon* = It. *tonno*, < L. *thunnus*, *thynnus*, ML. also *tinnus*, prob. also **tunnus*, < Gr. θύννος, θῦνος, a tunny, prob. lit. 'darter,' < θύνειν, dart along.] A scombroid fish of the genus *Thunnus*, as *T. thynnus*. The germon, or long-finned tunny, is *Germo alalonga*. (See cut under *albacore*.) The true tunny of the Mediterranean and Atlantic waters has been the object of an important fishery, systematically conducted from remote antiquity, as by the Phenicians, to the present day. It is one of the largest food-fishes, growing to a length of 10 feet, and acquiring a weight of one thousand pounds or more. It is a near relative of the bonito and albacore, but is distinguished from the latter by the much shorter pectoral fins; the body is deepest about the middle, whence it tapers rapidly to a slender caudal peduncle; there are eight or nine short separate finlets behind the dorsal and anal fins; the dorsals are two, of which the first rises high in front; the caudal fin is very short, but its upper and under lobes extend high and low. The color is dark-bluish above, and below grayish, irregularly silvery. The tunny is a fish of the high seas, but periodically wanders in large shoals coastwise. The flesh is eaten fresh, or preserved in salt or in oil.

To see the small fish *Tuny* scape the net.
Heywood, Dialogues (Works, ed. Pearson, 1874, VI. 171).

tun-shell (tun′shel), *n.* In *conch.*, a tun. See *Doliidæ*, and cut under *Dolium*.

tuny (tū′ni), *a.* [< *tune* + *-y*[1].] Abounding in tunes; characterized by melody, especially as distinguished from harmony. [Colloq.]

Let our modern æsthetes, who sneer at Mozart for being *tuny*, say what they will. *N. and Q.*, 7th ser., XI. 30.

tup (tup), *n.* [Sc. also *tip*; < ME. *tuppe*, *tupe*, a ram. Cf. LG. *tuppen*, *toppen*, pull by the hair.] **1.** A ram; the male of the sheep.

Nowe putte amonge the shepe thaire *tuppes* white,
Not oonly woolled, but also thair tonge.
Palladius, Husbondrie (E. E. T. S.), p. 166.

2. In *mech. engin.*, the mass which forms the striking weight of a tilt-, drop-, or steam-hammer. Its face is usually so arranged that it can be removed when worn out or broken. *Gun Foundry Board Report*, p. 37.

tup (tup), *v.*; pret. and pp. *tupped*, ppr. *tupping*. [< *tup*, *n.*] **I.** *trans.* **1.** To cover or copulate with: used specifically of a ram. *Shak.*, Othello, i. 1. 89.—**2.** To butt. [Prov. Eng.]—**3.** To bow to before drinking. *Halliwell.* [Prov. Eng.]

II. *intrans.* **1.** To copulate, as a ram.—**2.** To butt, as a ram. [Prov. Eng.]

Tupaia (tū-pā′iạ), *n.* [NL. (Sir S. Raffles, 1821), < Malay *tūpāya*, *tūpey*.] The typical genus of the *Tupaiidæ*, the squirrel-shrews, contain-

Banxring (*Tupaia javanica*).

ing several species of India, the Malay peninsula, and various Malayan islands. They are pretty little creatures of arboreal habits, with long bushy tails, feeding upon fruits and insects, with the general aspect and manners of squirrels. Some are called *banxring* and *tana*. Also written *Tupaja*, *Tupaya*.

Tupaiidæ (tū-pā-ī′i-dē), *n. pl.* [NL., < *Tupaia* + *-idæ*.] A family of squirrel-like arboreal and diurnal insectivorous mammals. They have a developed cæcum, a comparatively large brain-case, completed orbits, large zygomatic arches, bullate tympanic bones, tibia and fibula separate, the pubic symphysis long, the hind limbs moderately exceeding the fore in length, and thirty-eight teeth. There are at least 2 genera, *Tupaia*, the banxrings, and *Ptilocercus*, the pentails, inhabiting Asia and Malaysia, with several species. See cuts under *Ptilocercus* and *Tupaia*. Also *Tupaiadæ*.

tupelo (tū′pe-lō), *n.* [Amer. Ind.] One of several species of *Nyssa*, most commonly *N. sylvatica*, the pepperidge, sour-gum, or black-gum. See *black-gum*, and cut under *Nyssa*. The sour tupelo is *N. Ogeche*, otherwise called *gopher-plum* and *Ogeechee lime*. (See *lime*3.) The large tupelo, cotton- or tupelo-gum, is *N. aquatica*, a large tree of deep swamps and river-bottoms in the southern United States. Its wood, which is light, soft, and unwedgeable, is used in turnery, largely for woodenware, for wooden shoes, etc.; that of the root is used for the floats of nets. *Sargent.*—**Tupelo tent**, a small rod of tupelo which is inserted into the mouth of the womb when it is desired to dilate this passage. The tupelo effects this by increasing in size through absorption of the fluids of the parts.

Tupistra (tū-pis′trą), *n.* [NL. (Ker, 1814), so called from the shape of the stigma; < Gr. τυπίς, or τυπάς, a mallet, < τύπτειν, strike: see *type*.] A genus of monocotyledonous plants, of the family *Convallariaceæ*. It is characterized by flowers in a dense cylindrical spike with spreading perianth-lobes, and a thick peltate stigma which is deeply lobed or is nearly entire and closes the throat of the flower. There are about 5 species, natives of China, Burma, and of the Himalayas. They are perennial herbs, with long ample leaves contracted into an erect petiole, growing from a thick rhizome which is either elongated or short and tuberous. The violet or lurid flowers are sessile, crowded between smaller green or scarious bracts upon an erect or recurved scape. They are known as *mallet-flower*. *T. squalida*, the original species, and *T. nutans*, the nodding mallet-flower, are sometimes cultivated under glass.

tup-man (tup′man), *n.* A breeder of or dealer in tups. [Local, Eng.]

tupsee (tup′sē), *n.* The mango-fish, *Polynemus paradoxus*.

tuque (tūk), *n.* [Canadian F. form of F. *toque*, a cap: see *toque*.] A cap worn in Canada. See the quotation.

Tuque.
a, folded to fit the head; *b*, as knitted.

But the *tuque* is disappearing, we are sorry to say, and ordinary caps are taking its place. It alone served to mark the habitant. It is something like a long stocking, knit and closed at both ends, and one end being pushed into the other to double it, it is drawn over the head, down the back of the neck, and indeed over the whole face and shoulders if necessary. . . The sash . . . has been adopted as an ornamental and useful appendage by the citizens; and the snow-shoe clubs have adopted the *tuque*.
The Century, II. 454.

tu quoque (tū kwō′kwē). [< L. *tu quoque*, 'thou too, i. e. 'you have done the same thing,' or 'you're another': *tu* = E. *thou*; *quoque*, also, too, perhaps orig. **quomque*, < *quom*, *quum*, as, when, + *-que*, and.] A retort consisting of a charge or accusation similar to that which has been made by one's antagonist, as in the case of a person charged with bribery who replies that his accuser's hands are not clean of corruption: also used attributively: as, the *tu quoque* argument is not conclusive.

tur (tȯr), *n.* The urus.

turacin (tȯ′rą-sin), *n.* [< *turacou*, *touracou*, + *-in*2.] The red or crimson coloring matter of the feathers of the turakoo. In solution turacin gives two absorption-bands of its spectrum like those of oxyhemoglobin. It contains about six per cent. of copper, which cannot be isolated without destroying the pigment. Turacin is said to wash out more or less during the rainy season, leaving the feathers that were scarlet of a pinkish white.

turacou, *n.* See *turakoo*.

turacoverdin (tū″rą-kō-vėr′din), *n.* [< *turaco* + F. *vert*, green (see *verd*), + *-in*2.] The green coloring matter of the feathers of the turakoo.

Turacus (tū′rą-kus), *n.* [NL. (Cuvier, 1800), < F. *touraco* or *touracou*.] A genus of turakoos, now restricted to species with feathered nostrils, as *T. persa*, *T. corythaix*, and about 12 others. It has several synonyms, the most prominent of which is *Corythaix* (Illiger, 1811). Also *Touraco*.

turakoo (tȯ′rą-kō), *n.* [Also *turako*, *turaco*, *tourakoo*, *touracou*, *touraco*, etc.; F., said to be imitative of its cry.] A bird of the family *Musophagidæ* and any of the genera *Turacus* (or *Corythaix*), *Schizorhis*, etc.; a kind of plantain-eater: sometimes extended to all the birds of this family. The species are numerous, all African, of large size and striking appearance. In the members of the genus *Turacus* the plumage is mostly bright-green and rich-red,

Giant Turakoo (*Corythæola cristata*).

and there is an elegant helmet-like crest which the birds instantly erect when excited or alarmed. They live in the woods in small companies, and their voice is very loud and harsh. One of the best-known is *T. corythaix*, the white-crested turakoo of South Africa. The Senegal turakoo is *T. persa*. Another is *Schizorhis africanus* of West Africa. The gray turakoo is a plainer species, *S. concolor*, of South Africa. The giant turakoo, *Corythæola cristata* (formerly *Turacus giganteus*, *T. cristatus*, *Musophaga cristata*, etc., the blue curassow of Latham, 1823), is a plantain-eater very near the species of *Musophaga* proper, with oval exposed nostrils, and a helmet crest; the plumage is chiefly verditer-blue, without crimson; the tail has a broad black subterminal bar; the bill is yellow and scarlet; the eyes are red; the total length is 28 inches. This turakoo inhabits West and Central Africa.

Turanian (tū-rā′ni-an), *a.* and *n.* [< *Turan* (see *Iranian*) + *-ian*.] A word loosely and indefinitely used to designate a family of languages, sometimes applied to the Asiatic languages in general outside of the Indo-European and Semitic families, and so including various discordant and independent families, but sometimes used especially or restrictedly of the Ural-Altaic or Scythian family.

turbt, *n.* [< L. *turba*, a crowd.] A troop; a throng or crowd.

In the secund *turbe* was Maister Coradin.
Rob. of Brunne, l. 188.

Alle the *tourbe* of deuellis fleying in the ayer fledde backwarde. *Golden Legend*, fol. 24. (*Richardson Supp.*)

turba (tėr′bą), *n.* [L., a crowd: see *turbid*, *trouble*.] The chorus in medieval passion-plays, representing the Jewish populace.

turban (tėr′ban), *n.* [Early mod. E. also *turband*, *turbant*, *turbent*, *turribant*, *turbanto* = MD. *turbant* = G. Sw. Dan. *turban*, < OF. *turban*, *turbant*, F. *turban* = Sp. Pg. It. *turbante*; also in a more orig. form, early mod. E. *tuliban*, *tolliban*, *tulibant*, *tolibant*, *tulipant*, *tolipant*, *tolipane* = D. *tulband*, *tulpe*, < OF. *toliban*, *tollipan*, *tolopan* (ML. *tulipantus*, also *tulipa*); < Turk. *tulbend*, *dulbend* = Ar. *dulband*, < Pers. Hind. *dulband*, a turban. From the same source is E. *tulip*, lit. 'a turban': see *tulip*.] 1. The distinctive head-dress of men of the Moslem nations, consisting of a scarf or shawl wound around the tarboosh. The color and material of the scarf differ with the rank and position of the wearer,

With hundred turrets, like a *Turribant*.
Spencer, F. Q., IV. xi. 28.

Vpon his head was a *tolipane* with a sharpe end standing vpwards halfe a yard long, of rich cloth of golde.
Hakluyt's Voyages, I. 346.

They wrappe and fold together . . . almost as much linnen upon their heads as the Turks doe in those linnen caps they weare, which are called *Turbents*.
Coryat, Crudities, I. 90.

2. A modification of the Oriental turban, worn by women in Europe and America during the first half of the nineteenth century.

I was anxious to prevent her from disfiguring her small gentle mousey face with a great Saracen's-head *turban*.
Mrs. Gaskell, Cranford, ix.

3. A head-dress consisting of a bright-colored handkerchief or square of cotton, worn by negro women in the West Indies and the southern United States.

A black woman in blue cotton gown, red-and-yellow Madras *turban*, . . . crouched against the wall.
G. W. Cable, Au Large, i.

4. During the latter half of the nineteenth century, a hat consisting of a crown either without a brim or with a brim turned up close alongside the crown, worn by women and children.—5. In *her.*, a high rounded cap, supposed to be the official head-dress of the Sultan of Turkey: it is usually represented with plumes attached to its sides, with jeweled clasps, and the like. Also called *Turkish crown*.—6. In *conch.*, the spire of a univalve shell. See *spire*2, 2, and *univalve* (with cuts).—**Mamamouchi turban**, a kind of cap, made in supposed imitation of a Turkish turban: the name is taken from Molière's play "Le Bourgeois Gentilhomme."

turband†, (tėr′band), *n.* Same as *turban*.

turbaned (tėr′band), *a.* [< *turban* + *-ed*2.] Wearing a turban.

A malignant and a *turban'd* Turk
Beat a Venetian. *Shak.*, Othello, v. 2. 353.

turban-shell (tėr′ban-shel), *n.* The test or case of a sea-urchin.

turban-stone (tėr′ban-stōn), *n.* The typical form of Mohammedan tombstone. It is a low cylindrical pillar with a representation of a turban carved on its top.

turbant†, *n.* An obsolete form of *turban*.

turban-top (tėr′ban-top), *n.* A plant of the genus *Helvella*, a kind of fungus or mushroom.

turbary (tėr′bą-ri), *n.* [< ML. *turbaria*, < L. *turba*, turf: see *turf*1.] 1. In *law*, a right of digging turf on another man's land. *Blackstone.*

Turbarie (*Turbaria*) is an Interest to dig Turves upon a Common Kitchin, fol. 94. *Cowell's Interpreter.*

2. A peat-bog, peat-moor, or peat-swamp; any locality where peat occurs in considerable quantity. See the quotation under *peat-moor*.

A small bit of *turbary* land, given up by the parish to the curate for teaching a school.
Baines, Hist. Lancashire, II. 683.

Common of turbary. See *common*, 4.

Turbellaria (tėr-be-lā′ri-ą), *n. pl.* [NL., so called in allusion to the currents caused by their moving cilia; < L. *turba*, a crowd, + *-ella* + *-aria*.] A class of worms, or an order of flatworms, characterized by the ciliation of the body, by means of which they set up little currents or vortices of water; the whirl-worms. The name was given in 1831 by Ehrenberg to worms which had long been known as *planarians* (see *Planarida*), and was a mere substitute for or synonym of the earlier designation. It has been used with various extensions and restrictions, and has included the nemerteans or so-called rhynchocœlous turbellarians (see *Nemertea*). These are now excluded, and the *Turbellaria*, as an order of flatworms, are those whose body is ciliated and which have a mouth and with few exceptions an alimentary canal, but no anus. Most of them fall in the two main divisions of rhabdocœlous and dendrocœlous turbellarians, according to the simple or branched condition of the alimentary canal. They are mainly free-swimming worms, some of microscopic size, others several inches long; some forms inhabit fresh and others salt water. See cuts under *Dendrocœla*, *Rhabdocœla*, and *Rhynchocœla*.

turbellarian (tėr-be-lā′ri-an), *a.* and *n.* [< *Turbellaria* + *-an*.] I. *a.* Causing little currents or vortexes of water by ciliary action, as the more minute members of the class *Turbellaria*; belonging to this class, as a worm.

II. *n.* A member of the class *Turbellaria*.

turbellariform (tėr-be-lar′i-fȯrm), *a.* [< NL. *Turbellaria*, q. v., + L. *forma*, form.] Like or likened to a turbellarian: as, the *turbellariform* larva of *Balanoglossus*.

turbeth†, *n.* An obsolete form of *turpeth*.

turbid (tėr′bid), *a.* [< L. *turbidus*, disturbed, < *turbare*, disturb, < *turba*, mass, throng, crowd, tumult, disturbance. From the same source are E. *disturb*, *trouble*, *turbine*, etc.] 1. Properly, having the lees disturbed; in a more general

sense, muddy; foul with extraneous matter; thick; not clear: used of liquids of any kind, or of color.

Though their stream is loaded with sand, and *turbid* with alluvial waste. *O. W. Holmes*, Autocrat, iii.

2. Confused; disordered; disquieted; disturbed.

I had divers Fits of Melancholy, and such *turbid* Intervals that used to attend close Prisoners. *Howell*, Letters, ii. 30.

A grim man in a flannel shirt, hatless and with *turbid* red hair. *George Eliot*, Felix Holt, xxx.

Turbidæ (tėr'bi-dē), *n. pl.* [NL. (J. E. Gray, 1840), irreg. < *Turbo* + *-idæ*.] Same as *Turbinidæ*.

turbidity (tėr-bid'i-ti), *n.* [= Sp. *turbiedad* = It. *turbidità*; < *turbid* + *-ity*.] The state of being turbid; turbidness.

turbidly (tėr'bid-li), *adv.* 1. In a turbid or muddy manner.—2. With disorder or roughness; boisterously; vehemently. [Rare.]

A person of small merit is anxiously jealous of imputations on his honour; . . . one of great merit *turbidly* resents them. *Young*, Estimation of Human Life. (*Richardson.*)

turbidness (tėr'bid-nes), *n.* The state or quality of being turbid; turbidity.

turbillion (tėr-bil'yon), *n.* [< F. *tourbillon* = Sp. *turbión* = Pg. *turbilhão*, < L. *turbo* (*turbin-*), a whirl, whirlwind, hurricane: see *turbine*.] A whirl; a vortex.

Each of them is a sun, moving on its own axis, in the centre of its own vortex or *turbillion*. *Steele*, Spectator, No. 472.

Turbinacea (tėr-bi-nā'sē-ą), *n. pl.* [NL., < *Turbo* (*Turbin-*) + *-acea*.] Same as *Turbinidæ*. *Lamarck*, 1822.

turbinaceous (tėr-bi-nā'shius), *a.* [Erroneous form for **turbaceous*, < ML. *turba*, turf, + *-aceous*.] Of or belonging to turf or peat; turfy; peaty. [Rare.]

The real *turbinaceous* flavour no sooner reached the nose of the Captain than the beverage was turned down his throat with symptoms of most unequivocal applause. *Scott*, St. Ronan's Well, xiii.

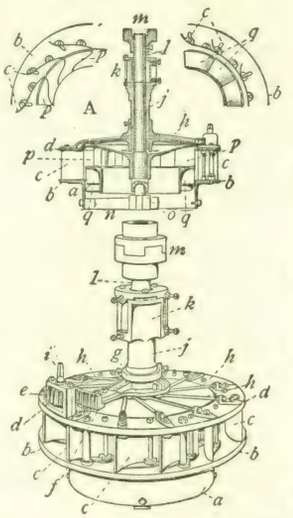
★**turbinal** (tėr'bi-nal), *a.* and *n.* [< L. *turbo* (*turbin-*), a top, + *-al*.] **I.** *a.* Same as *turbinate*.

II. *n.* In *zoöl.* and *anat.*: (*a*) A turbinate bone; one of the spongy or scroll-like bones of the nasal passages specified as *ethmoturbinal*, *maxilloturbinal*, and *sphenoturbinal* (see the distinctive names). See *turbinate*, and the phrases there. (*b*) In the *Ophidia*, a bone of the skull different from (*a*). See the quotation, and cut under *Pythonidæ*.

Forming the floor of the front part of the nasal chamber, on each side, is a large concavo-convex bone, which extends from the ethmoidal septum to the maxilla, protects the nasal gland, and is commonly termed a *turbinal*; though, if it be a membrane-bone, it does not truly correspond with the turbinals of the higher Vertebrata. *Huxley*, Anat. Vert., p. 204.

★**Alinasal turbinal.** See *alinasal*.

turbinate (tėr'bi-nāt), *a.* [= F. *turbiné* = Sp. Pg. *turbinado* = It. *turbinato*, < L. *turbinatus*, shaped like a top or cone, < *turbo* (*turbin-*), a top: see *turbine*.] 1. Shaped like a whipping-top. Specifically—(*a*) In *bot.*, shaped like a top or a cone inverted; narrow at the base and broad at the apex: as, a *turbinate* germ, nectary, or pericarp. (*b*) In *conch.*, spiral, as a univalve shell; whorled from a broad base to an apex. 2. In *anat.*, whorled or scroll-like in shape; turbinal; spongy in texture, or full of cavities: applied to certain bones and parts of bones in the nasal fossæ.—3. Whirling in the manner of a top.—**Inferior turbinate bone**, a distinct bone attached to the nasal surface of the superior maxillary bone, separating the middle from the inferior nasal fossa; the maxilloturbinal. See cuts under *mouth* and *nasal*.—**Middle turbinate bone**, an indefinite lower section of the lateral mass of the ethmoid.—**Superior turbinate bone**, an indefinite upper part of the lateral mass of the ethmoid. The superior and middle turbinate bones, taken together, are the ethmoturbinal bone. See cuts under *mouth* and *nasal*.—**Turbinate crest.** See *turbinated crest*, under *crest*.—**Turbinate process.** See *process*.



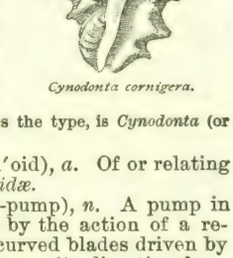
turbinate (tėr'bi-nāt), *v.*; pret. and pp. *turbinated*, ppr. *turbinating*. [< L. *turbinatus*, like a top: see *turbinate*, *a.*] **I.** *trans.* To fashion like a top. *Bailey*, 1731.—**Turbinated crest.** See *crest*.

II. *intrans.* To revolve like a top; spin; whirl. [Rare.]

turbinate-lentiform (tėr'bi-nāt-len'ti-fôrm), *a.* In *bot.*, between turbinate and lentiform in shape.

turbination (tėr-bi-nā'shon), *n.* [< L. *turbinatio*(*n-*), a pointing in the form of a cone, shaped like a top, < *turbinatus*, cone-shaped: see *turbinate*.] 1. The act of turbinating, or the state of being turbinate. *Bailey*, 1727.—2. That which is turbinated; a whorled or scroll-like formation, as a shell.

★**turbine** (tėr'bin), *n.* [< F. *turbine* = Sp. *turbina*, turbine, = It. *turbine*, a whirlwind, < L. *turbo* (*turbin-*), also *turben*, anything that whirls around, a wheel, a top, a whirlwind, < *turbare*, disturb, move, < *turba*, disturbance, uproar, turmoil, also a crowd: see *turbid*.] A water-wheel driven by the impact or reaction of a flowing stream of water, or by impact and reaction combined. Turbines are usually horizontally rotating wheels on vertical shafts. They are of various constructions, and may be divided into *reaction-turbines*, or those actuated substantially by the reaction of the water passing through them (their buckets moving in a direction opposite to that of the flow); *impulse-turbines*, or those principally driven by impact against their blades or buckets (the buckets moving with the flow); and *combined reaction and impulse wheels*, which include the best modern types of turbines. They are also distinguished, by the manner in which they discharge the water, into *outward-*, *vertical-*, or *central-discharge wheels*. In some types of turbines the discharge is partly vertical and partly central. Such is the case with the wheel shown in the cut, which is constructed and set so that the water enters at the perimeter of the case. By the modern turbine a very high percentage of the potential energy of water is converted into work while passing through the wheel. Compare cut under *scroll*.—**Air-turbine**, a wheel of turbinate form driven by wind, or air ejected from a pipe or tube.—**Jonval turbine**, a turbine having a downward discharge, as distinguished from those in which the discharge is outward, oblique, combined, etc.—**Steam turbine**, a turbine impelled by steam-jets, the steam impinging upon vanes or buckets on the circumference of a rotating disk or cylinder. The steam turbine is coming into common use, and competes with the simpler and less economical types of reciprocating steam-engine. See the supplement.



Turbine.

a, cylinder; *b*, lower flange of case; *c*, gates, which also act as guides to direct the flow upon the buckets, and which are pivoted medially to balance the hydrostatic pressure upon them; *d*, upper flange, or crown-plate; *e*, gate-pinion, which gears with the toothed segment *f*, connected by an arm with the gate-arm hub *g*; *h*, *h*, gate-rods pivoted at their inner ends to *g*, and at their outer ends to the gates *c*, *c*, by which mechanism the turning of the pinion *e* causes the opening or closing of the gates; *i*, gate-pinion shaft, either operated independently or controlled by a governor for regulating the flow of water to the buckets; *j*, sleeve, which is held by the bush *k* and set-screws on the shaft *l*, the sleeve holding the gate-hub in position; *m*, clutch-coupling to connecting with a shaft for transmitting power. A is a vertical section, with two diagrams, showing bridge-tree *n*, which carries the locust or lignum-vitæ step *o*, fitted to a concave bearing in the bottom of the shaft *l*. It also shows the upper and central discharge-buckets *p*, and the lower and vertical discharge-buckets *q*.

turbine-dynamometer (tėr'bin-dī-na-mom'e-tėr), *n.* In *hydraulic engin.*, a modification of the Prony brake, which adapts that device for application to vertical shafts or to horizontally revolving wheels on vertical shafts. It is used more especially for testing the power delivered from turbines (whence the name). A spring-scale is used instead of a weight in applying the brake-band. Compare *Prony's dynamometer*.

Turbinella (tėr-bi-nel'ą), *n.* [NL. (Lamarck, 1799), < *Turbo* (*Turbin-*) + dim. term. *-ella*.] The typical genus of the family *Turbinellidæ*. *T. pyrum* is the famous chank (which see, with cut).

Cynodonta cornigera.

Turbinellidæ (tėr-bi-nel'i-dē), *n. pl.* [NL., < *Turbinella* + *-idæ*.] A family of large marine gastropods, whose typical genus is *Turbinella*; the so-called false volutes, turnip-shells, or pap-boats. The principal genus, besides the type, is *Cynodonta* (or *Vasum*).

turbinelloid (tėr-bi-nel'oid), *a.* Of or relating to the family *Turbinellidæ*.

turbine-pump (tėr'bin-pump), *n.* A pump in which water is raised by the action of a revolving element with curved blades driven by exterior power in the opposite direction from that in which such elements would turn when used as a motor; a propeller-pump.

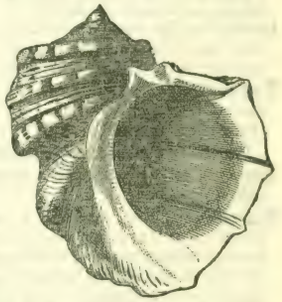
Turbinidæ (tėr-bin'i-dē), *n. pl.* [NL., < *Turbo* (*Turbin-*) + *-idæ*.] A family of scutibranchiate gastropods, whose typical genus is *Turbo*. The stony opercula of some of the species are known as *eye-stones* and *sea-beans*. Various kinds of turbinids are polished and much used as mantel-ornaments, etc., under the name of *wreath-shells*. The family has been variously limited, and is now usually restricted to the numerous species, of all seas but especially of tropical ones, which have a long cirrous appendage of the foot, a pair of intertentacular lobes, and eleven radular teeth in each cross-row. The shell is generally turbinate or trochiform and highly nacreous, and its aperture is closed with a thick calcareous operculum whose nucleus is centric or eccentric. See cuts under *Turbo* and *Imperator*. Also *Turbidæ*, *Turbinacea*.

turbiniform (tėr'bi-ni-fôrm), *a.* [< L. *turbo* (*turbin-*), a wheel, top, + *forma*, form.] Top-shaped, as a shell; having turbinate whorls or spire; resembling or related to the *Turbinidæ*; turbinoid.

turbinite (tėr'bi-nīt), *n.* [< L. *turbo* (*turbin-*), a top, + *-ite*2.] A fossil shell of the family *Turbinidæ*, or some similar shell. Also *turbite*.

turbinoid (tėr'bi-noid), *a.* [< L. *turbo* (*turbin-*), a top, + Gr. *εἶδος*, form.] Top-shaped; turbiniform; spirally coiled, wreathed, or whorled, as the turns of a shell. Specifically applied—(*a*) To shells, whether of foraminifers, gastropods, or cephalopods, whose whorls rise in a conical or conoidal figure, as compared with shells coiled flat in one plane. (*b*) To gastropods resembling or related to the *Turbinidæ*.

turbit1†, *n.* An obsolete form of *turbot*.

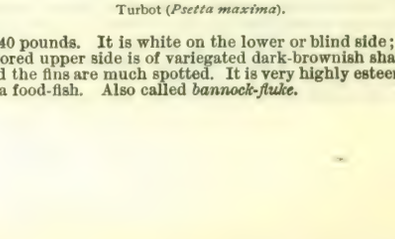


turbit2 (tėr'bit), *n.* [Origin unknown.] A breed of domestic pigeons with white body and colored wings, ruffled breast, very short stout beak, flattened head, and peak-crest or shell-crest or both. There are several color-varieties; some are whole-colored.

turbite (tėr'bīt), *n.* [< L. *turbo*, a wheel, top, + *-ite*2.] Same as *turbinite*.

turbith† (tėr'bith), *n.* Same as *turpeth*.

turbitteen (tėr-bi-tēn'), *n.* [< *turbit*2 + *-teen* as in *sateen*, *velveteen*, etc.] A strain of domestic pigeons of the turbit breed, which occurs in several colors.



Turbo (tėr'bō), *n.* [NL., < L. *turbo* (*turbin-*), a whirl, wheel, top: see *turbine*.] 1. The typical genus of the family *Turbinidæ*, formerly very extensive, now restricted to species with a regularly turbinated shell, rounded aperture, smooth beveled columellar lip, and a calcareous operculum with a central or subcentral nucleus. Some attain considerable size, and when polished show beautiful colors, as green, red, and pearly-white, the last highly iridescent with nacreous luster. Various species, as *T. sarmaticus* and *T. marmoratus*, are common parlor-ornaments. See *sea-bean*, 3, and cut under *operculum*.

Wreath-shell (*Turbo marmoratus*).

★2. [*l. c.*] A shell of this genus.

turbot (tėr'bot), *n.* [Early mod. E. also *turbet*, *turbit*, *turbutte*, etc.; < ME. *turbote*, *turbut* (= MD. *turbot*, *terbot*, *tarbot*, D. *tarbot*); cf. Ir. *turbit* = Gael. *turbaid* = W. *torbwt* (prob. < E.) = Bret. *turboden*, *turbozen* (prob. < F.); < OF. *turbot*, a turbot, prob. < L. *turbo* (*turbin-*), a top (cf. ML. *turbo*, a turbot; Gr. *ῥόμβος*, a top, also a turbot). The ME. forms *turbut*, *turbutte* appar. simulate a connection with *butt*2, which is contained in *halibut*.] 1. One of the larger flatfishes, *Scophthalmus maximus* (also called *Psetta maxima*), belonging to the family *Pleuronectidæ*. With the exception of the halibut, the turbot is the largest flatfish of European waters, attaining a weight of from 80

Turbot (*Psetta maxima*).

to 40 pounds. It is white on the lower or blind side; the colored upper side is of variegated dark-brownish shades, and the fins are much spotted. It is very highly esteemed as a food-fish. Also called *bannock-fluke*.

The Greekes and Latines both call it [the lozenge] Rombus, which may be the cause, as I suppose, why they also gaue that name to the fish commonly called the *Turbot*, who beareth iustly that figure.
Puttenham, Arte of Eng. Poesie, p. 76.

2. In the United States, one of several large flounders more or less resembling the above, as *Lophopsetta maculata*, the sand-flounder or window-pane of the Atlantic coast, more fully called *spotted turbot*, and *Hypsopsetta guttulata*, the diamond flounder of California.—**3.** The file-fish. [Bermudas.]—**4.** The trigger-fish. —**Bastard turbot.** See *bastard*.

turbulence (tėr'bū-lens), *n.* [< F. *turbulence* = Sp. Pg. *turbulencia* = It. *turbolenza, turbulenzia*, < LL. *turbulentia*, trouble, disquiet, < L. *turbulentus*, turbulent: see *turbulent*.] The state or character of being turbulent; a disturbed state; tumultuousness; agitation; disorder; commotion; refractoriness; insubordination.

They were necessitated by the *turbulence* and danger of those times to put the Kingdome by thir owne autority into a posture of defence. *Milton*, Eikonoklastes, viii.

=**Syn.** Tumult, riot, sedition, mutiny, insurrection.

turbulency (tėr'bū-len-si), *n.* [As *turbulence* (see *-cy*).] Turbulence. *Milton*, P. R., iv. 462.

turbulent (tėr'bū-lent), *a.* [< F. *turbulent* = Pr. *turbulent, turbolent* = Sp. Pg. *turbulento* = It. *turbolento, turbulento*, < L. *turbulentus*, restless, stormy, < *turbare*, trouble, agitate: see *turbid*.] **1.** Disturbed; agitated; tumultuous; being in violent commotion: as, the *turbulent* ocean.

'T has been a *turbulent* and stormy night.
Shak., Pericles, iii. 2. 4.

2. Restless; unquiet; refractory; disposed to insubordination and disorder; hence, violent; tumultuous; riotous; disorderly.

It were happy for Government if these *turbulent* spirits could be singled out from the rest in their first attempts.
Stillingfleet, Sermons, I. vii.

3. Producing commotion or agitation; inducing turbulence.

A froward retention of custom is as *turbulent* a thing as an innovation. *Bacon*, Innovations (ed. 1887).

=**Syn. 2** and **3.** Obstreperous, uproarious, brawling; seditious, mutinous, revolutionary.

turbulently (tėr'bū-lent-li), *adv.* In a turbulent manner; tumultuously; with violent agitation; with refractoriness.

Turcism (tėr'sizm), *n.* [< ML. *Turcus*, Turk (see *Turk*[1]), + *-ism*.] The religion, manners, character, or customs of the Turks.

Preferring *Turcism* to Christianity. *Bp. Atterbury.*

Türck's column. See *columns of Türck*, under *column*.

Turco[1] (tür'kō), *n.* [F., < *turc* (or It. *Turco*?), Turk: see *Turk*.] One of a body of light infantry raised among the natives of Algeria for service in the French army, and properly called *Algerian tirailleurs*. Also *Turko*.

turco[2] (tėr'kō), *n.* A small Chilian bird, *Hylactes megapodius*.

turcois, *n.* Same as *turquoise*.

Turcoman, *n.* See *Turkoman*.

Turcophile (tėr'kō-fil), *n.* [< ML. *Turcus*, Turk, + Gr. *φιλεῖν*, love.] One who favors the Ottoman Turks, or their principles or policy. *The Times* (London), June 16, 1876.

Turcophilism (tėr'kō-fil-izm), *n.* [< *Turcophile* + *-ism*.] The course or principles of a Turcophile. *Athenæum*, Feb. 10, 1887.

Turcophobist (tėr'kō-fō-bist), *n.* [< ML. *Turcus*, Turk, + Gr. *φοβεῖν*, fear.] One who earnestly opposes the Ottoman Turks or their policy. *J. Baker*, Turkey, p. iv.

turcopolier (tėr'kō-po-lēr), *n.* [OF. (AF.) *turcopolier*, also *turcopilier, tricoplier, turcupler*, also *turcopole, turcople*, commander of light cavalry called *turcopoles, turcoples*, < ML. *turcopuli*, < MGr. *τυρκόπουλοι*, light-armed soldiers, so called < *Τύρκος, Τοῦρκος*, Turk, + *ποῦλος*, child (Gr. *πῶλος*, colt).] An officer of the Knights of St. John of Jerusalem of the tongue of England.

The *Turcopolier* of the Knights Hospitallers was always an Englishman; he was the commander of the light infantry of the order.
Stubbs, Medieval and Modern Hist., p. 205.

turd (tėrd), *n.* [< ME. *tord, toord*, < AS. *tord* = MD. *tord*, a lump of excrement. Hence dim. *treddle*[2], < ME. *tyrdel*, < AS. *tyrdel*, dim. of *tord*.] A ball or lump of excrement; dung. [Low.]

Turdidæ (tėr'di-dē), *n. pl.* [NL., < *Turdus* + *-idæ*.] A large and nearly cosmopolitan family of dentirostral oscine passerine birds, named from the genus *Turdus;* the thrushes and thrush-like birds, sometimes called *Merulidæ*. The *Turdidæ* form the leading group of turdoid, turdiform, or cichlomorphic birds, respecting neither the definition nor the subdivision of which are any authors agreed. The *Sylviidæ*, which form an extensive group, are alternately included in and excluded from it; and the same is true of five or six other nominal families of less extent, as *Saxicolidæ, Cinclidæ, Pycnonotidæ, Mimidæ, Troglodytidæ*, some of the *Timeliidæ*, etc. The most typical *Turdidæ* are characterized by the combination of notched grypaniform bill, booted tarsi, ten primaries of which the first is short or spurious, and the spotted coloration of the young birds. Such *Turdidæ* constitute a subfamily, *Turdinæ*, to which the family name is sometimes restricted. True *Turdidæ* abound in the Palearctic, Ethiopian, Nearctic, and Neotropical regions. Some of them are among the most familiar of birds, as the fieldfare and blackbird of Great Britain, and the robin and wood-thrush of the United States. See *Turdus* and *thrush*[1].

turdiform (tėr'di-fôrm), *a.* [< NL. *turdiformis*, < L. *turdus*, a thrush, + *forma*, form.] Thrush-like; resembling or related to a thrush; belonging to the *Turdiformes;* turdoid; cichlomorphic.

Turdiformes (tėr-di-fôr'mēz), *n. pl.* [NL.: see *turdiform*.] The thrushes and thrush-like birds; the turdoid *Passeres;* the *Cichlomorphæ*.

Turdinæ (tėr-dī'nē), *n. pl.* [NL., < *Turdus* + *-inæ*.] The leading subfamily of *Turdidæ*, represented by the genus *Turdus* and its near allies, and equivalent to the family *Turdidæ* in a restricted sense; the true thrushes, often called *Merulinæ*. See *Turdidæ, Turdus*, and *thrush*[1].

turdine (tėr'din), *a.* [< *Turdus* + *-ine*[1].] Thrush-like in a strict sense; of or belonging to the *Turdinæ*.

turdoid (tėr'doid), *a.* [< L. *turdus*, a thrush, + Gr. *εἶδος*, form.] Thrush-like in a broad sense; turdiform or cichlomorphic: especially used in the phrase *turdoid Passeres*, applied by Wallace to such birds in distinction from *sturnoid, tanagroid*, and *formicarioid Passeres*.

Turdulus (tėr'dū-lus), *n.* [NL. (Hodgson, 1844), dim. of *Turdus*, q. v.] A genus of Oriental ground-thrushes, containing such as the Indian *T. wardi*, now usually referred to *Geocichla*.

Turdus (tėr'dus), *n.* [NL. (Linnæus, taken as of 1758), < L. *turdus*, a thrush, fieldfare: see *thrush*[1].] A genus of thrushes. It formerly included any of the *Turdidæ* and various other birds supposed to be thrush-like; later it was variously restricted, and it is now usually confined to species like the European mistlethrush (*T. viscivorus*), song-thrush (*T. musicus*), fieldfare (*T. pilaris*), and redwing (*T. iliacus*). In these the sexes are similar, the throat is not streaked, and the general color is not black. (See cuts under *fieldfare, mistlethrush*, and *thrush*[1].) In the narrowest sense, the genus is coincident with the family in geographical range, being represented in Europe, Asia, Africa, and America. The blackish or dark thrushes, such as the common blackbird or ouzel of Europe, *T. merula*, and the ring-ouzel, *T. torquatus*, represent an extensive group, either kept in *Turdus* proper or separated under the name of *Merula*. (See cuts under *ouzel* and *blackbird*.) The common robin or migratory thrush of North America represents a group indifferently called *Planesticus* (as a subgenus of *Turdus*) or merged in *Merula*. (See cut under *robin*, 2.) The song-thrushes of North America represent a section of *Turdus* named *Hylocichla*, as the wood-thrush, *T.* (*H.*) *mustelinus;* the hermit-thrush, *T.* (*H.*) *pallasi* (see cut under *hermit-thrush*); the tawny or Wilson's thrush, or veery, *T.* (*H.*) *fuscescens* (see cut under *veery*); the olive-backed or Swainson's thrush, *T.* (*H.*) *swainsoni;* the gray-cheeked or Alice's thrush, *T.* (*H.*) *aliciæ;* all of which are common woodland songsters of the United States. The varied thrush, or Oregon robin (see cut under *thrush*[1]), formerly *T. nævius*, represents a section *Hesperocichla*, or is taken out of the genus and called *Geocichla nævia*. See *Turdidæ* and *thrush*[1].

Turdus Solitarius (tėr'dus sol-i-tā'ri-us). [NL., 'solitary thrush': L. *turdus*, thrush; *solitarius*, solitary.] A constellation introduced by Le Monnier in 1776, on the tail of Hydra, and encroaching on the southern scale of Libra. It is no longer used.

tureen (tū-rēn'), *n.* [A false form of *terreen*, more prop. *terrine*, < F. *terrine*, an earthen vessel: see *terrine*. The spelling *tureen* seems to have arisen in cook-books. There is a story that Marshal Turenne once used his helmet as a soup-dish, and thus gave a name to the dish. This is a mere fiction.] A deep dish with a cover, for holding liquids at table; especially, such a vessel, holding a gallon or more, intended for soup.

turf[1] (tėrf), *n.*; pl. *turfs* (tėrfs), obsolescent *turves* (tėrvz). [< ME. *turf, torf* (pl. *turves, torves*), < AS. *turf* (dat. and pl. *tyrf*) = OFries. *turf* = MD. *torf, turf*, D. *turf* = MLG. LG. *torf* = OHG. *zurba, zurf*, G. dial. *turbe* (G. *torf*, < LG.) = Icel. *torfa*, f., *torf*, n., = Sw. *torf* = Dan. *törv* (cf. F. *tourbe*, Sp. Pg. *turba*, It. *torba*, ML. *turba*, < Teut.), turf; cf. Skt. *darbha*, a kind of grass.] **1.** The surface or sward of grass-land, consisting of earth or mold filled with the roots of grass and other small plants, so as to adhere and form a kind of mat; earth covered with grass.

The shepherd that complain'd of love,
Who you saw sitting by me on the *turf*.
Shak., As you Like it, iii. 4. 52.

2. A piece of such earth or mold dug or torn from the ground; a sod.

In a litel herber that I have,
That benched was on *turves* fresshe ygrave,
I bad men sholde me my couche make.
Chaucer, Good Women, l. 204.

Those that are first cut vp are called *Turffes*, . . . and such as are taken downward are called Peates.
Norden, Surveyor's Dialogue (1608), in Harrison's Eng-[land (New Shak. Soc.), II. 183.

3. In Ireland, same as *peat*. See *peat*.

In this rude hostel, however, the landlord . . . offered a seat at the *turf*-fire. *Thackeray*, Irish Sketch-Book, xix.

A typical red bog gives four kinds of peat: near the surface is the clearing of more or less living organic matter, from 2 to 6 feet in thickness; under this white *turf*, then brown *turf*, and lowest of all, black or stone *turf*.
Kinahan, Geol. of Ireland, p. 269.

The turf, the race-course; hence, the occupation or profession of racing horses.

We justly boast
At least superior jockeyship, and claim
The honors of *the turf* as all our own!
Cowper, Task, ii. 277.

All men are equal on *the turf* or under it.
Lord George Bentinck. (*Imp. Dict.*)

To stool turfs. See *stool*.—**Turf web-worm.** Same as *sod-worm*.

turf[1] (tėrf), *v. t.* [< *turf*[1], *n.*] To cover with turf or sod: as, to *turf* a bank or border. *Bacon*, Gardens (ed. 1887).

turf[2]† (tėrf), *n.* [< ME. *tyrf, tyrfe;* prob. < *torven*, turn: see *torve, topsyturvy*.] The turn of a cap, hood, or sleeve.

Tyrfe of a cappe or suche lyke. *Rebras.*
Palsgrave, p. 281.

turf-ant (tėrf'ant), *n.* A small yellowish ant of Europe, *Lasius flavus*, which makes its hills on turf.

turf-bound (tėrf'bound), *a.* Covered and held together by a close and unyielding surface of turf.

These fields and mountains are so *turf-bound* that no particle of soil is carried away by the water.
The Century, XXVII. 419.

turf-charcoal (tėrf'chär″kōl), *n.* Same as *peat-charcoal*.

turf-clad (tėrf'klad), *a.* Covered with turf. *V. Knox.*

turf-cutter (tėrf'kut″ėr), *n.* A paring-plow. *E. H. Knight.*

turf-drain (tėrf'drān), *n.* A drain covered with turf. *E. H. Knight.*

turfen (tėr'fn), *a.* [< *turf*[1] + *-en*[2].] Made of turf; covered with turf: as, *turfen* steps. *Disraeli*, Coningsby, vii. 5.

turfer† (tėr'fėr), *n.* [< ME. **turfer, turvare;* < *turf*[1] + *-er*[1].] A clod-breaker; a plowman.

Turvare. Glebarius. *Prompt. Parv.*, p. 507.

turfery†, *n.* Same as *turbary*. *Skinner.*

turf-graver† (tėrf'grā″vėr), *n.* A plowman. *Halliwell.*

turfiness (tėr'fi-nes), *n.* The state or quality of being turfy.

turfing-iron (tėr'fing-ī″ėrn), *n.* An implement for paring off turf.

turfing-spade (tėr'fing-spād), *n.* An instrument for under-cutting turf when marked out by the plow.

turfite (tėr'fīt), *n.* [< *turf*[1] + *-ite*[2].] A frequenter of the turf; one devoted to horse-racing. [Colloq.]

The very flashy *turfite* at Hyde Park Corner, and the less flashy, but quite as turfy, gentleman who operates at the other corner of Piccadilly. *Thackeray.*

turf-knife (tėrf'nīf), *n.* An implement for tracing out the sides of drains, trenches, etc. It has a simitar-like blade, with a tread for the foot and a bent handle.

turfman (tėrf'man), *n.*; pl. *turfmen* (-men). One who is devoted to horse-racing.

turf-moss (tėrf'môs), *n.* A tract of turfy, mossy, or boggy land.

turf-plow (tėrf'plou), *n.* A plow adapted to remove the turf from the surface of the ground preparatory to deep plowing, or for destroying grubs, etc.

turf-spade (tėrf'spād), *n.* **1.** A spade used for cutting and digging turf or peat, longer and narrower than the common spade.—**2.** A spade for cutting turf for sodding lawns, etc. See cut *d* under *spade*.

turf-worm (tėrf'wėrm), *n.* Same as *sod-worm*. See cut under *Crambidæ*.

turfy (tėr'fi), *a.* [< *turf*[1] + *-y*[1].] **1.** Abounding or covered with turf; covered with short grass; also, having the qualities, nature, or appearance of turf.

Thy *turfy* mountains, where live nibbling sheep.
Shak., Tempest, iv. 1. 62.

Can you see many long weeds and nettles among the graves, or do they look *turfy* and flowery?
Charlotte Brontë, Shirley, xxiii.

A *turfy* slope surrounded with groves.
B. Taylor, Northern Travel, p. 390.

2. Of or connected with the turf or race-ground; characteristic of the turf or of horse-racing; sporting.

Mr. Bailey asked it again, because — accompanied with a straddling action of the white cords, a bend of the knees, and a striking forth of the top-boots—it was an easy, horsefleshy, *turfy* sort of thing to do.
Dickens, Martin Chuzzlewit, xxvi.

turgent (tėr'jent), *a.* [< ME. *turgent*, < L. *turgen(t-)s*, ppr. of *turgere*, swell. Cf. *turgid*.] 1. Swelling; tumid; rising into a tumor; puffy.

The *turgent* trunke let scarifie,
That humour effluent oute of it hie.
Palladius, Husbondrie (E. E. T. S.), p. 125.

2†. Tumid; turgid; inflated; pompous; bombastic.

All honour, offices, applause, grand titles, and *turgent* epithets are put upon him. *Burton*, Anat. of Mel., p. 212.

turgesce (tėr-jes'), *v. i.*; pret. and pp. *turgesced*, ppr. *turgescing*. [< L. *turgescere*, inceptive of *turgere*, swell: see *turgent*.] To become turgid; ★swell; become inflated. [Rare.] *Imp. Dict.*

turgescence (tėr-jes'ens), *n.* [= F. *turgescence* = Sp. Pg. *turgencia* = It. *turgenza*; as *turgescen(t)* + *-ce*.] 1. The act of swelling, or the state of being swelled.—2. In *med.*, the swelling or enlargement of any part, usually from congestion or the extravasation of serum or blood.—3. Pomposity; inflation; bombast.

turgescency (tėr-jes'en-si), *n.* [As *turgescence* (see *-cy*).] Same as *turgescence*.

turgescent (tėr-jes'ent), *a.* [= F. *turgescent*, < L. *turgescen(t-)s*, ppr. of *turgescere*, begin to swell: see *turgesce*.] Growing turgid; swelling. *Bailey*, 1727.

turgescible (tėr-jes'i-bl), *a.* [< *turgesce* + *-ible*.] Capable of swelling or becoming turgescent.

Similar but less extensive *turgescible* tissue exists in other portions of the nasal mucous membrane.
★ *Medical News*, XLIX. 214.

turgid (tėr'jid), *a.* [< F. *turgide* = Pg. It. *turgido*, < L. *turgidus*, swollen, < *turgere*, swell out: see *turgent*.] 1. Swollen; bloated; tumid; distended beyond its natural or usual state by some internal agent or expansive force: often applied to an enlarged part of the body.

These lurking particles [of air] so expanding themselves must necessarily plump out the sides of the bladder, and so keep them *turgid*. *Boyle*, Works, I. 114.

2. Tumid; pompous; inflated; bombastic: as, a *turgid* style.

It is much easier to write in a *turgid* strain than with . . . delicate simplicity. *Goldsmith*, The Bee, No. 3.

Turgid palpi, palpi the last joint of which appears bladdery, as in the male crickets. = **Syn. 1.** Swollen, puffed up. —2. Stilted, grandiloquent. See *turgidness*.

turgidity (tėr-jid'i-ti), *n.* [< *turgid* + *-ity*.] 1. The state of being turgid or swollen; turgidness; tumidity.

The forerunners of an apoplexy are . . . vertigos, weakness, wateriness, and *turgidity* of the eyes.
Arbuthnot, On Diet, iii.

2. Bombast, turgidness; pomposity.

We call him [Johnson] affected for his *turgidity*.
Landor, Imag. Conv., Archdeacon Hare and Walter Landor.

turgidly (tėr'jid-li), *adv.* In a turgid manner; with swelling or empty pomp; pompously.

turgidness (tėr'jid-nes), *n.* 1. The state of being turgid; a swelling or swelled state of a thing; distention beyond the natural state by some internal force or agent, as of a limb.—2. Pompousness; inflated manner of writing or speaking; bombast: as, the *turgidness* of language or style. = **Syn. 2.** *Fustian*, *Rant*, etc. See *bombast*.

turgidous† (tėr'jid-us), *a.* [< L. *turgidus*, swollen: see *turgid*.] Turgid.

Puffie, inflate, *turgidous*, and ventosity are come up.

turgite (tėr'jit), *n.* [< *Turginsk*, a copper-mine in the Ural, + *-ite*2.] A hydrous oxid of iron, occurring in mammillary or stalactitic masses much resembling limonite, from which, however, it is easily distinguished by its red streak. Also called *hydrohematite*.

turgometer (tėr-gom'e-tėr), *n.* [Irreg. < L. *turgere*, swell, + Gr. *μέτρον*, measure.] That which measures or indicates the amount or degree of turgidity. See the quotation. [Rare.]

The more the cells [of *Drosera dichotoma*] lose their turgidity, the more does the plastoid tend to assume a spherical form. Its spindle-shaped elongated form may, however, be restored by again bringing about turgidity, e. g., by injection of water into the tissue. Thus the plastoid may be regarded as a *turgometer*, since it indicates the state of turgidity of the cell.
W. Gardiner, Proc. Roy. Soc., XXXIX. 232.

turgor (tėr'gor), *n.* [< LL. *turgor*, a swelling, < L. *turgere*, swell: see *turgent*.] 1. In *physiol.*, the normal fullness of the capillaries and smaller blood-vessels, upon which is supposed to depend in part the resilience of the tissues: usually qualified by the epithet *vital*. [Rare.]

With the cessation of the circulation and *vital turgor*, the skin becomes ashy pale, and the tissues lose their elasticity. *Quain*, Med. Dict., p. 328.

2. In *bot.* See the quotation.

The state of *turgor*, as it has long been called by botanical physiologists, by virtue of which the framework of the protoplasm of the plant retains its content with a tenacity to which I have already referred, is the analogue of the state of polarization of Bernstein. *Nature*, XL. 524.

Turin grass. The couch- or quitch-grass, *Agropyron repens*.

Turin nut. The fossil fruit of a species of walnut, *Juglans nux-taurinensis*: so called because the kernels occur inclosed in calc-spar in the Upper Tertiary of Turin.

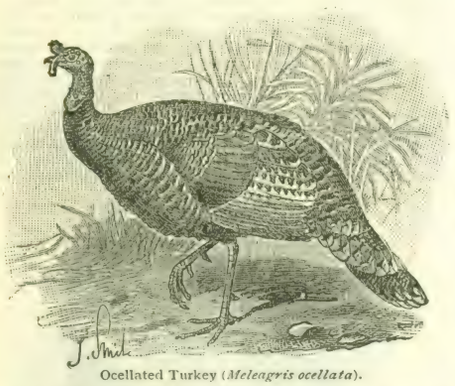
turkey (tėr'ki), *n.* [Formerly also *turky*, *turkie*; ★short for *Turkey-cock* or *Turkey-hen*, 'cock' or 'hen of Turkey,' *Turkey* here meaning 'Tatary' or vaguely 'Asia,' whence the bird was at first supposed to come; < F. *Turquie*, Turkey, < *Turc*, Turk: see *Turk*. The bird was also supposed to come from India, being also called *cock of India*, F. *poule d'Inde*, now *dinde*, 'hen of India,' Sp. *gallina de India*, 'hen of India,' It. *gallo* or *gallina d' India*, 'cock' or 'hen of India,' G. *Indianische henn* or *hun* (Minsheu), 'Indian hen,' also *Calecutischer hahn* or *henne* (cf. D. *kalkoen*) 'cock' or 'hen of Calicut.' It was also referred to Africa, being called *Guineahen* (*Ginnie henne*, etc.), or *hen of Guinea* (*henne of Guinie*, etc.), and confused with the *guineahen* as now so known; Sp. *gallina Morisca*, 'Moorish hen,' etc. (So maize, or Indian corn, was supposed to come from 'Turkey' or Asia, and was called *Turkey-wheat*.) The Hind. name is *perū*, perhaps referring to its American ('Peruvian') origin. The Ar. name in Egypt is *dik rūmī*, 'fowl of Turkey.'] 1. An American gallinaceous bird of the genus *Meleagris*; any species of *Meleagridæ*. See the technical names.



Turkeys are of two totally distinct species: one of these has two varieties, both widely known and with a long intricate history; the other species is practically unknown, except in ornithology. (*a*) The turkey now living wild in Mexico, and everywhere domesticated, became known to Europeans almost immediately upon the discovery of Mexico by the Spaniards in 1518. It was described by Oviedo, in or about 1527, as already domesticated among Christians and elsewhere than in New Spain (Mexico); it was called *pavo*, and the strutting of the gobbler with stiffly erect spread tail, like that of the peacock, was noted. It is traditional, and not incredible though unproved, that the turkey reached England in 1524, and certain that it was established in domestication in Europe by 1530. There is English documentary evidence of the turkey in 1541; the bird was first figured, both by Belon and by Gesner, in 1555; and by 1575 it had already taken up its since established connection with Christmas festivities. It is quite probable, but not in evidence, that there were other and very early (perhaps the earliest) European importations of turkeys from New England; if so, the domestic bird would be a composite of the two feral varieties noted below. From Gesner on, for about 200 years, the usual technical name of the turkey was *gallopavo* (with variants *gallopavus* and *gallopava*, sometimes *pavogallus*, and qualified as *gallopavo sylvestris*, *gallopavo cristatus*, simulating a modern binomial). But meanwhile, by some confusion with the African guinea-hen, the exact date and occasion of which are open to conjecture, the turkey as domesticated in Europe was called *meleagris* (so Charleton, "Exercitationes," 1677, and on to Linnæus, "Fauna Suecica," 1746). These two synonyms thus ran parallel for many years, till in the Linnean "Systema Naturæ," 1758, they were united in the onym *Meleagris gallopavo*. There had not then been, nor was there for some time afterward, any suspicion that two different species, or well-marked feral races, of the turkey existed in America (both covered by the term *M. gallopavo*). One of these, the ordinary wild turkey of the United States, was first technically specified by William Bartram, in 1791, as *M. americana*, and was soon after

Wild Turkey of the United States (*Meleagris gallopavo americana*), male.

twice renamed by Vieillot, as *M. sylvestris* and *M. fera*. The other of these, native in Mexico, and also extending into adjoining regions of the United States, was by John Gould, in 1856, specified as *M. mexicana*. This renaming accentuated the actual distinctions between the two kinds of turkeys, and also the fact, not before made prominent, that Gould's Mexican species was more like the ordinary domestic bird than like the feral bird of the United States. Hence *M. mexicana* is rightly taken to be a mere synonym of *M. gallopavo*, which latter name, as based mainly or wholly upon domesticated descendants of the Mexican

form, is properly restricted to these and to their feral stock; and the distinctive onym of the United States wild turkey becomes *M. americana* (after Bartram), or *M. sylvestris* (after Vieillot, with those who decline to recognize Bartram's names on the ground that his nomenclature was not systematically binomial). The distinctions, though not trenchant, are obvious. (1) The northern wild turkey inhabits or has inhabited the eastern half of the United States, north into Canada, where it still occurs, northwest to some parts of the Missouri region, and southwest to Texas; it has been for many years extirpated from New England, where it formerly abounded; it lingers in the Middle States, still occurs in the immediate vicinity of Washington, and is common in the South and West. The head and upper part of the neck are naked, bristly, and carunculate, with an erect fleshy process on the former and a dewlap on the latter; a long bunch of coarse hairy feathers hangs from the breast; the tarsi are naked, scutellate before and behind, and spurred in the cock; the tail is broad and rounded, of fourteen to eighteen feathers, capable of erection into a circular disk (indicating the relationship of the turkey to the peafowl, and so of the *Meleagridæ* to the *Phasianidæ*). The plumage is compact and lustrous, and that of the body is almost entirely of blackish bronzed tints, not markedly whitening on the rump, upper tail-coverts, and ends of the tail-feathers. The cock or gobbler is 3 feet or more in total length, and may acquire a weight of 30 pounds, though the average is much less; the hen is considerably smaller and lighter. The wild turkey is confined to woodland. It continues abundant enough to retain economic importance, and its chase is a distinct branch of field sport; it is usually pursued with the shotgun, like other game-birds, or stalked with the rifle, like larger game; it may be decoyed by imitating its gobbling (see *turkey-call*), and where abundant may be trapped (see *turkey-pen*). The female nests on the ground, and lays a numerous clutch of eggs of a buff color profusely speckled with dark brown. The eggs have often been hatched under the domestic turkey, but the difficulty of immediately domesticating this feral stock is great. (2) The Mexican turkey, found wild in Texas, New Mexico, and Arizona, as well as southward, is mainly distinguished by the chestnut-brown upper tail-coverts with paler or whitish tips, and the similar light tips of the tail-feathers. This marking is usually distinctive, as when dark-colored individuals of the tame turkey are marketed unplucked for wild turkeys. Under domestication, now protracted for more than 300 years, this turkey has tended to enormous development of the caruncles and dewlap, occasionally sports a topknot of feathers, and runs into several color-strains which may be perpetuated by methodical selection. One of these, known in England as the *Norfolk*, tends to melanism, being chiefly of a lusterless blackish color; but the usual variation is in the opposite direction, resulting in the variegated plumage of the breed known in England as the *Cambridgeshire*, and in the buff, the pied, and even the white color-strain. (See also *bronze turkey*, under *bronze*.) Authorities practically agree that *M. gallopavo* is the proper name for the Mexican turkey, but they differ as to the status and names of the others. The northeastern form is regarded by some as a distinct species and variously called *M. americana*, *sylvestris*, or *fera*; by others it is considered a subspecies. The Florida bird is a subspecies and has received but one name, *M. g. osceola*. The subspecies of southwestern Texas is called *M. g. ellioti* or *M. g. intermedia*. (*b*) The second species of *Meleagris* is *M. ocellata*, the ocellated turkey of Honduras and some other parts of Central America. This is much smaller and more beautiful than

Ocellated Turkey (*Meleagris ocellata*).

the other; the plumage is intensely lustrous, and in part eyed with iridescent ocelli, recalling those of the peacock; the bare head is deep-blue, studded with caruncles of an orange color, and no dewlap is developed.

2. With qualifying term, one of several different Australian birds which resemble or suggest the turkey. See phrases below.—**Bronze turkey.** See *bronze*.—**Cambridgeshire turkey.** See def. 1 (*a*) (2). [Eng.]—**Colorado turkey.** See *Tantalus*.—**Crested turkey,** a variety of the domestic turkey having a topknot of feathers. This has long been known; it was figured by Albin in 1738, and was the *gallopavo cristatus* of various authors.—**Honduras turkey,** the ocellated turkey.—**Mexican turkey.** See def. 1 (*a*).—**Native turkey,** the Australian bustard, *Otis* (*Choriotis*) *australis*. [Anglo-Australian.]—**New England wild turkey,** the feral turkey of the region named. This was early noted as differing from the domestic bird in its dark color and supposed greater size, and was the *gallopavo sylvestris* of various writers, as Ray, 1713. Its size was usually exaggerated, even up to a weight of 60 pounds (Brisson, 1760). See def. 1 (*a*) (1), and quotation from Clarke.—**Norfolk turkey.** See def. 1 (*a*) (2). [Eng.]—**Ocellated turkey.** See def. 1 (*b*).—**Wild turkey.** See def. 1 (*a*). (See also *brush-turkey*, *water-turkey*.)

turkeyback (tėr'ki-bak), *n.* A large variety of the yellowshank, *Totanus melanoleucus*. *G. Trumbull*, 1888. [Salem, Massachusetts.]

turkeybeard (tėr'ki-bērd), *n.* A liliaceous plant of the genus *Xerophyllum*. Also *turkey's-beard*.

turkey-berry (tėr'ki-ber″i), *n.* 1. The fruit of species of *Rhamnus*, used in dyeing. See *Persian berries*, under *Persian*.—2. Either of the plants *Solanum mammosum* and *S. torvum*. [West Indies.]—3. A West Indian tree, *Cordia Collococca*, bearing a small purple drupe; also, its fruit.

turkey-bird (tėr'ki-bėrd), *n.* The wryneck, *Iynx torquilla*. [Local, British.]

turkey-blossom (tėr'ki-blos″um), *n.* See *Tribulus*.

turkey-buzzard (tėr'ki-buz″ärd), *n.* An American vulture of the family *Cathartidæ*, the *Cathartes aura*, common and wide-spread through the greater part of North and South America: generally so called in the United States in distinction from the black vulture, or carrion-crow, of that country, *Catharista atrata:* more fully called *red-headed turkey-buzzard*. This well-known and very useful bird is abundant in most of the States to the west and south of Pennsylvania, and extends northward to Canada. It is from 27 to 30 inches long, and about 60 inches in extent, of a blackish-brown color, blacker on the wings and tail, and grayer on the wing-coverts; the whole head is bare of feathers, and of a reddish color ranging from livid crimson to pale carmine in the adults; the beak is white; the feet are flesh-colored, and the eyes brown. The naked skin of the head is wrinkled and sparsely bristled; the feathers begin in a circle around the upper part of the neck, and do not run up in a point on the hindhead as in the black vulture. Though ill-favored and bad-smelling when in hand, on the wing the turkey-buzzard is one of the most graceful of birds, soaring and sailing with a strong and buoyant flight on motionless pinions, and affording one of the best examples of this kind of flight. It nests on the ground or near it in hollow stumps and logs, and lays usually two eggs, white or creamy, boldly spotted and blotched with shades of rich brown and neutral tints. The young hatch clothed with whitish down. This vulture has the trick of "playing possum" when captured. The question whether it finds its food by scent or sight, or both, is still discussed. See cut under *Cathartes*.

turkey-call (tėr'ki-kâl), *n.* An instrument producing a sound which resembles the cry of the female turkey, used as a decoy.

Turkey carpet. See *carpet*.

turkey-cock (tėr'ki-kok), *n.* [Orig. *Turkey-cock* or *Turkey cock* (*Turkie-cock*, etc.), < *Turkey*, the country so called (see *turkey*), + *cock*[1].] The bird now called *turkey* (including the female); properly, the male of the turkey, called the *gobbler;* hence, a person of great personal vanity and foolish pride: so called in allusion to the strutting of the bird.

> Puppet-like thou dost advaunce thy crest,
> And swell in big lookes like some *turkie-cocke*,
> Ready to burst with pride.
> *Times' Whistle* (E. E. T. S.), p. 37.

> Here he comes, swelling like a *turkey-cock*.
> *Shak.*, Hen. V., v. 1. 16.

turkey-corn (tėr'ki-kôrn), *n.* Same as *squirrel-corn*.

Turkey corn. See *maize*, 1.

turkey-fat ore (tėr'ki-fat ōr). A bright orange-yellow variety of zinc carbonate (smithsonite), colored by cadmium sulphid. It occurs in mammillary forms in the zinc region of southwestern Missouri. [Local.]

turkey-feather laver (tėr'ki-feᴛʜ″ėr lā'vėr). A seaweed: same as *peacock's-tail*.

turkey-gnat (tėr'ki-nat), *n.* A small black fly, *Simulium meridionale*, which attacks poultry in the southern and western United States, particularly in the Mississippi valley. Compare cut under *Simulium*.

Turkey-gnat (*Simulium meridionale*), about ten times natural size.

turkey-gobbler (tėr'ki-gob″lėr), *n.* The turkey-cock. See *gobbler*[2].

turkey-grass (tėr'ki-gràs), *n.* The cleavers or goose-grass, *Galium Aparine*. [Local, Eng.]

Turkey gum. See *gum arabic*, under *gum*[2].

turkey-hen (tėr'ki-hen), *n.* [Orig. *Turkey-hen* or *Turkey hen:* see *turkey-cock* and *turkey*.] The hen or female of the turkey.

Turkey-hone (tėr'ki-hōn), *n.* Same as *Turkey-stone*, 2.

turkey-leather (tėr'ki-leᴛʜ″ėr), *n.* A leather prepared by oil-tawing without first removing the hair side, the flesh side being blackened in the usual way: used for women's boots and ★shoes.

turkey-louse (tėr'ki-lous), *n. Goniodes stylifer*, a bird-louse or mallophagous insect of the family *Philopteridæ*, which infests the domestic turkey, having the sides of the abdomen fringed with long hairs.

Turkey myrrh. See *myrrh*.

Turkey oak. See *oak*.

turkey-pea (tur'ki-pē), *n.* 1. Same as *squirrel-corn*. Also *wild-turkey pea*.—2. The hoary pea, *Cracca Virginiana*. See *Tephrosia*. [Southern U. S.]

turkey-pen (tėr'ki-pen), *n.* A pen contrived for trapping turkeys in parts of the United States where they were abundant. It was simply constructed of rails forming four sides and a top, with a low entrance at one place to admit the birds, which were tolled by sprinkling corn to some distance from the opening, as well as inside the inclosure. There was no special contrivance to prevent exit, as the efficiency of the trap depended on the fact that the turkeys, on finding themselves shut in, would carry their heads too high to notice the place through which they had crept to pick up the corn.

turkey-poult (tėr'ki-pōlt), *n.* The pullet or young of the turkey.

Turkey red. 1. See *red*[1].—2. The cotton cloth dyed of this color, formerly brought from the East, but now made in western Europe and in America.—**Mock Turkey red.** See *barwood*.—**Turkey red oil.** See *red*[1].

Turkey-slate (tėr'ki-slāt), *n.* Same as *Turkey-stone*, 2.

Turkey-stone (tėr'ki-stōn), *n.* [Formerly also *turky-stone;* < *Turkey* (see *turkey*) + *stone*.] 1†. A turquoise.

> She shows me her ring of a *Turky-stone*, set with little sparks of dyamonds. *Pepys*, Diary, Feb. 18, 1667–68.

2. A very fine-grained silicious rock, commonly of a yellowish or bluish color. It is used with oil for sharpening small cutting-instruments. It is commonly called *Turkey oil-stone*, as it comes from the interior of Asia Minor. All the so-called hones and oil-stones are almost entirely made up of very fine particles of silica, and the quality of the article varies with the fineness and sharpness of the grain and the compactness of the stone. Some varieties of hone and oil-stone are highly valued for putting a fine edge on delicate cutting-instruments, and bring very high prices.

turkey-trot (tėr'ki-trot'), *n.* A round dance, danced by couples, properly to rag-time, the step being a springy walk with little or no bending of the knees, and accompanied by a swinging motion of the body with shoulder movements up and down. See *one-step*.

turkey-vulture (tėr'ki-vul″tūr), *n.* The turkey-buzzard.

Turkey wheat. See *wheat*.

Turkic (tėr'kik), *a.* Same as *Turkish*.

turkis[1]†, *v. t.* [Also *torkess;* < OF. *torquiss, torquer*, turn: see *turken*.] To turn; alter.

Turlupin (tėr'lū-pin), *n.* [OF., appar. a particular use, in contempt, of *turlupin*, "a grub, mushrome, start-up, new-nothing man of no value" (Cotgrave, ed. 1611); origin unknown.] In *eccles. hist.*, a name given to the members of a French sect of about the fourteenth century, which held views very similar to those of the Brethren of the Free Spirit.

The *Turlupins* were first known by the names Beghards, or Beghins, and brothers and sisters of the free spirit. The common people alone called them *Turlupins*, a name which seems obviously to be connected with the wolvish howlings which these people, in all probability, would make in their religious ravings. Their subsequent name of the fraternity of poor men might have been the cause why the wandering rogues, called Bedlam beggars, assumed or obtained the title of *Turlupins* or Turlygoods, especially if their mode of asking alms was accompanied by the gesticulations of madmen.
Douce, Ill. of Shakspeare.

The rhizome of *Curcuma longa*, a plant of the ginger family, native and long cultivated in the East Indies. It has a central ovoid body and lateral elongated tubers, called respectively *round* and *long turmeric*, formerly supposed to come from different species. Turmeric is of a deep brownish or greenish yellow, inwardly orange, of a resinous consistence and peculiar aromatic odor. It is prepared for use by grinding. In India it is most largely employed as a condiment, particularly as an ingredient in curry-powders. It has the property of an aromatic stimulant, and is there given internally for various troubles, and applied externally for skin-diseases. In western countries its chief use (now declining) has been that of a dyestuff, in which capacity it affords beautiful but fugitive shades of yellow; at present a leading use is in the preparation of a test-paper called *turmeric-paper* or *curcuma-paper.* The coloring matter is called *curcumin;* and the oil to which its aromatic taste and smell are due, *turmeric-oil* or *turmerol.* Sometimes called *Indian saffron.* The Hindu name is *huldee.*

Turnera (tur'nėr-ä), *n.* [NL. (Plumier, 1703), named after W. *Turner* (about the middle of the 16th century), a physician, author (1551) of an English herbal.] A genus of dicotyledonous plants, type of the family *Turneraceæ*. It is characterized by usually perigynous stamens and by three or more multifid stigmas. There are about 70 species, natives of tropical America, with one naturalized in the old world. They are herbs or shrubs with scattered leaves, which are often gland-bearing at the base. The flowers are yellow, and usually solitary in the axils, peculiar in the frequent union of the peduncle with the petiole, the flower therefore seeming to spring from the base of the leaf. Several species are cultivated under glass for their very handsome flowers, which often resemble those of *Flemingia*. *T. opifera* is used as an astringent in Brazil. *T. ulmifolia*, a species widely distributed from the West Indies to Brazil, and known as *holly-rose* and *sage-rose*, is a reputed tonic and expectorant. The stimulant drug damiana is largely prepared from *T. microphylla*, *T. diffusa*, and *T. aphrodisiaca*, especially from the last, which is a native of Texas, Mexico, and Lower California. This, which is widely known by the name *damiana*, is also used, in the form of a hot tea, as a blood-purifier and as a beverage, and is sold in preparations with spirits as a tonic or diuretic, as well as for alleviating colic and nervous disorders. See cut in next column.

★**turnip** (tėr′nip), *n.* [Formerly also *turnep;* perhaps orig. **turn-nep,* < *turn*, implying something round, + *nep, neep,* < ME. *nepe,* < AS. *nǣp*, a turnip: see *neep*[2].] The thick fleshy root of the plant designated by Linnæus as *Brassica Rapa*, considered by some authors as a variety of *B. campestris*, a plant found wild, in varieties corresponding to these plants, in Europe and Asiatic Russia (see *navew*); also, the plant itself, a common garden and field crop. The rutabaga, or Swedish turnip, has smooth leaves, and a root longer than broad. The turnip proper has the root rounded, often broader than long, the root-leaves usually lobed, rough and hairy. The turnip was cultivated by the Greeks and Romans, and is now widely grown in temperate climates for use in soups and stews, or as a boiled vegetable, mashed or whole, and for feeding cattle and sheep, forming in Great Britain a valuable rotation crop. The young shoots of the second year, known as *turnip-tops*, are dressed for early greens. The turnip is little nutritious, containing from 90 to 92 per cent. of water. The rutabaga is somewhat more nutritious, but less easily grown. The varieties of both plants are numerous. The crop sometimes suffers from an affection called *finger-and-toe* or *dactylorhiza*, in which the root divides into branches, apparently a tendency to revert to the wild state. Various insects attack the turnip. See *turnip-fly.*—**Devil's turnip**, the common bryony, *Bryonia dioica.*—**Indian turnip.** See *Indian.*—**St. Anthony's turnip,** *Ranunculus bulbosus*, its bulbs being a favorite food of pigs, and St. Anthony being the patron of pigs. Also called *St. Anthony's rape.*—**Swedish turnip.** See *rutabaga.*—**Teltow turnip,** a variety grown in Germany, with roots but 1 inch thick and 3 inches long, the rind having a very piquant flavor, whence it is much valued for soups and stews.—**Turnip flea-beetle.** See *Phyllotreta* and *turnip-fly* (*c*).—**Turnip-stemmed cabbage,** the kohlrabi.—**Wild turnip.** (*a*) The common turnip in its native state. II. *n.* Vertigo; also, the gid, sturdy, or staggers of sheep.
[Obsolete or provincial.]

turnside (tėrn′sīd), *n.* A turnsick disease of the dog. See the quotation.

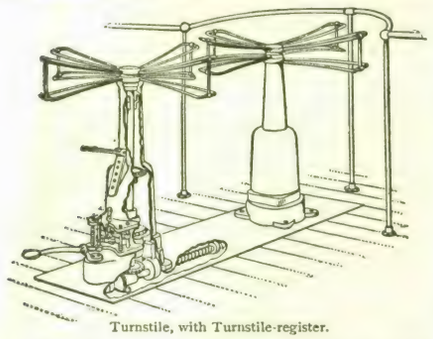
Turnside is more frequently seen in the dog than tetanus, still it is by no means common. It consists in some obscure affection of the brain, resembling the "gid" of sheep, and probably results from the same cause. *Dogs of Great Britain and America*, p. 327.

turnsol, turnsole (tėrn′sōl), *n.* [< ME. *turnesole;* < OF. (and F.) *tournesol*, dial. *tournesoleil* (= It. *tornasole*), < *tourner* (= It. *tornare*), turn, + *sol*, sun, < L. *sol:* see *turn* and *sol*[1], and cf. *parasol.*] 1. Any one of several plants regarded as turning with the movement of the sun. This is the classical meaning of the word, which is the equivalent of *heliotrope;* and it has been so understood in later use, although according to some it refers to the appearance of the flowers at the summer solstice. In modern times the name has been applied (*a*) to the sun-spurge or wartwort, *Euphorbia Helioscopia*, rarely to the sunflower (*Helianthus*), more often to the heliotrope (*Heliotropium*), and (*b*) as in def. 2.

2. A plant, *Tournesol tinctorium*, of the *Euphorbiaceæ*, found in the Mediterranean region and eastward to Persia and India. Its juice is rendered blue by ammonia and air, and linen dipped in it is a test for acids. The plant is of a poisonous character. The name is also given to a deep-purple dye obtained from the plant.

Turnesole is good & holsom for red wyne colowrynge. *Babees Book* (E. E. T. S.), p. 127.

3. Same as *turnsole-blue.*



turnsole-blue (tėrn′sōl-blö), *n.* A color obtained from archil, and formerly used for dyeing. It was claimed that the color was extracted from the turnsol, in order to keep its true source a secret. Also written *tournesol-blue.*

turnspit (tėrn′spit), *n.* [< *turn*, *v.*, + obj. *spit*[1]. Cf. *turnbroach.*] 1. A person who turns a spit.

I am their *turnspit*, indeed; they eat and smell no roast-meat but in my name. *B. Jonson*, Mercury Vindicated.

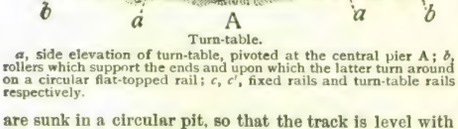
2. A kind of dog of small size, long-bodied and short-legged, formerly used to work a kind of treadmill-wheel by means of which a spit was turned.

turnstile (tėrn′stīl), *n.* [< *turn* + *stile*[1].] A post surmounted by four horizontal arms which move round as a person passes through; a turnpike. Turnstiles are usually placed on roads, bridges, or other places, either to prevent the passage of cattle, horses,

Turnstile, with Turnstile-register.

vehicles, etc., but to admit that of persons, or to bar a passage until toll or passage-money is collected; they are also placed (sometimes with a turnstile-register) at the entrance of buildings, as where there is a charge for admission, or where it is desired to prevent the entrance of too many persons at one time.

turnstile-register (tėrn′stīl-rej″is-tėr), *n.* A recording device for registering the number of persons passing through a turnstile, as at the entrance of a toll-bridge, a place of amusement, etc. It works by means of gear-wheels.



turnstone (tėrn′stōn), *n.* [< *turn*, *v.*, + obj. *stone*.] A small grallatorial bird of the genus *Arenaria*, allied both to plovers and to sandpipers: so called from its habit of turning over little stones or pebbles on the sea-shore in search of food. The common turnstone or sea-dotterel is *S. interpres*. In full summer plumage this is one of the handsomest of its tribe, being pied with black, brown, white, and chestnut-red, and having orange feet; it is 8 to 9 inches long, and about 17 in extent of wings. It is nearly cosmopolitan in its extensive migrations, and breeds in high latitudes. It is common in North America, especially coastwise, and there has many local names, as *brant-bird, beach-bird, whale-bird, heart-bird, chicken-bird, calico-bird, calico-back, calico-jacket, checkered snipe, sparked-back, streaked-back, red-legs, red-legged plover, bishop-plover, maggot-snipe, horse-foot snipe, chuckatuck, creddock, jinny*, etc., derived from its appearance or habits. Among its

Turnstone (*Arenaria interpres*), in full summer plumage.

English names are *Hebridal sandpiper* and *variegated plover, stone-peck'r, tangle-picker*, etc. The black-headed turnstone, *S. melanocephalus*, is a different variety or species, mostly of a blackish color, found on the coasts of the North Pacific. See *Strepsilas*.—**Plover-billed turnstone.** Same as *surf-bird*. *Seebohm.*

turn-table (tėrn′tā″bl), *n.* **1.** A circular platform designed to turn upon its center, and supported by a series of wheels that travel upon a circular track laid under the edge of the platform. This is the original form of the railroad turntable, and is still in use. The platform is laid with a single line of rails, and the running-gear, pivot, wheels, etc.,

Turn-table.

a, side elevation of turn-table, pivoted at the central pier A; *b*, rollers which support the ends and upon which the latter turn around on a circular flat-topped rail; *c*, *c′*, fixed rails and turn-table rails respectively.

are sunk in a circular pit, so that the track is level with the connecting tracks. In some cases a second line of rails is laid on the platform, at right angles with the first. The turn-table for turning locomotives, as at the end of local lines, is now usually simply a wooden or iron girder, pivoted at the center and having each end supported on wheels that move on a circular track in a pit, the platform being dispensed with. Small turn-tables for moving cars from one track to another, as in narrow yards where there is no room for curves or switches, are sometimes used. Also called *turning-plate*.

2. A device used in tracing the circular cement-cells for microscope-slides. *E. H. Knight.*

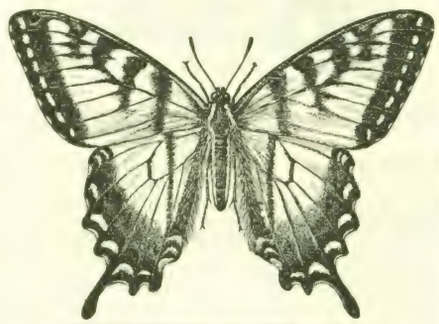
turntale† (tėrn′tāl), *n.* [< *turn*, *v.*, + *tale*[1].] An apostrophe. See the quotation under *turnway*.

turn-tippet† (tėrn′tip″et), *n.* [< *turn*, *v.*, + *tippet*.] A turncoat; a time-server.

The priests, for the most part, were double-faced, *turn-tippets*, and flatterers.
Cranmer, Works (Parker Soc.), II. 15. (*Davies.*)

turn-under (tėrn′un″dėr), *n.* Same as *fall-under*.

turn-up (tėrn′up), *n.* [< *turn up*: see under *turn*.] **1.** A disturbance; a commotion; a shindy or scrimmage.



I have seen many a *turn-up*, and some pitched battles among the yokels; and, though one or two were rather too sanguinary for my taste, no serious mischief was done.
Noctes Ambrosianæ, Dec., 1834.

2. One who or that which turns up unexpectedly or without prearrangement.

The type of men of which Emerson and Carlyle are the most pronounced and influential examples in our time, it must be owned, are comparatively a new *turn-up* in literature. *The Century*, XXVII. 926.

[Colloq. or slang in both uses.]

turnus (tėr′nus), *n.* [< NL. *turnus*, the specific name, < L. *Turnus*, a man's name.] The tiger-swallowtail, *Papilio turnus*, a large yellow

Turnus (*Papilio turnus*), one half natural size.

black-striped swallow-tailed butterfly common in the United States. One striking variety of the female has the wings entirely black. The larva, of a deep velvety-green color, feeds on sassafras, alder, willow, oak, apple, and various other trees.

turnverein (törn′fe-rīn′), *n.* [G. *turn-verein*, < *turnen*, practise gymnastics (see *turn*, *turner*), + *verein*, union, association, < *ver-*, E. *for-*, + *ein*, one, = E. *one*.] An association for the practice of gymnastics according to the system of the turners. See *turner*[1], 4.

turnway† (tėrn′wā), *n.* [< *turn*, *v.*, + *way*[1], *n.*] An apostrophe. [Rare.]

Many times, when we haue runne a long race in our tale spoken to the hearers, we do sodainly flye out & either speake or exclaime at some other person or thing, and therefore the Greekes call such a figure (as we do) the *turnway* or turntale.
Puttenham, Arte of Eng. Poesie, p. 199.

turn-wrest (tėrn′rest), *a.* Noting a plow having a reversible mold-board, whereby a furrow may be turned either to the right or to the left, according to the position of the mold-board.

Turonian (tū-rō′ni-an), *n.* [Irreg. < *Touraine* in France, where the system is well developed, + *-ian*.] In *geol.*, a division of the Cretaceous system, according to the continental geologists. It lies between the Cenomanian and the Senonian, and is the equivalent of the English Middle Chalk, or "Chalk without flints"—the chalk of the cliffs of Dover and Shakespeare Cliff. In the more detailed nomenclature of the French geologists it includes the Ligerian and Angoumian.

turpentine (tėr′pen-tīn), *n.* [Formerly also *terpentine*; < ME. *turbentyne* = MD. *terpentijn, termentijn*, D. *terpentijn* = G. Sw. Dan. *terpentin*, < OF. *turbentine, terebentine*, turpentine, *terebenthine*, ML. *terebintina*, NL. *terebinthina*, turpentine, < L. *terebinthina* (sc. *resina*), fem. of *terebinthinus*, of the terebinth, < *terebinthus*, < Gr. τερέβινθος, terebinth: see *terebinth*, and cf. *terebinthine*.] **1.** An oleoresinous substance secreted by the wood or bark of a number of trees, all coniferous except the terebinth, which yields Chian turpentine. It consists chiefly of an essential hydrocarbon oil ($C_{10}H_{16}$) and a resin called *colophony* or *rosin*. The common turpentine is derived in France from the maritime pine, *Pinus Pinaster* (French or Bordeaux turpentine); in Russia and Germany, from the Scotch pine, *P. sylvestris*; in Austria and Corsica, from the Corsican pine, *P. nigra*; in the East Indies and Japan, from several pines; and in the United States, most largely in North Carolina, from the southern or long-leafed pine, *P. palustris*, and somewhat from the loblolly-pine, *P. Tæda*. For other turpentines, see the phrases below. In the United States turpentine is obtained by cutting a pocket in the side of the tree (boxing), whence it is periodically collected. In France the less destructive method is practised of removing a piece of bark and conducting the flow into earthen vessels. The crude turpentine is subjected to distillation, separating the oil, or so-called spirit or spirits of turpentine, from the rosin—the oil in the case of the long-leafed pine constituting, it is said, 17 per cent., and in the case of the maritime pine 24 per cent. This when pure is limpid and colorless, of a penetrating peculiar odor, and a pungent bitterish taste. Spirit of turpentine is very extensively used in mixing paints and varnishes. In medicine it is stimulant and diuretic, an anthelmintic, and externally a rubefacient and counter-irritant.

Men sellen a Gome, that Men clepen *Turbentyne*, in stede of Bawme; and thei putten there to a littille Bawme for to 3even gode Odour. *Mandeville*, Travels, p. 51.

2. The oil or spirit of turpentine; turps: an ordinary but less precise use.—**Aleppo turpentine,** an article resembling, but not equal to, the Bordeaux turpentine, obtained in Provence from *Pinus hierosolymitana*.—**Canada turpentine,** Canada balsam. During the American civil war, turpentine of the common sort was obtained from the Canadian red pine, *Pinus resinosa*.—**Carpathian turpentine,** usually called *Carpathian balsam*, a turpentine from the Swiss stone-pine, *Pinus Cembra*.—**Chian turpentine,** the product of the terebinth-tree, *Pistacia Terebinthus*, obtained by incision. It is of a feebly aromatic and terebinthinous flavor, not bitter or acrid, and of a characteristic pleasantly aromatic and terebinthinous scent. It was formerly of medicinal repute, then fell nearly into disuse, but latterly has been used with some success for cancer. Also *Cyprian* or *Scio turpentine*.—**Hungarian turpentine,** the product of the dwarf pine, *Pinus montana*, usually called *Hungarian balsam*, an article scarcely met with in commerce. Its essential oil is used as an inhalant in throat-diseases.—**Larch turpentine.** Same as *Venetian turpentine*, below.—**Mineral turpentine,** a deodorized benzine used in painting as a substitute for turpentine.—**Scio turpentine.** Same as *Chian turpentine*, above.—**Strasburg turpentine,** the product of the silver fir, *Abies Picea*, much resembling common turpentine, but pleasantly odorous, and not acrid and bitter. It was formerly much esteemed in medicine, but is now nearly obsolete.—**Turpentine camphor.** Same as *artificial camphor*. See *camphor*.—**Turpentine ointment.** See *ointment*.—**Venetian** or **Venice turpentine,** the oleoresin of the European larch, *Larix decidua*, secreted chiefly in its sapwood. It is useful for plasters, and is often prescribed in veterinary practice; but the genuine article is consumed mostly in continental Europe.

turpentine (tėr′pen-tīn), *v. t.* [< *turpentine*, *n.*] To apply turpentine to; rub with turpentine.

Or Martyr beat like Shrovetide cocks with bats,
And fired like *turpentined* poor wasting rats.
Wolcot (P. Pindar), Subjects for Painters.

turpentine-hack (tėr′pen-tīn-hak), *n.* A hand-tool for cutting or boxing pine-trees, to start the flow of crude turpentine. *E. H. Knight.*

turpentine-moth (tėr′pen-tīn-môth), *n.* Any one of several tortricid moths whose larvæ bore the twigs and shoots of pine and fir, causing an exudation of resin and killing the twig. *Evetria resinana* is the common turpentine-moth of Europe; *E. comstockiana* and *E. frustana* are common in the United States.

turpentine-oil (tėr′pen-tīn-oil), *n.* The oil of turpentine. See *turpentine*. Also called *pine-oil*.—**Hydrochlorate of turpentine-oil,** artificial camphor. See *camphor*.

turpentine-still (tėr′pen-tīn-stil), *n.* An apparatus for distilling spirit from turpentine, or turpentine from pine-wood.

turpentine-tree (tėr′pen-tīn-trē), *n.* **1.** The terebinth-tree, *Pistacia Terebinthus*, the source of Chian or Scio turpentine. Though the range of the terebinth is wide, the moderate demand is met by about 1,000 trees, some of them 800 or 900 years old, on the isle of Scio. See *terebinth*.

2. The Australian *Syncarpia glomulifera* and *Tristania conferta*, trees affording an aromatic oil. See the generic names.

turpentinic (tėr-pen-tin′ik), *a.* [< *turpentine* + *-ic*.] Related to turpentine.—**Turpentinic acid.** Same as *terebic acid* (which see, under *terebic*).

turpeth (tėr′peth), *n.* [Formerly also *turbeth, turbith, turbit*; < ME. *turbyte*, < OF. (and F.) *turbith* = Pg. *turbit* (ML. *turpethum*), < Ar. *turbid*, < Pers. *turbid*, a cathartic, *turbad*, a purgative root.] **1.** The root of *Operculina Turpethum*, a plant of Ceylon, Malabar, and Australia, which has a cathartic property. (See *Indian jalap*, under *jalap*.) It is sometimes called *vegetable turpeth*, to distinguish it from *mineral turpeth*.—**2.** Turpeth-mineral.—**Resin of turpeth.** See *resin*.

turpeth-mineral (tėr′peth-min″e-ral), *n.* A name formerly given to the yellow basic mercury sulphate ($Hg_3(SO_4)O_2$). It acts as a powerful emetic, and was formerly given in croup, but it is now seldom used internally. It is a very useful errhine in cases of headache, amaurosis, etc.

turpify† (tėr′pi-fī), *v. t.* [< L. **turpificare*, in pp. *turpificatus*, made foul, < *turpis*, foul, base, + *-ficare*, < *facere*, make.] To calumniate; stigmatize.

O [that] . . . a woman . . . should thus *turpifie* the reputation of my doctrine with the superscription of a fool! *Sir P. Sidney*, Wanstead Play, p. 620. (*Davies.*)

turpin†, *n.* An obsolete corruption of *terrapin*.

Turpinia (tėr-pin′i-ä), *n.* [NL. (Ventenat, 1803), named after P. J. F. *Turpin*, a French naturalist and artist (1775–1840).] A genus of dicotyledonous plants, of the *Staphyleaceæ*. It is characterized by a three-lobed ovary indehiscent in fruit. The 10 species are natives of Asia and America, especially in China, India, and the West Indies. They are smooth trees or shrubs with terete branchlets bearing opposite leaves, usually composed of opposite serrulate leaflets. The small white flowers form terminal and axillary spreading panicles. Some species produce an edible drupaceous fruit. *T. occidentalis*, a tree from 20 to 30 feet high, is known as *cassava-wood* or *coromantee drumwood* in Jamaica. (See *drumwood*.) *T. pomifera* of India and China, the toukshama of Burma, a very variable species from 12 to 40 feet high, in its typical state bears a fleshy, smooth, and roundish yellow, green, or reddish drupe, sometimes 2 inches in diameter.

turpis causa (tėr′pis kâ′zä). [L.: *turpis*, base, vile; *causa*, cause, reason: see *cause*.] In *Scots law*, a base or vile consideration on which no action can be founded. This would be called in English law *a consideration contra bonos mores*, or *against public policy*.

turpitude (tėr′pi-tūd), *n.* [< F. *turpitude* = It. *turpitudine*, < L. *turpitudo*, baseness, < *turpis*, base.] Inherent baseness or vileness; shameful wickedness; depravity.

All maner of conceites that stirre vp any vehement passion in a man doo it by some *turpitude* or euill and vndecency that is in them.
Puttenham, Arte of Eng. Poesie, p. 242.

How wouldst thou have paid
My better service, when my *turpitude*
Thou thus dost crown with gold!
Shak., A. and C., iv. 6. 33.

Whose political vices, at least, were imputable to mental incapacity, and to evil counsellors, rather than to any natural *turpitude* of heart. *Prescott*, Ferd. and Isa., i. 3.

turps (tėrps), *n.* A workmen's name for the oil or spirit of turpentine.

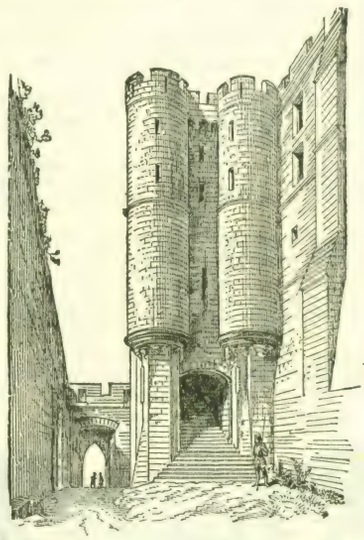
The spirit of turpentine will be designated by the word *turps*, which is in general use, has only one meaning, and has the advantage of brevity.
Spons' Encyc. Manuf., p. 2025.

turquet†, *n.* [Appar. < OF. **Turquet*, dim. of *Turc*, Turk: see *Turk*.] A figure of a Turk or Mohammedan.

Let anti-masques not be long; they have been commonly of fools, satyrs, baboons, wild men, antics, . . . *turquets*, nymphs, rustics, Cupids, statues moving, and the like. *Bacon*, Masques and Triumphs (ed. 1887).

turquoise (tėr-koiz′ or tėr-kēz′), *n.* [A word of unstable form and pronunciation, the older forms being now largely displaced by *turquoise* after mod. E., the pron. wavering between that belonging properly to the word (tėr′kis), and that belonging only to the later form *turquoise*, namely tėr-koiz′: other pronunciations are tėr-kēz′, tėr-kēs′. Now most commonly spelled *turquoise*, also *turkoise*, also *turquois*, *turkois*, *turcois*, also *turkis* (as in Tennyson); early mod. E. *turquoise*, *turquois*, *turkoise*, *tourquoise*, also *turqueis*, rarely *turcas*; not found in ME. (but prob. existent); = D. *turckois*, *turcoys*, now *turkoois* = MHG. *türkis*, *turkoys*, *turggis*, G. *turckiss*, *türkis*, now *turkiss* = Dan. *turkis*, *tyrkis* = Sw. *turkos*; < OF. *turquoise*, *tourques*, F. *turquoise* = Sp. *turquesa* = Pg. *turqueza* = It. *turchese* (ML. reflex *turchesius*), a turquoise, lit. 'Turkish stone' (being brought through Turkey ult. from Persia, or 'Turkish' meaning practically 'Asiatic') (cf. *Turkey-stone*); fem. of OF. *Turquois*, etc. (ML. **Turcensis*), Turkish (see *Turkeis*), < *Turc*, Turk: see *Turk*.] An opaque blue or greenish-blue precious stone, consisting essentially of a phosphate of aluminium containing a little copper and iron. The true or Oriental turquoise, a favorite ornamental stone in rings and other articles of jewelry, is found in a mountain region in Persia, and was originally brought into western Europe by way of Turkey. A variety found in New Mexico, usually of a greenish-blue color, is also used in jewelry. The principal locality is in the Los Cerillos Mountains, where the turquoise was obtained by the Indians in very early times. A greenish turquoise is also found in Nevada. See *bone-turquoise*.

Turkis and agate and almondine.
Tennyson, The Merman.



Reconstructed turquoise, imitation turquoise made of finely powered ivory which is deposited in a solution of copper. This deposit is dried, baked very slowly, and cut.—**Rock-turquoise**, a name given to a matrix of turquoise when small grains of turquoise are embedded in it. In commerce turquoises are said to come from the old and the new rock—the specimens from the old rock being true turquoise, and those from the new being odontolite, a fossil ivory stained with copper.

turquoise-green (tėr-koiz′grēn), *n.* A somewhat pale color intermediate between green and blue.

turr (tėr), *n.* [Burmese.] A three-stringed viol used in Burma.

turrel (tur′el), *n.* [Prob. ult. < OF. *tour*, a turn: see *tour*, *turn*, and cf. *turret*[2].] An auger used by coopers.

★**turret**[1] (tur′et), *n.* [< ME. *turet*, *toret*, < OF. *tourette*, *touret*, a turret or small tower: see *tower*. The W. *twred*, tower, is from the E.] 1. A little tower rising from or otherwise connected with a larger building; a small tower, often crowning or finishing the angle of a wall, etc. Turrets are of two chief classes—such as rise immediately from the ground, as *staircase turrets*, and such as are formed on the upper parts of a building, often corbeled out from the wall and not extending down to the ground, as *bartizan turrets*. See also cuts under *peel* and *bartizan*.

Turrets, 13th century.—Main entrance to the Abbey of Mont St. Michel, Normandy. (From Viollet-le-Duc's "Dict. de l'Architecture.")

2. In *medieval warfare*, a movable building of a square form, consisting of ten or even twenty stories, and sometimes 180 feet high, usually moved on wheels, and employed in approaches to a fortified place for carrying soldiers, engines, ladders, etc.—3. *Milit.*, a tower, often revolving, for offensive purposes, on land or water. See the supplement.—4. In *her.*: (*a*) A small slender tower, usually forming part of a bearing, being set upon a larger tower. See *turreted*, 3. (*b*) A bearing representing a kind of scepter having both ends alike and resembling the ends of the cross avellane. See *tirret*. [Rare.]—5. In a railroad-car of American model, the raised part of the middle of the roof, utilized for affording light and ventilation.—6. In a lathe, a cylindrical or polygonal block on the bed, with holes around it for dies.

turret[2] (tur′et), *n.* [Prob. < OF. **touret*, equiv. to *tournet*, a ring in the mouth of a bit, < *tourn*, a turn: see *turn*.] Same as *terret*.

The silver *turrets* of his harness.
De Quincey, Eng. Mail Coach.

turreted (tur′et-ed), *a.* [< *turret* + *-ed*[2].] 1. Furnished with turrets.—2. In *her.*, having small towers or turrets set upon it, as a castle or a city wall.—3. Formed like a tower: as, a *turreted* lamp.—4. In *conch.*, having a long or towering spire; turriculated. Also *turrited*. See also cut under *Turrilites*.

Turreted Shell of *Latirus gibbulus*, a member of the *Fasciolariidæ*.

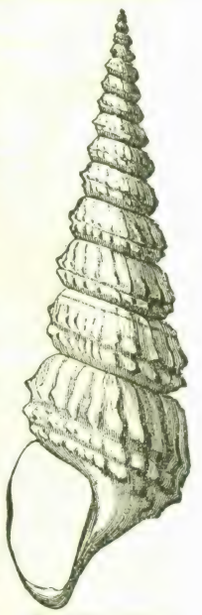
turret-gun (tur′et-gun), *n.* A gun especially designed for use in a revolving turret.

turret-head (tur′et-hed), *n.* The revolving head of a bolt-cutter. *E. H. Knight.*

turret-lathe (tur′et-lāᵺ), *n.* A screw-cutting lathe the slide of which is fitted with a cylindrical or polygonal block or turret pierced around its periphery with openings to receive dies or special tools or formers.

turret-ship (tur′et-ship), *n.* A ship of war whose largest guns are mounted in turrets. In many modern armored vessels not only the largest guns but some of those of intermediate caliber are mounted in some form of turret. The early turret-ships usually were of low freeboard and the turrets of cylindrical shape. See *monitor*, 7.

turribant† (tur′i-bant), *n.* Same as *turban*.



turricula (tu-rik′ū-lä), *n.*; pl. *turriculæ* (-lē). [ML., < L. *turricula*, a little tower, dim. of *turris*, tower: see *turret*[1], *tower*.] Any utensil, as a candlestick, having the form of a tower, especially in ornamental art.

turriculate (tu-rik′ū-lāt), *a.* [< L. *turricula*, a little tower (see *turricula*), + *-ate*[1].] 1. Having turrets; characterized by the presence of a number of small towers; turreted.—2. In *conch.*, turreted. Also *turriculated*.

turriculated (tu-rik′ū-lā-ted), *a.* [< *turriculate* + *-ed*[2].] Same as *turriculate*, 2.

turrilite (tur′i-līt), *n.* [< *Turrilites*.] A fossil ammonitoid cephalopod, the shells of which occur in the cretaceous and greensand formations, and which belongs to the genus *Turrilites* or a related form. The shell is spiral, turreted, and sinistral. There are many species.

Turrilites (tur-i-lī′tēz), *n.* [NL. (Lamarck, 1801), < L. *turris*, a tower, + Gr. λίθος, stone.] A genus of fossil cephalopods, formerly referred to the family *Stephanoceratidæ*, but generally considered as the type of a family *Turrilitidæ*; the turrilites, as *T. costatus* or *T. catenatus*.

Turrilites costatus.

turrion†, *n.* [< It. *torrione*.] A tower or bastion of a fortified city or post.

turrited, *a.* [< L. *turritus*, towered (< *turris*, tower: see *tower*), + *-ed*[2].] See *turreted*, 4.

Turritella (tur-i-tel′ä), *n.* [NL. (Lamarck, 1799), < L. *turritus*, towered, + *-ella*.] 1. The typical genus of *Turritellidæ*, having a long turriculate spirally striate shell, with rounded aperture, as *T. imbricata*.—2. [*l. c.*] Any member of this genus.

Turritellidæ (tur-i-tel′i-dē), *n. pl.* [NL., < *Turritella* + *-idæ*.] A family of tænioglossate holostomous gastropods, whose typical genus is *Turritella*; the screws or screw-shells.

turritelloid (tur-i-tel′oid), *a.* [< *Turritella* + *-oid*.] Resembling a screw-shell; of or pertaining to the *Turritellidæ*. *P. P. Carpenter*.

tursio (tėr′si-ō), *n.* [NL., < L. *tursio*, a kind of fish resembling the dolphin.] 1. A kind of dolphin, *Tursiops tursio*, of British and other North Atlantic waters, of rather large size and heavy build, with comparatively large and few teeth.—2†. [*cap.*] A genus of cetaceans.

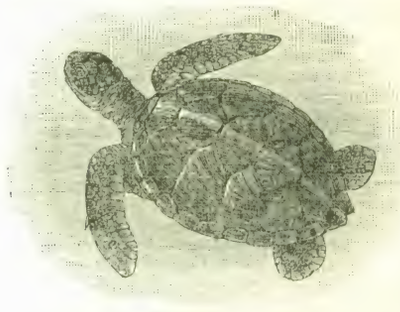
Tursiops (tėr′si-ops), *n.* [NL., < *Tursio* (see *tursio*) + Gr. ὤψ, aspect.] A genus of *Delphinidæ*, named from the resemblance of its members to the tursio, and including such species as *T. gilli* of the North Pacific, which shares with various cetaceans the name *cow-fish*. It differs from *Tursio* in having a dorsal fin.

turtle[1] (tėr′tl), *n.* [< ME. *turtle*, *tortle*, *turtel*, *turtul*, also *tortor* (also *turtre*, < OF.), < AS. *turtle* = G. *turtel*(*taube*) = OF. *turtre*, F. *tourtre* (also dim. *tourtereau*, *tourterelle*) = Pr. *tortre* = Sp. *tórtora*, *tórtola* = It. *tortora*, *tortola*, < L. *turtur*, a turtle; a reduplicated form, prob. imitative of the cooing of a dove.] A turtle-dove.

The wedded *turtel* with her herte trewe.
Chaucer, Parliament of Fowls, l. 355.

Greenland turtle, the sea-pigeon, or Greenland sea-dove, ★*Cepphus grylle*. See cut under *guillemot*.

turtle[2] (tėr′tl), *n.* [Formerly also *tortle*; prob. a corruption of *tortoise*, or an accom. form, first used by English sailors, of the Sp. *tortuga* or Pg. *tartaruga*, a tortoise: see *tortoise*. In either case the alteration appears to have been assisted



Turtle (*Chelopus marmoratus*).

by a whimsical association with *turtle*[1]. The application to the smaller land-tortoises seems to be later.] 1. A tortoise; any chelonian or testudinate; any member of the *Chelonia* or *Testudinata* (see the technical names); especially, a marine tortoise, provided with flippers; absolutely, the green turtle, as *Chelonia midas* (see cut below), highly esteemed for soup. See cuts referred to under *tortoise*, also cuts under *Aspidonectes*, *Eretmochelys*, *periotic*, *Pleurospondylia*, *slider*, and *stinkpot*.

The tortoise, which they call *turtle*, eats like veal.
S. Clarke, Four Plantations in America (1670), p. 21.

A *turtle* — which means a tortoise — is fond of his shell.
O. W. Holmes, Professor, ii.

2. The detachable segment of the cylinder of a rotary printing-machine which contains the types or plates to be printed: so called from its curved surface. In practice, the turtle is removed from the machine to the type-setting room. The types are made up on the curved surface, and firmly held in place by rebated column-rules, thicker at the top than at the bottom, and firmly grooved in the turtle. When the types have been locked up by screws on the turtle, they can be placed on the machine for printing without risk of falling out. Types can be molded in thin curved form by the papier-mâché process, and the curved plate made therefrom can be used in printing. The stereotype method is preferred. — **Bastard turtle**, *Thalassochelys kempi*. — **Box-turtle**. See *box-tortoise*, *Cistudo*, *cooter*, *Pyxis*. — **Chicken-turtle**. Same as *chicken-tortoise*. [Southern U. S.] — **Diamond-backed turtle**. See *diamond-backed*. — **Greaved turtle**, a tortoise of the genus *Podocnemis*, as *P. expansa*. — **Green turtle**, one of several species of turtles, belonging to the natural order *Chelonia*, family *Cheloniidæ*, and genus *Chelonia* (which see for the technical zoölogical characters). They are all marine, and feed almost exclusively on algæ or seaweeds. The common species

of the West Indies is *Chelonia midas;* that of Pacific waters is *C. virgata*. The former comes on the coast of the United States, from the Gulf of Mexico northward, occasionally even to Long Island Sound or even on the New England fishing-banks. It attains great size, individuals having been taken weighing from 200 to 300 pounds. It lives chiefly in deep water, but also seeks the mouths of rivers and estuaries. It breeds from April till July, and in April, and especially in May, large numbers come ashore to lay their eggs, which are much esteemed and eagerly sought for. The animal itself is celebrated as the source of real-turtle soup. The Pacific species ranges along the whole southern coast of California, and is regularly taken to the San Francisco markets. — **Hawk-billed** or **hawk's-bill turtle**, a marine turtle, the caret, *Eretmochelys imbricata*, the source of commercial tortoise-shell. See cut under *Eretmochelys*. — **Loggerhead turtle**. See *loggerhead*, 4. — **Mock turtle**. See *mock*[1]. — **Painted turtle**. Same as *painted terrapin* (which see, under *terrapin*). — **Soft-shelled** or **soft turtle**. See *soft-shelled*, *Trionychidæ*, and cut under *Aspidonectes*. — **To turn turtle**, to capsize: said of a vessel. Tuscan (tus'kan), *a.* and *n.* [= F. *Toscan*, < It. *Toscano*, < L. *Tuscanus*, < *Tuscus*, *Thuscus*, Tuscan. Cf. *Etruscan*.] **I.** *a.* Pertaining to Tuscany, a former grand duchy, now a compartimento of the present kingdom of Italy, corresponding generally to the ancient Etruria. — **Tuscan order**, one of the five orders of architecture, according to Vitruvius and Palladio. It admits of no ornaments, presents the lack of refinement of the other Roman orders, and the columns are never fluted. It differs so little, however, from the Roman Doric that it is generally regarded as being only a variety of the latter. See *Doric*. — **Tuscan straw**, plaited straw of fine yellow color, used for making hats and fine mats and baskets.

Tuscan Order, after Vignola.

II. *n.* 1. An inhabitant of Tuscany. — 2. In *arch.*, the Tuscan order.

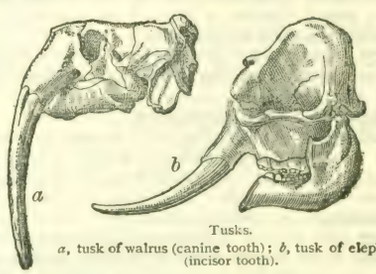
tush[1] (tush), *n.* [< ME. *tusch*, *tosch;* an assibilated form of *tusk*[1].] A long pointed tooth; a tusk; specifically, one of the four canine teeth of the horse.

That great wolf [Gardiner], . . . whose teeth are like to the venomous *toshes* of the ramping lion.
Becon, Works (Parker Soc.), III. 237.

And whom he strikes his crooked *tushes* slay.
Shak., Venus and Adonis, l. 624.

tush[2] (tush), *interj.* [Formerly also *twish;* cf. *tut* and *pish*.] An exclamation expressing rebuke, impatience, or contempt, and equivalent to 'pshaw! be silent': as, *tush! tush!* never tell me such a story as that.

There is a cholerike or disdainfull interiection vsed in the Irish language called Boagh, which is as much in English as *twish*.
Stanihurst, Descrip. of Ireland, i. (Holinshed's Chron., I.).



Tush, man; in this topsy-turvy world friendship and bosom-kindness are but made covers for mischief, means to compass ill. *Chapman*, Widow's Tears, v.

tush[2] (tush), *v. i.* [< *tush*[2], *interj.*] To express impatience, contempt, or the like by the exclamation "Tush!"

Cedric *tushed* and pshawed more than once at the message. *Scott*, Ivanhoe, xliv.

tushed (tusht), *a.* [< *tush*[1] + *-ed*[2].] Having ★tushes; tusked.

tusk[1] (tusk), *n.* [< ME. *tusk*, also transposed *tux* (also assibilated *tusch*, *tosch:* see *tush*[1]), < AS. *tusc*, also transposed *tux* = OFries. *tusk*, *tusch* = Icel. *toskr* (cf. Gael. *tosg*, < E.), a tusk, tooth; prob., with orig. adj. formative *-k* or *-sk* (as in AS. *-isc*, E. *-ish*[1]), from the orig. form of *tooth* (AS. *tōth*, Goth. *tunthus*, etc.), the radical *th* + *k* or *th* + *sk* reducing to *sk*, as *th* + *t* or *th* + *st* reduces to *st*. The supposition that AS. *tusc* is a contr. of **twisc*, < *twi-*, two, though phonetically tenable (cf. *tuskar*, *twiscar*), does not meet the sense.] 1. A long pointed tooth; especially, a tooth long enough to protrude from the lips when the mouth is closed. Tusks are extremely prominent in some animals, as elephants, mastodons, and other proboscideans; the narwhal among cetaceans; various pachyderms, as the hippopotamus, boar, and babirussa; the walrus among pinniped carnivores; and the fossil saber-toothed tigers among ordinary

Tusks.
a, tusk of walrus (canine tooth); *b*, tusk of elephant (incisor tooth).

carnivores. Tusks may be upper or lower; they are usually upper, but in the dinotherium lower. They are either incisors or canines in different animals, but are usually canines. They are always paired, except in the narwhal. The single developed upper incisor of the male narwhal is the longest tusk known, reaching a length of 6 or 8 feet, and it is spirally grooved as if twisted. Elephants tusks are upper incisors, and furnish most of the ivory of commerce. The tusks of the walrus are upper canines; those of the boar tribe are canines, both upper and lower. The tusks of the dinotherium are a pair of lower incisors turned down out of the mouth. The so-called tusks or tushes of the horse are ordinary canines. See cuts under *babirussa*, *boar*, *Dinotherium*, *elephant*, *Mastodontinæ*, *monodon*, *narwhal*, *Phacochærus*, *saber-toothed*, and *walrus*.

But bit his lip for felonous despight,
And gnasht his yron *tuskes* at that displeasing sight.
Spenser, F. Q., IV. x. 33.

2. A sharp projecting point resembling in some degree a tusk or tooth of an animal. Specifically —(*a*) A tooth of a harrow. (*b*) The share of a plow.

Shortly plough or harrow
Shall pass o'er what was Ismail, and its *tusk*
Be unimpeded by the proudest mosque.
Byron, Don Juan, vii. 63.

(*c*) In locks, a sharp projecting point or claw which forms a means of attachment or engagement. **3.** In *carp.*, a bevel shoulder on a tenon to give it additional strength.—**4.** A tooth-shell. See *Dentaliidæ*, and cut under *tooth-shell*.

tusk[1] (tusk), *v.* [< *tusk*[1], *n.*] **I.** *trans.* **1.** To gore with the tusks.

My poor mistress went distract and mad
When the boar *tusk'd* him. *Keats*, Endymion, iii.

2. To move, turn, or thrust with the tusks.

The wilde boare has *tusked* up his vine.
Dekker, Londons Tempe (Works, ed. Pearson, IV. 120).

II.† *intrans.* To gnash the teeth, as a boar; show the tusks.

Never *tusk*, nor twirl your dibble; . . . you shall not fright me with your lion-chap, sir, nor your tusks.
B. Jonson, Bartholomew Fair, ii. 1.

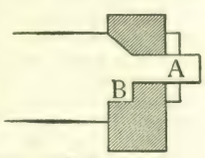
tusk[2] (tusk), *n.* [A reduced form of *torsk*. Cf. *cusk*.] A fish: same as *torsk*.

tusk[3] (tusk), *n.* [Early mod. E. *tuske*, also assibilated *tushe*; cf. Dan. *dusk*, a tuft, tassel, Sw. dial. *tuss*, a wisp of hay; cf. also W. *tus*, *tusw*, a wisp, bundle. The relations of these forms are uncertain. Cf. *tussock*.] A tuft; a bush. *Palsgrave*.

tuskar (tus'kär), *n.* [Also *tushkar*, *twiscar*; < Icel. *torfskeri*, a turf-cutter (cf. *torfskurdhr*, turf-cutting), < *torf*, turf, + *skera*, cut: see *turf*[1] and *shear*.] An implement of iron with a wooden handle, for cutting peat. [Orkney and Shetland.]

tusked (tuskt), *a.* [< *tusk*[1] + *-ed*[2].] Having tusks; tusky: used in heraldry only when the tusks are of a different tincture from the rest of the bearing. Also *tushed*.

His wide mouth did gape
With huge great teeth, like to a *tusked* Bore.
Spenser, F. Q., IV. vii. 5.



tuskee (tus'kē), *n.* [Amer. Ind.] The prairie-turnip, *Psoralea esculenta*. See *Psoralea*.

tusker (tus'kėr), *n.* [< *tusk*[1] + *-er*[1].] An elephant whose tusks are grown and retained.

Every one knows that elephants are found there [in Ceylon], but it is not so generally known that *tuskers* are so rare that not one male in 300 has tusks.
W. W. Greener, The Gun, p. 587.

tusk-shell (tusk'shel), *n.* A tooth-shell: same as *tusk*[1], 4.

tusk-tenon (tusk'ten″ọn), *n.* A tenon strengthened by having a shoulder or step on the lower side. This form has the advantage of permitting the mortise into which it enters to be cut at a higher point in a horizontal beam, thus weakening the latter less than if cut at or below the neutral line of deflection.

Tusk-tenon.
A, tenon; B, tusk.

tusk-vase (tusk'vās), *n.* A decorative vase formed of a part of the tusk of an elephant, hollowed and mounted with the point downward on a stand; hence, a vase of any material resembling a tusk so mounted.

tusky (tus'ki), *a.* [< *tusk*[1] + *-y*[1].] Having tusks; tusked: as, the *tusky* boar. *Pope*, Odyssey, xiv. 124.

tussemose†, *n.* See *tuzzimuzzy*.

tusser (tus'ėr), *n.* [Also *tussur*, *tussore*, *tusseh*, ★*tussah*, *tussa*, *tasar*; prob. at first in comp. *tusser-silk*, lit. 'shuttle-silk,' perhaps from the form of the cocoon (Yule), < Hind. *tassar*, < Skt. *tasara*, *trasara*, shuttle.] **1.** Same as *tusser-silk*. —**2.** An oak-feeding silkworm, *Antheræa mylitta*, furnishing a silk of great strength, but of coarse quality and hard to reel.

tusser-silk (tus'er-silk), *n.* The raw silk produced by various silkworms other than the ordinary *Bombyx mori*, as by *Antheræa mylitta*. The silk is naturally of a dark fawn-color; the cloths made from it are generally plainly woven, without patterns, brocading, or even cords.

tusser-worm (tus'ėr-wėrm), *n.* Same as *tusser*, 2.

tusses (tus'ez), *n. pl.* [Appar. for *tushes*, pl. of *tush*, var. of *tusk*: cf. *tusk*[1], *n.*, 3.] Projecting stones left in masonry to tie in the wall of a building intended to be subsequently annexed. *Halliwell*.

And also forsaide Richarde sall schote out *tusses* in the west ende for makyng of a stepill.
Contract for Catterick Church, Yorkshire (1412), quoted in [N. and Q., 7th ser., V. 490.

tussicular (tu-sik'ū-lär), *a.* [< L. *tussicularis*, < *tussicula*, dim. of *tussis*, cough.] Of or pertaining to a cough.

Tussilago (tus-i-lā'gō), *n.* [NL. (Tournefort, 1700; earlier in Lobel, 1576), < L. *tussilago*, the herb coltsfoot.] A genus of composite plants, of the tribe *Senecioneæ*, type of the subtribe *Tussilagineæ*. It is characterized by radiate flower-heads with erect uniseriate involucral bracts, the disk-flowers with undivided styles. The only species, *T. Farfara*, the coltsfoot, is widely distributed through north temperate regions in the Old World, in America naturalized in the North Atlantic States and Canada. It is a perennial herb, more or less covered with snowy wool, growing from a deep-seated rootstock. The leaves are radical, large and roundish, and somewhat angulate; the flower-heads are yellow, of medium size, and solitary upon a scale-bearing scape. See *coltsfoot* (with cut), and compare *coughwort* and *foalfoot*

tussis (tus'is), *n.* [L.] In *med.*, a cough. Compare *pertussis*. [Now rare.]

tussle (tus'l), *n.* [Formerly also *tussel*; a var., with shortened vowel, of *tousle*: see *tousle*.] A struggle; a conflict; a scuffle. [Colloq.]

"It is some comfort, when one has had a sair *tussel*," continued the captain, . . . "that it is in a fair leddy's service." *Scott*, Heart of Mid-Lothian, li.

tussock (tus'ọk), *n.* [Formerly also *tussuck*; supposed to be another form, with accom. dim. suffix *-ock*, of *tusk*[3].] **1.** A clump, tuft, or small hillock of growing grass.—**2.** Same as *tuft*[2], 1.

There shoulde not any such *tussocks* nor tufts be seen as there be, nor such laying out of the hair.
Latimer, Sermon bef. Edw. VI., 1550.

3. A tussock-moth, as of the genus *Orgyia* (which see); a vaporer: so called from the tufted larvæ. The larva of the white-marked tussock, *O. leucostigma*, is a very destructive caterpillar in the United States. The pale tussock is the European *O. pudibunda*: so called in England. **4.** Same as *tussock-grass*.

tussock-caterpillar (tus'ọk-kat′ėr-pil-är), *n.* The larva of any tussock-moth.

tussock-grass (tus'ọk-gras), *n.* **1.** A tall and elegant grass, *Poa flabellata* (*Dactylis cæspitosa*), a native of the Falkland Islands, Tierra del Fuego, and southern Patagonia, delighting in boggy and peaty ground. It grows in great tufts or tussocks sometimes 5 or 6 feet in height, the long tapering leaves gracefully recurved. The plant is highly nutritious, containing a large amount of saccharine matter, and is sought after by cattle. Several attempts have been made to establish it in seaside districts in Scotland.

Tussock-grass (*Poa flabellata*).

2. In Australia, a plant of the lily family, *Lomandra* (*Xerotes*) *longifolia*, considered the best native substitute for esparto. Though it is of taller growth in wet ground, the best quality is from dry lands. Also called *mat-rush*. *Spons' Encyc. Manuf.* **3.** A tufted grass, *Deschampsia cæspitosa*. ★*Britten and Holland*. [Prov. Eng.]

tussock-moth (tus'ọk-môth), *n.* One of various bombycoid moths whose larvæ are tufted; a tussock; a vaporer: as, the hickory *tussock-moth*, *Halesidota caryæ*, the larva of which feeds mainly on the foliage of hickory, but also upon other forest- and orchard-trees in the United States. See cut under *Orgyia*.

tussock-sedge (tus'ọk-sej), *n.* A sedge-plant, *Carex stricta*, growing in swampy grounds in dense clumps, the bases of which at length become elevated into hummocks.

tussocky (tus'ọk-i), *a.* [< *tussock* + *-y*[1].] Abounding in or resembling tussocks or tufts.

tussore, *n.* Same as *tusser*.

tussuck†, *n.* An old spelling of *tussock*.

tussy†, *n.* An old spelling of *tuzzy*.

tut[1] (tut), *v. i.* [Var. of *toot*[1], *tote*[1].] To project.

tut[2] (tut), *n.* [Also *tote*: see *tut*[1], *v.*, and *toot*[1].] A hassock; a footstool. [Prov. Eng.]

Paid for a *tut* for him that drawes the bellowes of the orgaines to sit upon. iv*d*.
Chwardens Accounts of Cheddle, 1637. (*Davies.*)

tut[3] (tut), *n.* [Also *tote*; origin obscure.] A piece of work; a job.

tutenag (tū'te-nag), *n.* [Also *tutenague*, *tootnague*, formerly *tuthinag*, *toothenague*; < F. *tutenague*, *tutenage*, *toutenague*, *toutenage*, *tutunac*, *tintenaque*, etc., = Sp. Pg. *tutenaga*; prob. < Pers. Ar. *tūtiya*, an oxid of zinc (see *tutty*[2]), + (?) Pers. *-nāk*, an adj. suffix, or Hind. *nāga*, lead.] The name given to the zinc imported

into Europe from China and the East Indies, and formerly, especially in the second half of the eighteenth century, an article of considerable commercial importance—this metal having been purchased by the Dutch in China and by them distributed through the East Indies and supplied to India proper, whence more or less of it found its way to Europe, where its manufacture seems to have been begun on a small scale, both in Germany and in England, about 1730. It is said that the name *tutenag* was first given to an alloy imported from the East by the Portuguese, and that this alloy was the gong-metal of the Chinese, which is a variety of bronze. This would seem to be probable, since the first mention of this alloy, so far as known, is that of Libavius, who, in his work "De Natura Metallorum, published in 1597, describes a white bronze (*æs album*), which he says is not zinc, but a peculiar kind of tin brought from the East Indies, and which is sonorous, for which reason it was called by the Spaniards *tintinaso*, from *tintinnare*, 'to resound. Whether this name was a variant of *tutenag* (also spelled in a great variety of other ways, among which *tintinague*) or an independent designation of the alloy is not known. The whole matter of the early nomenclature of zinc is extremely obscure. See *zinc*.

tutiorism (tū'ti-ọr-izm), *n.* [< L. *tutior*, compar. of *tutus*, safe (pp. of *tueri*, watch, guard: see *tuition*), + *-ism*.] Rigorism, especially in a mild form.

tutiorist (tū'ti-ọr-ist), *n.* [< *tutior(ism)* + *-ist*.] A rigorist; especially, one who holds the doctrines of rigorism in a less rigid or severe form.

Tutivillus†, *n.* [ML.: see *titivil*.] A demon who was said to collect all the fragments of words which the priests had skipped over or mutilated in the performance of the service, and to carry them to hell. *Halliwell.*

Tutivillus, the devyl of hell,
He wryteth har names, sothe to tel,
admissa extrahantes. . . .
For his love that ȝou der boȝth,
Hold ȝou stil, and fangel noȝth,
sordem aperte deprecantes.
Rel. Antiq., I. 257.

tut-mouthed† (tut'moutht), *a.* Having a projecting under jaw. *Holland.*

tut-nose (tut'nōz), *n.* A snub-nose. [Prov. Eng.]

tutor (tū'tọr), *n.* [Early mod. E. also *tutour*, *tuter*; < ME. *tutour*, < OF. *tuteur*, F. *tuteur* = Sp. Pg. *tutor* = It. *tutore*, < L. *tutor*, a watcher, protector, guardian, < *tueri*, protect: see *tuition*. In the legal sense the word is directly from the L. *tutor*.] **1.** A guardian.

And kynde wit be wardeyn ȝoure welthe to kepe,
And *tutour* of ȝowre tresoure and take hit ȝow atte nede.
Piers Plowman (C), ii. 52.

I'll have mine own power here,
Mine own authority; I need no *tutor*.
Fletcher, Double Marriage, v. 1.

The guardian—the *tutor* in Scottish phrase—of the orphans and their land.
E. A. Freeman, Norman Conquest, V. 252.

2. In *law*, the guardian of a boy or girl in pupilarity. In the absence of other provision, the father is the tutor, and failing him there may be a *tutor nominate*, a *tutor-at-law*, or a *tutor dative*. A tutor nominate is one nominated in a testament, etc., by the father of the child or children to be placed under guardianship. A father may nominate any number of tutors. A tutor-at-law is one who acquires his right by the mere disposition of law, in cases where there is no tutor nominate, or where the tutor nominate is dead, or cannot act, or has not accepted. A tutor dative is one named by the sovereign on the failure of both tutors nominate and tutors-at-law. In civil law it was originally considered as a right of the nearest relative to be named the tutor in order to preserve the fortune for the family, and it was only gradually that the protection of the infant himself came to be considered the principal object, and the filling of the office of tutor more as a duty which had to be fulfilled unless there were special circumstances to excuse, than as a right which a relative could claim.

3. One who has the care of instructing another in various branches or in any branch of learning; a private instructor; also, a teacher or instructor in anything.

Thou shalt be as thou wast,
The *tutor* and the feeder of my riots.
Shak., 2 Hen. IV., v. 5. 66.

4. In *Eng. universities*, an officer who is specially intrusted with the care of the undergraduates of his college.

By the middle of the sixteenth century, the modern system of admitting students not on the foundation was fully established; and, as a natural result, the office of *tutor* in the present meaning of the term then first appears, being probably introduced at King's Hall, the chief of the earlier foundations absorbed in Trinity College, "where the students were much younger than elsewhere."
Quarterly Rev., CXLV. 403.

The college officer with whom the Undergraduate has most frequent contact is the *Tutor*. He not only directs the studies of his pupils, but also deals with them in all points, material as well as intellectual. He collects the College bills, and generally acts as agent for the College in all business transactions with its members. . . . The *Tutor* himself does not necessarily lecture or teach.
Dickens's Dict. of Cambridge, p. 124.

5. In *U. S. colleges*, a teacher subordinate to a professor, usually appointed for a year or a term of years.

tutor (tū'tọr), *v. t.* [< *tutor*, *n.*] **1.** To have the guardianship or care of.—**2.** To instruct; teach.

Then gave I her, . . . *tutor'd* by my art,
A sleeping potion. *Shak.*, R. and J., v. 3. 243.

She trills her song with *tutored* powers,
Or mocks each casual note.
Wordsworth, The Contrast, i.

tutorage (tū'tọr-āj), *n.* [< *tutor* + *-age*.] The office, occupation, or authority of a tutor or guardian; guardianship.

Children care not for the company of their parents or tutors, and men will care less for theirs, who would make them children by usurping a *tutorage*.
Government of the Tongue.

tutoress (tū'tọr-es), *n.* [Formerly also *tuteresse*, *tutress*; < *tutor* + *-ess*.] A female tutor; an instructress; a governess.

What a good helper, what a true instructer!
In all good arts a *tutresse* and conducter.
Heywood, Dialogues (Works, ed. Pearson, 1874, VI. 177).

tutorial (tū-tō'ri-al), *a.* [< LL. *tutorius*, belonging to a guardian (< L. *tutor*, a guardian: see *tutor*), + *-al*.] Of, pertaining to, or exercised by a tutor or instructor.

The Commissioners had two purposes plainly before them, which events have shown to be incompatible in the form which they were made to take. The one was to enlarge and strengthen the Professoriate, the other was to extend and encourage what is called the *Tutorial* system, by which is meant the instruction of the undergraduates in work for their examinations by certain College officials.
Contemporary Rev., LVI. 928.

tutorially (tū-tō'ri-al-i), *adv.* In a tutorial manner; as a tutor. *The Academy*, Jan. 31, 1891, p. 102.

tutorly† (tū'tọr-li), *a.* [< *tutor* + *-ly*1.] Like, befitting, or belonging to a tutor; pedagogic.

The King had great reason to be weary of the Earl, who was grown so infirm, peevish, and forgetful, as also not a little *tutorly* in his Majesty's affairs.
Roger North, Examen, p. 453. (*Davies.*)

tutorship (tū'tọr-ship), *n.* [< *tutor* + *-ship*.] **1.** Guardianship; tutelage.

This young Duke William, the second of that name and seauenth Duke of Normandie, being vnder *tutorship*, and not of himselfe to gouerne the country.
Verstegan, Rest. of Decayed Intelligence (ed. 1628), p. 169.

2. The office of a tutor or instructor.

tutory (tū'tọr-i), *n.* [< *tutor* + *-y*3.] Tutorship; tutorage; guardianship; instruction.

The guardianship or *tutorie* of a king.
Holinshed, Hist. Scotland, an. 1524 (Chron. I.).

Their reciprocal prospective rights of *tutory* were defeated, and the minutio of either tutor or ward put an end to a subsisting guardianship. *Encyc. Brit.*, XX. 687.

tutrice, *n.* See *tuteur*.

tutrix (tū'triks), *n.* [< LL. *tutrix*, fem. of L. *tutor*, a guardian: see *tutor*.] A female guardian.

The Jacobites submitted to the queen, as *tutrix* or regent for the prince of Wales, whom they firmly believed she intended to establish on the throne.
Smollett, Hist. Eng., I. vii. § 28.

tutsan (tut'san), *n.* [Formerly also *tutsain*; < OF. *toutesaine*, also *tutsan*, F. *toutesaine*, < *tout* (< L. *totus*), all, + *sain* (< L. *sanus*), sound: see *total* and *sane*1. Cf. *allheal*.] A species of St.-John's-wort, *Hypericum Androsæmum*, once regarded as a panacea, or particularly as healing to wounds. Also *parkleaves*. Sometimes extended to the whole genus; by Lindley to the family *Hypericaceæ*.

The healing *Tutsan* then, and Plantan for a sore.
Drayton, Polyolbion, xiii. 204.

tutti (töt'ti), *a.* and *n.* [It., pl. of *tutto*, all, < L. *totus*, pl. *toti*, all: see *total*.] **I.** *a.* In *music*, all the voices or instruments together; concerted: opposed to *solo*. In concertos the term is applied to passages in which the orchestra is used without the solo instrument. It is also loosely used of any loud concerted passage.

II. *n.* A concerted movement or passage intended for or performed by all the voices or instruments together, or by most of them: opposed to *solo*.

They were bent upon a surfeit of music: *tuttis*, finales, choruses, must be performed.
Longfellow, Hyperion, iv. 4.

tutti-frutti (töt'ti-frö't'ti), *n.* [It.] A confection flavored with or containing different kinds of fruit; specifically, ice-cream so made.

tutty1 (tut'i), *n.*; pl. *tutties* (-iz). [Also *tussy*, *tosty*, and in many other confused forms; partly due to *tuzz*, *tuzzy*, q. v., but perhaps in part connected with *tut*3, in sense 'tuft.'] A nosegay; a posy. [Prov. Eng.]

Joan can call by name her cows,
And deck her windows with green boughs;
She can wreathes and *tuttyes* make,
And trim with plums a bridal cake.
T. Campion (Arber's Eng. Garner, II. 383).

tutty2 (tut'i), *n.* [Formerly also *tuty*, *tutie*; < ME. *tutie*, < OF. (and F.) *tutie* = Sp. *tutia*, *atutía* = Pg. *tutia*, < ML. *tutia*, < Ar. Pers. *tūtiya*, an oxid of zinc. Cf. *tutenag*.] Impure zinc protoxid, collected from the chimneys of smelting-furnaces. It is said also to be found native in Persia. In the state of powder tutty is used for polishing, and in medicine to dust irritated surfaces.

Tutie (tutia) a medicinable stone or dust, said to be the heavier foil of Brass, cleaving to the upper sides and tops of brass-melting houses; and such ordinary Apothecaries pass away for *Tuty*; whereas the true *Tuty* is not heavy, but light, and white like flocks of wooll, falling into dust so soon as it is touched; this is bred of the sparkles of brazen furnaces, whereinto store of the mineral Calamine hath been cast. *Blount*, Glossographia (1670).

The larvæ of the parallel twig-pruner, *E. parallelum*, live in the twigs of oak- and apple-trees and other forest- and fruit-trees in the northern United States, and pupate in their burrows. The beetles oviposit by preference in the cut ends of twigs, and the larvæ work into the live wood by boring down the center. See cut under *Elaphidion*, and compare *twig-borer*.

twig-rush (twig'rush), *n.* A plant of the cyperaceous genus *Cladium*, this name as well as the genus name referring to the repeatedly branching cyme of the original species, *C. Mariscus*. This is a tall perennial rush-like plant with long slender leaves toothed on the edges and the keel, found in bogs in most temperate and some tropical regions. It occurs in the western United States, and in the southern if the similar *C. effusum* (see *saw-grass*) be included in it. *C. mariscoides* grows northward in North America. There are in all about 33 species.

twigsome (twig'sum), *a.* [< *twig*[1] + *-some.*] Abounding in twigs. [Rare.]

The *twigsome* trees by the wayside (which, I suppose, will never grow leafy, for they never did).
Dickens, Uncommercial Traveller, vii.

★ **twilight** (twī'līt), *n.* and *a.* [Formerly also *twylight;* < ME. *twilight, twyelyghte* = LG. *twilecht* = G. *zwielicht* (cf. MHG. *zwischenlicht*); < *twi-* + *light*[1].] **I.** *n.* 1. The light from the sky when the sun is below the horizon at morning and evening. It has generally been agreed by observers in different countries that this light rises in the morning and sets in the evening when the sun is 18° or 19° below the horizon. The former depression is given by Ptolemy, Gemma Frisius, Magini, Kepler, and Gassendi; the value 19° is given by Posidonius and Alhazen. Under some circumstances a second twilight or afterglow appears. Twilight proper is due to reflection, refraction, and diffraction by the dust and moisture of the atmosphere and to a slight extent by the mixed masses of warm and cold air. The phenomena are much modified by the presence of clouds and sometimes even by the zodiacal light. Ordinarily twilight is the glow surrounding the sun, but intensified by the greater amount of dust and vapor in the path of the sunbeams when the sun is near the horizon. In some special cases the upper atmosphere is filled with the finest water particles that give rise to halos of 10° to 20° radius (see *Bishop's ring*), and in such cases the particles give rise to a red-colored diffraction-ring that covers the sky like a lurid flame when the sun is 20 or 30 degrees below the horizon. Ordinarily the clear sky shows a shade of light green in the region to the right or left of the sun and between the lower reds and the upper blue of the sky. This may be a pure diffraction green or a mixture of the blue and pink shades.

Twye lyghte, be-fore the day. Diluculum.
Twye lyghte, a-fore the nyghte. Crepusculum.
Prompt. Parv., p. 505.

Now came still evening on, and *twilight* gray
Had in her sober livery all things clad.
Milton, P. L., iv. 598.

2. Hence, any faint light; partial darkness; shade.

Through many a woodland dun,
Through buried paths, where sleepy *twilight* dreams
The summer time away. *Keats*, Endymion, ii.

3. Figuratively, an indistinct medium of perception; also, a state of faint or hazy mental illumination.

What shall I do? what conduct shall I find
To lead me through this *twi-light* of my mind?
Buckingham, Rehearsal, iii. 2.

II. *a.* 1. Belonging, pertaining, or peculiar to twilight; seen by twilight; crepuscular, as a bat or moth.

Nymphs and shepherds . . .
Trip no more in *twilight* ranks.
Milton, Arcades, l. 99.

2. Faintly illuminated; shady; dim; obscure: either literally or figuratively.

Some few sparks or flashes of this divine knowledge may possibly be driven out by rational consideration; philosophy may yield some *twilight* glimmerings thereof.
Barrow, Sermons, III. xlv.

Twilight curve, the boundary of the earth's shadow, which rises in the east after the sun has set and cuts off the twilight glow. Within this arc, which sometimes appears very sharply defined, the atmosphere receives no direct light from the sun, and reflects only the diffuse light that comes from other parts of the sky. As the sun descends, the arc rises to the zenith and then passes over to the western horizon. Its arrival at the zenith marks the end of the ordinary civil daytime and the beginning of night-time. Municipal contracts for lighting the streets generally consider this moment as that at which street lamps should be lighted in the evening or extinguished in the morning. On the other hand, marine lights, lighthouses, buoys, etc., are lighted when the sun is in the horizon, taking no account of twilight on account of the possibility of fog or stormy weather.

twilight (twī'līt), *v. t.* [< *twilight, n.* The form of the pp. in the second quotation is irregular.] To illuminate faintly or dimly.

The temple's dim cavernous recesses, faintly starred with mosaic, and *twilighted* by twinkling altar-lamps.
Howells, Venetian Life, xi.

He was like some one lying in *twilit*, formless pre-existence. *R. L. Stevenson*, Will o' the Mill.

twill[1] (twil), *v. t.* [Also dial. (Sc.) *tweel, twell, tweil, tweal;* < LG. *twillen*, make double, also fork into branches, as a tree; cf. LG. *twill, twille, twehl*, a forked branch, any forked thing; D. *tweeling* = G. *zwilling* = Sw. Dan. *tvilling*, twin; Sw. dial. *tvilla*, produce twins (said of sheep); OHG. *zwilih, zwilihh*, MHG. *zwilich, zwilch*, G. *zwillich*, twill (fashioned after L. *bilix*, having two threads); with formative *-l*, < *twi-*, two: see *twi-, two*, and cf. *twin*[1].] To weave in a particular way (see *twill*[1], *n.*), producing diagonal ribs in the stuff.

At last she stood complete in her silvery *twilled* silk, her lace tucker, her coral necklace, and coral ear-drops.
George Eliot, Silas Marner, xi.

★ **twill**[1] (twil), *n.* [< *twill*[1], *v.*] 1. A variety of textile fabric in which the weft-threads do not pass over and under the warp-threads in regular succession, as in common plain weaving, but pass over one and under two, over one and under three, or over one and under eight or ten, according to the kind of twill. The next weft-thread takes a set oblique to the former, throwing up one of the two deposed by the preceding. The effect of this is to produce the appearance of parallel diagonal lines or ribs over the whole surface of the cloth; but the regularity of the parallel lines is broken in various ways in what is termed *fanciful twilling*. The goods so manufactured are stronger than those made by plain weaving. In twilled cloth the number of heddles used is equal to the number of threads contained in the interval between two intersections of the warp and weft, as when every third thread is to be interwoven three leaves are used, for six threads six leaves, etc. Twills are called, according to the number of leaves employed in the weaving, *three-leaf twill, six-leaf twill*, etc.

Special duties were charged upon Scotch linens called *twill* and ticking, on importation into England.
S. Dowell, Taxes in England, II. 61.

2. The raised line made by twilling.

A right hand *twill* is said to appear much bolder if the thread be twisted to the right hand.
A. Barlow, Weaving, p. 99.

Colored twill, a stout cotton material made in all principal colors, and employed for linings of curtains and embroideries. It will not bear washing.—**French twill.** See *French.*—**Full twills**, twilled fabrics of cotton and woolen, usually of plain color.—**Herring-bone twill.** See *herring-bone.*—**Kirriemuir twill**, a fine twilled linen cloth manufactured in Scotland, and often used as a background for embroidery.

twill[2] (twil), *n.* [A var. of *quill*[1]; cf. *twilt* for *quilt.*] A reed; a quill; a spool to wind yarn on. [Prov. Eng.]

A *Twill;* a Spoole; from Quill. In the South they call it winding of Quills, because anciently, I suppose, they wound the Yarn upon Quills for the Weavers, though now they use Reeds. *Ray*, Eng. Words (1691), p. 77.

twill[2] (twil), *v. t.* [< *twill*[2], *n.*] To quill; trim with quilling or fluting.

The great fat pincushion lined with pink inside, and *twilled* like a lady's nightcap.
Thackeray, Vanity Fair, xvi.

twill[3] (twil), *prep.* and *conj.* A dialectal variant of *till*[2].

'twill (twil). A contraction of *it will.*

twilled (twild), *a.* [An uncertain word, used only in the following passage. If correctly printed in the original, it may be < *twill*[1] + *-ed*[2], meaning 'ridged, terraced,' or, as commentators say, 'hedged'; or < *twill*[2] + *-ed*[2], meaning then 'reeded, reedy.' But it is not likely that Shakspere ever used *twill*[2] for *quill.*] See the etymology.

Thy banks with pioned and *twilled* brims,
Which spongy April at thy best betrims.
Shak., Tempest, iv. 1. 64.

twilt (twilt), *n.* [A var. of *quilt*, as *twill*[2] for *quill*[1].] A quilt. [Prov. Eng. and Scotch.]

Beds of state, *twilts*, pands and testors, napery and broidered wark. *Scott*, Bride of Lammermoor, xxvi.

★ **twin**[1] (twin), *a.* and *n.* [< ME. *twin, twyn, twinne, twynne*, < AS. *getwin*, double (pl. *getwinnas*, twins) (= Icel. *tvinnr, tvennr*, two and two, twin), < *twi-*, two: see *twi-*. Cf. *twinling.* See also *twine*[1].] **I.** *a.* 1†. Two; twain.

Forr Crist iss bathe Godd & mann,

Ormulum, l. 1361 (Morris and Skeat, **I. 52**).

A wain thai had thair gere wit-in,
That draun was wit oxen *twin.*
Cursor Mundi, l. 278 (Morris and Skeat, **II. 78**).

Thou do to gedder x. and ij.
The laghis [laws] *twin* sal thou finde squa [so].
Holy Rood (ed. Morris), p. 119.

2. Consisting of two separate, closely related, and equal members; twofold; double; specifically, consisting of or forming twins or a pair: as, *twin* children.

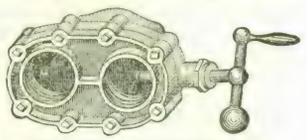
An apple cleft in two is not more *twin*
Than these two creatures. *Shak.*, T. N., v. 1. 302.

Parrots with *twin* cherries in their beak.
Cowper, Task, i. 38.

3. One, each, or either of two; one of a pair, specifically of two born at a birth: as, a *twin* brother or sister.

The water up-stod, thurgh godes migt,
On *twinne* half, also a wal up-rigt.
Genesis and Exodus (E. E. T. S.), l. 3248.

A Boat *twin*-sister of the crescent-moon!
Wordsworth, Peter Bell.



4. In *bot.*, growing in pairs; didymous.—5. Consisting of two chief parts alike, or nearly alike, and held firmly together: as, a *twin* bottle; a *twin* vase. The plural is used in the same sense: as, *twin* vases.—6. In *entom.*, geminate: applied to spots, punctures, spines, etc., which are close together in pairs, and distant from others.—**The Twin Brothers** or **Brethren, Castor and Pollux**; **the Twins.**

These be the Great *Twin Brethren*
To whom the Dorians pray.
Macaulay, Battle of Lake Regillus, st. 40.

Twin boat, a boat having two hulls, or a double hull. See *twin steamer.*—**Twin cones.** See *cone.*—**Twin crystal.** See II., 3.—**Twin engine.** See *engine.*—**Twin graptolites.** See *Graptolithidæ.*—**Twin ocelli**, two similar ocellated spots close together and inclosed in a common colored ring.—**Twin-screw**, a steam-vessel fitted with two propellers on separate shafts, one under each quarter. For convenience in working, symmetry, and facility in steering, they are usually made with right-handed and left-handed twists so that they turn in opposite directions when going ahead. Also used attributively: as, a *twin-screw* cruiser.

The Rodney, Admiral Fitzroy's flagship, . . . is also in the Admiralty list called a "*twin-screw* cruiser."
Fortnightly Rev., N. S., XLIII. 390.

Twin steam-engine, an adaptation of the steam-engine in which two complete engines are associated to perform the same work; a duplex engine.—**Twin steamer**, a form of steam-vessel occasionally employed in ferries, the deck, etc., being supported on two distinct hulls which are placed some distance asunder, with the paddle-wheels between them.—**Twin valve**, a form of valve with a double connection, used at the discharge-orifice of a pump, and serving the double purpose of supplying water to a steam-boiler and to a line of hose or pipe. *E. H. Knight.*

Twin Valve, or Double Gate-valve.

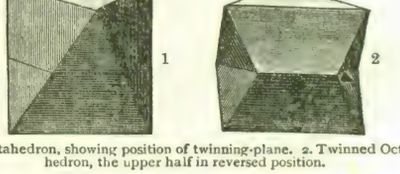
II. *n.* 1†. Two; twain; a pair; a couple.

The scharp of the schalk schyndered the bones,
& schrank thurg the schyire grece, & scade hit in *twynne.*
Sir Gawayne and the Green Knight (E. E. T. S.), l. 425.

Hit is brused, other broken, other byten in *twynne.*
Alliterative Poems (ed. Morris), ii. 1047.

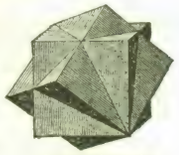
I saw the roote in great disdaine
A *twinne* of forked trees send forth againe.
Spenser, Visions of Bellay, l. 70.

2. One of two; one of a pair or couple linked together by a particular tie or relation; the mate, counterpart, or fellow of another; specifically, one of two creatures produced at a birth: said of the young both of human beings and of beasts.



He was most princely: ever witness for him
Those *twins* of learning that he raised in you,
Ipswich and Oxford. *Shak.*, Hen. VIII., iv. 2. 58.

Time and Place are *twinnes* and vnseparable companions. *Purchas*, Pilgrimage, p. 50.



Two were never found
Twins at all points. *Cowper*, Task, iv. 738.

They see no men,
Not ev'n her brother Arac, nor the *twins*
Her brethren. *Tennyson*, Princess, i.

3. A compound crystal one part of which is in a reversed position with reference to the other, as if it had been revolved through 180° about an axis (twinning-axis) perpendicular to a plane which is called the *twinning-plane*, and is usually a fundamental plane of the given crystal. Thus if (fig. 1) one half of the octahedron as indicated is revolved through 180° about a vertical axis,

1 2
1. Octahedron, showing position of twinning-plane. 2. Twinned Octahedron, the upper half in reversed position.

the twinned octahedron of fig. 2 results, the twinning-plane being here a face of the octahedron; such twins are common with spinel, and are hence called *spinel twins.* This is also called a *juxtaposition-* or *contact-twin*, in distinction from a *penetration-twin*, such as is represented in fig. 3, where each crystal is complete and interpenetrates the other. If the molecular reversal is often repeated in the growth of a crystal, a *polysynthetic twin* may result, consisting of successive thin layers or lamellæ of two sets, alternately in reversed position to each other. This is common among the plagioclase feldspars, and is the cause of the fine striation often observed on a cleavage-surface. (See *albite twin* and *pericline twin*, below.) When the angle between the axes of the two parts of the twin crystal is an aliquot part of 360°, repeated twinning may occur (thus, 3 × 120°, 4 × 90°, 5 × 72°, etc., complete the form); the resulting compound crystal may then imitate (mimetic form) a form of higher symmetry than belongs to the single crystal, and hence be a case of pseudosymmetry: for example, the twins of aragonite (which has a prismatic angle not far from 120°) have often the form of a pseudohexagonal crystal; the six-rayed stellate twins of cerusite give another common example of a repeated twin. In some cases the imitation is so perfect that the true nature of the form can be determined only by an investigation in polarized light.—**Albite twin**, a kind of twin common with albite and the other triclinic feldspars, where the twinning-plane is the brachydiagonal plane of the crystal, and the twinning gives a reëntrant angle on

3. Penetration-twin (Cubes).

the basal plane or surface of most perfect cleavage: such twins are usually polysynthetic, and give rise to a series of fine lines seen on the basal cleavage-face.—**Baveno twin**, a kind of twin crystal of orthoclase feldspar, first noted in crystals from Baveno in Italy. The twinning-plane is a clinodome inclined about 45° to the base, and the twin has nearly the form of a square prism.—**Carlsbad twin**, a name given to the common twin crystals of orthoclase feldspar often observed in granites, trachytes, and other crystalline rocks, as at Carlsbad in Bohemia. The twinning-axis is here the vertical crystallographic axis, and the twins are commonly of the penetration type.—**In twin†, a twin†**, in two; apart.

The kyng depertid his pupull, put hom *in twyn*,
In batels on his best wise for boldyng hym-seluyn.
Destruction of Troy (E. E. T. S.), l. 1181.

Paragenetic twin, an ordinary twin crystal in which the compound structure may be considered to belong to it from the beginning of its formation: sometimes used in distinction from *metagenetic twin*, where the molecular reversal seems to have begun after the crystal had reached a certain development; the latter kind is illustrated by the geniculated twins of rutile.—**Parasitic twin**, in *teratol.* See *autosite.*—**Pericline twin**, a twin common with the variety of albite called pericline, also with the other triclinic feldspars, where the twinning-axis is the macrodiagonal axis. Such twins are often polysynthetic, and then give a series of striations on the brachydiagonal plane or surface of second cleavage; the direction of these striations varies with the composition of the feldspar according to a definite law.—**Spinel twin.** See above, under def. 3.—**The Siamese twins.** See *Siamese.*—**The Twins**, a constellation and sign of the zodiac; Gemini.

When now no more *the* alternate *Twins* are fired
And Cancer reddens, with the solar blaze,
Short is the doubtful empire of the Night.
Thomson, Summer, l. 43.

★ **twin**[1] (twin), *v.*; pret. and pp. *twinned*, ppr. *twinning*. [< *twin*[1], *a.*] **I.** *trans.* **1.** To couple; pair; mate; join intimately or link together: said of two united or of one joined to another.

We were as *twinn'd* lambs that did frisk i' the sun.
Shak., W. T., i. 2. 67.

In Gemini that noble power is shown
That *twins* their hearts, and doth of two make one.
B. Jonson, Hue and Cry.

True liberty
Is lost, which always with right reason dwells
Twinn'd, and from her hath no dividual being.
Milton, P. L., xii. 85.

2. Specifically, in *mineral.*, to form or unite into a compound or twin crystal by a reversal of the molecular structure according to some definite law.

Occasionally a simple form is *twinned* with a more complex one, as in chabasite. *Encyc. Brit.*, XVI. 363.

II. *intrans.* **1.** To be coupled or paired; be mated, as one with another; specifically, to be twin-born.

He that is approved in this offence,
Though he had *twinn'd* with me, both at a birth,
Shall lose me. *Shak.*, Othello, ii. 3. 212.

Were it to plot against the fame, the life
Of one with whom I *twinned*.
B. Jonson, Sejanus, iii. 3.

2. To bring forth two at a birth.

Ewes yearly by *twinning* rich masters do make.
Tusser, January's Husbandry, st. 28.

twin[2]† (twin), *v.* [Also *twine*; < ME. *twinnen*, *twynnen*, lit. go in two (cf. *in twin*, above), < *twin*, two: see *twin*[1]. Cf. *twine*[2], *v.*] **I.** *intrans.* **1.** To be parted in twain; be divided or sundered; come apart.

Ther hit onez is tachched, *twynne* wil hit neuer.
Sir Gawayne and the Green Knight (E. E. T. S.), l. 2512.

My saule, ihesu, take I to thee
When my body and it sal *twynne*.
Political Poems (ed. Furnivall), p. 109.

Thy faith and troth thou sall na get,
And our true love shall never *twin*.
Clerk Saunders (Child's Ballads, II. 50).

2. To part; depart; go away.

Fortune wolde that he moste *twinne*
Out of that place which that I was inne.
Chaucer, Squire's Tale, l. 569.

Loke thou thin herte fro him not *twynne*.
Hymns to Virgin, etc. (E. E. T. S.), p. 23.

3. To be separated (from) or deprived (of): as, to *twin* with one's gear. *Jamieson.* [Scotch.]

II. *trans.* **1.** To part in twain; sever; sunder. *Halliwell.*

There were twenty and too, to *twyn* hom in sonder.
Destruction of Troy (E. E. T. S.), l. 2747.

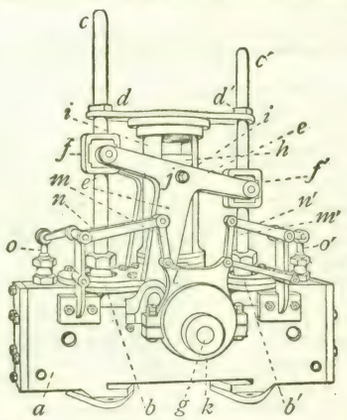
It seith, "Allas! whi *twynned* be we tweyne?"
Chaucer, Troilus, v. 679.

When two lovers love each other weel,
Great sin it were them to *twinn*.
Young Bearwell (Child's Ballads, IV. 302).

2. To part, as from another person or thing; separate; sunder; especially, to deprive.

From helle he wille them *twyn*.
Towneley Mysteries, p. 49.

She 's taen out her little penknife, . . .
And *twinn'd* the sweet babe o' its life.
Fine Flowers in the Valley (Child's Ballads, II. 265).



"Alas!" said I, "what ruefu' chance
Has *twin'd* ye o' your stately trees?"
Burns, Destruction of the Woods near Drumlanrig.

twin-born (twin'bôrn), *a.* Born at the same birth; born along with another.

O hard condition,
Twin-born with greatness, subject to the breath
Of every fool! *Shak.*, Hen. V., iv. 1. 251.

But such a connection between lordship and land was a slowly developed notion, not a notion *twin-born* with the notion of government. *W. Wilson*, State, § 15.

twin-cylinder (twin'sil″in-dėr), *a.* Having twin cylinders: as, a *twin-cylinder* engine.

Twin-cylinder Engine.

a, bed-plate; *b*, *b*′, twin cylinders; *c*, *c*′, piston-rods; *d*, *d*′, guides for piston-rods; *e*, *e*′, T-shaped working-beam connected to the piston-rods at *f*, *f*′ by slide-blocks pivoted to the ends of the beam and playing in rectangular slideways rigidly attached to the rods. The part *e*′ of the beam is connected directly with the wrist of a crank on the shaft. The cross-head *h* works between the slides *i*, *i*, and is pivoted at *f* to the beam *e*, *e*′; *k*, eccentric; *l*, eccentric-strap; *m*, *m*′, eccentric-rods; *n*, *n*′, rock-shafts which operate the valve-stems *o*, *o*′ and the valves.

twindle (twin'dl), *n.* [Var. of **twinnle*, dim. of *twin*[1].] A twin. [Prov. Eng.]

In the same book [F. Sparry's "Geomancie of Maister Christopher Cattan"] the word *twindle* (Fr. Gemeaux) occurs for the sign Gemini, two twins in one. Is it known elsewhere? *N. and Q.*, 7th ser., X. 486.

twindle-pippin†, *n.* A double pippin.

I dream'd my husband, when he came first a woing,
Came i' th' liknes of a Kentish *twindle-pippen*.
Sampson's Vow Breaker (1636). (*Nares.*)

★ **twine**[1] (twīn), *n.* and *a.* [Early mod. E. also *twyne*; < ME. *twine*, *twyne*, *twin*, double thread, < AS. *twīn* (= D. *twijn*; cf. Icel. *tvinni*), a double thread, < *twi-*, two: see *twi-*. Cf. *twin*[1].] **I.** *n.* **1.** A double thread; a thread made of two strands twisted; hence, any coarse strand or cord, or, by extension, a fabric woven of such threads; in modern use, a cord composed of several strands, especially when made of hemp or manila; also, a strong thread made of hemp or cotton, used in sewing sails.

Layamon (MS. Cott. Calig., A, ix.), l. 14220.

No shetes clene, to lye betwene,
Made of threde and *twyne*.
The Nut-Brown Maid (Percy's Reliques, II. i. 6).

2. The act of twining or twisting; spinning. [Rare.]

As she some web wrought, or her spindles *twine*
She cherish'd with her song.
Chapman, Odyssey, x. 306.

3. A curving, winding, or twisting movement or form; a convolution; a coil; a twist.

With an yvie *twyne* his waste is girt about.
Spenser, F. Q., I. vi. 14.

Dancing chearely in a siluer *twine*.
Tourneur, Trans. Metamorphosis, Epil.

Typhon huge ending in snaky *twine*.
Milton, Nativity, l. 226.

4. A clasping; an embrace.

Milke white leaves, and branches greene,
Folded in amorous *twines* together.
Heywood, Prologues and Epilogues (Works, ed. 1874, VI. [352]).

5. An intertwining or interlacing; a tangle; a snarl.

So multiplied were reasons pro and con,
Delicate, intertwisted, and obscure,
That law were shamed to lend a finger-tip
To unravel, readjust the hopeless *twine*.
Browning, Ring and Book.

6†. Duality. [Rare.]

Th' Vnitie dwels in God, ith' Fiend the *Twine*.
Sylvester, tr. of Du Bartas's Weeks, ii., The Magnificence.

Paper twine, wrapping-twine made of long, continuous strips of paper, stretched, twisted, and sometimes sized or varnished.

II. *a.* Consisting of double (usually coarse) thread; specifically, consisting or made of twine. See I., 1.

May live in peace, and rule the land with a *twine* thread.
Fletcher, Loyal Subject, ii. 1.

Twine cloth, a fine cotton cloth used as a substitute for linen. Compare *calico shirting*, under *shirting.*

twine[1] (twin), *v.*; pret. and pp. *twined*, ppr. *twining*. [< ME. *twinen*, *twynen* = D. *twijnen* (cf. Icel. *tvinna* = Sw. *tvinna* = Dan. *tvinde*), twine, twist, lit. 'double,' < AS. *twin*, a double thread: see *twine*[1], *n.*] **I.** *trans.* **1.** To make double, as thread, by twisting two strands together; hence, to twist; intertwine.

To a torche other to a taper the Trinite is likened,
As wexe and a weke were *twyned* to-gederes,
And fuyr flaumed forth of hem bothe.
Piers Plowman (C), xx. 169.

These Rufflers after a year or two at the farthest become Upright men, unless they be prevented by *twined* hemp. *Harman*, Caveat for Cursetors, p. 15.

2. To form of twisted threads or filaments; make by intertwining; in general, to weave.

Take aff, take aff his costly jupe
(Of gold well was it *twin'd*).
Hardyknute (Percy's Reliques, II. i. 17).

For the south side [of the tabernacle] southward there shall be hangings for the court of fine *twined* linen of an hundred cubits long for one side. Ex. xxvii. 9.

The Naïads, and the Nymphs, . . .
Upon this joyful day, some dainty chaplets *twine*.
Drayton, Polyolbion, xv. 139.

3. To wind or coil about something, as in clasping or embracing it; wreathe; coil.

She 's *twined* her arms about his waist,
And thrown him into the sea.
May Colvin (Child's Ballads, II. 274).

Fill the Bowl with rosie Wine,
Around our Temples Roses *twine*.
Cowley, Anacreontics, viii.

4. To encircle; entwine; curl around.

The plant [Amellus] in holy garlands often *twines*
The altars' posts, and beautifies the shrines.

3†. To warp.

Because it *twineth* and casteth not, it is passing good for hinges and hookes, for sawne bords, for ledges in dores and gates. *Holland*, tr. of Pliny, xvi. 40.

4. To make turns or flexures; wind; meander.

As rivers, though they bend and *twine*. *Swift.*

Nae gowden stream thro' myrtles *twines*.
Burns, On Pastoral Poetry.

twine[2] (twīn), *v.* [Var. of *twin*[2].] **I.** *trans.* **1†.** To separate; divide; part.

And sighing says this lady fair,
"They shou'd gar twa loves *twine*."
The Water o' Wearie's Well (Child's Ballads, I. 200).

2†. To turn.

She shrikes, and *twines* away her sdaignefull eyes
From his sweet face.
Fairfax, Godfrey of Boulogne, xx. 128.

II. *intrans.* **1†.** To fall.

Right on the front he gaue that ladie kinde
A blow so huge, so strong, so great, so sore,
That out of sense and feeling downe she *twinde*.
Fairfax, Godfrey of Boulogne, xx. 43.

2. To languish; pine away. Probably confused with *dwine*. *Halliwell.* [Prov. Eng.]

twine-cutter (twīn'kut″ėr), *n.* A knife or blade, of various form, fixed to a counter, table, stand, etc., to cut the twine used in tying up parcels.

twine-holder (twīn′hōl″dėr), *n.* A case, usually of metal or wire, for holding a ball of twine in a convenient position for unwinding.

twine-machine (twīn′ma-shēn″), *n.* A spinning-machine for making small cord or string. It is a form of the thread-machine. *E. H. Knight.*

twiner (twī′nėr), *n.* [< *twine*[1] + *-er*[1].] One who or that which twines. Specifically—(*a*) A machine for twining threads or fibers, as in cotton-spinning.

Mules and *Twiners* for Spinning Cotton, etc.
The Engineer, LXVI. 231.

(*b*) A plant which supports itself by twining.

Some plants twine with the sun and some twine against it; and most *twiners* have nearly allied species that do not climb at all. *Princeton Rev.*, March, 1878, p. 288.

twine-reeler (twīn′rē″lėr), *n.* A kind of mule or spinning-machine for making twine or twisting string; a mule-doubler.

twin-flower (twin′flou″ėr), *n.* In *bot.*, either of two slender creeping and trailing evergreens, *Linnæa borealis* and *L. Americana*, with

Flowering Plant of Twin-flower (*Linnæa Americana*).

rounded leaves and thread-like branches leafy below, forking near the summit, and bearing a pair of nodding fragrant flowers. The corolla is funnelform, purplish rose-colored or whitish, under half an inch long. *L. Americana* is found in cool woods and bogs northward in both hemispheres, in America extending south to the mountains of Maryland and of Colorado and to the Sierra Nevada, from these points reaching nearly to the arctic circle. These modest but extremely beautiful plants were favorites of Linnæus, who included the American species with the common European one, *L. borealis*, and to whom the genus was dedicated.

Beds of purple *twin-flower*. *S. Judd*, Margaret, i. 14.

twinge (twinj), *v.*; pret. and pp. *twinged*, ppr. *twinging*. Cf. *thong*, from the same ult. source.] **I.** *trans.* 1†. To press; constrain; oppress; afflict.

And wharfore murned in I go,
Whil that *twinges* me the fo?
Anglo-Saxon and Early Eng. Psalter (ed. Stevenson, 1843), [xli. 10.

2. To pull with a sharp, pinching jerk; tweak; twitch.

He *tuengde* & schok hire [the Devil] bi the nose that the fur [fire] out-blaste.
Rob. of Gloucester, St. Dunstan, l. 81. (*Morris and Skeat*, [II. 22.)

Twinge three or four buttons
From off my lady's gown. *B. Jonson*, New Inn, i. 1.

When a man is past his sense,
There's no way to reduce him thence
But *twinging* him by th' ears and nose,
Or laying on of heavy blows.
S. Butler, Hudibras, III. i. 1155.

3. To torment with sharp, darting pains; sting: said of physical or mental pain.

The gnat charged into the nostrils of the lion, and there *twinged* him till he made him tear himself, and so mastered him. *Sir R. L'Estrange.*

The poor wretch has a little shrivelled bit of conscience left. It *twinges* him sometimes, like a dying nerve in a rotten tooth. *T. Winthrop*, Cecil Dreeme, v.

II. *intrans.* To have a sharp, jerking pain, like a twitch; suffer a keen, shooting pain.

I've a *twinging* knee
Oft hinders dancing.
George Eliot, Spanish Gypsy, i.

twinge (twinj), *n.* [< *twinge*, *v.*] 1. A nipping or pinching; a twitch; a tweak.

How can you fawn upon a master that gives you so many blows and *twinges* by the ears? *Sir R. L'Estrange.*

2. A sharp, darting pain of momentary continuance; a pang, physical or mental.

The wickedness of this old villain startles me, and gives me a *twinge* for my own sin, tho' it come far short of his. *Dryden*, Spanish Friar, iv. 1.

"What is it, my dear child?" cries kind Mrs. Lambert, as he started. "Nothing, Madam; a *twinge* in my shoulder," said the lad. *Thackeray*, Virginians, xxii.

=Syn. 2. See *pain*[1] and *agony*.

twingle-twangle† (twing′gl-twang″gl), *n.* [A varied redupl. of *twangle*.] A twangling sound; a jangle.

With the rare discord of bells, pipes, and tabors,
Hotch-potch of Scotch and Irish *twingle-twangles*.
Ford, Perkin Warbeck, iii. 2.

twining (twī′ning), *p. a.* Twisting; winding; coiling; embracing. — **Twining stem**, in *bot.*, a stem which ascends spirally around another stem, a branch, or a prop, either to the right or to the left. See *right-handed*, 3.

Twining Stems.
1, Hedge-bindweed, *Convolvulus sepium*; 2, Hop, *Humulus Lupulus*.

twiningly (twī′ning-li), *adv.* In a twining manner; by twining. *Bailey*, 1731.

twink[1] (twingk), *v. i.* [< ME. *twinken*, *twynken*, < AS. **twincan* (= MHG. *zwinken*, *zwingen*), wink. Hence *twinkle*.] To wink. [Obsolete or prov. Eng.]

Lane, Tom Tel-Troths Message (1600). (*Nares.*)

twink[1] (twingk), *n.* [< *twink*[1], *v.*] A wink; a twinkling.

But in a *twinck* methought
'A chang'd at once his habit and his steed.
Peele, Honour of the Garter.

twink[2] (twingk), *v. t.* [Imitative; cf. *tink*[1] and *twank*.] To pour out in bird-notes; twitter; chirp.

As a swallow in the air doth sing
With no continued tune, but, pausing still,
Twinks out her scatter'd voice in accents shrill.
Chapman, Odyssey, xxi. 548.

twink[2] (twingk), *n.* [Cf. *twink*[2], *v.*, also *pink*, *spink*, *finch*, etc.] The chaffinch.

twinkle (twing′kl), *v.*; pret. and pp. *twinkled*, ppr. *twinkling*. [Early mod. E. *twynkle*, *twynkell*; < ME. *twinclen*, *twynclen*, < AS. *twinclian*, twinkle; freq. of **twincan*, wink: see *twink*[1].] **I.** *intrans.* 1. To shut an eye or the eyes with an involuntary twitch or with a quick voluntary and significant action; blink; wink.

She hath now *twyncled* fyrst upon the with wyckede eye.
Chaucer, Boëthius, ii. prose 3.

I *twynkell* with the eye. Je clignette. . . . You *twynkell* with your eye, do you? I truste you never the better.
Palsgrave, p. 764.

The owl fell a moping and *twinkling*.
Sir R. L'Estrange.

2. Of the eyelids, to open and shut with frequent involuntary twitches; hence, of anything that moves rapidly, to dart to and fro.

Myne eye *twynkleth* somtyme and I can nat cease it.
Palsgrave, p. 764.

No lips so sweet
That I may worship them? No eyelids meet
To *twinkle* on my bosom? *Keats*, Endymion, iv.

The feet of said partner never ceased to *twinkle* in and out from beneath her skirts.
New York Evening Post, April 25, 1891.

3. To pass in and out of sight rapidly, as a light; flash at almost insensible intervals; shine with quick, irregular gleams; scintillate; sparkle, as a star.

All the fixed Tapers
He made to *twinkle* with such trembling capers.
Sylvester, tr. of Du Bartas's Weeks, i. 4.

The chiefe Mountaines, them of Pennobscot, the *twinkling* Mountaine of Acocisco, the great Mountaine of Sassanow, and the high Mountaine of Massachuset.
Capt. John Smith, Works, II. 195.

I see his gray eyes *twinkle* yet
At his own jest.
Tennyson, Miller's Daughter.

II. *trans.* 1. To open and shut rapidly; wink; blink.

Phœbe took leave of the desolate couple, and passed through the shop, *twinkling* her eyelids to shake off a dew-drop. *Hawthorne*, Seven Gables, xiv.

The bats whirled . . . their wings and *twinkled* their small eyes. *Disraeli*, Alroy, x. 17.

2. To emit in quick gleams; flash out.

The sun and moon also Thou mad'st to give him light;
And each one of the wandring stars to *twinkle* sparkles bright. *Surrey*, Paraphrase of Ps. viii.

3. To influence or charm by sparkling.

That affectionate light, those diamond things,
Those eyes, those passions, those supreme pearl springs,
Shall be my grief, or *twinkle* me to pleasure.
Keats, Endymion, iv.

twinkle (twing′kl), *n.* [< *twinkle*, *v.*] 1. A twitching of the eyelid; a blinking; a wink.

Old David moved from place to place about his ordinary employments, scarce shewing, unless by . . . an occasional convulsive sigh, or *twinkle* of the eyelid, that he was labouring under the yoke of such bitter affliction.
Scott, Heart of Mid-Lothian, xiv.

2. A quick, tremulous light; a glimmer; a sparkle; a flash.

Glimmers and dies the fire-fly's spark —
Like starry *twinkles* that momently break
Through the rifts of the gathering tempest's rack.
J. R. Drake, Culprit Fay.

3. The time required for a wink; a twinkling.

twinkler (twing′klėr), *n.* [< ME. *twynclere* (= MHG. *zwinkeler*); < *twinkle* + *-er*[1].] One who or that which twinkles. Specifically—(*a*) A winker; a blinker; especially, the eye.

The *twynclere* with the eȝe forgeth wicke thingus.
Wyclif, Ecclus. xxvii. 25.

You'll just be pleased . . . not to be staring at me, following me up and down with those *twinklers* of yours.
Marryatt, Snarleyyow, I. vii.

(*b*) That which glimmers, sparkles, or flashes; a sparkler.

Aram. The stars have done this.
Clar. The pretty little *twinklers*.
Vanbrugh, Confederacy, iii. 2.

Such tiny *twinklers* as the planet-orbs
That there attendant on the solar power
With borrowed light pursued their narrower way.
Shelley, Queen Mab, ix.

twinkling (twing′kling), *n.* [< ME. *twinkling*, *twinkelinge*; verbal n. of *twinkle*, *v.*] 1. The act of one who or that which twinkles; especially, a quick twitching or fluttering movement of the eye; a wink.

Boys in their first bloom, skilled in the dance, . . . smote the good floor with their feet. And Odysseus gazed at the *twinklings* of the feet, and marvelled in spirit.
Butcher and Lang, tr. of Homer's Odyssey, viii. (ed. Macmillan, 1881, p. 123).

2. The phenomenon of scintillation of the fixed stars, consisting of fluctuations of light and of color at the rate of from five to a hundred per second. The fluctuations of light did not escape the notice of the ancients; those of color were noticed by Robert Hooke in 1665. The phenomenon was, without any reason at all, generally supposed to have its origin in the eye, until William Nicholson, the chemist, showed in 1813 that, if the image of a twinkling star was stretched out into a ribbon by an irregular movement of the telescope, the fluctuations would appear as variations of light and color along this ribbon. Charles Dufour, in 1856, published the following generalizations of his observations, now known as *Dufour's laws:* (1) the pale stars twinkle more than the chrome, and the chrome more than the ruddy ones; (2) at different altitudes the twinkling is proportional to the coefficient of astronomical refraction multiplied by the trajectory of the ray; and (3) the twinkling diminishes as the diameter of the star increases. Lorenzo Respighi, in 1868, examined the effect of twinkling upon the spectra of stars. He found that oblique bands of shade pass over the spectrum in different directions according as the star is east or west of the meridian. Finally, Charles Montigny, with a special instrument called a scintillometer, has made extensive observations concerning the differences of the rate of twinkling at different seasons, under different meteorological conditions, and for different stars. It is certain that twinkling is due to the slight inequalities of density and motions of the air through which the light passes, causing deviations and interferences of the rays. The "dancing" of stars is due to the same causes, exaggerated.

3. The time required for one twinkle or wink, as of the eye; a flash; hence, a very short time.

This world in an iges *twynkeling*
Thou maist distroie, noon may defende.
Political Poems, etc. (ed. Furnivall), p. 173.

We shall not all sleep, but we shall all be changed, in a moment, in the *twinkling* of an eye, at the last trump.
1 Cor. xv. 51, 52.

Ric. What you do, do in a *twinkling*, sir.
Val. As soon as may be.
Beau. and Fl., Coxcomb, iv. 2.

He vanish'd frae her sight,
Wi' the *twinkling* o' an eye.
Courteous Knight (Child's Ballads, VIII. 277).

8. Specifically, in firearms—(*a*) The spiral formed by a groove in a rifled piece; the inclination of the grooves of a rifled piece to the axis of the bore.

Some of the rifles and rifled ordnance in the service are made with grooves which have a very slight *twist* at the breech, but the *twist* is increased regularly until it reaches the muzzle; this is known as the increasing or gaining *twist*. *Farrow*, Mil. Encyc., I. 727.

If the angle of inclination be equal at all points, the *twist* is said to be uniform. . . . If the angle increases from the breech to the muzzle, the *twist* is called increasing; if the reverse, decreasing.
Tidball, Manual of Artillery, p. 38.

(*b*) Iron and steel twisted and welded together, used as a material for gun-barrels.—**9.** In *arch.*, the wind of the bed-joint of every course of voussoirs in a skew arch.—**10.** In rope, cordage, and the like, the way in which the spiral strands are laid, the number of strands, the degree of turn of the spiral, etc.: as, these two ropes differ in their *twist*.—**11.** A convolution; a curve; a flexure; a bend or turn.

Unkus, alias Okoco, the Monahegan sachem in the *twist* of Pequod River, came to Boston with thirty-seven men.
Winthrop, Hist. New England, I. 319.

Knowing every *twist* and turn of rock, our drivers brought us at the camping-time almost to the verge of the chaparral. *R. D. Blackmore*, Erema, lviii.

12. A turning about, as on a pivot or axis; a turn; a twirl.

A wink of his eye, and a *twist* of his head,
Soon gave me to know I had nothing to dread.
C. C. Moore, A Visit from St. Nicholas.

13. A wresting out of place; distortion; a wrench; a strain.

Which ligament keeps the two parts of the joint so firmly in their place that . . . none of the jerks and *twists* to which it [the limb] is ordinarily liable . . . can pull them asunder. *Paley*, Nat. Theol., viii.

Generally, it was after a number of twistings in both ways, from the initial position of no *twist*, that the transient current settled to its final value.
Philos. Mag., London, 5th ser., XXIX. 124.

14. Figuratively, a peculiar bent, turn, or cast; a variation or perversion from the usual or normal type.

Heads with some diverting *twist* in them—the oddities of authorship please me most. *Lamb*, Mackery End.

An exclusively scientific training will bring about a mental *twist* as surely as an exclusively literary training.

twychild†, *a.* An obsolete spelling of *twichild*.

twye†, *adv.* See *twie*.

twyer (twī′ėr), *n.* [Also *tuyere*, *tweer*, *tuyer*, ★and *twier*; accom. forms of F. *tuyère*, a nozle: see *tewel*, *tuel*.] A tube or pipe through which the blast of air enters a blast-furnace or a forge. In blast-furnaces working with cold air this passes direct from the blowing-engine into the "blast-main" or "horseshoe-main (a circular pipe nearly surrounding the hearth on the outside), and thence through the twyers into the furnace. When the hot blast is used precautions have to be taken to prevent the twyers from melting, and this is done by making them hollow truncated cones through which a supply of water is constantly circulating. In the so-called "Scotch twyer," which is also much used, instead of a truncated cone there is a spiral wrought-iron tube inclosed in a cast-iron casing, through which tube water is continually flowing. Copper and phosphor-bronze have also been used for twyers. Also called *tue-iron*. See cut under *smelting-furnace*. — **Twyer arch.** See *arch*[1].

twyfallow†, *v. t.* See *twifallow*.

twyfoil, *a.* See *twifoil*.

twyforked, *a.* See *twiforked*.

twyformed, *a.* See *twiformed*.

twynt, twynnet†, *v.* Variants of *twin*[2].

Twyne's case. See *case*[1].

tyt†, *v.* An old spelling of *tie*[1].

-ty[1]. [⟨ ME. *-ty*, *-ti*, ⟨ AS. *-tig*, etc., a suffix, in Goth. a separate noun, 'a ten' or 'decade,' = Goth. *tigus;* a form of *ten*, used in numerals: see *ten*, and the words *twenty*, etc., as cited.] A termination of numerals — namely, in *twenty*, *thirty*, *forty*, *fifty*, *sixty*, *seventy*, *eighty*, *ninety*, originally meaning 'ten' (*twenty*, 'twain tens,' *thirty*, 'three tens,' etc.).

-ty[2]. [⟨ ME. *-tie*, *-tye*, *-tee*, *-te*, ⟨ OF. *-te*, *-tee*, F. *-té* = Sp. *-dad* = Pg. *-dade* = It. *-tà*, *-tate*, *-tade*, ⟨ L. *-tas* (*-tāt-*), usually preceded by a stem-vowel *-i-* (*-itas*, > E. *-ity*), a suffix used to form abstract nouns from adjectives, as in *agilitas*, agility, ⟨ *agilis*, agile, *bonitas*, goodness, ⟨ *bonus*, good, *unitas*, oneness, ⟨ *unus*, one, etc.] A suffix appearing in many abstract nouns taken or formed from the Latin, as in *agility*, *anxiety*, *benignity*, *humanity*, *unity*, etc. It is commonly preceded, as in these cases, by a stem-vowel *-i-* (the termination *-ity* being so common as to be often used as an English formative); but in some words the original vowel has disappeared, as in *bounty*, *loyalty*, *royalty*, etc., or none existed in the Latin, as in *liberty*, *poverty*, etc. In some words the suffix is not recognized as such, as in *city*.

tyall†, *n.* [Perhaps irreg. ⟨ *tie*[1], formerly *tye*, + *-al* (?).] A bell-rope, or something tied to a bell for ringing it.

The great bell's clapper was fallen down, the *tyall* was broken, so that the bishop could not be rung into the town. *Latimer*, 6th Serm. bef. Edw. VI., 1549.

Tyburn ticket. A certificate formerly given to the prosecutor of a felon to conviction, the original proprietor or first assignee of it being exempted by a statute of William III. from all parish and ward offices within the parish or ward where the felony had been committed.

Tyburn tree. See *tree*.

Tyche (tī′kē), *n.* [< Gr. Τύχη, personification of *τύχη*, fortune.] In *Gr. myth.*, the goddess of fortune, a divinity whose protection was believed to assure prosperity, wealth, and good luck: often in the form *Agathe Tyche* (Good Fortune). Compare *agathodæmon*.

Tychonic (tī-kon′ik), *a.* [< *Tycho* (see def.) + *-n-ic.*] Pertaining to Tycho Brahe, a famous Danish astronomer (1546–1601), or to his system of astronomy.

The Copernican hypothesis is more probable than the *Tychonic*. *Sir W. Hamilton*, Metaph., x.

tycoon (tī-kön′), *n.* [Also *taikun*, *taicoon*; < Jap. *taikun*, 'great prince,' < Chinese *ta*, great, + *kiun*, prince: said to have been coined in 1854 by a preceptor of Iyesada, the shogun, as a fitting title for his master in the treaty which he was then concluding with Commodore Perry. The phrase, however, seems to have been used much earlier, having been applied to Iyemitsŭ (1623–49), the third of the Tokugawa shoguns, in a letter sent by his government to Corea, in order to impress the "barbarian" Coreans with his greatness.] The title by which the shoguns of Japan were known to foreigners from the signing of the treaty negotiated in 1854 by Commodore Matthew Perry, on behalf of the United States, and Iyesada, the shogun and supposed "temporal emperor" of Japan, to the end of the shogunate in 1868, but never recognized by the Japanese.

The style *Tai Kun*, Great Prince, was borrowed, in order to convey the idea of sovereignty to foreigners, at the time of the conclusion of the Treaties.
Mitford, Tales of Old Japan, p. 5.

tycoonate (tī-kö′nāt), *n.* [< *tycoon* + *-ate*³.] The shogunate.

tye² (tī), *n.* [Cf. *tye*², *v.*] In *mining*, a kind of narrow buddle used with a quick current of water for roughly washing tin or lead ore. [Eng.]

tye² (tī), *v. t.*; pret. and pp. *tyed*, ppr. *tying*. [Perhaps ult. < AS. *thweán*, wash: see *towel*¹.] To wash with the tye, as ore. Compare *tye*², *n.*

tye-block (tī-blok), *n.* In heavy ships, a block on the topsail-yard through which the tye is rove, the standing part being made fast to the masthead.

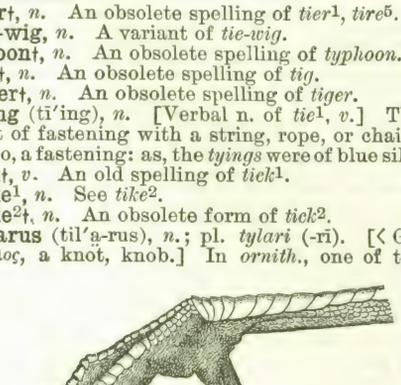
tyer†, *n.* An obsolete spelling of *tier*¹, *tire*⁵.

tye-wig, *n.* A variant of *tie-wig*.

tyfoon†, *n.* An obsolete spelling of *typhoon*.

tyg†, *n.* An obsolete spelling of *tig*.

tyger†, *n.* An obsolete spelling of *tiger*.



tying (tī′ing), *n.* [Verbal n. of *tie*¹, *v.*] The act of fastening with a string, rope, or chain; also, a fastening: as, the *tyings* were of blue silk.

tyk†, *v.* An old spelling of *tick*¹.

tyke¹, *n.* See *tike*².

tyke²†, *n.* An obsolete form of *tick*².

tylarus (til′a-rus), *n.*; pl. *tylari* (-rī). [< Gr. *τύλος*, a knot, knob.] In *ornith.*, one of the

Foot of a Hawk (*Accipiter cooperi*), four fifths natural size.
x, *x*, some of the tylari.

callous pads or cushions on the under side of the toes. Such balls of the toes are little apparent or non-existent in birds with soft skinny feet, but well marked in most perchers whose toes are horny, and especially prominent in birds of prey.

tylet. An old spelling of *tile*¹, *tile*².

tyleberry (tīl′ber″i), *n.* The coral-plant, *Jatropha multifida*. Its seeds have properties like those of the physic-nut (see *Jatropha*), and it is sometimes called *French physic-nut*.

Tylenchus (tī-leng′kus), *n.* [NL., also *Tylelenchus* (Bastian, 1865), < Gr. *τύλος*, a knot, knob, + *ἔγχος*, a spear.] A genus of minute parasitic nematoid worms, of the family *Anguillulidæ*. Some of them do much damage to crops, as the wheat-worm, *T. tritici*, which causes the disease called *ear-cockle* and *purples*, and *T. devastatrix*, the stem-eelworm of clover. Some of these worms were early known as *vibrios*, and they were formerly placed in the more comprehensive genus *Anguillula*.

tyler, *n.* An obsolete or archaic form of *tiler*.

Tylerism (tī′lėr-izm), *n.* [< *Tyler* (see defs.) + *-ism.*] **1.** A phase of New England Calvinism named from Dr. Bennet Tyler of Connecticut (1783–1858). It reaffirmed the positions of the older Calvinism concerning divine sovereignty, as against the positions of Taylorism. Out of Dr. Tyler's controversy with Dr. Taylor of New Haven grew the theological seminary now at Hartford, Connecticut.

2. In *U. S. politics*, the methods of President Tyler. See *Tylerize*.

Tylerize (tī′lėr-īz), *v. i.*; pret. and pp. *Tylerized*, ppr. *Tylerizing*. [< *Tyler* (see def.) + *-ize.*] In *U. S. politics*, to follow the example of President Tyler (1841–5), who turned against the Whig party, to which he owed his office; become a renegade to one's party while holding an office conferred by it.

The Democratic party evidently had two ways of returning, or trying to return, to office and power. They might either assail and unseat the Administration, or else persuade the Executive to *Tylerize*. *The Nation*, I. 227.

tyli, *n.* Plural of *tylus*.

tyll†, **tylle**†, *prep.* Obsolete forms of *till*².

tyllet†, *n.* See *tillet*².

Tylophora (tī-lof′ō-rä), *n.* [NL. (R. Brown, 1809), from the thick fleshy segments of the staminal corona; < Gr. *τύλος*, a knot, knob, + *-φορος*, < *φέρειν* = E. *bear*¹.] A genus of plants, of the family *Asclepiadaceæ*, type of the tribe *Tylophoreæ*. It is characterized by a somewhat wheel-shaped corolla with a corona of five fleshy scales laterally compressed and introrsely adnate to the stamen-tube, and by small globose or ovoid pollen-masses. There are about 40 species, natives of Africa, Asia, and Australasia. They are shrubby or herbaceous twiners, or rarely partially erect; they bear opposite leaves and small cymose flowers. *T. barbata* is sometimes cultivated; for *T. vomitoria*, see *Indian ipecac*, under *ipecac*.

tylopod (tī′lō-pod), *a.* and *n.* [< Gr. *τύλος*, a knot, knob, callus, + *πούς* (*ποδ-*) = E. *foot*.] **I.** *a.* Having padded instead of hoofed digits; having the ends of the digits like pads; of or pertaining to the *Tylopoda*; phalangigrade, as a camel.

II. *n.* A member of the *Tylopoda*, as a camel or llama.

Tylopoda (tī-lop′ō-dä), *n. pl.* [NL. (Illiger, 1811, as a family of his *Bisulca*): see *tylopod*.] The tylopod or phalangigrade artiodactyl ruminants, represented by one family, the *Camelidæ*. The feet are tylopod; the lower part of the thigh is exserted from the trunk of the body; the lower canines are specialized; the lateral upper incisors are persistent; the stomach is incompletely quadripartite; and the placenta is diffuse. More fully called *Pecora tylopoda*, and also *Phalangigrada*.

tylopodous (tī-lop′ō-dus), *a.* Same as *tylopod*.

tylosis (tī-lō′sis), *n.*; pl. *tyloses* (-sēz). [< Gr. *τύλος*, a knot, knob, callus, + *-osis.*] **1.** In *bot.*, a growth formed in the cavity of a duct by the intrusion of the wall of a contiguous cell through one or more of the perforations of the duct.—**2.** An affection of the eyelids characterized by an indurated thickening of their edges.—**3.** Same as *leucoplacia*.—**4.** Callosity.

tylostylar (tī-lō-stī′lär), *a.* [< *tylostyle* + *-ar*³.] Of or pertaining to a tylostyle; resembling a tylostyle; knobbed at one end and pointed at ★the other, like a dressing-pin.

tylostyle (tī′lō-stīl), *n.* [< Gr. *τύλος*, a knot, lump, knob, + *στῦλος*, a pillar: see *style*².] In sponges, a supporting spicule of cylindrical form, knobbed at one end and pointed at the other.

tylostylus (tī-lō-stī′lus), *n.*; pl. *tylostyli* (-lī). [NL.: see *tylostyle*.] A tylostyle.

Tylosurus (tī-lō-sū′rus), *n.* [NL. (Cocco), irreg. < Gr. *τύλος*, a knot, lump, + *οὐρά*, a tail.] A genus of garfishes, of the family *Belonidæ*, differing from *Belone* in the absence of gill-rakers and vomerine teeth. These gars are comparatively large (3 or 4 feet long) voracious fishes of most seas. The species are numerous, and some of them, as *T. marinus*, are known as *bill-fish* and *needle-fish*, from the long sharp jaws. See cut under *Belonidæ*.

tylotate (tī′lō-tāt), *a.* [< *tylote* + *-ate*¹.] Knobbed at both ends, as a sponge-spicule; having the character of a tylote. *Sollas*.

tylote (tī′lōt), *n.* [< Gr. *τυλωτός*, verb. adj. of *τυλοῦν*, make knotty, < *τύλος*, a knot, knob.] A tylotate sponge-spicule; a simple spicular ray of the monaxon biradiate type, or a rhabdus, knobbed at each end. A tylote knobbed at one end and pointed at the other becomes a tylotoxea or tylostyle. *Sollas*.

tyloti, *n.* Plural of *tylotus*.

tylotic (tī-lot′ik), *a.* [< *tylosis* (*-ot-*) + *-ic.*] Of or relating to tylosis.

tylotoxea (tī-lō-tok′sē-ä), *n.*; pl. *tylotoxeæ* (-ē). [< Gr. *τυλωτός*, knobbed, + *ὀξύς*, sharp, keen.] A tylote knobbed at one end and pointed at the other; a tylostyle. *Sollas*.

With gong and *tymbalon's* tremendous chime.
Moore, Lalla Rookh, Veiled Prophet.

tymp (timp), *n.* [Shortened from *tympan* or *tympanum*.] **1.** In the blast-furnace, the crown of the opening in front of the hearth, a little below and in front of which is the dam-stone. The tymp is sometimes a masonry arch (the tymp-arch), sometimes a block of refractory stone (the tymp-stone), and sometimes a hollow box or block of iron (the tymp-plate) through which water is kept constantly circulating, so as to protect it from the heat and the corrosive action of the slag.

2. In *coal-mining*, a cap or lid; a short piece of timber placed horizontally for supporting the roof. [Eng.]

tymp. An abbreviation of *tympano* or *tympani*.

tympan (tim′pan), *n.* [Formerly also *timpan*, ★*timpane*; < F. *tympan* = Sp. *timpano* = Pg. *timpano*, *tympano* = It. *timpano* = Ir. Gael. *tiompan* = W. *tympan*, a drum, timbrel, etc., < L. *tympanum*, < Gr. *τύμπανον*, poet. also *τύπανον*, a drum, roller, area of a pediment, panel of a door, etc., < *τύπτειν*, beat, strike: see *type*. From the same source are *tympanum*, *timber*³, *timbre*³, etc.] **1**†. A timbrel or drum. *Bailey*.—**2.** An ancient Irish musical instrument, the exact nature of which is disputed. Probably it had strings, and was played with a bow, thus resembling the crowd.

It should be remarked that the [Irish] *tympan* was not a drum, as was formerly supposed, but a stringed instrument, and by the researches of the antiquary O'Curry it is proved to have been played with a bow.
Sir R. P. Stewart, in Grove's Dict. Music, II. 20.

3. A stretched membrane, or a tense sheet of some thin material, as that of a drumhead.

This [carbon] lozenge is pressed gently by a *tympan*.
Greer, Dict. Electricity, p. 170.

4. In a printing-press having a platen, a framed appliance interposed between the platen and the sheet to be printed, for softening and equalizing the pressure, by means of blankets between its two parts, the *outer* and the *inner tympan*. The latter has a frame fitting snugly into that of the former, and both are tightly covered with parchment or strong linen cloth. In a hand-press the tympan is hinged to the outer end of the bed, has the frisket fixed by hinges to its top, receives the sheets to be printed, and completely covers the bed when folded down upon it, the platen, when lowered, fitting into the frame of the inner tympan. See cut under *printing-press*.

5. In *anat.*, a tympanum.—**6.** In *arch.*, a tympanum.—**Tympan of an arch**, a spandrel. [Rare.]

tympana, *n.* Latin plural of *tympanum*.

tympanal (tim′pa-nal), *a.* [< *tympan*(*um*) + *-al.*] Same as *tympanic*.

tympani, *n.* Plural of *tympano*.

tympanic (tim-pan′ik), *a.* and *n.* [< *tympan*(*um*) ★+ *-ic.*] **I.** *a.* **1.** Of, pertaining to, or resembling a tympan or tympanum; similar to or acting like a drumhead.—**2.** In *anat.*, of or pertaining to the tympanum: as, the *tympanic* cavity.

The "*tympanic* wing" of the exoccipital [cartilage in birds]. *Encyc. Brit.*, III. 702.

The *tympanic* sense . . . comes in to help here.
W. James, Prin. of Psychol., II. 204.

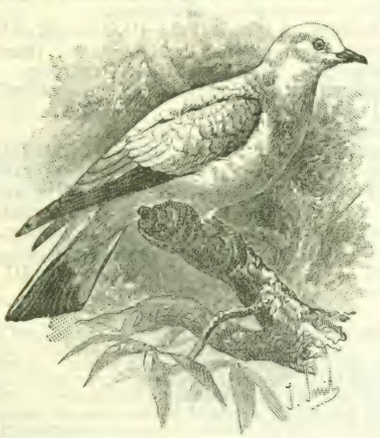
Tympanic artery, a small branch of the internal maxillary artery, which passes through the Glaserian fissure to be distributed to the structures within the tympanum and to the tympanic membrane.—**Tympanic bone.** See II. See also *temporal bone*, under *temporal*².—**Tympanic cartilage**, a gristly prolongation of the cartilage of the outer ear, attached to the circumference of the bony external auditory meatus.—**Tympanic cavity**, the drum of the ear. See *tympanum*, 2.—**Tympanic membrane**, the drum-membrane of the ear—a membrane stretched across the bottom of the external auditory meatus, separating the cavity of that meatus from that of

the tympanum, and connected with the malleus in a mammal or with the quadrate bone in a bird. It is very superficial in the human infant, where the tympanic bone is merely annular, and in those animals in which this bone is rudimentary or wanting; but it is generally situated at the bottom of a deep tube. See cuts under *tympanum* and *ear*[1].—**Tympanic nerve,** a branch of the glossopharyngeal, which enters the tympanum through a canal of the temporal bone to supply the mucous membrane of that cavity and of the Eustachian tube. Also called *Jacobson's* and *Andersch's nerve.*—**Tympanic notch.** See *notch.*—**Tympanic pedicle,** the suspensorium of the lower jaw in fishes. See *epitympanic.*—**Tympanic plate,** the lamina of bone which forms the anterior wall of the tympanum and external auditory meatus, and the posterior part of the glenoid fossa.—**Tympanic plexus.** See *plexus.*—**Tympanic resonance,** tympanitic resonance (which see, under *resonance*).—**Tympanic ring,** an annular tympanic bone or cartilage, to which the tympanic membrane is attached. This bone of the ear may be a permanent complete ring, or may form an incomplete circle. In either case, it may characterize only the embryo or the infant, and grow into a tubular form, or may be inflated as a tympanic bulla, sometimes of enormous dimensions. In man the ring is at first simply annular and incomplete, so that the ossicles of the tympanum are readily seen from the outside of the skull of the infant; it acquires with age a tubular form, and becomes ankylosed with other elements of the temporal bone.

II. *n.* **1.** A bone of the ear of man and mammals, supporting the tympanic membrane, generally annular or tubular, forming most of the meatus auditorius externus, or external auditory passage. Its outer extremity is known in human anatomy as the external auditory process; it is annular at birth, subsequently becoming elongated and cylindric. **2.** Below mammals, in animals in which the true tympanic is rudimentary or wanting, the quadrate or pedicellate bone, the representative of the malleus; the suspensorium of the lower jaw, or especially its uppermost piece, the hyomandibular or epitympanic: so called by some who suppose it to be the tympanic bone, from the fact that it in part supports the tympanic membrane. See *quadrate, n.*, 3 (*a*), *hyomandibular, epitympanic,* and other compounds of *tympanic* there cited.—**3.** In *ornith.*, sometimes, the tympano-occipital, considered as the true representative in birds of the tympanic of a mammal.

tympanichord (tim′pa-ni-kôrd), *n.* [< NL. *tympanum* + Gr. *χορδή*, a string.] That branch of the facial nerve which traverses the tympanum; the so-called chorda tympani. See *chorda.* *Coues,* 1887.

tympanichordal (tim″pa-ni-kôr′dal), *a.* [< *tympanichord* + *-al.*] Of or pertaining to the tympanichord. *Coues.*



tympaniform (tim′pa-ni-fôrm), *a.* [< NL. *tympanum* + L. *forma,* form.] Resembling or having the form of a tympanum; stretched like a drumhead: as, a *tympaniform* membrane. *Huxley,* Anat. Invert., p. 378.

tympanism (tim′pa-nizm), *n.* [< Gr. *τύμπανον,* a drum, + *-ism.*] In *pathol.*, distention by gas.

tympanist (tim′pa-nist), *n.* [< Gr. *τύμπανον,* a drum, + *-ist.*] One who plays a tympan or drum. [Rare.]

"Why is the Timpan called Timpan Naimh (or saint's Timpan), and yet no saint ever took a Timpan into his hands?" "I do not know," said the *timpanist.*
O'Curry, Anc. Irish, II. xxxi.

Tympanistria (tim-pa-nis′tri-ä), *n.* [NL. (Reichenbach, 1852), < Gr. *τυμπανίστρια,* fem. of *τυμπανίστης,* a drummer, < *τύμπανον,* a drum: see *tympanum.*] 1. In *ornith.*, a monotypic genus of South African doves. *T. bicolor,* the tambourine, is credited with a peculiar resonance of voice or sort of

Tambourine (*Tympanistria bicolor*).

ventriloquial effect (whence the name). It is extensively whitish, with black-tipped wings and tail, and inhabits woodland.

2. In *entom.*, a genus of hemipterous insects. Stål, 1861.

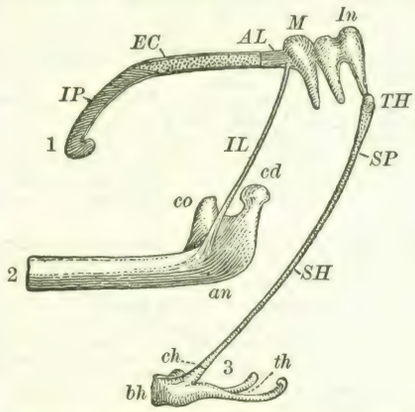
tympanites (tim-pa-nī′tēz), *n.* [NL., < L. *tympanites,* dropsy of the belly, < Gr. *τυμπανίτης,* of or pertaining to a drum, < *τύμπανον,* a drum: see *tympanum.*] Distention of the abdomen caused by the presence of air either in the intestine or in the cavity of the peritoneum; abdominal tympanism.—**Uterine tympanites,** tympanism of the womb; physometra.

tympanitic (tim-pa-nit′ik), *a.* [< L. *tympaniticus,* one who is afflicted with tympanites, < *tympanites,* tympanites: see *tympanites.*] Pertaining to or of the nature of tympanites.

Since then all he had eaten or drunk or done had flown to his stomach, producing a *tympanitic* action in that organ. *H. Kingsley,* Ravenshoe, xii.

Tympanitic dullness, the quality of a percussion-note in which the resonance is subnormal and in which the vesicular quality is absent.—**Tympanitic resonance.** See *resonance.*

tympanitis (tim-pa-nī′tis), *n.* [NL., < *tympan(um)* + *-itis.* Cf. *tympanites.*] **1.** Inflammation of the lining membrane of the tympanum, or middle ear.—**2.** Incorrectly, tympanites.



tympanize† (tim′pa-nīz), *v.* [< Gr. *τυμπανίζειν,* beat the drum, < *τύμπανον,* a drum: see *tympanum.*] **I.** *trans.* To make into a drum. *Oley,* Life of G. Herbert (1671), M. 2. b. (*Latham.*)

II. *intrans.* To act the part of a drummer. *Coles.*

tympano, *n.* See *timpano.*

tympano-Eustachian (tim″pa-nō-ū-stā′ki-an), *a.* Of or pertaining to the tympanum and the Eustachian tube.

tympanohyal (tim″pa-nō-hī′al), *n.* and *a.* [< *tympan(um)* + *hy(oid)* + *-al.*] **I.** *n.* In *zoöl.* and *anat.*, a small cartilage or bone of man and some other mammals, recognizably distinct at an early period, subsequently fused with its surroundings, constituting one of the elements of

Visceral Arches of Chondrocranium of Human Fetus at third month, somewhat diagrammatic, enlarged.

1, preoral (palatopterygoid) arch; 2, first postoral (mandibular) arch; 3, second postoral (hyoidean) arch: *IP*, internal pterygoid cartilage; *EC*, Eustachian cartilage; *AL*, anterior ligament of malleus; *M*, malleus; *In*, incus; *IL*, long internal lateral ligament of lower jaw, connecting the malleus with the mandible (of which latter *co* is the coronoid process, *cd* the condyle, and *an* the angle); *bh*, basihyal; *th*, thyrohyal; *ch*, ceratohyal; *SH*, stylohyoid ligament, suspending the hyoid to *SP*, stylohyal, or so-called styloid process of the temporal bone, at the root of which, in line with the incus, is *TH*, the tympanohyal. (From the Proceedings of the Zoölogical Society of London, 1884, p. 572.)

the compound temporal bone, and in man situated at the root of the styloid process, in the course of the hyoidean arch.

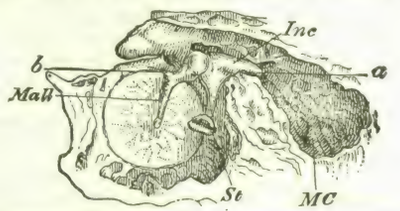
II. *a.* Specifying this cartilage or bone.

tympanomalleal (tim″pa-nō-mal′ē-al), *a.* Pertaining to the tympanic bone and the malleus: specifying a bone in the batrachian skull, later identified as the quadratojugal. See cuts under *Rana* and *temporomastoid.*

tympanomandibular (tim″pa-nō-man-dib′-ū-lär), *a.* Of or pertaining to the tympanum, or tympanic bone, and the mandible, or lower jaw-bone, of some animals, as fishes: specifying one of the visceral arches of the head. See *epitympanic, n.*, and *tympanic, n.*, 2.

tympano-occipital (tim″pa-nō-ok-sip′i-tal), *n.* In *ornith.*, a small bone, or slight ossification, in relation with the exoccipital bone and the outer ear of a bird, bounding the external orifice of the ear posteriorly, and considered to represent the true tympanic bone of a mammal.

tympanoperiotic (tim″pa-nō-per-i-ot′ik), *a.* and *n.* **I.** *a.* Including or consisting of a tympanic bone united with the periotic bone proper: used especially with reference to the ear-bone of cetaceans. *Huxley,* Anat. Vert., p. 345.

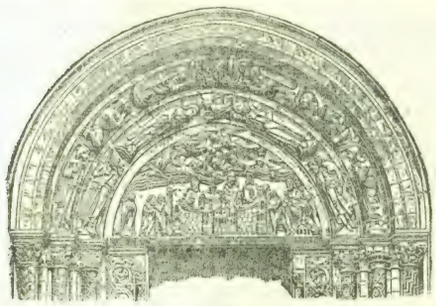


II. *n.* A part of the skull of cetaceans, the so-called ear-bone of those animals, which consists of the periotic bones united with one another and with the tympanic, forming a single specially hard and durable bone readily detached from the rest of the skull.

tympanosquamosal (tim″pa-nō-skwā-mō′sal), *a.* Common to the tympanic and the squamosal bone, as a suture or ankylosis: as, the Glaserian fissure of man is *tympanosquamosal.*

tympanous (tim′pa-nus), *a.* [Formerly also *timpanous;* < *tympan-y* + *-ous.*] Swelled or puffed out; inflated; distended; figuratively, pompous.

His proud *tympanous* master, swell'd with state-wind.
Middleton, Game at Chess, ii. 1.



tympanum (tim′pa-num), *n.*; pl. *tympana* (-nä), sometimes *tympanums* (-numz). [NL., < L. *tympanum,* < Gr. *τύμπανον,* a drum, roller, area of a pediment, panel of a door: see *timpan.*] **1.** An ancient tambourine or hand-drum, either with a single head like the modern tambourine, or with both front and back covered (the back sometimes swelled out as in a kettledrum), and beaten either with the hand or with a stick.—**2.** In *anat.* and *zoöl.*: (*a*) The ear-drum considered as to its walls, its cavity, and its contents. In man and other mammals the tympanum is the middle ear, a hollow or recess in the

Tympanum of Human Ear.—The tympanic cavity, enlarged, is here viewed from the inside: the circular object is the tympanic membrane, or membrane of the ear-drum, upon which rests *Mall*, the malleus; *Inc*, the incus; *St*, the stapes; *ab*, the horizontal axis about which the malleus and incus turn slightly; *MC*, cells in the mastoid part of the temporal.

temporal bone, among several of the bones of which the temporal is composed, shut off from the meatus auditorius externus by the tympanic membrane, communicating with the back of the mouth by the Eustachian tube, in relation with the labyrinth, or inner ear, its inner wall forming part of the wall of the latter, and containing the chain of little bones called ossicula auditus, and usually the chorda tympani nerve. It is a part of the passage-way which in the early embryo is uninterrupted between the pharynx and the exterior, and in the adult is occluded only by the membrane of the tympanum. In the dry state of the parts, the bony walls of the human tympanum present several openings: that leading outward through the external auditory meatus; the orifice of the Eustachian tube; the openings of mastoid cells; the fenestra ovalis and fenestra rotunda, respectively the terminations of the scala vestibuli and scala tympani, communicating with the vestibule and cochlea of the inner ear; the iter posterius, by which the chorda tympani nerve enters the tympanum from the aqueduct of Fallopius; the iter anterius, by which the same nerve leaves the tympanum by the canal of Huguier; the canal for the tensor tympani muscle; the Glaserian fissure, between the squamosal and the tympanic bones, for the laxator tympani muscle, tympanic artery, and slender process of the malleus, these last two openings being rifts between component bones of the parts communicating, like the Eustachian tube, with parts outside the temporal bone; and the minute orifice at the apex of the pyramid, for the passage of the stapedius muscle. In animals below mammals, as birds and reptiles, the tympanum contains the columella, when that bone exists, and is the cavity of the external ear when there is no external auditory meatus. Its membrane is often upon the surface of the head, and in some cases is a conspicuous structure of the exterior, as in a frog or toad. This is well shown in the cut under *parotoid,* where the circular formation just in front of the parotoid is the tympanum. See also cuts under *ear*[1] and *temporal.* (*b*) The tympanic membrane; the ear-drum, in the restricted sense of that term: so used in physiology and aural surgery, and in common speech: as, a rupture of the *tympanum.* See *tympanic membrane,* under *tympanic.* (*c*) In *ornith.*: (1) The labyrinth at the bottom of the windpipe of sundry birds, as the mergansers and various sea-ducks: a large irregular bony or gristly dilatation of the lower part of the trachea, often involving also more or less of the upper ends of the bronchi. It is chiefly found, or most developed, in the male sex. (2) The naked inflatable air-sac on each side of the neck of certain birds, as grouse, especially the sage-grouse and prairie-hen, in which the ordinary cervical air-cells of birds are inordinately developed and susceptible of great distention. See cut under *Cupidonia.* (*d*) In *entom.*, a tympanic membrane, stretched upon a chitinized ring, one surface being directed to the exterior, the other to the interior, in relation with a tracheal vesicle and with nervous ganglia and nervous end-organs in the form of

clavate rods, as in the *Orthoptera*, where such an arrangement constitutes an auditory organ. —3. In *arch.*: (*a*) The triangular space forming the field or back of a pediment, and included between the cornices of the inclined sides and

the horizontal cornice; also, any space similarly marked off or bounded, as above a window, or between the lintel of a door and an arch above it. The tympanum often constitutes a field for sculpture in relief or in the round. See also cuts under *pediment* and *pedimented*.

The triforium openings consist of a pointed arch in each bay, spanning a sub-order of two pointed arches. . . . The *tympanum* is pierced with a trefoil.
C. H. Moore, Gothic Architecture, p. 50.

(*b*) The die or drum of a pedestal. See cuts under *dado* and *pedestal*. (*c*) The panel of a door. —4. (*a*) In *hydraul. engin.*, a water-raising current-wheel, originally made in the form of a drum, whence the name. It is now a circular open-frame wheel, fitted with radial partitions so curved as to point upward on the rising side of the wheel and downward on the descending side. The wheel is suspended so

Perronet's Tympanum.

A, side elevation, showing form of curved radial partitions, or buckets; *B*, front elevation. *a*, annulus for discharge of water; *b*, floats by which the wheel is propelled in a running stream; *b'*, buckets; *c*, supports for journals of the wheel; *d*, spout or chute for conveying the water lifted.

that its lower edge is just submerged, and is turned by the current (or by other power), the partitions scooping up a quantity of water which, as the wheel revolves, runs back to the axis of the wheel, where it is discharged; or it may discharge at some point of the periphery. While one of the most ancient forms of water-lifting machines, it is still used in drainage-works, though for small lifts it is now superseded by the *scoop-wheel*. *E. H. Knight.* (*b*) A kind of hollow tread-wheel wherein two or more persons walk in order to turn it, and thus give motion to a machine.—5. In *bot.*, a membranous substance stretched across the theca of a moss.—**Laxator tympani.** See *laxator.* —**Membrana tympani,** the tympanic membrane, or drum of the ear. See cut in def. 2.—**Pyramid of the tympanum.** See *pyramid.*—**Tegmen tympani.** See *tegmen*, 4.—**Tensor tympani.** See *tensor*, and third cut under *temporal.*

tympany (tim'pa-ni), *n.*; pl. *tympanies* (-niz). [Formerly also *timpany*; < OF. *tympanie* = Sp. *timpano* = Pg. *tympano* = It. *timpano*, < Gr. *τυμπανιάς*, a kind of dropsy in which the belly is stretched like a drum, < *τύμπανον*, a drum: see *tympan*, and cf. *tympanites.*] 1. A swelling out or inflation; an inflated or puffed-up mass or condition; hence, turgidity; bombast; conceit. [Archaic.]

The idle *timpanies* of a windy brain.
Randolph, Muses' Looking-Glass, iv. 4.

2. In *pathol.*, an inflated or distended condition of the abdomen or peritoneum; tympanites.

She cured her of three *tympanies*, but the fourth carried her off. *Farquhar*, Beaux' Stratagem, i. 1.

tympany† (tim'pa-ni), *v. t.* [< *tympany*, *n.*] To swell or puff up; inflate; dilate; distend.

It likewise proves
More simple truth in their chaste loves
Than greater Ladies, *tympany de*
With much more honour, state, and pride.
Heywood, Pelopœa and Alope (Works, ed. 1874, VI. 297).

tymp-plate (timp'plāt), *n.* A cast-iron support for a tymp-stone, built into the masonry of a furnace. The dam-plate forms a similar facing and support for the dam-stone. Both tymp-plate (or tymp) and dam-plate are kept cool by the circulation of water in a hollow coil about them. See *tymp.*

tymp-stone (timp'stōn), *n.* A heavy block of stone which forms the upper part of the front side of the hearth or crucible of a furnace, the lower part being inclosed by the dam-stone. See *tymp.*

tyndt, *n.* A spelling of *tind*[2].

Tyndaridæ (tin-dar'i-dē), *n. pl.* [L., pl. of *Tyndarides*, < Gr. *Τυνδαρίδης*, a descendant of Tyndareus, < *Τυνδάρης*, *Τυνδάρεως*, a mythical king of Sparta, husband of Leda, and father of Castor and Pollux.] The male children of Tyndareus —Castor and Pollux: a name applied to the electric discharge commonly known as St. Elmo's fire. See *corposant.*

tyne. See *tine*[1], *tine*[2], etc.

Tynewald, Tinewald (tīn'wold), *n.* [Also *Tynwald;* a var. of the word which appears in a more original form in the Shetland *tingwall*, < Icel. *thing-völlr*, the place where a parliament sat, < *thing*, a parliament, assembly, + *völlr* (= AS. *weald*), a wood: see *thing*[2] and *wold*[1].] The parliament or legislature of the Isle of Man, consisting of the governor and council, constituting the upper house, and the House of Keys, or lower house. It is independent of the British Parliament, its acts requiring only the assent of the sovereign in council.

tynsen†, *n.* Same as *tinsel*[2].

typ. An abbreviation of *typographer* or *typography.*

typacanthid (tip-a-kan'thid), *a.* [< Gr. *τύπος*, type, + *ἀκανθα*, spine, + *-id*[1].] Having the usual or typical arrangement of the spines, as a starfish: opposed to *autacanthid.*

typal (tī'pal), *a.* [< *type* + *-al.*] In *biol.*, of or pertaining to a type; forming or serving as a type; typical. *R. Owen.*

type (tīp), *n.* [< F. *type* = Sp. *tipo* = Pg. *typo*, *tipo* = It. *tipo* = D. *type*, *typus* = G. *typus* = Sw. *typ* = Dan. *type*, < L. *typus*, a figure, image (on a wall), in med. the form, type, or character of a fever, ML. (also *tipus*) access of fever, fever, a figure, prototype, etc., < Gr. *τύπος*, a blow, an impress, a mark, also something wrought of metal or stone, a figure, general form or character, the original type or model of a thing, type or form of disease, MGr. a decree, etc.; < *τύπτειν*, *τυπεῖν* (√ *τυπ*), strike; cf. Gr. *στυφελίζειν*, strike, smite; L. *tundere* (√ *tud*, √ **stud*), strike, = G. *stossen*, strike: see *stot*[1]. From the same Gr. source are ult. E. *tympan*, *tympanum*, etc.] 1. A distinguishing mark or sign; a classifying stamp or emblem; a mark or an object serving for a symbol or an index, or anything that indicates office, occupation, or character. [Now chiefly technical.]

The faith they have in tennis, and tall stockings,
Short blister'd breeches, and those *types* of travel.
Shak., Hen. VIII., i. 3. 31.

On the obverse is the leading *type* of the city where the coin was issued, in relief.
B. V. Head, Historia Numorum, Int., p. lii.

2. Something that has a representative or symbolical significance; an emblem, or an emblematic instance.

Some of our readers may have seen in India a cloud of crows pecking a sick vulture to death — no bad *type* of what happens in that country as often as fortune deserts one who has been great and dreaded.
Macaulay, Warren Hastings.

3. Specifically, a prefigurement; a foreshadowing of, or that which foreshows, some reality to come, which is called the *antitype;* particularly, in *theol.*, a person, thing, or event in the Old Testament regarded as foreshowing or betokening a corresponding reality of the new dispensation; a prophetic similitude: as, the paschal lamb is the *type* of Christ (who is the *antitype*).

The nature of *types* is in shadow to describe by dark lines a future substance.
Jer. Taylor, Works (ed. 1835), I. 115.

As he sees his Day at a distance through *Types* and Shadows, he rejoices in it. *Addison*, Spectator, No. 369.

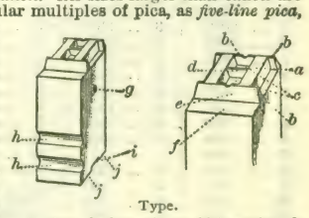
4. A characteristic embodiment; a definitive example or standard; an exemplar; a pattern; a model.

For loftie *type* of honour, through the glaunce
Of envies dart, is downe in dust prostrate.
Spenser, Virgil's Gnat, l. 557.

Tophet thence
And black Gehenna call'd, the *type* of hell.
Milton, P. L., i. 405.

Aristophanes is beyond question the highest *type* of pure comedy. *Lowell*, Study Windows, p. 218.

5. A representative style, mode, or structure; a characteristic assemblage of particulars or qualities.—6. In *biol.*, specifically, a main division of the animal or vegetable kingdom; a subkingdom, branch, phylum, or province. Thus, Leuckart divided animals into the six types *Cœlenterata*, *Echinodermata*, *Vermes*, *Arthropoda*, *Mollusca*, and *Vertebrata* (the protozoans not being treated). The vegetable kingdom is similarly divided into main groups called *types* of vegetation; and in general, in any department of biology, *type* is predicable of the structure or morphological character of a division or group of any grade in taxonomy, down to the species itself, as compared with another group of its own grade: as, a family *type;* a generic *type.* (See *type genus*, *type species*, *type specimen*, and *unity of type*, below.) The term has both a concrete or material sense, in its application to actually embodied form, and an ideal sense, as applied to form in the abstract. See *archetype*, *prototype*, *antetype.*



Natural Groups are best described, not by any definition which marks their boundaries, but by a *Type* which marks their centre. The *Type* of any natural group is an example which possesses in a marked degree all the leading characters of the class.
Whewell, Philos. of Inductive Sciences, I. p. xxxii.

The whole animal kingdom can be broken up into several large divisions, each of which differs from the rest by a number of special characteristics. The essential character may be recognized in all the subdivisions, and even under great individual variations. This has been called the *type.* *Gegenbaur*, Comp. Anat. (trans.), p. 64.

7. A model or style that serves as a guide; a general plan or standard for the doing of anything; especially, in the arts, the plan, idea, or conception upon which anything is modeled or according to which any work is executed.—8. A right-angled prism-shaped piece of metal or wood, having for its face a letter or character (usually in high relief), adapted for use in letter-press printing; collectively, the assemblage of the stamped characters used for printing; types in the aggregate. Types of wood are of large size, and are now used only for posting-bills. Types for books or newspapers are of founded metal. (See *type-metal*, *matrix*, and *mold*[4].) In Great Britain the standard height

of type is .9166 inch; in the United States it is variable, from .9166 to .9186 inch. French and German types are higher. The features of type are face, counter, stem (thick stroke, or body-mark), hair-line, serif, neck or beard, shoulder, body or shank, pin-mark, nick, feet, groove. (See cut below.) The names of printing-types, given in an increasing scale as to size, are *excelsior*, *brilliant*, *diamond*, *pearl*, *agate* or *ruby*, *nonpareil* (the type in which this is printed), *emerald* or *minionette*, *minion*, *brevier* (the larger size of type used throughout this dictionary), *bourgeois*, *long primer*, *small pica*, *pica*, *English*, *two-line brevier*, *great primer*, *paragon*, *double small pica*, *double pica*, *double English*, *double great primer*, *meridian* or *trafalgar*, and *canon*. All sizes larger than canon are named by the regular multiples of pica, as *five-line pica*, *six-line pica*. The smaller sizes are or should be graded so that each size will be doubled in its seventh progression. (See *point*[1], 14 (*b*).) The names here given define the dimensions of the bodies only. The faces or styles of types most used are roman and italic, which form the text of all books in English. Antique, gothic, clarendon, and black-letter are approved styles for display. The type for headings of entries in this dictionary and for phrase-headings is antique condensed. Ornamental types are too irregular for classification. Of each style many varieties are made, which are usually labeled with a special name. Roman types are broadly divided into two classes, *modern* and *old-style.* The leading forms of modern roman are broad-face, Scotch-face, French-face, thin-face, bold-face. Old-style types are reproductions of the styles of early printers: the Caslon and the Baskerville (English styles), of the eighteenth century; the French and the Elzevir, of the seventeenth century; and the Basle, or early Italian, of the sixteenth

century. The shapes of types as to width are defined by the following names: *up to standard* is a type of which the lower-case alphabet measures 12 ems or squares of its own body from bourgeois to pica, or more than 12 ems for the smaller sizes (on newspapers the standards for widths of types range from 14 to 17 ems for the alphabet); *lean* or *lean-faced type* is a name applied to types slightly below the standard; *condensed type* is seriously below the standard (see *condensed*); *extra-condensed* and *elongated* are of unusual thinness; *fat letter* or *fat-faced* is slightly wider than the standard; *expanded* is still wider; *extended* is of unusual breadth. The Roman types for book- and newspaper-work are in three series: capitals or upper-case, A, B, C, D; small capitals, A, B, C, D; lower-case, a, b, c, d, sometimes called small letters, or minuscules. A *two-line type* is a capital of the face height of two lines of its accompanying text. A *double type* is the height of two

bodies of the size specified by its name. *Copper-faced type* is type covered on its face only with a thin coat of copper by an electrotyper's battery. *White-faced type* or *barefaced type* is type uncoppered: so called to distinguish it from the coppered, or to specify type that is new and that has never been covered with ink. *Nickeled type* is type plated on its face with nickel. *Bastard type* is a type with a face too large or too small for its body. *Type-high* is of the standard height of type. *Type high to paper* is above the standard of height. *High-bodied type* is a type with too high shoulders. American type-founders apportion the characters of a font, or complete collection of characters, by weight. In a font of 1,000 pounds there are of roman lower-case 514 pounds; capitals, 86; small capitals, 20; figures, 40; points, 28; spaces, 85; quadrats, 122; fractions, 5; italic lower-case, 73; italic capitals, 23; sundries, 4 — total, 1,000 pounds. Italic for 800 pounds of roman weighs 80 pounds.

9. In *numis.*, the principal device or subject on the obverse and reverse of a coin or medal. For example, on sovereigns of Queen Victoria the head of the queen is the obverse type and the group of St. George and the Dragon the reverse type.

10. In *chem.*, a fundamental chemical compound which represents the structure of a large number of other and more complex compounds. Hydrochloric acid (HCl), water (H_2O), ammonia (NH_3), and marsh-gas (CH_4) are the four types, or typical compounds, which have been most employed.

11. [*cap.*] In *church hist.*, an edict of the emperor Constans II., issued in 648. The Type (superseding the Ecthesis) forbade all discussion of the question whether there are in Christ two wills and two operations or energies, or only one will and one operation.

12. In *math.*, a succession of symbols susceptible of + and — signs. — **Checker-type.** See *checker*[1]. — **Chess-type.** See *chess*[1]. — **Chromatic, compressed, elastic type.** See the adjectives. — **Elizabethan type.** Same as *church text* (which see, under *church*). — **Grade of a type,** in *alg.* See *grade*[1]. — **Monadelphic type.** See *monadelphic*. — **Rubber type.** See *rubber*. — **Test types.** See *test*[1]. — **Type genus,** in *biol.*, a generic type; that genus which is typical of the family or other higher group to which it belongs, or which is formally so taken and held to be. It may be the only representative of such more comprehensive group, or one of several generic components of the higher group. In the actual technic of classification and nomenclature the name-giving genus of a family or subfamily is regularly assumed to be the type, though it may not be in fact the truest or best representative of the group thus indicated. — **Type of a reciprocant.** See *reciprocant*. — **Type of a stress or strain,** the character of the stress or strain as defined by the stress-ellipsoid or strain-ellipsoid. — **Type of a wave,** the relation between the extent of disturbance at a given instant of a set of particles and their respective undisturbed positions. — **Type of Desor,** a nemertean worm which does not pass through a pilidium stage, or the type of structure characterizing such a nemertean. — **Type species,** in *biol.*, a specific type; that species of a genus which is regarded as the best example of the generic characters, and especially that species upon which a genus has been nominally or ostensibly based; the type of a genus. The determination of the type species is always a matter of much practical concern in the nomenclature of zoölogy and botany, since upon it turns the assignation of generic names, and consequently the major term in the binomial designation of every species. It is often difficult and sometimes impossible to make this determination, so intricate has become the synonymy of many species, and so far from being actually typical of a genus is the species assumed to be its type in many cases. (See *synonymy.*) It is now the rule (neglect of which is a decided breach of nomenclatural propriety) for the author who names a new genus to declare his type species; and such declaration of the basis of his genus is conclusive of his intent, however well or ill he may proceed to characterize his genus. But no such custom prevailed with the earlier naturalists, whose genera we have consequently to take either (*a*) upon the face of the generic diagnosis originally made, or (*b*) upon the specific contents — that is, upon the species actually grouped under the generic name. Nearly all the older genera were made more comprehensive than modern genera are allowed to be, and have been restricted by reference of nearly all (often of all but one) of their usually numerous species to other genera; yet a generic name once established upon any species must always rest upon some (one or more) species; hence the occasion and the necessity for the determination of the type species in every such case. This has been done mainly in three ways. (1) The first species given by an author in the list of the species of his genus is arbitrarily assumed to be his type species. But this is a mere convention, which often becomes an absurdity. (2) The species which agrees best with the author's diagnosis of his genus is selected as the type species. This is reasonable, but it is at best a matter of opinion, and opinions differ enough to unsettle the whole system of nomenclature if each is to be allowed its own full weight. (3) The most feasible and only safe procedure is to consider that species to be the type species which has as a matter of fact been left in the original genus from which the other species have been successively detached to form new genera; or, if there be more than one left, to choose the best-known, that being almost always the one which has oftenest borne the original generic name, and hence is most closely identified with it. For example: Let there be a Linnean genus *Aba*, with 3 species, *A. aca*, *A. ada*, and *A. aga;* let *A. ada* and *A. aga* have been detached as types respectively of two new genera; then *A. aca* remains as the type species of the original genus *Aba*, in its now restricted sense. This rule is applicable with force and precision to thousands of questionable cases; and its observance, together with insistence upon the fundamental law of priority, tends to the utmost attainable fixity of zoölogical and botanical nomenclature. — **Type specimen,** in *biol.*, an individual animal or plant, or any part of one, prepared and preserved as a specimen of natural history, from which the description of a species has been prepared and upon which a specific name has been based; the actual object which serves as the type of a species in zoölogy or botany. In theoretic strictness every type specimen is unique; practically, a species may be based upon several or many specimens which answer exactly to the diagnosis made, or typify different phases of the species, as male and female specimens of the same animal, flowering and fruiting specimens of the same plant, and so on. Type specimens have a particular part and high value in descriptive zoölogy and botany, comparable to that of the actual object which is taken as the authoritative standard in any system of weights, measures, or coinage. When available for examination, they take precedence over any published description or figure, and are conclusive evidence in cases of doubtful or disputed specific identity. — **Unity of type,** in *biol.*, that fundamental agreement in structure which we see in organic beings of the same class, order, etc., and which is independent of their habits of life, and consequently unaffected by adaptive modifications.

> On my theory, *unity of type* is explained by unity of descent. *Darwin*, Origin of Species, vi.

Woodbury type. See *Woodburytype.* = **Syn.** 3. Image, shadow, adumbration, prophecy. — 2 and 3. *Symbol*, etc. ★See *emblem.* — **4-6.** Prototype, archetype, standard form.

type (tīp), *v. t.*; pret. and pp. *typed*, ppr. *typing*. [< *type*, *n.*] **1.** To exhibit or constitute a type of; typify.

> But let us *type* them now
> In our own lives. *Tennyson*, Princess, vii.

2. To reproduce in type, or by impression from types, as with a type-writer.

> MSS. carefully *typed* by experienced copyists. *N. and Q.*, July 17, 1886, adv't.

type-bar (tīp'bär), *n.* **1.** A line of types in the form of one solid bar, cast during the process of composition in some type-setting machines. — **2.** In some type-writers, a short bar of iron having at its extremity one of the steel types which serve to make the impressions.

type-block (tīp'blok), *n.* A body of metal or wood on which a character used as a type is cut or cast.

type-case (tīp'kās), *n.* See *case*[2], 6.

type-casting (tīp'kas″ting), *n.* The act or process of founding type in molds. It was formerly done by hand, now chiefly by machinery. — **Type-casting and -setting machine,** a machine which collects over a mold the matrices that are needed by the operator, and fills this mold with melted metal, either in the form of a single type or of a full line of types. — **Type-casting machine,** a mechanism which casts or founds type, but does not rub or dress them. A *complete type-casting machine* is a mechanism which founds, rubs, dresses, and sets up in lines perfect types.

type-chart (tīp'chärt), *n.* In *biol.*, a chart exhibiting the details of a typical form or structure; a chart of a type. [Rare.]

> There are *type-charts* of each organ, . . . so that there is not the least difficulty in tracing the homologies of structure throughout the whole vertebrated kingdom. *Nineteenth Century*, XXI. 386.

type-cutter (tīp'kut″ėr), *n.* A punch-cutter; one who engraves dies for printing-types; a die-sinker employed in a type-foundry.

> He was a die-sinker and *type-cutter* with a nebulous and questionable record. *Athenæum*, No. 3253, p. 281.

type-cutting (tīp'kut″ing), *n.* The engraving of a type or a type-die: usually called *punch-cutting*. See *punch*[1], 6.

type-cylinder (tīp'sil″in-dėr), *n.* The cylinder of a rotary printing-machine on which types or plates are fastened for printing. See cut under *printing-machine*.

type-dressing (tīp'dres″ing), *n.* The process of cutting off with suitable knives or planes the superfluous metal on newly cast types. — **Type-dressing machine,** a mechanism which removes the burs or feather-edges from the angles of recently made types, and cuts off all superfluous metal.

type-founder (tīp'foun″dėr), *n.* A manufacturer of type by founding or molding. Also called *letter-founder*.

type-founding (tīp'foun″ding), *n.* The art or process of manufacturing movable metallic types used by printers. It includes punch-cutting, mold-making, and type-casting, by hand or by machine. Also called *letter-founding*.

type-foundry (tīp'foun″dri), *n.* A place where printing-types are manufactured. Also called *letter-foundry*.

type-gage (tīp'gāj), *n.* A mechanism used by type-founders to test the accuracy of type. It consists of an exact right-angled flat bar of steel, against which can be moved another flat bar slightly out of parallelism with its mate. The sides of the bars are graduated in standard lines. A type too thin or too thick when put between these bars shows its deviation from the standard.

type-high (tīp'hī), *a.* Of the height of type: noting a woodcut or blocked electrotype plate. — **Type-high clump,** a square block of type-metal made of various sizes to uphold to a proper height stereotype plates in the process of printing. [Eng.]

type-holder (tīp'hōl″dėr), *n.* A pallet or receptacle for holding type, used by bookbinders and for hand-stamping.

type-matrix (tīp'mā″triks), *n.* See *matrix*, 2 (*d*).

typembryo (tī-pem'bri-ō), *n.* [NL., < Gr. τύπος, type, + ἔμβρυον, embryo.] That stage or period in the development of an embryo when the characteristics of the main type to which it belongs are first discoverable; an embryo advanced to the stage when it shows the type of structure of the phylum or subkingdom to which it belongs. The term was lately introduced by A. Hyatt, with special reference to the embryology of mollusks. Hyatt considered the typembryo of a mollusk to be the veliger stage, when the embryo is far enough advanced to be recognized as molluscan; he also applied the term to the completed embryonic shell, or protoconch (which see). Later (July, 1890) R. T. Jackson used *typembryo* in a more restricted and precise sense, as the fifth of the following six recognizable embryonic stages of mollusks: (1) *protembryo*, prior to blastulation; (2) *mesembryo*, the blastula; (3) *metembryo*, the gastrula; (4) *neoembryo*, the trochosphere (which see); (5) *typembryo*, the period when that essential molluscan feature, the shell-gland, and plate-like beginnings of the shell are discoverable, yet in which the embryo is not far enough advanced to show to what class it belongs; (6) the *phylembryo*, or that early veliger stage (see *veliger*, with cut) in which the structure of the shell and other characters render the embryo referable to the class of mollusks to which it belongs.

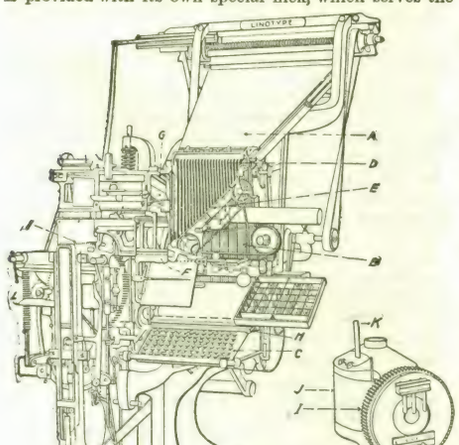
type-measure (tīp′mezh″ūr), *n.* Same as *type-scale.*

type-measurer (tīp′mezh″ūr-ėr), *n.* In *printing*, a graduated rod on the sides or edges of which the body of each different size of type is marked. In use it is laid alongside a column of matter or proof, to ascertain the number of lines and the number of ems.

type-metal (tīp′met″al), *n.* An alloy of lead with antimony, or with tin and antimony, used to make types for printing. The value of the alloy is considerably increased by the addition of a small amount of tin (from 6 to 8 per cent.). Copper and iron have also been used in small quantity to give greater resistance to the alloy. The proportions of the metals used vary considerably with the quality desired, and in different type-foundries. The metal used in some foundries for small types, from brilliant to brevier, consists of 100 pounds of lead, 40 pounds of antimony, and 20 pounds of tin; while larger types, from bourgeois to pica, are cast from 100 pounds of lead, 30 pounds of antimony, and 15 pounds of tin. Extra hard or copper-alloy metal contains 100 pounds of lead, 44 pounds of antimony, 24 pounds of tin, and 6 per cent. of copper. Electrotype-metal contains 100 pounds of lead, 4 pounds of antimony, and 5 pounds of tin. Stereotype-metal contains 100 pounds of lead, 20 pounds of antimony, and 10 pounds of tin. Soft metal, such as is used for leads and quadrats, contains a very large proportion of lead, and but little tin and antimony.

type-mold (tīp′mōld), *n.* See *mold*[4], 3.

type-punch (tīp′punch), *n.* See *punch*[1], 6.



type-scale (tīp′skāl), *n.* A measuring-rod of stout paper, ivory, or thin brass, which shows the dimensions of the most-used bodies of type. It is used to measure composed types.

type-setter (tīp′set″ėr), *n.* **1.** A composer of types; a compositor.

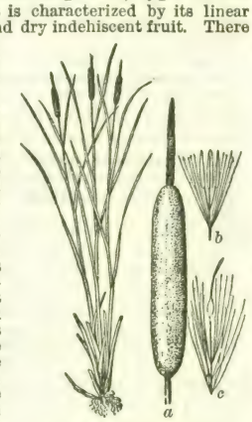
> The composition of ordinary books is always a work of special contract. When the master printer agrees in turn with his compositors at a fixed rate per page, it is supposed that the copy furnished will be easily readable, and that the daily performance of every *type-setter* will be about five duodecimo pages of ten-point type or its equivalent.
> *De Vinne*, Correct Composition, p. 336.

2. A type-setting machine. See *type-setting.*

type-setting (tīp′set″ing), *n.* The act or process of setting or combining types in proper order for printing. It is usually done by picking up each type from an exposed case, and arranging the types so collected in a composing-stick in lines of even length.—**Type-setting machine**, a mechanism intended to quicken the operation of type-setting. In the simpler forms of mechanical type-setters, the types, separately arranged in inclined tubes or channels, are successively dislodged by the pressure of appropriate levers moved by the fingers of the operator on a keyboard. As the types fall, they are collected in a long line, and afterward subdivided in lines of proper length. The Kastenbein and McMillan machines are of this construction. Distribution of types is usually done by a separate machine, of which there are many varieties. In all, each distinct letter or character is provided with its own special nick, which serves the same purpose as the nicks or channels in a key for the wards of its lock. When the types are successively presented before outlets with wards, the proper nick finds its proper ward, and is discharged in its proper channel. Some machines combine the two operations of setting and distribution, as the Thorne and Paige machines. The Paige machine adds the operation of automatic justifying, or making its lines of even length. A more complex form of machine dispenses with types and distribution, and makes the types as they are needed. The operator at the keyboard moves levers that assemble the matrices in proper order over a mold, and justifies the words of each line, in a line evenly spaced and of uniform length. The mold is then instantly filled with melted type-metal, which casts all the words in one piece. The Mergenthaler, or linotype, and the Rogers are of this form. The Lanston casts single types by the pressure of the finger on a keyboard, and arranges the cast types in lines for printing. The first type-setting and type-making machine was planned at London by Dr. Church in 1824. More than fifty varieties of machine type-setters have been invented, but few are in use.

Mergenthaler Linotype Machine.

A, matrix magazine; *B*, rods from finger-keys to matrix-releasing device; *C*, keyboard; *D*, matrix channels; *E*, traveling-belt to convey matrices to *F*; *F*, assembling-stick for matrices; *G*, rack containing spaces; *H*, space-releasing bar; *I*, mold-wheel (shown also in machine at *J*); *J*, melting-pot; *K*, pump-plunger for forcing metal into mold; *L*, receiving-galley for finished linotypes.



type-wheel (tīp′hwēl), *n.* A disk or revolving sector bearing letters in relief on its periphery: used in some adaptations of the telegraph and in some type-writers.

type-write (tīp′rīt), *v. t.* and *i.* To print or reproduce by means of a type-writer; practise type-writing. [Recent.]

type-writer (tīp′rī″tėr), *n.* **1.** A machine for mechanical writing, operated by hand, and printing one letter, or combination of letters, at a time, by the impress of type adapted to the purpose. There are now several distinct types of these machines.—**2.** An operator on a type-writing machine; one who prints characters on paper by means of a type-writer.—**Automatic type-writer telegraph.** See *telegraph.*

type-writing (tīp′rī″ting), *n.* The process of printing letter by letter by the use of a type-writer; also, work done by this process.

Typha (tī′fą), *n.* [NL. (Tournefort, 1700; earlier by Lobel, 1576), < Gr. *τίφη*, cattail.] A genus of monocotyledonous plants, type of the family *Typhaceæ*. It is characterized by its linear anthers, stalked ovary, and dry indehiscent fruit. There are about 10 species, natives of fresh-water swamps in both tropical and temperate regions. They are smooth herbs with strong creeping rootstocks from which grow erect unbranched and often tall and robust stems with a submerged base. The leaves are chiefly radical, long and linear, spongy, and at first somewhat fleshy and watery. The monœcious flowers form a cylindrical terminal spadix, the upper part of which is staminate and deciduous; both parts are partly covered in the bud by very perishable thin spathaceous bracts. The long-stalked minute fruit is produced in great abundance, over 60,000 to the average spike in the common species; each fruit contains a single seed, and is surrounded near the base by twenty to forty long slender white hairs which expand at maturity, aiding in dispersion by the wind. The plant usually reaches from 5 to 9 feet high; in California *T. Domingensis* sometimes reaches 18 feet, including an inflorescence of 3 feet; in the common *T. latifolia* the handsome dark rusty-brown fertile part of the spike is usually from 5 to 8 inches long, sometimes 14, and is much used for rustic decoration. The abundant mealy pollen is made into bread in India and New Zealand; it is inflammable, and has been used as a substitute for tinder and for matches. The powdered flowers have been used for poultices, and the farinaceous rootstocks are considered astringent and diuretic in eastern Asia. The long leaves are much used in central New York to make chair-bottoms, and are elsewhere woven into mats and baskets. Three species occur in the United States, of which *T. latifolia*, with four-grained pollen, and *T. angustifolia*, with single-grained pollen, are widely distributed throughout the northern parts of both hemispheres; the latter is in the United States more local and largely maritime, and often shows a distinct interval between the male and female divisions of the spike. The other and larger species, *T. Domingensis*, occurs in the West Indies, Mexico, Texas, California, and the Argentine Republic. For *T. elephantina*, see *elephant-grass;* for the others, *cattail, reed-mace*, and *reree;* and compare *marsh-beetle* and *dunche-down*. They are also commonly known as *flag* and as *bulrush*.

Cattail (*Typha latifolia*).

a, the spadix, with male flowers above and female ones below; *b*, a male flower; *c*, a female flower.

Typhaceæ (tī-fā′sē-ē), *n. pl.* [NL. (Saint-Hilaire, 1805), < *Typha* + *-aceæ*.] A family of monocotyledonous plants, belonging to the order *Pandanales*. It is characterized by usually monœcious flowers with a perianth of irregular membranous scales or of very slender elongated hairs. It includes about 10 species, belonging to a single genus, *Typha*, which see. They are marsh-plants of wide distribution, with unjointed watery stems and long entire alternate leaves which project stiffly out of the water or in a few cases float on its surface. The small crowded flowers contain six or more stamens with elongated flaccid filaments, and a single superior ovary usually with a single cell and a single ovule.

typh-fever (tīf′fē″vėr), *n.* [< *typh*(*us*), *typh*(*oid*), + *fever*[1].] A term proposed to include both typhus and typhoid fevers.

typhinia (tī-fin′i-ą), *n.* [NL., < Gr. *τῦφος*, smoke, mist: see *typhus*.] In *pathol.*, relapsing fever. [Rare.]

typhlitic (tif-lit′ik), *a.* [< *typhlitis* + *-ic*.] Pertaining to or of the nature of typhlitis; affected with typhlitis.

typhlitis (tif-lī′tis), *n.* [NL., < Gr. *τυφλός*, blind (with ref. to the cæcum), + *-itis*.] Inflammation of the cæcum and vermiform appendix.

typhloënteritis (tif-lō-en-tę-rī′tis), *n.* [NL., < Gr. *τυφλός*, blind, + *ἔντερον*, intestine, + *-itis*.] Same as *typhlitis*.

typhloid (tif′loid), *a.* [< Gr. *τυφλός*, blind, + *εἶδος*, form.] Having defective vision, as a blindworm.

typhlology (tif-lol′ǫ-ji), *n.* [< Gr. *τυφλός*, blind, + *-λογία*, < *λέγειν*, speak: see *-ology*.] The sum of scientific knowledge concerning blindness.

typhlope (tif′lōp), *n.* [< NL. *Typhlops*.] A small snake of the family *Typhlopidæ;* a worm-snake or blindworm.

Typhlophthalmi (tif-lof-thal′mī), *n. pl.* [NL., < Gr. *τυφλός*, blind, + *ὀφθαλμός*, eye.] In Cope's classification, a superfamily of pleurodont lizards, represented by the *Anelytropidæ*, *Acontidæ*, and *Aniellidæ*.

typhlophthalmic (tif-lof-thal′mik), *a.* [< *Typhlophthalmi* + *-ic*.] Of or pertaining to the *Typhlophthalmi*.

Typhlopidæ (tif-lop′i-dē), *n. pl.* [NL., < *Typhlops* + *-idæ*.] A family of angiostomatous scolecophidian serpents, typified by the genus *Typhlops;* the worm-snakes or blindworms. It formerly included all the small serpents with the mouth not distensible and teeth only in one jaw, upper or lower, being the same as *Typhlopoidea*. By the division of these into two families, *Catodonta* and *Epanodonta*, with lower and with upper teeth only, respectively, the *Typhlopidæ* are restricted to the latter, and contrasted with *Stenostomidæ*.

Typhlopoidea (tif-lō-poi′dē-ą), *n. pl.* [NL., < Gr. *τυφλός*, blind, + *ὤψ*, eye, + *εἶδος*, form.] A suborder of *Ophidia*, containing the small scolecophidian or angiostomatous snakes of the families *Typhlopidæ* and *Stenostomatidæ*, and thus equivalent to *Typhlopidæ* in a broad sense. They differ from all other ophidians in having no transverse bone of the skull, the pterygoid disconnected from the quadrate, the palatines with their long axes transverse and bounding the nasal choanæ behind, and the ethmoturbinal forming part of the roof of the mouth.

Typhlops (tif′lops), *n.* [NL. (Schneider), < Gr. *τυφλώψ*, blind, < *τυφλός*, blind, + *ὤψ*, eye.] The typical genus of *Typhlopidæ*, having the muzzle covered above with rostral and internasal scutes, and one ocular, one preocular, and one nasal plate.

typhlosis (tif-lō′sis), *n.* [NL., < Gr. *τύφλωσις*, a making blind, blindness, < *τυφλοῦν*, make blind, < *τυφλός*, blind.] Blindness.

typhlosolar (tif-lǫ-sō′lăr), *a.* [< *typhlosole* + *-ar*[3].] Of the character of or pertaining to a typhlosole. *Micros. Sci.*, N. S., XXVII. 565.

typhlosole (tif′lǫ-sōl), *n.* [< Gr. *τυφλός*, blind, + *σωλήν*, tube, pipe: see *solen*.] A thick folding of the intestine of certain annelids, mollusks, etc., formed by the involution of the wall of the intestine along the dorsomedian line, and projecting into the intestinal cavity. *Huxley*, Anat. Invert., p. 196.

Typhoëan (tī-fō′ę-ąn), *a.* [Also, erroneously, *Typhœan, Typhean;* < L. *Typhōeus*, < Gr. Τυφωεύς, contr. Τυφώς, Typhoëus (see def.); cf. *Typhon*[2].] Of, pertaining to, or resembling Typhoëus (or Typhos), a monster of Greek mythology, who tried to conquer the gods, but was overcome by Zeus and buried under Mount Etna. Typhoëus is described as vomiting flame from a hundred mouths, and thus typifies a volcano.

typhoid (tī′foid), *a.* and *n.* [= F. *typhoïde*, < Gr. **τυφοειδής*, contr. *τυφώδης*, delirious, of persons suffering from fever, also of the fever itself, < *τῦφος*, smoke, also stupor arising from fever: see *typhus*.] **I.** *a.* Resembling typhus: noting a specific continued fever.—**Bilious typhoid fever.** See *fever*[1].—**Typhoid bacillus,** or **Eberth's bacillus,** a micro-organism found in the intestinal ulcers, and elsewhere in the bodies of those dying from typhoid fever, and during life in the blood of sufferers from this disease.—**Typhoid condition** or **state,** a condition occurring sometimes in the course of acute diseases of a depressing type, in which there is marked lowering of all the vital forces, shown by prostration, muttering delirium, carphologia, muscular twitchings, unconscious discharges from the bladder and bowels, a dry, cracked, often blackish tongue, etc.—**Typhoid fever.** See *fever*[1].—**Typhoid pneumonia.** See *pneumonia*.

II. *n.* Typhoid fever. See *fever*[1].

typhoidal (tī′foi-dąl), *a.* [< *typhoid* + *-al*.] Of, pertaining to, or characteristic of typhoid fever: as, *typhoidal* symptoms.

typhomalarial (tī″fō-mą-lā′ri-ąl), *a.* [< *typho*(*id*) + *malarial*.] Involving both typhoid and malarial characters: applied to a disease believed to be caused by the combined influence of the typhoid bacillus and the malarial plasmodium, or a typhoid fever in which the symptoms are modified by malaria. Whether either of these conditions exists has been a subject of dispute among medical writers.

typhomania (tī-fǫ-mā′ni-ą), *n.* [< Gr. *τῦφος*, stupor (see *typhus, typhoid*), + *μανία*, madness.]

A low, muttering delirium with stupor, but without sleep, as seen in severe cases of typhus fever. Also *typhonia*.

typhon[1]† (tī'fon), *n.* [< NL. *typhon* (Bacon), < Gr. *τυφῶν*, also *τυφώς*, a furious whirlwind; cf. *Τυφών*, Typhon, one of the giants, son of Typhoëus, and *Τυφώς, Τυφωείς*, father of Typhon, and a god of the winds; cf. *τῦφος*, cloud, smoke, mist, < *τύφειν*, smoke; cf. Skt. *dhūpa*, smoke. Cf. *typhus*. The word has been merged in *typhoon*, q. v.] A whirlwind.

Typhon[2] (tī'fon), *n.* [< L. *Typhon*, < Gr. *Τυφῶν*, one of the giants: see def. and *typhon*[1].] 1. In *Gr. myth.*, a son of Typhoëus, and the father of the winds: later confused with *Typhos* or *Typhoëus*.—2. typhonic (tī-fon'ik), *a.* [< *typhon*[1] + *-ic*.] Of or pertaining to a typhon or typhoon; having the force or character of a typhoon.

typhoon (tī-fön'), *n.* [Formerly also *tyfoon;* altered, in simulation of *typhon*[1], from the earlier *tuffoon* (1680), *tuffon* (1610), *touffon* (1567), < Pg. *tufão*, < Ar. Pers. Hind. *tūfān* (whence in recent Anglo-Ind. *tufan*, *toofan*, *toofaun*, *touffan*), a sudden and violent storm, a tempest, hurricane. The Ar. Pers. Hind. *tūfān* does not appear to be original in any of those languages, and may have been derived from the Gr. *τυφῶν*, whence also E. *typhon:* see *typhon*[1]. Cf. Chinese *t'ai fŭng*, 'a great wind' (of any kind): *ta*, *t'ai*, great; *fŭng* (also given as *fäng*, *fêng*), in Canton *fong*, wind. The term *tai fŭng*, a cyclone, a local name in Formosa, may be from the Chinese *t'ai fŭng* in its general sense. The Chinese names for *typhoon* are *pao fŭng*, lit. 'fierce wind,' *kiu fŭng*, lit. 'cyclone wind' (*kiu*, a furious cyclone, whirlwind, a wind which comes from four sides at once). The Chinese terms have prob. no connection with the Ar. Pers. Hind. word.] A violent hurricane occurring in the China seas and their environs, principally during the months of July, August, September, and October. Typhoons are prolonged cyclonic storms of great intensity, and correspond in every respect to the West Indian hurricanes which occur in the same latitudes in the western hemisphere.

I went aboord of the shippe of Bengala, at which time it was the yeere of *Touffon:* concerning which *Touffon* ye are to vnderstand, that in the East Indies often times there are not stormes as in other countreys; but euery 10. or 12. yeeres there are such tempests and stormes that it is a thing incredible, . . . neither do they know certainly what yeere they wil come. *Hakluyt's Voyages*, II. 370.

Tuffoon are a particular kind of violent Storm blowing on the Coast of Tonquin. . . . It comes on fierce and blows very violent, at N. E. twelve hours more or less. . . . When the Wind begins to abate, it dies away suddenly, and falling flat calm it continues so an Hour, more or less; then the Wind comes about to the S. W., and it blows and rains as fierce from thence as it did before at N. E., and as long. *Dampier*, Voyages, II. i. 2.9.

typhotoxin (tī-fō-tok'sin), *n.* [< Gr. *τῦφος*, stupor (see *typhus*), + *τοξ(ικόν)*, poison, + *-in*[2].] A ptomaine ($C_7H_{17}NO_2$) obtained from cultures of the bacillus of typhoid fever.

typhous (tī'fus), *a.* [< *typh(us)* + *-ous*.] Of or relating to typhus.

typh-poison (tīf'poi″zn), *n.* [< *typh(us)*, *typh(oid)*, + *poison*.] Poison or virus which when admitted into the system produces typh-fever, ★or continued low fevers, as typhus or typhoid.

typhus (tī'fus), *n.* [= F. *typhus* = Sp. *tifo* = Pg. *typho* = It. *tifo* = D. G. *typhus* = Sw. Dan. *tyfus*, < NL. *typhus*, typhus (cf. L. *typhus*, pride, vanity), < Gr. *τῦφος*, smoke, vapor, mist (hence, vanity, conceit), also stupor, esp. stupor arising from fever, < *τύφειν*, smoke: see *typhon*[1].] A fever accompanied by great prostration, usually delirium, and an eruption of small reddish-purple spots; ship-fever; jail-fever. Tyrannidæ (tī-ran′i-dē), *n. pl.* [NL., < *Tyrannus* + *-idæ*.] A family of passerine birds, named from the genus *Tyrannus*; the tyrant-birds or tyrant-flycatchers. There are many genera, and upward of 400 species, confined to America, and chiefly represented in the Neotropical region. They are readily distinguished by the non-oscine (clamatorial or mesomyodian) character of the syrinx, the scutelliplantar tarsi of the exaspidean type, ten primaries of which the first is not spurious, twelve rectrices, and the bill almost invariably hooked at the end by an overhanging point of the upper mandible. The rictus as a rule is strongly bristled; the hind toe is eleutherodactylous, or freely movable apart from the others (as in oscine *Passeres*), and the outer and middle toes are united only at their bases. It is one of the most extensive and characteristic groups of its grade in the New World, only the *Tanagridæ* and *Trochilidæ* approaching it in these respects. Its relationships are with the other non-oscine *Passeres* highly developed in and peculiar to the Neotropical region, namely the *Pipridæ* and *Cotingidæ*; but not with the true flycatchers, or *Muscicapidæ*, to which many of the long-known species used to be referred. Only 8 or 9 genera extend into the United States, and of these only 5 (*Tyrannus*, *Myiarchus*, *Sayornis*, *Contopus*, and *Empidonax*) have any extensive distribution in that country. The genus *Oxyrhynchus*, without any hook of the beak, is often now separated as the type of another family; aside from this the *Tyrannidæ* are by Sclater divided into 4 subfamilies — *Tæniopterinæ*, *Platyrhynchinæ*, *Elæninæ*, and *Tyranninæ*. See cuts under *Contopus*, *Empidonax*, *Fluvicola*, *king-bird*, *Megarhynchus*, *Milvulus*, *pewit*, *Platyrhynchus*, *Pyrocephalus*, *Sayornis*, *scissortail*, *Tæniopteræ*, *Todirostrum*, and *Tyrannulus*.

Tyranninæ (tir-a-nī′nē), *n. pl.* [NL., < *Tyrannus* + *-inæ*.] A subfamily of *Tyrannidæ*, containing the true tyrant-flycatchers, of arboreal habits, and usually more or less extensively olivaceous coloration, sometimes gray, varied chiefly with white or yellow, and often with a bright-colored spot on the crown. Birds of this group abound throughout the woodlands of America, from the limit of trees both north and south, and play an important part in the economy of nature, comparable to that of the true flycatchers (*Muscicapidæ*) of the Old World. In the United States the scissortail (*Milvulus forficatus*), the common kingbird or bee-martin (*Tyrannus carolinensis*), the great crested flycatcher (*Myiarchus crinitus*), the pewit or water-pewee (*Sayornis* (or *Empidias*) *fuscus*), the wood-pewee or phœbe-bird (*Contopus virens*), and several smaller flycatchers of the genus *Empidonax* furnish characteristic examples of the *Tyranninæ*. There are in all about 20 genera.

tyrannine (tir′a-nin), *a.* [< *Tyrannus* + *-ine*[1].] Of or pertaining to the *Tyranninæ*; relating to or resembling the genus *Tyrannus*: in a narrow sense applied to the larger tyrant-flycatchers, in distinction from the smaller tyrannuline forms.

Tyranniscus (tir-a-nis′kus), *n.* [NL. (Cabanis and Heine, 1859), dim. of *Tyrannus*, q. v.] A genus of small tyrant-flycatchers, of the subfamily *Elæninæ*, containing about 11 species, ranging from Guatemala to southern Brazil, as *T. nigricapillus* and *T. cinereiceps*.

tyrannise, *v.* See *tyrannize*.

tyrannish† (tī′ra-nish), *a.* [< ME. *tyrannish*, *tirannish*; < *tyran* + *-ish*[1].] Like a tyrant; characteristic of a tyrant; tyrannical.

> The proude *tirannish* Romain
> Tarquinius, which was than king.
> *Gower*, Conf. Amant., vii.

tyrannize (tir′a-nīz), *v.*; pret. and pp. *tyrannized*, ppr. *tyrannizing*. [< F. *tyranniser* = Sp. *tiranizar* = Pg. *tyrannizar* = It. *tirannizzare*, < Gr. *τυραννίζειν*, take the part of a tyrant, < *τύραννος*, tyrant: see *tyrant*.] **I.** *intrans.* 1. To act as a tyrant; exercise tyrannical power; rule despotically or cruelly: used of persons, with *over* before an object.

> I made thee miserable,
> What time I threw the people's suffrages
> On him that thus doth *tyrannize o'er* me.
> *Shak.*, Tit. And., iv. 3. 20.

Hence — 2. To have a tyrannical influence; exercise oppressive restraint; maintain arbitrary control: used of things, commonly with *over*.

> Nor, while we trust in the mercy of God through Christ Jesus, [shall] fear be able to *tyrannize over* us.
> *Hooker*, Eccles. Polity, v. 47.

> The first and last lesson of the useful arts is that Nature *tyrannizes over* our works. *Emerson*, Art.

II. *trans.* 1. To rule, treat, or affect tyrannically; act the tyrant to or over.

> This is he that shal *tyrannize* the citie of Rome, and be the ruine of my house.
> *Guevara*, Letters (tr. by Hellowes, 1577), p. 164.

> They would enjoyne a slavish obedience without law, which is the known definition of a tyrant and a *tyranniz'd* people. *Milton*, Apology for Smectymnuus.

2†. To make tyrannically oppressive; convert into an instrument of tyranny.

> Boisterous edicts *tyrannizing* the blessed ordinance of marriage into the quality of a most unnatural and unchristianly yoke. *Milton*, Divorce, ii. 20.

Also spelled *tyrannise*.

tyrannoid (tir′a-noid), *a.* [< *Tyrannus* + *-oid*.] Resembling or related to a tyrant-bird; belonging to the *Tyrannoideæ*.

Tyrannoideæ (tir-a-noi′dē-ē), *n. pl.* [NL., < *Tyrannus* + *-oideæ*.] A superfamily of passerine birds, containing those families of *Passeres* which have a mesomyodian tracheobronchial syrinx and an independently movable hallux, divided into *Heteromeri* and *Homœomeri*, according to the situation of the main artery of the thigh, and consisting of the families *Xenicidæ* (New Zealand), *Philepittidæ* (Madagascar), *Pittidæ* (Ethiopian, Oriental, and Australian), and the American *Tyrannidæ*, *Pipridæ*, *Cotingidæ*, and *Phytotomidæ*. Nine tenths of the species are American, and most of these Neotropical.

tyrannous (tir′a-nus), *a.* [< *tyran* + *-ous*.] Of tyrannical character or quality; given to or marked by tyranny; harshly despotic.

> And, like the *tyrannous* breathing of the north,
> Shakes all our buds from growing.
> *Shak.*, Cymbeline, i. 3. 36.

> And now the storm-blast came, and he
> Was *tyrannous* and strong.
> *Coleridge*, Ancient Mariner, i.

tyrannously (tir′a-nus-li), *adv.* In a tyrannous manner; with tyrannical force or intent; despotically; cruelly.

> There, being both together in the floud,
> They each at other *tyrannously* flew.
> *Spenser*, F. Q., V. ii. 13.

> Julius before his Death *tyrannously* had made himself Emperor of the Roman Commonwealth
> *Milton*, Hist. Eng., ii.

Tyrannula (tī-ran′ū-lä), *n.* [NL. (Swainson, 1827), dim. of *Tyrannus*, q. v.] 1. A genus of tyrannuline flycatchers, the type of which is *T. barbata*. It has been loosely used for many small olivaceous species now distributed in different genera. Owing to its similarity to the name *Tyrannulus* of prior date, it is now disused, the species properly belonging to *Tyrannula* being called *Myiobius*.

2. [*l. c.*] A small tyrant-flycatcher of the above or some related genus; a tyrannuline.

tyrannuline (tī-ran′ū-lin), *a.* and *n.* [< *Tyrannula* + *-ine*[1].] **I.** *a.* Pertaining or related to the tyrannulas, or small tyrant-flycatchers, as distinguished from the larger or tyrannine forms.

II. *n.* A little olivaceous flycatcher; a member of the genus *Tyrannula*, or some similar bird. They are such as those figured under *Contopus*, *Empidonax*, and *pewit*.

Tyrannulus (tī-ran′ū-lus), *n.* [NL. (Vieillot, 1816), dim. of *Tyrannus*, q. v.] A genus of very small tyrant-flycatchers of tropical America, of the subfamily *Elæninæ*. The type is *T. elatus*, the so-called gold-naped wren of early writers, about

Tyrannulus elatus.

2¾ inches long, with yellow crest, white throat, and short bill, tail, and wings, inhabiting the valley of the Amazon, and found northward to Panama.

Tyrannus (tī-ran′us), *n.* [NL. (Cuvier, 1800), < L. *tyrannus*, tyrant: see *tyrant*.] The name-giving genus of *Tyrannidæ*, formerly loosely extended to embrace most of the larger species then known (so named from their irritable or irascible disposition and their tendency to tyrannize over other birds), now restricted to a few large stout flycatchers like the common king-bird or bee-martin of the United States, *T. tyrannus*, *T. pipiri*, *T. intrepidus*, or *T. carolinensis*. They have the head with a vertical crest, the bill stout, hooked, and well-bristled, several outer primaries emarginate, the tail even or emarginate, and the coloration black and white, or gray and white, or olive and yellow. The gray king-bird of the West Indies and southern United States (*T. dominicensis* or *T. griseus*), the Arkansas flycatcher (*T. verticalis*) of the Western States and Territories, Cassin's and Couch's flycatchers of the Southwestern States and southward (*T. vociferans* and *T. melancholicus*), are additional examples; and others occur in the West Indies and Central and South America. See cut under *king-bird*.

tyranny (tir′a-ni), *n.*; pl. *tyrannies* (-niz). [< ME. *tirannye*, < OF. (and F.) *tyrannie* = Pr. *tirannia* = Sp. *tiranía* = Pg. *tyrannia* = It. *tirannia*, < ML. *tyrannia*, *tyrania*, < Gr. *τυραννία*, *τυραννίς*, tyranny, < *τύραννος*, a tyrant: see *tyrant*.] 1. The rule of a tyrant in the ancient sense; the personal government of one of the Greek tyrants; a state or government having an uncontrolled ruler bearing the title of tyrant.

> His [Cypselus's] moderation and clemency are allowed by all; yet he is universally called by the Grecian writers Tyrant of Corinth, and his government a *Tyranny*.
> *J. Adams*, Works, IV. 507.

> One might have thought . . . that, amid the endless changes that went on among the small commonwealths and *tyrannies* of that region, it would have been easier for the Republic to establish its dominion there than to establish it over great cities like Padua and Verona.
> *E. A. Freeman*, Venice, p. 288.

2. The office or incumbency of a tyrant; a tyrant's administration or tenure; the system of government by tyrants.

> Aristotle . . . assigns to the *tyranny* of Periander a duration of 44 years.
> *Smith's Dict. Gr. and Rom. Biog.*, III. 191.

Hence — 3. A tyrannical government; a lawless autocracy or despotism.

> Polybius, . . . in the Sixth Book of his History, says thus: "When Princes began to indulge their own Lusts and sensual Appetites, then Kingdoms were turned into so many *Tyrannies*." *Milton*, Answer to Salmasius.

4. Arbitrary or unrestrained exercise of power; despotic abuse of authority; unmerciful rule.

> Insulting *tyranny* begins to jet
> Upon the innocent and aweless throne.
> *Shak.*, Rich. III., ii. 4. 51.

> 'The *tyranny* of wealthy and powerful subjects was the characteristic evil of the times.
> *Macaulay*, Hallam's Const. Hist.

5. A tyrannical action or proceeding; an instance of despotic rule or conduct.

> My meditations are how to revenge
> Thy bloody *tyrannies*. *Lust's Dominion*, v. 2.

> 'Tis a *tyranny*
> Over an humble and obedient sweetness
> Ungently to insult. *Ford*, Lady's Trial, v. 2.

6. Severity; harshness; stringency.

> The *tyranny* of the open night's too rough
> For nature to endure. *Shak.*, Lear, iii. 4. 2.

=Syn. 1. *Despotism, Autocracy*, etc. See *despotism*.—**4.** *Oppression, Despotism*, etc. See *oppression*.

tyrant (tī′rant), *n.* [Early mod. E. also *tirant*, also *tyran, tyranne;* < ME. *tyrant, tirant, tyraunt, tiraunt*, also *tyran, tiran*, < OF. *tirant* (with unorig. *-t*), *tiran, tyran*, F. *tyran* = Pr. *tiran* = Sp. *tirano* = Pg. *tyranno* = It. *tiranno* = D. *tiran, tyran* = G. Sw. *tyrann* = Dan. *tyran*, < L. *tyrannus*, < Gr. *τύραννος*, lord, master, sovereign, tyrant; root unknown.] **1.** In ancient Greece, an irresponsible chief or magistrate with unlimited powers, owing his office primarily to insurrection or usurpation. The first tyrants, so called, were generally the leaders of risings against the oligarchies during the seventh and sixth centuries B. C. They ruled with the popular consent in nearly all the Greek states and colonies at one time or another, transmitting their power to their heirs until democracies or new oligarchies overthrew them. Others raised themselves to the position by direct conquest or conspiracy. The arbitrary government of the tyrants was sometimes beneficent, but more often extremely oppressive and cruel. The typical tyrant in the latter sense of the word was Dionysius the Elder, of Syracuse (405–367 B. C.).

> The *tyrant* of the Chersonese
> Was freedom's best and bravest friend;
> That *tyrant* was Miltiades!
> *Byron*, Don Juan, iii. 86 (song).

Hence—**2.** A wilfully arbitrary monarch or person in authority; a ruler or master who uses his power cruelly or oppressively; any person who treats those bound to him in any way as slaves to his will; an autocratic oppressor.

> Let us define a *Tyrant*, not according to vulgar conceits, but the judgment of Aristotle, and of all Learned Men. He is a *Tyrant* who regards his own welfare and profit only, and not that of the People.
> *Milton*, Ans. to Salmasius, xii.

> A *tyrant* cannot reign and oppress by his single force; he must really interest, and interest prodigiously, a sufficient number of subordinate *tyrants* in the duration of his power. *Ames*, Works, II. 280.

3. A tyrannical or compulsory influence; something that constrains the will inexorably; an overruling power.

> For lordly love is such a *Tyranne* fell
> That where he rules all power he doth expell.
> *Spenser*, Shep. Cal., October.

> Thought emancipated itself from expression without becoming its *tyrant*.
> *Lowell*, Among my Books, 2d ser., p. 326.

4. In *ornith.*, a tyrant-flycatcher; one of the *Tyrannidæ*.—**Bald tyrant.** Same as *baldhead*, 3.—**The Thirty Tyrants**, a committee of thirty sympathizers with the oligarchs and with Sparta, who ruled Athens with absolute power 404–403 B. C. They were overthrown by the democracy under Thrasybulus.

tyrant† (tī′rant), *v.* [Early mod. E. also *tyran;* < *tyrant, n.*] **I.** *trans.* To tyrannize over.

> What glorie or what guerdon hast thou [Love] found
> In feeble Ladies *tyranning* so sore?
> *Spenser*, F. Q., IV. vii. 1.

II. *intrans.* To play the tyrant; tyrannize: sometimes with indefinite *it*.

> This encouraged the Irish grandees (their O's and Mac's) to rant and *tyrant it* in their respective seignories.
> *Fuller*, Worthies, Buckinghamshire, I. 203.

tyrant-bird (tī′rant-bėrd), *n.* A tyrant-flycatcher.

tyrant-chat (tī′rant-chat), *n.* Some tyrant-flycatcher which resembles or suggests a chat.

tyrant-flycatcher (tī′rant-flī″kach-ėr), *n.* A tyrant-bird; any member of the *Tyrannidæ*.

tyrantly† (tī′rant-li), *adv.* [< ME. *tyrauntly;* < *tyrant* + *-ly*2.] In the manner of a tyrant; tyrannically.

> He askyde me *tyrauntly* tribute of Rome,
> That tenefully tynt was in tyme of myne elders.
> *Morte Arthure* (E. E. T. S.), l. 271.

tyrantry† (tī′rant-ri), *n.* Same as *tyranny*. *Wyclif*, 3 Ki. [1 Ki.] xvi. 20.

tyrant-shrike (tī′rant-shrīk), *n.* One of the larger tyrant-flycatchers with a stout bill resembling a shrike's, as any species of the genus *Tyrannus* proper, like the king-bird or bee-martin. Some of these used to be placed in the genus *Lanius*, being mistaken for shrikes. See cut under *king-bird*.

tyrant-wren (tī′rant-ren), *n.* One of the smaller tyrant-flycatchers, as a species of *Tyrannulus*, resembling a wren in some respects. See cut under *Tyrannulus*.

tyre[1]. Same as *tire*.

tyre[2] (tīr), *n.* [E. Ind.] A preparation of milk and rice used by the East Indians.

tyremesis (tī-rem′e-sis), *n.* [< Gr. *τυρός*, cheese, + *ἔμεσις*, vomiting: see *emesis*.] Vomiting of cheesy or curdy matters. Also *tyrosis*.

Tyrian (tir′i-an), *a.* and *n.* [= F. *Tyrien*, < L. *Tyrius*, < Gr. *Τύριος*, < *Τύρος*, L. *Tyrus*, Tyre (see def.).] **I.** *a.* **1.** Of or pertaining to the ancient city and state of Tyre in Phenicia, on the Mediterranean.—**2.** Of a purple color characteristic of Tyre.—**Tyrian Cynosure**, the constellation Ursa Minor, anciently called the Cynosure, which served as a guide to the Tyrians in their long voyages.

> And thou shalt be our star of Arcady,
> Or *Tyrian cynosure*. *Milton*, Comus, l. 342.

Tyrian purple. See *purple*.

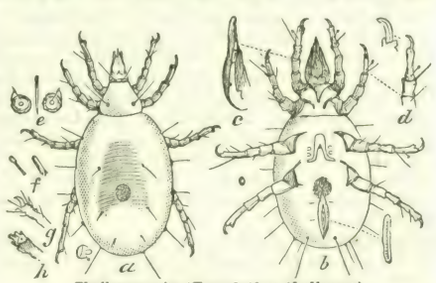
II. *n.* A native of Tyre.

tyriasis (ti-rī′a-sis), *n.* [< Gr. *τυρός*, cheese, + *-iasis*.] **1.** Elephantiasis Arabum.—**2.** Falling off of the hair; alopecia.

tyrite (tī′rīt), *n.* [< Icel. *Tȳr*, Tyr (see *Tyr*), + *-ite*2.] A variety of fergusonite found near Arendal in Norway.

tyro (tī′rō), *n.* [Formerly, and prop., *tiro;* < L. *tiro*, misspelled *tyro*, a newly levied soldier, a young soldier.] A beginner in learning anything; one who is employed in learning or who has mastered the rudiments only of any branch of knowledge; a novice.

> There stands a structure on a rising hill,
> Where *tyros* take their freedom out to kill.
> *Garth*, Dispensary, iii.



tyrocinium† (tī-rō-sin′i-um), *n.* Same as *tyrociny*. *Gayton.* Compare *tirocinium*.

tyrociny (tī-ros′i-ni), *n.* [Prop. **tirociny;* < L. *tirocinium*, first service or trial, < *tiro*, a newly levied soldier: see *tyro*.] The state of being a tyro, beginner, or learner; pupilage; apprenticeship; unskilled effort.

> To thee I write my Apotheosie,
> Mæcenas, strengthen my *Tyrocinie*.
> *Tourneur*, Trans. Metamorphosis, Ded.

Tyroglyphidæ (tī-rō-glif′i-dē), *n. pl.* [NL., < *Tyroglyphus* + *-idæ*.] A family of atracheate *Acarina*, typified by the genus *Tyroglyphus*. They all have eight legs developed, of five joints apiece, chelate mandibles, skeleton composed of sclerites in a soft skin, and two front pairs of legs set below the body. The *Tyroglyphidæ* are usually parasitic during the curious hypopial stage, although they do not seem to require any nutriment from the host; and some species would appear to be parasitic in the adult stage, as *Glyciphagus balænarum*. The related families *Sarcoptidæ* and *Myobiidæ* are strictly parasitic during every stage of their existence.

Tyroglyphus (tī-rog′li-fus), *n.* [NL. (Latreille, 1796), < Gr. *τυρός*, cheese, + *γλύφειν*, carve.] A notable genus of acarids or mites, typical of the family *Tyroglyphidæ*, having a tarsal claw and a sucker. Those of the subgenus *Rhizoglyphus* feed upon vegetable products, and comprise

Phylloxera-mite (*Tyroglyphus phylloxeræ*).

a, dorsal view of female; *b*, ventral view of female; *c*, mouth-parts; *d*, *f*, *g*, *h*, forms of tarsal appendages; *e*, ventral tubercles of male. (All the figures are much enlarged.)

about a dozen species. Those of *Tyroglyphus* proper feed upon animal products, and include among others the well-known cheese-mites, *T. siro* and *T. longior*—the latter feeding also upon farinaceous substances. (See cut under *flour-mite*.) *T.* (*Rhizoglyphus*) *phylloxeræ* was supposed to prey upon the grape-vine phylloxera, but it undoubtedly feeds on grape-roots.

Tyroler (ti-rō′lėr), *n.* [< G. *Tyroler, Tiroler*, a Tyrolese, < *Tyrol, Tirol*, Tyrol: see *Tyrolese*.] A native of Tyrol; a Tyrolese. [Rare.]

Tyrolese (tir-ō-lēs′ or -lēz′), *a.* and *n.* [< *Tyrol* (G. *Tirol*, and improperly *Tyrol*) + *-ese*.] **I.** *a.* Of or pertaining to Tyrol (often called the Tyrol), an Alpine province forming with Vorarlberg a crownland of the Cisleithan division of Austria-Hungary.

II. *n. sing.* and *pl.* A native or the natives of Tyrol.

Tyrolienne (ti-rō-li-en′), *n.* [F., fem. of *Tyrolien*, of or pertaining to Tyrol, < *Tyrol*, Tyrol.] A dance of the Tyrolese peasants, or a song or melody suitable for such a dance. The characteristic folk-songs of Tyrol abound in yodels.

tyroline (tir′ō-lin), *n.* A violet dye produced by treatment of aniline; aniline violet. *Ure*, Dict., III. 1050.

tyrolite (tir′ō-līt), *n.* [Also *tirolite;* < *Tyrol* + *-ite*2.] A hydrous arseniate of copper, occurring in orthorhombic crystals and in aggregates having a foliated micaceous structure. It is very soft, sectile, and flexible in thin scales, and has a bluish-green color. It is known from a number of localities, but is named from that at Falkenstein in Tyrol.

tyroma (tī-rō′mą), *n.* [NL., < Gr. *τυρός*, cheese.] Falling off of the hair; alopecia.

tyronism (tī′rō-nizm), *n.* [< *tyro*(*n*-) + *-ism*.] The state of being a tyro. Also *tironism*.

tyrosin (tī′rō-sin), *n.* [Irreg. < Gr. *τίρος*, cheese, + *-in*2.] A white crystalline body, odorless, and insoluble in cold water, having the formula $C_9H_{11}NO_3$. It is an amido-acid, and forms salts with both acids and bases. It is a product of the decomposition of proteids, either by the ferment trypsin, by putrefaction, or by boiling with acids.

tyrosis (tī-rō′sis), *n.* [NL., < Gr. *τυρός*, cheese, + *-osis*.] **1.** Same as *tyremesis*.—**2.** The curdling of milk.

tyrothrix (tī′rō-thriks), *n.* [NL., < Gr. *τυρός*, cheese, + *θρίξ*, hair.] A bacterium found in cheese.

tyrotoxicon (tī-rō-tok′si-kon), *n.* [NL., < Gr. *τυρός*, cheese, + *τοξικόν*, poison.] A ptomaïne produced in milk or cheese, the cause of the symptoms of poisoning occasionally observed to follow the eating of ice-cream. It is either identical with or closely related to diazobenzol.

Tyrrel's case. See *case*[1].

Tyrrel's fascia. The rectovesical fascia.

Tyrrel's hook. A fine hook used in certain operations on the eye for drawing forward the iris.

Tyrrhene (ti-rēn′), *a.* [< L. *Tyrrhenus*, < Gr. *Τυρρηνός*, < *Τυρρηνία*, the Gr. name of Etruria or Tuscany.] Same as *Tyrrhenian*.

Tyrrhenian (ti-rē′ni-an), *a.* and *n.* [< *Tyrrhene* + *-ian*.] **I.** *a.* Etruscan: used poetically, or in connection with subjects having some Greek relation or bearing.—**Tyrrhenian Sea**, a name still used for that part of the Mediterranean which lies between Tuscany and the mainland southward and the islands of Sardinia and Corsica.

II. *n.* An Etruscan.

tyrrit†, *n.* An old spelling of *tirret*.

Tyrtæan (tėr-tē′an), *a.* [< L. *Tyrtæus*, < Gr. *Τυρταῖος*, Tyrtæus (see def.), + *-an*.] Of or pertaining to Tyrtæus, a Greek poet of the seventh century B. C., who wrote marching-songs and elegiac exhortations for the Spartans.

tysan†, *n.* A variant of *tisane*.

Tysonian (tī-sō′ni-an), *a.* [< *Tyson* (see def.) + *-ian*.] Of or pertaining to, or named after, the anatomist Tyson: specifying the preputial glands or follicles which secrete the sebaceous substance smegma.

tysonite (tī′son-īt), *n.* [After S. T. *Tyson*, the discoverer.] A rare fluorid of the cerium metals, occurring in hexagonal crystals and massive, of a wax-yellow color: found in Colorado.

Tyson's glands. See *gland* and *Tysonian*.

tyssew†, *n.* An old spelling of *tissue*.

tystie (tis′ti), *n.* The black guillemot, *Cepphus grylle*. See cut under *guillemot*. [Orkney and Shetland.]

tyt†, **tyte**†, **tytte**†, *adv.* Obsolete spellings of *tite*[1].

tythe†, *n.* and *v.* An obsolete spelling of *tithe*[1].

tything†, *n.* An obsolete spelling of *tithing*[1].

tythings†, *n.* An obsolete form of *tidings*. See *tiding*.

Tyzack's anchor. See *anchor*, 1.

tzar, tzarina, etc. See *czar*, etc.

tzetze, tzetse, *n.* See *tsetse*.

Tzigany (tsig′a-ni), *n.* and *a.* [Hung. *Cigany, Tzigany* (cf. It. *Zingano, Zingaro*, G. *Zigeuner*, etc.), Gipsy: see under *Gipsy*.] **I.** *n.* A Hungarian Gipsy.

II. *a.* Of or pertaining to Hungarian Gipsies: used in English chiefly with reference to their music.

tzopilotl (tsō′pi-lotl), *n.* [Mex.] Same as *zopilote*.

★ **1.** The twenty-first character and fifth vowel-sign in the English alphabet. The Phenician alphabet, from which ours comes ultimately (see under *A*), had no such sign, but ended with *T*. A sign for the *u*-sound (that is, for *oo*, or *ö*, as it is represented in the respellings of this dictionary) was added by the Greeks when they adapted the Phenician signs to their own use, and was written indifferently *V* or *Y;* but the latter finally established itself as the accepted form in Greek usage, while the former became customary in the derived Italian alphabets; so that, considerably later, the Romans were able to import *Y* as a separate and foreign character, to represent the foreign Greek sound *ü* (= French *u*, German *ü* or *ue*), into which the Greek *ö* had meanwhile become to a great extent altered in pronunciation. The *V* was also commonly written with its angle rounded, as *U;* and *V* and *U* were for a long time merely different forms of the same sign (like *I* and *J*): it is only recently that they have come to be always distinctly held apart, and have different values given them. As *W* also is a doubled *U* or *V*, it appears that our four letters *U*, *V*, *W*, and *Y* all come from a single sign added by the Greeks at the end of the Phenician system. The sound originally and properly represented by the character, and still belonging to it in most languages outside of English, is the *oo* or *ö* sound, as in *mood*, *move*, *rule*, and the like, the closest of the labial vowels, or rounded vowels, as they are often called (see under *O*); but this value the letter has in English only in exceptional cases. What we call "long *u*," namely, is this same sound with the semivowel *y* prefixed, as *yoo* (*yö*); and what we call "short *u*" is the more open of the two shades of neutral vowel-sound. The digraphs *ue*, *eu*, and *ew* also have, as long, the *yö*-value in the same manner and degree. The *y*-element in the sound, namely, is not always alike full and undeniable, but varies somewhat, according to the difficulty of slipping it in after a preceding consonant. After a guttural (*k*, *q*) or a labial (*p*, *b*, *m*, *f*, *v*), as when initial, the utterance is completely *yö;* but after the tongue-tip letters (*t*, *d*, *n*, *th*, *s*, *z*, *l*, *r*) the insertion of *y* involves a more difficult combination of movements of the tongue, and the element is apt to be slighted, being reduced rather to a bit of *ĭ;* and in the practice of many speakers, and in certain localities, it is even omitted altogether, so that the *yö* becomes simple *ö*, *new* being pronounced noo, *lurid* loorid, and so on. The difficulty in the way of inserting the *y*, however, is removed if the preceding syllable has the accent; and hence even those who pronounce *penö'rious* say *pen'ūry*, and so in all other like cases. This omission of the *y*-element is not approved, but is stigmatized as provincial or vulgar, although practised by many educated and careful speakers, and probably becoming more prevalent. It is more generally condoned, and even accepted, after *l* than after *t*, *d*, *n*, etc., and some standard authorities in England itself now pronounce and teach *lö* instead of *lū;* in this dictionary the *u* is so marked if it occurs after *l* preceded by another consonant, as in *fluid* (*flö-id*). After *r*, the difficulty of adding the *y*-sound before a vowel is greater than after any other tongue-tip consonant; hence in this situation the pronunciation of "long *u*" as *ö* is almost universally accepted and practised. Further, after *t*, *d*, *s*, *z*, "long *u*" becomes *ö* when the *y*-element is as it were absorbed into them, converting them (see the different letters) into *ch*, *j*, *sh*, and *zh;* nor is the *y*-element heard when *ū* follows any of these sounds having an independent origin, as in *jury*, etc. The real short *u*-sound, or that corresponding to *ö* as long, is in a limited number of words also represented by *u*, as in *bull* *put*, etc.; also by double *o*, as in *look*, *foot*, etc. What we call "short *u*" is in the great majority of cases written with *u*, but also with *o*, as in *son*, with *oo*, as in *blood*, and with *ou*, as in *young*, and in the slighted pronunciation of unaccented syllables with almost any vowel. Cases like *bury* and *busy* and *buy* are anomalous and isolated. A *u* is always written after *q*, and this *u* (save in the exceptional cases in which it is silent) has a consonantal value, being pronounced as the semivowel *w;* and it is so treated sometimes also after other consonants, especially *s*, as in *suave*, *persuade*, *anguish*. *U* is silent in many words after *g*, having only (as in French) the office of preserving the hard sound of the *g;* thus, *guide*, *plague*. Like *i* and *y*, *u* is never doubled.

2. As a symbol: (*a*) The chemical symbol of *uranium*. (*b*) In quaternions, an operational sign which, prefixed to the symbol of a quaternion, denotes the versor of that quaternion. (*c*) In the *theory of heat*, a symbol used to denote the energy, or the sum of the increment of heat and the heat consumed. (*d*) [*l. c.*] In the calculus, the symbol of a function. (*e*) [*l. c.*] In *hydrodynamics*, used with *v* and *w* to denote the rectangular components of the velocity.

uakari, *n.* Same as *saki*.

Ubbenite (ub'e-nīt), *n.* [< *Ubbe* (*Ubben-*) (see def.) + *-ite*2.] One of a German sect of moderate Anabaptists, founded in 1534 by one Ubbe Phillips. The Ubbenites rejected the doctrine of divorce, and differed from the rest of the Anabaptists by denying that the kingdom of Christ is an earthly kingdom, in which the righteous are to exterminate the wicked. (*Neudecker*, in Schaff-Herzog's Relig. Encyc.) Also *Ubbonite*.

ubiety (ū-bī'ĭ-ti), *n.* [< ML. *ubieta(t-)s*, ubeity, < L. *ubi*, where.] The state of being in a definite place; whereness; ubiety.

uberous (ū'bẹ-rus), *a.* [< ML. *uberosus*, fruitful, < L. *uber*, fruitful, fertile; cf. *uber*, udder, teat, = E. *udder:* see *udder*.] Yielding largely or copiously; fruitful; productive; prolific.

> About the fruitful flanks of *uberous* Kent,
> A fat and olive soil.
> *Middleton (and another)*, Mayor of Queenborough, ii. 3.

uberty (ū'bėr-ti), *n.* [< ME. *ubertee*, < OF. **uberte* = Pg. *uberdade* = It. *ubertà*, < L. *uberta(t-)s*, abundance, fruitfulness, < *uber*, fruitful: see *uberous*.] Fertility; productiveness; fruitfulness; abundant yield.

> And take not hem [vines] that bere a grape or two,
> But hem that kneeleth down for *ubertee*.
> *Palladius*, Husbondrie (E. E. T. S.), p. 64.

ubication (ū-bi-kā'shọn), *n.* [= Sp. *ubicación* = Pg. *ubicação*, < L. *ubi*, where (prob. for **cubi*, **quobi*, < *qui*, who, *quid*, what, + *-bi*, a locative suffix).] 1. Situation; position; local relation; place of rest or lodgment. [Rare.]—2. Ubeity; whereness.

> Among other solutions, he suggests that the board affects the upper weight, which it does not touch, by determining its *ubication* or whereness. *Whewell.*

ubiety (ū-bī'e-ti), *n.* [< NL. *ubieta(t-)s* (replacing the medieval *ubeita(t-)s*), ubiety, < L. *ubi*, where.] 1. The state of being in a definite place; ubeity. Ubiety is generally said to be either repletive, circumscriptive, or definitive; but these terms are taken in different senses by different authors. According to the best usage, *repletive ubiety* is that of a body which excludes other bodies from its place by its absolute impenetrability; *circumscriptive ubiety* is that of any extended image which is in a place part by part without excluding other objects; *definitive ubiety* is connection with a portion of space, all in every part, and not part by part.

> *Ubiety.* Local relation; whereness. *Johnson.*

> If my *ubiety* did not so nearly resemble ubiquity, that in Anywhereness and Everywhereness I know where I am.
> *Southey*, The Doctor, cxcii. (*Davies.*)

2. Ubiquity; omnipresence.

ubiquarian (ū-bi-kwā'ri-ạn), *a.* and *n.* [< L. *ubique*, everywhere (see *ubiquity*), + *-arian*.] I. *a.* Existing everywhere; ubiquitary; ubiquitous. [Rare.]

> Have ye, ye sage intendants of the whole,
> A *ubiquarian* presence and control?
> *Cowper*, Tirocinium, l. 266.

II. *n.* [*cap.*] Same as *Ubiquitarian*, 2.

ubiquist (ū'bi-kwist), *n.* [= F. *ubiquiste* = Sp. Pg. *ubiquista*, < L. *ubique*, everywhere, + *-ist*.] Same as *ubiquitarian*.

ubiquitair† (ū-bik-wi-tãr'), *a.* [< F. *ubiquitaire:* see *ubiquitary*.] Ubiquitary. *Howell*, Letters, I. vi. 13.

ubiquitarian (ū-bik-wi-tā'ri-ạn), *n.* and *a.* [< *ubiquitary* + *-an*.] I. *n.* 1. One who exists everywhere. *Bailey*, 1727.—2. [*cap.*] One who holds to the omnipresence of the body of Christ.

> The name of *Ubiquitarians* is commonly given to those among the Lutherans who held the doctrine of the ubiquity of Christ's body, maintaining it as an explanation of the real presence of his body in the eucharist. Their opponents regarded this view as denying a special sacramental presence and as confounding the two natures of Christ. For the latter reason the name is sometimes given to the Monophysites. Also *Ubiquarian*, *Ubiquitist*.

II. *a.* 1. Omnipresent; existing everywhere. —2. [*cap.*] Belonging or pertaining to the Ubiquitarians: as, *Ubiquitarian* doctrines or arguments.

Ubiquitarianism (ū-bik-wi-tā'ri-ạn-izm), *n.* [< *Ubiquitarian* + *-ism*.] The doctrines of the Ubiquitarians. *Schaff*, Christ and Christianity, p. 75.

ubiquitariness (ū-bik'wi-tā-ri-nes), *n.* The state of being ubiquitary; existence everywhere. *Fuller*, Ch. Hist., X. i. § 31.

ubiquitary (ū-bik'wi-tā-ri), *a.* and *n.* [= F. *ubiquitaire* = Sp. *ubicuitario* = Pg. *ubiquitario*, n.; as *ubiquit-y* + *-ary*.] I. *a.* Being everywhere or in all places; ubiquitous.

> She can conjure,
> And I am her *ubiquitary* spirit.
> *Massinger*, Emperor of the East, i. 2.

> The *ubiquitary* and omnipresent essence of God.
> *Sir T. Browne*, Religio Medici, i. 35.

II. *n.*; pl. *ubiquitaries* (-riz). 1. One who is or exists everywhere.

> There is a nymph too of a most curious and elaborate strain, light, all motion, an *ubiquitary*, she is everywhere.
> *B. Jonson*, Cynthia's Revels, ii. 1.

2. [*cap.*] A Ubiquitarian.

> God is so omnipresent as that the *Ubiquitary* will needs have the body of God everywhere. *Donne*, Sermons, vii.

Omnipresence, or a capacity of being in an indefinite number of places at the same time, not strictly amounting to omnipresence: as, the *ubiquity* of Christ's body; the *ubiquity* of the king (see below).

> This is the consolation of all good men, unto whom his *ubiquity* affordeth continual comfort and security.
> *Sir T. Browne*, Vulg. Err., i. 2.

2. The doctrines or beliefs of the Ubiquitarians.

> No one sequel urged by the apostles against the Galatians, for joining circumcision with Christ, but may be as well enforced against the Lutherans holding *ubiquity*.
> *I. Walton*, Hooker.

3†. Locality; neighborhood; whereabouts.

> Pem she hight,
> A solemn wight
> As you should meet
> In any street
> In that *ubiquity*.
> *B. Jonson*, Love's Welcome at Welbeck.

Ubiquity of the king, in *law*. See the quotation.

> A consequence of this prerogative is the legal *ubiquity of the king*. His majesty, in the eye of the law, is always present in all his courts, though he cannot personally distribute justice. His judges are the mirrors by which the king's image is reflected. It is the regal office, and not the royal person, that is always present in court, always ready to undertake prosecutions, or pronounce judgment, for the benefit and protection of the subject. And from this ubiquity it follows that the king can never be nonsuit; for a nonsuit is the desertion of a suit or action by the non-appearance of the plaintiff in court. For the same reason, also, in the forms of legal proceedings, the king is not said to appear by his attorney, as other men do; for in contemplation of law he is always present in court.
> *Blackstone*, Com., I. vii.

ubi supra (ū'bī sū'prạ). [L.: *ubi*, where; *supra*, above: see *supra-*.] In the place above mentioned: marking reference to some passage or page before named.

Uji-fly (*Ujimyia sericaria*), natural size.

by the silkworm, the eggs hatching and the larvæ developing within the body of the latter, instead of, as is usual with tachina-flies, laying its eggs upon the body of the worm. See *Leskia.*

U. K. An abbreviation of *United Kingdom* (of Great Britain and Ireland).

ukase (ū-kās'), *n.* [= F. *ukase, oukase* = Sp. *ucase* = Pg. *ukase* = G. *ukas,* < Russ. *ukazŭ,* an ordinance, edict; cf. *ukazuivatĭ, ykazatĭ,* show, indicate, order, prescribe, < *y-* + *kazatĭ,* show.] 1. An edict or order, legislative or administrative, emanating from the Russian government. Ukases have the force of laws till they are annulled by subsequent decisions. A collection of the ukases issued at different periods, made by order of the emperor Nicholas, and supplemented since year by year, constitutes the legal code of the Russian empire.

In former times, cruel punishments with whips used to be ordained in episcopal circulars as well as in Imperial *ukases.* *A. J. C. Hare,* Russia, i.

Hence—2. Any official proclamation.

Lord Canning is probably not nearly as enthusiastic with respect to the effect of the Proclamation as he was last March, when he issued his famous *ukase* to the landlords of Oude. *W. H. Russell,* Diary in India, II. 280.

ulan, *n.* See *uhlan.*

ulcer (ul'sėr), *n.* [= F. *ulcère* = Sp. Pg. *ulcera* ★= It. *ulcera, ulcere, ulcero,* < L. *ulcus* (*ulcer-*), also *hulcus* (*hulcer-*), a sore, ulcer, = Gr. ἕλκος, a wound, sore, ulcer.] 1. A sore in any of the soft parts of the body, open either to the surface or to some natural cavity, and attended with a secretion of pus or some kind of discharge; a solution of continuity of the skin of the body, or of the investing tissue of any natural cavity, the result of morbid action, not of mechanical injury nor of a healthy reparative process. A wound may become an ulcer, but is not such unless diseased action is set up. An abscess is an ulceration within the tissue of a part which has formed a morbid excavation with a contracted orifice or none. Ulcers have been divided into *local* and *constitutional,* but the distinction is not obvious. They are also treated as *simple* or *specific* sores. Most ulcers are both constitutional and specific—that is, the local exhibition of a specific poison which infects the whole system, as the diphtheritic, the syphilitic, or the carcinomatous; others are less obviously specific, as the scrofulous or the scorbutic.

2. Hence, figuratively, a sore, blot, stain, or cause of reproach, in an ethical sense: as, an *ulcer* of the body politic.

To feed the living *ulcer* of a corroding memory. *Burke,* Rev. in France.

Aden or **Aleppo ulcer,** a cutaneous affection occurring in the East, which, beginning as a small red papule, grows, suppurates, and finally ulcerates. The etiology is obscure, and apparently there has been great freedom in the application of the name to skin-diseases of this type when occurring in the East. There seems to be no essential difference in the meaning of the following terms: *Delhi boil, Aleppo evil, Aleppo boil, Aleppo gall, Biskra button, Pendjeh ulcer, Delhi sore, Oriental sore, Persian ulcer,* and many others qualified by the name of some Eastern town or country. They are all classed under the one name *endemic ulcer.*—**Perforating ulcer of the foot.** See *perforating.*—**Varicose ulcer.** See *varicose.*—**Warty ulcer.** See *warty.*

ulcer (ul'sėr), *v. i.* and *t.* [< OF. *ulcerer,* F. *ulcérer* = Sp. Pg. *ulcerar* = It. *ulcerare,* < L. *ulcerare,* make sore, < *ulcus* (*ulcer-*), a sore, ulcer: see *ulcer, n.*] To ulcerate. *Fuller,* Holy and Profane State, V. vi. 3. [Rare.]

ule (ū'le), *n.* [< Mex. *ule, hule,* caoutchouc.] The ule-tree.

-ule. [F. *-ule* = Sp. Pg. *-ulo* = It. *-ulo, -olo,* < L. *-ulus,* m., *-ula,* f., *-ulum,* n., a dim. termination. Cf. *-cule, -cle.*] A diminutive termination in many words from the Latin, as in *capsule, glandule, globule, nodule,* etc. It often appears unrecognized as *-le,* as in *circle, scruple,* etc., and in the original Latin form *-ulus* in *calculus, annulus,* etc. It also appears in the compound terminations *-cule, -cle* (which see). It is much used in the formation of new terms in zoölogy and botany.

ulema (ö-le-mä'), *n.* [= F. *uléma, oulema* = Sp. *ulema,* < Ar. *'ulemā,* pl. of *'ālim,* learned, one who knows, < *'alama,* know: see *alma.*] The Moslem doctors of sacred law and theological science, especially those belonging to the religious hierarchy of the Turkish empire, with the Sheik ul Islam at their head: a collective term.

ule-tree (ö'le-trē), *n.* [Amer. Sp.] A Mexican tree, *Castilla elastica,* from the milky juice of which caoutchouc is obtained. See cut under *Castilla.*

Ulex (ū'leks), *n.* [NL. (Linnæus, 1735), < L. *ulex,* a shrub resembling rosemary; according to some, furze, or perhaps *Anthyllis Hermanniæ.*] A genus of leguminous plants, of the tribe *Genisteæ* and subtribe *Cytisinæ;* the furze. It is distinguished from the related genus *Cytisus* by its deeply two-lipped membranous and colored calyx. It includes about 20 species, natives of western Europe or northwestern Africa—one species, *U. nanus,* extending east nearly to Nice; and another, *U. Europæus,* per-

haps to Tuscany. They are spiny shrubs without genuine leaves, the leaves being reduced to a spine, petiole, or scale. The yellow flowers are solitary or racemose at the ends of the branches. For *Ulex aphyllus,* see *cross-spine. U. Europæus,* which also extends to the Azores and Canary Islands, and occurs naturalized on high mountains in Jamaica, is the common furze, gorse, or whin of Great Britain. See *furze.*

ulexine (ū'lek-sin), *n.* [< *Ulex* + *-ine*2.] An alkaloid prepared from *Ulex Europæus,* the common gorse or furze. It has been employed as a diuretic in cases of dropsy due to heart-disease.

ulexite (ū'lek-sīt), *n.* [Named after G. L. *Ulex,* a German chemist.] A hydrous borate of calcium and sodium, occurring in loose rounded masses with fibrous structure and white color. Also called *boronatrocalcite, natroborocalcite.*

uliginose (ū-lij'i-nōs), *a.* [< ME. *uliginose,* < L. *uliginosus:* see *uliginous.*] 1. Moist; muddy; uliginous. *Palladius,* Husbondrie (E. E. T. S.), p. 180.—2. In *nat. hist.,* living or growing in the mud or in muddy places. Also *ulignose.*

uliginous (ū-lij'i-nus), *a.* [< F. *uligineux* = It. *uliginoso,* < L. *uliginosus,* full of moisture, damp, < *uligo,* moisture, marshiness, for **uviligo,* < *uvere,* be wet or damp: see *humid.* Cf. *uliginose.*] Muddy; oozy; slimy. *Woodward.*

ullage (ul'āj), *n.* [< OF. *eullage, oeillage,* "the filling up of leakie wine vessels" (Cotgrave), < *oeiller, eullier, auillier,* "fill up wine vessels that have leaked" (Cotgrave), lit. fill to the 'eye' or bung, < *oeil,* eye, < L. *oculus,* eye: see *ocular, eyelet.* According to Skeat, the OF. verb is prob. < OF. *eure, ore,* border, brim, < L. *ora,* brim: see *orle.*] In *com.,* the wantage of a cask, or the estimated measure of the empty part of a cask of liquor.

ullet (ul'et), *n.* [A dial. form of *owlet.*] A howlet or hoot-owl; specifically, the tawny, brown, or wood owl, *Strix* (or *Syrnium*) *aluco.*

Ullmannia (ul-man'i-ą), *n.* [NL., named after J. C. *Ullmann,* a German mineralogist and statesman (1771–1821).] The name given by Göppert (1850) to a genus of fossil coniferous plants from the Permian of Europe. Its fruit is imperfectly known; but its irregularly branching twigs densely clothed with thick fleshy cylindrical or square leaves traversed by rows of punctations indicate Araucarian affinities. The name *Cupressites* (Brongniart, 1828) has priority and should be substituted.

ullmannite (ůl'man-īt), *n.* [Named after J. C. *Ullmann:* see *Ullmannia.*] A sulphid of nickel and antimony, part of the latter being frequently replaced by arsenic. It generally occurs massive with a granular structure, and is of a gray color with a metallic luster.

Ulloa's circle. See *circle of Ulloa,* under *circle.*

Ulmaceæ (ul-mā'sē-ē), *n. pl.* [NL. (Mirbel, 1815), < *Ulmus* + *-aceæ.*] A family of dicotyledonous plants, the elm family, belonging to the order *Urticales,* typified by the genus *Ulmus.* It is characterized by erect anthers, two stigmatose style-branches, a straight embryo with broad cotyledons, flower-buds produced on leafless yearly branches, and a compressed fruit with oblique apex, commonly a dry samara. It embraces 13 genera and about 140 species.

ulmaceous (ul-mā'shius), *a.* In *bot.,* of or pertaining to the plant family *Ulmaceæ.*

Ulmeæ (ul'mē-ē), *n. pl.* [NL. (Agardh, 1825), < *Ulmus* + *-eæ.*] A tribe of trees, the elm tribe, of the family *Ulmaceæ,* consisting of 4 genera. *Ulmus,* the type, and *Planera* are the best known.

ulmic (ul'mik), *a.* [< L. *ulmus,* elm, + *-ic.*] Noting an acid found in earth-mold, a product of the decay of vegetable matter. See *ulmin.*

ulmin (ul'min), *n.* [< L. *ulmus,* elm, + *-in*2.] 1. A name given to various substances which are present in vegetable mold, peat, etc. The name has also been applied to a dark-brown substance which exudes from the elm, oak, and various other trees. It has also been called *humus, humin, gein.* See *humus.*

2. A brown substance produced by the action of strong acids or alkalis on various organic bodies, especially by heating treacle or alcohol with strong sulphuric acid, thoroughly washing the residue with water, then triturating it with gum, and drying the mixture.

ulmo (ul'mō), *n.* A tree of Chile, *Eucryphia cordifolia:* same as *muermo.*

ulmous (ul'mus), *a.* [< L. *ulmus,* elm, + *-ous.*] In *chem.,* noting a group of brown or black substances in which ulmin or ulmic acid is present, occurring in vegetable mold, peat, etc.; humous.

Ulmus (ul'mus), *n.* [NL. (Tournefort, 1700), < L. *ulmus,* elm: see *elm.*] A genus of trees, the elms, type of the family *Ulmaceæ* and tribe *Ulmeæ.* It is characterized by a stalked fruit surrounded with a broad wing, and containing flat cotyledons. There are about 18 species, widely scattered through the north temperate regions, extending in Asia to mountains within the tropics. They bear alternate serrate two-ranked feather-veined leaves on slender and often recurving branches which form a graceful flat spray. The flower-clusters contain numerous small apetalous flowers, almost all perfect or mainly staminate, in 4 North American species preceding the leaves, and followed by disk-like notched and veiny samaras, which fall as the leaves expand. (See cut under *samara.*) Several other species are evergreen and late-flowering, as *U. parvifolia* of China and Japan. Seven species occur in the United States (for which see *elm, slippery-elm, rock-elm,* and *wahoo,* 3). Three species occur in Europe, all of them extending into Asia—*U. campestris,* the common old-world elm (see cut under *elm*), parent of very numerous cultivated varieties; *U. pedunculata,* the water-elm of central Europe; and *U. montana,* the witch-elm, the only one thought to be native to Great Britain. *U. Americana, U. pedunculata,* and also *U. Wallichii,* the Himalayan elm, sometimes reach a very large size, from 90 to 100 feet high, and 7 to 8 feet in diameter. *U. pumila,* the dwarf elm of Siberia, a very low shrub, forms the other extreme of the genus. *U. pedunculata,* the common village elm of Prussia, is peculiar in forming sharp ribs about its base in old age, which serve as natural buttresses.

ulna (ul′nä), *n.*; pl. *ulnæ* (-nē). [NL., < L. *ulna* = Gr. *ὠλένη*, elbow: see *ell*[1].] 1. The inner one of the two bones of the forearm, between the elbow and the wrist, the other being the radius; the bone which makes a strict hinge-joint at the elbow with the humerus, and about which the radius revolves in pronation and supination, when the ulna reaches to the wrist and these movements are practicable. The ulna is commonly the smaller one of the two bones, especially below, where its end is little more than a pivot for rotation of the wrist, the hand being almost entirely borne upon the end of the radius. In many animals the ulna is reduced by shortening, and in some it appears merely as a process of the radius, ankylosed upon the proximal end of the latter, as in bats, and in hoofed quadrupeds generally. In man, in animals generally which use their fore paws as hands, and in birds it is perfect, and extends the whole length of the forearm. Its proximal end has a large sigmoid cavity for articulation with the humerus, often a lesser sigmoid cavity for the head of the radius, and a prominent process, the olecranon, or head of the ulna, forming the greatest convexity of the back of the elbow. See cuts under *carpus, Catarrhina, Elephantinæ, forearm, pinion, Plesiosaurus,* and *shoulder.*

2. In *entom.*, the stigmatic or marginal vein of the fore wing. *Walker; Haliday.*—3. A unit of length; a cubit; an ell.—4. In *ichth.*, the hypercoracoid. *Owen.*—**Oblique line** (or **ridge**) **of the ulna.** See *oblique.*—**Tubercle of the ulna.** See *tubercle.*

ulnad (ul′nad), *adv.* [< *ulna* + *-ad*[2].] Toward or in the direction of the ulna; toward the ulnar aspect of the forearm.

ulnage† (ul′nāj), *n.* Same as *alnage.*

ulnager† (ul′nāj-ėr), *n.* Same as *alnager.*

ulnar (ul′när), *a.* [< NL. *ulnaris*, < L. *ulna*, ulna: see *ulna.*] 1. Of or pertaining to the ulna.—2. Of or pertaining to that side of the fore limb upon which the ulna is situated: as, the *ulnar* border of the forearm; the *ulnar* bone of the wrist (see *ulnare*): opposed to *radial.*—**Anterior ulnar vein.** See *vein.*—**Common ulnar vein.** See *vein.*—**Ulnar artery,** the larger of the two vessels resulting from the division of the brachial at the elbow, extending along the inner side of the forearm into the palm of the hand, where it forms the superficial palmar arch. Besides numerous muscular branches, it gives off the anterior and posterior ulnar recurrent arteries (see *recurrent*), the interosseous, and the anterior and posterior ulnar carpals.—**Ulnar carpal arteries,** two small branches, the anterior and the posterior, given off from the ulnar artery at the wrist to the anterior and posterior surfaces.—**Ulnar nerve,** a large branch of the brachial plexus, from the inner cord, distributed to the elbow-joint, ulnocarpal and deep digital flexors, and some of the muscles and a part of the skin of the hand. It gives off the dorsalis ulnaris, or dorsal cutaneous branch, to the skin of the wrist and hand, the palmaris superficialis to the palmaris brevis and skin of the little finger, and the palmaris profundus to most of the small muscles of the palm.

ulnare (ul-nā′rē), *n.*; pl. *ulnaria* (-ri-ä). [NL. (sc. *os*, bone), neut. of *ulnaris:* see *ulnar.*] 1. A bone of the wrist, that one of the proximal carpal bones which is upon the ulnar side, in man the cuneiform: opposed to *radiale.* See cuts under *Artiodactyla, carpus, hand, Perissodactyla,* and *Plesiosaurus.*—2. In *ornith.*, that one of the two free carpal bones which is upon the ulnar side (the other being the radiale), not necessarily with the implication that it is the cuneiform of a mammal. See cut under *pinion.*

ulnocarpal (ul-nō-kär′pal), *a.* Common to the ulna and the carpus: as, an *ulnocarpal* articulation.

ulnometacarpal (ul-nō-met-a-kär′pal), *a.* Of or pertaining to the ulna and the metacarpus: specifying certain muscles of a bird's wing. Also *ulnimetacarpal.*

ulnometacarpalis (ul-nō-met″a-kär-pā′lis), *n.*; pl. *ulnometacarpales* (-lēz). [NL.: cf. *ulnometacarpal.*] In *ornith.*, a muscle of the wing which arises from the ulna and is inserted into a metacarpal bone. Two such muscles are distinguished as *ulnometacarpalis ventralis* and *dorsalis.* Also *ulnimetacarpalis.*

ulnoradial (ul-nō-rā′di-al), *a.* Of or pertaining to the ulna and the radius; common to these bones, as an articulation.

Ulodendron (ū-lō-den′drọn), *n.* [NL. (Lindley and Hutton, 1831), < Gr. *οὐλή*, a scar (< *οὐλειν*, be whole or sound, become healed), + *δένδρον*, tree.] A genus of fossil plants, closely allied to *Lepidodendron,* and by some authors considered as belonging to, or being a peculiar condition of, this genus. The leaf-scars of *Ulodendron* are disposed in spiral order, are comparatively small, and do not vary much in dimensions, not being much larger upon trunks of great size than upon smaller ones. They are close, rhomboidal in shape, and sometimes broader than long. The fructification is a long cylindrical strobile. The characteristic feature of *Ulodendron* is the existence of a double series of concave disk-like depressions, of large size, round or oval in shape, and increasing in dimensions with the growth of the plant from below upward. These large scars, or disks as they are sometimes called, are arranged in vertical rows, alternating on each side of the stem, and are marked in the center by a small mammilla, around which scales or leaf-scars are concentrically arranged, which become more or less obscure, or are entirely obliterated, with the growth of the plant. The nature and function of these peculiar scars were formerly the object of much discussion among paleobotanists; but they are now recognized as the points of attachment of masses of inflorescence, which consisted of sessile cones formed of imbricated scales bearing sporangia, the cones being indistinguishable from *Lepidostrobus.* *Ulodendron* is characteristic of the lower section of the Carboniferous series.

Ulonata† (ū-lō-nā′tä), *n. pl.* [NL. (Fabricius, 1793): formation uncertain; perhaps < Gr. *αὐλών*, a hollow, a narrow space.] A group of mandibulate insects, in the system of Fabricius, composed of the genera *Acrydium, Gryllus, Truxalis, Forficula, Blatta, Mantis, Acheta,* and *Locusta:* an obsolete synonym of *Orthoptera.*

Ulophocinæ (ū″lō-fō-sī′nē), *n. pl.* [NL., < Gr. *οὖλος*, woolly, + *φώκη*, a seal, + *-inæ.*] A section of *Otariidæ,* containing the true fur-seals, as distinguished from the *Trichophocinæ* or hair-seals of the same family. Also *Oulophocinæ.* See cut under *fur-seal.*

ulophocine (ū′lō-fō-sin), *a.* Of or pertaining to the *Ulophocinæ.*

ulorrhagia (ū-lō-rā′ji-ä), *n.* Same as *oulorrhagy.*

Ulothrix (ū′lō-thriks), *n.* [NL. (Kützing, 1845), < Gr. *οὖλος*, woolly, + *θρίξ* (*τριχ-*), hair.] A genus of confervoid algæ, typical of the family *Ulotrichaceæ.*

Ulotrichaceæ (ū″lō-tri-kā′sē-ē), *n. pl.* [NL., < *Ulothrix* (*-trich-*) + *-aceæ.*] A small family of confervoid algæ, typified by the genus *Ulothrix.* They are aquatic or terrestrial green or yellowish-green plants, each composed of an unbranched filament of short cells that are usually broader than they are long.

ulotrichan (ū-lot′ri-kạn), *n.* and *a.* [< *Ulotrichi* + *-an.*] I. *n.* A member of the *Ulotrichi.*

II. *a.* Ulotrichous.

Ulotrichi (ū-lot′ri-kī), *n. pl.* [NL., pl. of *ulotrichus:* see *ulotrichous.*] One of the two primary groups into which the races of men are divided by Bory de Saint-Vincent, the other being the *Liotrichi* or *Lissotrichi.* The *Ulotrichi* are those with crisp or woolly hair. The color of the skin varies from yellow-brown to the blackest known; the hair and eyes are normally dark; the skull is in most types dolichocephalic. The negroes and Bushmen of ultra-Saharic Africa and the Negritos are members of this group.

ulotrichous (ū-lot′ri-kus), *a.* [< NL. *ulotrichus,* < Gr. *οὖλος*, woolly, + *θρίξ* (*τριχ-*), hair.] Having crisp woolly hair; belonging to the *Ulotrichi.*

ulster (ul′stėr), *n.* [< *Ulster*, a province of Ireland.] 1. A type of long loose overcoat, worn by both men and women: originally made of frieze cloth in Ulster. The peculiarity of the coat is that it is cut almost straight for both sexes, reaching very nearly to the feet, and is sometimes girded with a belt; it often has a hood or cape.

> Over my shoulders was a drenched Leopard skin, beneath which could be seen my travel-stained, much-worn *ulster* overcoat. *O'Donovan,* Merv, xvi.

2. [*cap.*] Same as *Ulster king-at-arms.*

Ulster custom. The form of tenant-right (in full, *Ulster tenant-right custom*) established by custom in the province of Ulster in Ireland, and recognized by the statutes of 1870 (33 and 34 Vict., c. 46) and 1881 (44 and 45 Vict., c. 49). It is regarded as including the right of a yearly tenant to continue his occupancy so long as the rent, or a fair rent adjusted in view of the value of the land exclusive of buildings, is paid, to dispose of his tenancy to a suitable successor, and to require compensation if the landlord resumes possession for his own use.

ulstered (ul′stėrd), *a.* [< *ulster* + *-ed*[2].] Wearing an ulster. *R. Broughton,* Second Thoughts, i. 5.

ulstering (ul′stėr-ing), *n.* [< *ulster* + *-ing.*] Cloth for ulsters. *Manufacturers' Rev.,* XX. 237. [A trade-word.]

Ulster king-at-arms. The king-at-arms for Ireland. See *king-at-arms.*

ult. An abbreviation of *ultimo.*

ulterior (ul-tē′ri-ọr), *a.* and *n.* [= F. *ultérieur* = Sp. Pg. *ulterior* = It. *ulteriore,* < L. *ulterior,* compar. of *ulter,* that is beyond. Cf. *ultra-.*] I. *a.* 1. Being or situated beyond or on the further side of any line or boundary.—2. Not at present in view or in consideration; in the future or in the background; beyond what is seen or avowed; remote: as, what *ulterior* measures will be adopted is uncertain.

> The *ulterior* accomplishment of that part of it [Scripture]. *Boyle,* Works, II. 130.

> When a thing has served an end to the uttermost, it is wholly new for an *ulterior* service. *Emerson,* Nature, v.

II. *n.* The further side; the remote part. *Coleridge.* [Rare.]

ulteriorly (ul-tē′ri-ọr-li), *adv.* In an ulterior manner; more distantly; remotely.

ultima (ul′ti-mä), *a.* and *n.* [L., fem. of *ultimus,* superl. of *ulter,* that is beyond or on the other side: see *ultimate.*] I. *a.* Most remote; furthest; final; last.—**Ultima ratio,** the last reason or argument.—**Ultima ratio regum,** the last reason of kings; resort to arms or war.—**Ultima Thule.** See *Thule.*

II. *n.* In *gram.*, the last syllable of a word.

ultimata, *n.* Latin plural of *ultimatum.*

ultimate (ul′ti-māt), *a.* [= Sp. Pg. *ultimado,* ★< ML. *ultimatus,* furthest, last, pp. of L. *ultimare,* come to an end, < *ultimus,* last, final, superl. of *ulter,* that is on the other side: see *ultra-.*] 1. Furthest; most remote in place.

> Looking over the *ultimate* sea. *Bret Harte,* The Two Ships.

2. Last; the last of a series of three or more members, especially of a series in which an inquiry is traced from one member to another: as, the *ultimate* signification of a phrase; an *ultimate* principle; an *ultimate* fact. *Ultimate* applies to the last of a series of events in time, as well as to other series. In special cases it is synonymous with *final,* except that it implies at least two preceding members, which *final* does not; and this circumstance gives the idea of a climax, and so emphasizes *ultimate.* But more frequently the series to which *ultimate* refers is a regressive one, so that it is quite opposed to *final.* Thus, *ultimate* cause means the original cause beyond which no causation can be traced; but *final* cause is the end toward which action is directed.

> Worst is my port,
> My harbour, and my *ultimate* repose.
> *Milton,* P. R., iii. 210.

> What are we? and whence came we? What shall be Our *ultimate* existence? *Byron,* Don Juan, vi. 63.

> Those *ultimate* truths and those universal laws of thought which we cannot rationally contradict. *Coleridge.*

> [Science] is teaching the world that the *ultimate* court of appeal is observation and experiment, and not authority. *Huxley,* Lay Sermons, p. 118.

> Any great building seems to me, while I look at it, the *ultimate* expression. *H. James, Jr.,* Little Tour, p. 79.

> There is no doubt a real difficulty here; and the shortest way of dealing with it would be to confess it insoluble and *ultimate.* *W. James,* Mind, XII. 27.

3. In *entom.*, specifically noting a stage of the second larva, after the third molt, of those insects which undergo hypermetamorphosis, as the blister-beetles (*Meloidæ*). It succeeds the scarabæidoid stage, and is followed by the coarctate larva.—**Prime and ultimate ratios.** See *ratio.*—**Ultimate abstraction,** the consideration of anything in so far as it is described in its definition, without reference to any other circumstance.—**Ultimate analysis,** in *chem.*, the resolution of a substance into its absolute elements: opposed to *proximate analysis,* or the resolution of a substance into its constituent compounds.—**Ultimate cause,** a primary cause.

> Mr. Adams had a great mind, quick, comprehensive, analytical, not easily satisfied save with *ultimate causes.* *Theo. Parker,* Historic Americans, John Adams, vi.

Ultimate element, an indecomposable element.—**Ultimate end,** an end to which no other is ulterior.—**Ultimate fact,** a fact not capable of being explained, rendered intelligible, or in any way subjected to reason; a brute fact.—**Ultimate principle,** a first principle.—**Ultimate significate,** in *nominalistic logic,* an individual significate, not a universal which, considered as a name, has a further significate.—**Ultimate species,** a species between which and the individuals there is no lower species; a lowest species.=**Syn. 2.** *Eventual, Conclusive,* etc. See *final.*

ultimate (ul′ti-māt), *v. i.*; pret. and pp. *ultimated,* ppr. *ultimating.* [< ML. *ultimatus,* pp. of L. *ultimare,* come to an end, be at the last: see *ultimate, a.*] To result finally; end. [Rare.]

> Believing that they [the socialistic tendencies of our time] must *ultimate,* if successful, in an increase of egoism and restriction of individual liberty. *Pop. Sci. Mo.,* XXXI. 564.

ultimately (ul′ti-māt-li), *adv.* As an ultimate or final result; at last; in the end or outcome; at the furthest point of a series; finally.

ultimateness (ul′ti-māt-nes), *n.* The state or character of being ultimate; a final or definitive condition.

> To have in it a certain completeness, *ultimateness,* and sacredness. *The Century,* XXVIII. 636.

ultimation† (ul-ti-mā′shọn), *n.* [= It. *ultimazione;* as *ultimate* + *-ion.*] A last offer or concession; an ultimatum.

> Lord Bolingbroke was likewise authorized to know the real *ultimation* of France. *Swift,* Hist. Four Last Years of Queen Anne. (*Latham.*)

ultimatum (ul-ti-mā′tum), *n.*; pl. *ultimatums* or *ultimata* (-tumz, -tä). [= F. *ultimatum,* < NL. *ultimatum,* a final statement, neut. of ML. *ultimatus,* final, ultimate: see *ultimate, a.*] A final proposal or statement of conditions; especially, in diplomatic negotiations, the final terms of one of the parties, the rejection of which may involve an immediate rupture of diplomatic relations and even lead to a declaration of war.

> He delivered to the mediators an *ultimatum,* importing that he adhered to the treaties of Westphalia and Nimeguen. *Smollett,* Hist. Eng., i. 5.

ultime† (ul'tim), *a.* [< F. *ultime* = Sp. *último* = Pg. It. *ultima*, < L. *ultimus*, last: see *ultimate*.] Last; final; ultimate. *Bacon*, Nat. Hist., § 99.

Nothing was wanting now to the perfecting of this League but the *ultime* and compleating act, the solemn confirmation by Oath.
H. L'Estrange, Reign of K. Charles (ed. 1655), p. 105.

ultimity† (ul-tim'i-ti), *n.* [< ML. *ultimita(t-)s*, < L. *ultimus*, last: see *ultime*, *ultimate*.] The last stage or consequence. *Bacon*, Nat. Hist., § 838.

ultimo (ul'ti-mō), *adv.* [L., abl. sing. masc. (sc. *mense*, month) of *ultimus*, last: see *ultime*.] In the month which preceded the present; in the last month, as distinguished from the current or present month and all others. It is usually abbreviated *ult.*: as, on the 12th *ult.*—that is, on the 12th day 'in the last month,' *ultimo* being a Latin adjective agreeing with *mense*, month, understood. Compare *instant*, *a.*, 1, and *proximo*.

ultimogeniture (ul″ti-mō-jen'i-tūr), *n.* [< L. *ultimus*, last, + *genitura*, geniture.] A system of inheritance, such as is called in England *borough-English*, by which the youngest son succeeds to the estate: opposed to *primogeniture*.

ultimus hæres (ul'ti-mus hē'rēz). [L.: *ultimus*, last; *hæres*, *heres*, heir: see *ultimate* and *heir*.] In *law*, the last or final heir. Thus, in cases of intestate succession, failing relations of every kind, the succession devolves on the state or crown as *ultimus hæres*.

ultion (ul'shon), *n.* [< OF. *ultion*, < L. *ultio(n-)*, an avenging, < *ulcisci*, pp. *ultus*, take vengeance on, punish.] Revenge.

To forgive our enemies is a charming way of revenge, . . . and to do good for evil a soft and melting *ultion*, a method taught from heaven, to keep all smooth upon earth.
Sir T. Browne, Christ. Mor., iii. 12.

ultra (ul'trä), *a.* and *n.* [< *ultra-*, q.v.] **I.** *a.* Extreme; extravagant; fanatical: as, *ultra* measures.

The extreme or *Ultra* party.
Milman, Latin Christianity.

II. *n.* One who advocates extreme views or measures; an extremist; an ultraist.

The "*Ultras*" would have owned him for their leader, and would have admitted that he went beyond them in the uncompromising consistency of his extravagant dogmas.
Brougham, Hist. Sketches, Burke.

ultra-. [< L. *ultra*, adv. beyond, further, moreover, more, besides, prep. beyond, on the further side, past; orig. fem. abl. of *ulter*, on the other side: see *ulterior*, *ultimate*. Hence *ultra*, *a.* and *n.*, and *outrage*[1].] A Latin preposition used as a prefix, signifying 'beyond.' (*a*) Beyond; on the further side of: chiefly with words implying natural objects forming great barriers, boundaries, or landmarks: as, *ultra*marine, *ultra*montane, *ultra*mundane. (*b*) Exceedingly; excessively; beyond what is reasonable, natural, or right: with words admitting of degrees, especially political and polemical terms: as, *ultra*conservative, *ultra*liberal, *ultra*radical, *ultra*catholic.

ultrabernoullian (ul″trä-bėr-nō'liạn), *a.* Resulting from an extension of the theory of Bernoullian numbers.—**Ultrabernoullian numbers**, the coefficients of the development

$$n^r = \sum_0^\infty {}_i A_{i,r} \{(n+1)!/(n+i-r)!\, r!\}.$$

ultracapillary (ul-trä-kap'i-lā-ri), *a.* In *bot.*, exceedingly slender; composed of exceedingly fine capillary filaments: as, an *ultracapillary* thallus.

ultracentenarianism (ul-trä-sen-te-nā'ri-ạn-izm), *n.* The state or condition of living to the age of more than one hundred years. *Pop. Sci. Mo.*, XX. 97. [Rare.]

ultraclassical (ul-trä-klas'i-kạl), *a.* Being excessively classical, or classical to an extreme or exaggerated degree: as, an *ultraclassical* musical composition.

ultraconservatism (ul″trä-kon-sėr'vạ-tizm), *n.* Unreasonable conservatism; extreme opposition to innovation or change.

ultraconservative (ul″trä-kon-sėr'vạ-tiv), *a.* Conservative in the extreme.

ultracosmopolitan (ul-trä-koz-mō-pol'i-tạn), *a.* Cosmopolitan in an extreme or offensive degree. *New Princeton Rev.*, I. 2.

ultracritical (ul-trä-krit'i-kạl), *a.* Excessively critical; over-critical.

ultra-elliptic (ul″trä-e-lip'tik), *a.* Hyperelliptic.

ultrafashionable (ul-trä-fash'ọn-ạ-bl), *a.* Fashionable in the extreme; over-fashionable.

ultrafederalist (ul-trä-fed'ẹ-rạl-ist), *n.* In *U. S. hist.*, an extreme federalist.

ultra-gaseous (ul-trä-gas'ē-us), *a.* See *radiant matter*, under *radiant*.

ultrage (ul'trāj), *n.* [< ML. *ultragium*, < L. *ultra*, beyond: see *outrage*[1].] Outrage.

ultraism (ul'trä-izm), *n.* [< *ultra-* + *-ism*.] 1. The principles of ultras, or men who advocate extreme measures, as a radical reform, etc.

New England Senators and Representatives have, from the very idea of their *ultraism*, little or no direct weight in Congress. *Wendell Phillips*, Speeches, etc., p. 354.

2. An extreme or radical statement or action.

We would also, in spite of some *ultraisms* in thought and language, . . . recommend heartily the papers of Dr. Forbes. *Dr. J. Brown*, Spare Hours, 3d ser., p. 98.

ultraist (ul'trä-ist), *n.* [< *ultra-* + *-ist*.] An ultra; an extremist.

ultramarine (ul'trä-ma-rēn″), *n.* and *a.* [= Sp. Pg. *ultramarino*, < L. *ultra*, beyond, + *marinus*, marine.] **I.** *n.* 1. A beautiful natural blue pigment, obtained from the mineral lapis lazuli, a variety of haüyne. This stone occurs in Siberia, Persia, Tibet, and some other localities. (See *lapis lazuli*, under *lapis*.) Small golden specks of iron pyrites are usually scattered through it. To prepare the pigment, selected pieces are heated, and cooled in water, producing disintegration. The powder is then purified by repeated washings, the several wash-waters depositing pigments of different depths of color, the gray powder known as ultramarine ash being the last and least valuable product. Ultramarine is very permanent under all conditions, and is, in color, the purest blue available. Its use is limited, however, by its great cost, and also by the fact that artificial ultramarine is practically as valuable. The color of both natural and artificial ultramarine is a rather dark and intensely chromatic violet blue. The natural ultramarine is only slightly violet, the artificial is very much so. Also called *lazulite-blue*.

2. Azure-stone.—**Artificial ultramarine**, the common ultramarine of commerce, prepared by grinding together a mixture of clay, carbonate of soda, sulphur, and rosin: discovered about 1830 by the chemist Gmelin, and now produced on a large scale in Germany, France, and the United States. The mixture is heated in closed crucibles in a furnace for several hours, and slowly cooled. A greenish porous cake is the product. This is the green ultramarine of commerce. The material is again powdered and again subjected to calcination, when upon cooling there results the proper blue color. It has never been determined to what cause this color is due. Certain variations in the proportion of the ingredients produce violet-blue colors. Also *French*, *Guimet*, *new*, and *permanent blue*.—**Green ultramarine.** See *artificial ultramarine*, above.—**Native ultramarine.** Same as def. 1.—**Yellow ultramarine**, barium chromate. See *barium*.

II. *a.* Situated or being beyond the sea.

The loss of the *ultramarine* colonies lightened the expenses of France. *Burke*, State of the Nation.

Ultramarine ashes, the residuum of lapis lazuli after the ultramarine has been extracted, used as a pigment by some old masters as a middle or neutral tint for flesh, skies, and draperies: it is a purer and tenderer gray than that produced by mixture of more positive colors. *Fairholt*.—**Ultramarine blue.** See I.—**Ultramarine green.** See *green*[1].

ultramicroscopic, ultramicroscopical (ul-trä-mī-krọ-skop'ik, -i-kạl), *a.* Beyond the power of a microscope to make visible; too small to be seen with a microscope. *Amer. Meteor. Jour.*, III. 131.

ultramontane (ul-trä-mon'tān), *a.* and *n.* [= F. *ultramontain* = Sp. Pg. It. *ultramontano*, < NL. **ultramontanus*, < L. *ultra*, beyond, + *montanus*, of or pertaining to a mountain, < *mon(t-)s*, mountain. Cf. *transmontane*.] **I.** *a.* Being or lying beyond the mountains; tramontane: opposed to *cismontane*. Specifically—(*a*) Lying or belonging to the north of the Alps, in reference to Italy: the sense in which the epithet was originally used. *Tramontane* is now more generally employed. (*b*) Lying to the south of the Alps—that is, beyond the mountains as regards the countries to the north of the Alps; Italian; specifically, of or belonging to the Italian party in the Church of Rome; holding the doctrines of ultramontanism.—**Ultramontane party**, in *German politics*, the Center party, which opposes legislation supposed to be inimical to the Church of Rome.

II. *n.* One who resides beyond the mountains; a foreigner. Specifically—(*a*) Formerly, one who resided north of the Alps; hence, one who maintains the rights of the northern churches, as the Gallican, in opposition to the claims of universal supremacy put forth for the popes; one who is unfavorable to papal claims of supremacy and infallibility.

He is an *ultramontane*, of which sort there hath been none [no pope] these fifty years. *Bacon*, Obs. on a Libel.

To the petition of the Bannerets of Rome for a promotion of Cardinals, he [Pope Urban VI.] openly avowed his design to make so large a nomination that the Italians should resume their ascendancy over the *Ultramontanes*.
Milman, Latin Christianity, xiii. 1.

(*b*) One who resides south of the Alps, or who identifies himself with the Italian party in the Roman Catholic Church, and maintains the doctrine of absolute papal supremacy. See *ultramontanism*.

To the *Ultramontane*, holding that the temporal welfare no less than the eternal salvation of men depends on submission to the Church, it is incredible that Church-authority has but a transitory value.
H. Spencer, Study of Sociol., p. 299.

ultramontanism (ul-trä-mon'tā-nizm), *n.* [= F. *ultramontanisme* = Sp. Pg. *ultramontanismo*; as *ultramontane* + *-ism*.] The doctrines of ultramontanes; the views of that party in the Church of Rome which places an absolute authority in matters of faith and discipline in the hands of the Pope, in opposition to the views of that party which would place the national churches, such as the Gallican, in partial independence of the Roman curia, and make the Pope subordinate to the statutes of an ecumenical council. According to ultramontanism, the Pope is superior to general councils, independent of their decrees, and is considered to be the source of all jurisdiction in the church. The Vatican Council of 1869–70 virtually established the views of ultramontanism as dogmas of the Roman Catholic Church.

ultramontanist (ul-trä-mon'tā-nist), *n.* [< *ultramontane* + *-ist*.] One of the ultramontane party; a promoter of ultramontanism.

ultramundane (ul-trä-mun'dān), *a.* [< L. *ultra*, beyond, + *mundus*, world: see *mundane*.] 1. Being beyond the world, or beyond the limits of the solar system: as, *ultramundane* spaces. *Boyle*, Works, V. 140.

These atoms [all atoms in space] he [Le Sage] calls *ultramundane* corpuscles, because he conceives them to come in all directions from regions far beyond that part of the system of the world which is in any way known to us.
Encyc. Brit., III. 46.

2. Being beyond this world, or the physical sphere of existence.

ultranominalistic (ul-trä-nom″i-nạ-lis'tik), *a.* Maintaining that nothing is real but individual substances, and that all resemblances and other relations are words, and nothing more.

ultrapartizan (ul-trä-pär'ti-zạn), *a.* Partizan in the extreme; offensively partizan.

ultra-Pauline (ul-trä-pâ'lin), *a.* Excessively Pauline; rigidly attached to the doctrines of the apostle Paul. *The Congregationalist*, June 28, 1883.

ultra-Protestant (ul-trä-prot'es-tạnt), *a.* Protestant in the extreme.

ultra-Protestantism (ul-trä-prot'es-tạn-tizm), *n.* Ultra-Protestant doctrines or methods.

A spirit of *ultra-Protestantism* mingled with and became an animating principle of the opposition which was raised against his [James II.'s] assaults upon the constitution.
Sir E. Creasy, Eng. Const., p. 275.

ultra-red (ul'trä-red), *a.* Beyond the red: used of the invisible heat-rays, less refrangible than those forming the lower or red part of the spectrum, more commonly called the *infra-red* rays. See *spectrum*.

ultra-religious (ul″trä-rē-lij'us), *a.* Religious in the extreme; excessively religious.

They were all prophetical, Toryish, *ultra-religious*.
Carlyle, in Froude (First Forty Years), II. viii.

ultra-sensual (ul-trä-sen'sū-ạl), *a.* Above or beyond the sensual. *Carlyle*, in Froude (First Forty Years), II. xvi.

ultra-violet (ul'trä-vī″ọ-let), *a.* Beyond the violet: used of the invisible rays of the spectrum which are more refrangible than the violet, and consequently lie beyond them. See *spectrum*.

ultra vires (ul'trä vī'rēz). [L.: *ultra*, beyond (see *ultra-*); *vires*, acc. pl. of *vis*, strength, power: see *vim*.] Beyond one's power; specifically, beyond the legal or constitutional power of a person, court, or corporation. In the law of corporations an act is said to be *ultra vires*—(*a*) when it is not within the scope of the powers of the corporation to perform it under any circumstances or for any purpose; or (*b*) with reference to the rights of members, when the corporation is not authorized to perform it without their consent; or (*c*) with reference to some specific purpose, when it is not authorized to perform it for that purpose.

ultra-virtuous (ul-trä-vėr'tū-us), *a.* Pharisaic.

An *ultra-virtuous* Irish Barney.
George Eliot, Silly Novels by Lady Novelists.

ultra-zodiacal (ul″trä-zō-dī'ạ-kạl), *a.* Passing beyond the zodiac.—**Ultra-zodiacal planet**, one of the planetoids between the orbits of Mars and Jupiter: so called because most of them have orbits much inclined to the ecliptic.

ultromotivity (ul″trō-mō-tiv'i-ti), *n.* [< L. *ultro* (see *ultroneous*) + *motivity*.] Capability of spontaneous movement.

ultroneous (ul-trō'nē-us), *a.* [< LL. *ultroneus*, of one's own accord, voluntary, < L. *ultro*, spontaneously, on his, their, etc., part, lit. on the other side, beyond, further, abl. neut. of *ulter*, < *ulter*, being on the other side: see *ultra-*, *ulterior*.] Spontaneous; voluntary. *Jer. Taylor*.—**Ultroneous witness**, in *Scots law*, a witness who offers his testimony without being regularly cited.

ultroneously (ul-trō'nē-us-li), *adv.* In an ultroneous manner; of one's own free will. *Sir W. Hamilton*.

ultroneousness (ul-trō'nē-us-nes), *n.* The character of being ultroneous; spontaneity.

Ulula (ū'lū-lä), *n.* [NL. (Cuvier, 1817, after Barrère, 1745), < L. *ulula*, a screech-owl.] 1.

Ulula A genus of hoot-owls. It has been variously applied, but is now usually regarded as a synonym of *Syrnium*. Compare *ullet*. See cut under *hawk-owl*.—2. A genus of neuropterous insects. *Rambur*, 1842.

ululant (ul'ū-lant), *a.* [< L. *ululan(t-)s*, ppr. of *ululare*, howl, yell: see *ululate*.] Ululating; howling; hooting or screeching, as an owl.

ululate (ul'ū-lāt), *v. i.*; pret. and pp. *ululated*, ppr. *ululating*. [< L. *ululatus*, pp. of *ululare* (> It. *ululare*, *ulolare* = Sp. Pg. *ulular*), howl, screech: see *owl*.] 1. To howl, as a dog or a wolf. *Sir T. Herbert*, Travels, p. 113.—2. To hoot or screech, as an owl.

ululation (ul-ū-lā'shọn), *n.* [< L. *ululatio(n-)*, a howling, a wailing, < *ululare*, howl: see *ululate*.] A howling, as of the wolf or dog; a wailing.

If a temporal loss fall on us, we entertain it with *ululations* and tears. *Rev. T. Adams*, Works, I. 415. (*Davies.*)

There sighs, complaints, and *ululations* loud
Resounded through the air.
Longfellow, tr. of Dante's Inferno, iii. 22.

Ululinæ (ū-lū-lī'nē), *n. pl.* [NL., < *Ulula* + *-inæ*.] A subfamily of *Strigidæ*, containing owls of the genus *Ulula* and some others.

Ulva (ul'vä), *n.* [NL., < L. *ulva*, sedge.] A genus of algæ, typical of the family *Ulvaceæ*, having a flat membranaceous bright-green frond. *U. latissima* and *U. Lactuca* are sometimes eaten. See *green laver* (under *laver*[2]), *sea-lettuce* (under *lettuce*), and *Enteromorpha*.

Ulvaceæ (ul-vā'sē-ē), *n. pl.* [NL., < *Ulva* + *-aceæ*.] A small family of fresh- or brackish-water algæ belonging to the *Chlorophyceæ*. They have a flat or tubular frond of a bright-green color, composed of either one or two layers of cells. Propagation is by means of zoöspores and gametes as well as vegetatively.

ulvaceous (ul-vā'shius), *a.* In *bot.*, resembling or belonging to *Ulva* or the *Ulvaceæ*.

ulwan (ul'wạn), *n.* [E. Ind.] Plain cloth of the shawl-wool of cashmere, such as is seen in the plain center of embroidered India shawls.

ulyie, ulzie (ül'yē), *n.* Scotch forms of *oil*. *Scott*, Pirate, xvii.

um-. [< ME. *um-*, *umbe-*, *embe-*, < AS. *ymb-*, *ymbe-*, *embe-*, prefix, *ymbe*, *ymb*, prep., around, about, = OS. *umbi* = OFries. *um* = D. *om-* = MLG. *um-* = OHG. *umbi*, *umpi*, *umbe*, MHG. *umbe*, G. *um* = Icel. *umb*, *um* = Sw. Dan. *om*, around, about, = L. *ambi-* = Gr. *ἀμφί-* = Skt. *abhi*, against, about, also used as a prefix: see *ambi-*, *amphi-*, etc. This prefix exists, unrecognized, in *ember*[2] as used in comp. *ember-days*: see *ember*[2].] A prefix of Anglo-Saxon and Scandinavian origin, meaning 'around, about,' cognate with *ambi-* and *amphi-*. It was formerly common, but is now wholly obsolete, except in a few Scotch words.

umbar†, *n.* Same as *umber*[1], 4.

umbe, *prep.* [ME., also *embe*, < AS. *ymbe*, *ymb*, around, about: see *um-*.] Around; about; after. [Obsolete except in dialectal use in composition.]

To speke so *embe* noȝt.
Early English Poems and Lives of Saints (ed. Furnivall), [xix. 164.

[They] hade meruell full mekull of that mayne place,
Of the walles that wroght were wondurly faire,

Destruction of Troy (E. E. T. S.), l. 4956.

umbecast (um'be-kȧst), *v. i.* To cast about; make a circuit.

The hound came fast after, and *umbecast* about, for she had lost the perfect fewt of the hind.
Sir T. Malory, Morte d'Arthur, III. cxxiv.

★ **umbel** (um'bel), *n.* [= F. *ombelle* = Sp. *umbela* = Pg. It. *umbella*, < NL. *umbella*, an umbel, < L. *umbella*, a sunshade, parasol, umbrella, dim. of *umbra*, a shade, shadow: see *umbra*.] 1. An inflorescence consisting of a number of flower-stalks or pedicels, nearly equal in length, spreading from a common center, their summits forming a level, convex, or even globose surface, more rarely a concave one, as in the carrot. See cuts under *inflorescence*, *Thapsia*, and *Œnanthe*.—2. In *zoöl.*, an umbelliform tuft, cluster, or group of parts, as of polypites borne upon a polypidom. See cut under *Umbellularia*.—**Compound, simple umbel.** See the adjectives.—**Universal umbel**, in *bot.*, a primary or general umbel; the first or largest set of rays in a compound umbel: opposed to *partial umbel*. A universal involucre is not infrequently placed at the foot of a universal umbel.

umbella (um-bel'ạ), *n.*; pl. *umbellæ* (-ē). [NL.: see *umbel*.] In *bot.*, an umbel.

umbellal (um'be-lạl), *a.* [< *umbella* + *-al*.] In *bot.* and *zoöl.*, same as *umbellate*; specifically, in *bot.*, of or pertaining to the *Umbellales*: as, the *umbellal* alliance. *Lindley.*

Umbellales (um-be-lā'lēz), *n. pl.* [NL. (Lindley, 1833), < *umbella*, umbel: see *umbel*.] In Lindley's system, an alliance of dicotyledonous choripetalous plants including the *Apiaceæ*, *Araliaceæ*, *Cornaceæ*, *Hamamelidaceæ*, and *Bruniaceæ*. In that of Bentham and Hooker it is called a cohort and restricted to the first three of these families.

umbellar (um'be-lär), *a.* [< *umbella* + *-ar*[3].] In *bot.* and *zoöl.*, same as *umbellate*.

umbellate (um'be-lāt), *a.* [= It. *umbellato*, < NL. **umbellatus*, < *umbella*, umbel: see *umbel*.] 1. In *bot.*, bearing umbels; arranged in umbels; umbel-like: as, *umbellate* plants, flowers, or clusters.—2. In *zoöl.*, having an umbel, as a polyp; umbelliferous; having the shape of an umbel; umbelliform.

umbellated (um'be-lā-ted), *a.* [< *umbellate* + *-ed*[2].] In *bot.* and *zoöl.*, same as *umbellate*.

umbellately (um'be-lāt-li), *adv.* In an umbellate manner. *De Bary*, Fungi (trans.), p. 153.

umbellet (um'be-let), *n.* [< *umbel*, *umbella*, + *-et*.] A little or partial umbel; an umbel formed at the end of one of the primary rays of a compound umbel; an umbellule. See cut under *Osmorrhiza*.

umbellifer (um-bel'i-fėr), *n.* [< NL. *umbellifer*: see *umbelliferous*.] In *bot.*, a plant of the family *Apiaceæ*, the *Umbelliferæ* of most authors.

Umbelliferæ (um-be-lif'ę-rē), *n. pl.* [NL. (A. L. de Jussieu, 1789), fem. pl. (sc. L. *plantæ*, plants) of *umbellifer*: see *umbeliferous*.] The name longest in use for the family of dicotyledonous choripetalous plants now called the *Apiaceæ* by botanists who require all family names to be based on the name of a typical genus, this latter name having been given it by Lindley in 1836, who took the genus *Apium* as the type. It includes about 258 genera, divided into 11 tribes and 1600 species. They are natives chiefly of north temperate regions, especially numerous in Europe and Asia, reaching the arctic zone and mountains within the tropics, also numerous in the temperate parts of South America, South Africa, Australia, and New Zealand. Most of the species are herbs with dissected alternate leaves of many ternate or pinnate leaflets, the petiole commonly dilated into a sheathing base. The flowers are small, usually white or yellow, and borne in simple or compound umbels, generally furnished with a row of narrow bracts forming an involucre or involucel. Each flower consists commonly of five small imbricated petals, as many stamens inflexed in the bud, and an ovary crowned with an epigynous two-lobed disk which rises into two conical stylopodia, each tipped with a distinct filiform style. The fruit is commonly traversed by canals (oil-tubes or *vittæ*) filled with a liquid or gummy oil of a highly penetrating and characteristic odor. The genera resemble one another closely, and are distinguished mainly by the ridges, the oil-tubes, and the commissure or inner face of the fruit; each carpel bears five primary ridges (*juga*), and frequently also five intermediate secondary ones, the channels (*valleculæ*) between them often containing oil-tubes. Many are proterogynous, or mature their pistils earlier than the stamens, thus securing cross-fertilization. The family is one of strongly marked properties; many umbelliferous plants contain a poisonous, acrid, watery liquid, especially the hemlock (see also *Conium*, *Cicata*, *Œnanthe*, and *Æthusa*). Many species yield stimulating gum-resins, as asafetida, asadulcis, galbanum, opopanax, and gum ammoniacum (see also *Ferula*, *Thapsia*, and *Laserpitium*). Others contain a carminative aromatic oil, and furnish condiments, as anise, dill, caraway, coriander, and cumin. From another group these principles are nearly absent, and the stem or leaf becomes edible, as parsley, celery, and samphire, or the root, as the carrot, parsnip, and skirret. Others are of great medicinal repute, as fennel and species of *Eryngium* and *Angelica*. The family is remarkable for its little resemblance or close relationship to any other except the *Araliaceæ*, which are, however, readily distinguished by their usually fleshy fruit, often of more than two carpels. Perhaps no other family is so free from variation or from exceptional forms, although in a few genera the characteristic habit is greatly disguised—as in *Eryngium*, where the umbels are replaced by compact heads; *Hydrocotyle*, with roundish undivided leaves; and *Xanthosia*, with broad and showy white involucres.

umbelliferous (um-be-lif'ę-rus), *a.* [< NL. *umbellifer*, bearing an umbel, < *umbella*, umbel, + L. *ferre* = E. *bear*[1].] In *bot.*, bearing an umbel or umbels; of or pertaining to the *Umbelliferæ*: as, an *umbelliferous* genus.

umbelliform (um-bel'i-fôrm), *a.* [< NL. *umbella*, umbel, + L. *forma*, form.] Forming an umbel, or having its form.

Umbellularia (um-bel-ū-lā'ri-ạ), *n.* [NL. (Nuttall, 1842), from the umbellate flowers: < *umbellula*, a little umbel: see *umbellule*.] 1. A genus of dicotyledonous trees, of the family *Lauraceæ* and tribe *Cinnamomeæ*, characterized by umbelliform flower clusters inclosed before blooming in a globular envelop. The only species, *U. Californica*, the spice-tree (which see), mountain-laurel, or Californian bay-tree, is a tall smooth Californian tree, reduced southward and in the mountains to a small shrub. It bears alternate veiny and odorous evergreen leaves, and numerous short-pedicelled yellowish-green flowers, each umbel at first included in a caducous globose involucre, and followed by one or two roundish dark-purple drupes.

Umbellularia grœnlandica.

2. In *zoöl.*, a genus of deep-sea alcyonarian polyps, having the polypites clustered in an umbel on top of the polypidom, and a long slender stalk somewhat bulbous at the base, as in *U. encrinus* or *U. grœnlandica*. *Lamarck*, 1801.

umbellulate (um-bel'ū-lāt), *a.* [< NL. **umbellulatus*, < **umbellula*, an umbellule: see *umbellule*.] In *bot.*, provided with or arranged in umbellules or umbellets.

umbellule (um-bel'ūl), *n.* [< NL. **umbellula*, dim. of *umbella*, umbel: see *umbel*.] A partial umbel; an umbellet. See *umbel*.

umber[1] (um'bėr), *n.* [Also *umbre*, formerly also *omber* (def. 2); < ME. *umber*, < OF. (and F.) *ombre*, shade, shadow, umber (fish), = Sp. *umbra*, *umbla*, umber (fish), = It. *umbra*, shade, < L. *umbra*, shade, shadow, a fish so called: see *umbra*.] 1. Shade.

Or floures sweete of vyne or other tree
In *umber* dried may reserved be.
Palladius, Husbondrie (E. E. T. S.), p. 198.

2. A fish, the grayling. See *Thymallus*.

Salvian takes him [the grayling] to be called *Umber* from his swift swimming, or gliding out of sight more like a shadow or a ghost than a fish.
I. Walton, Complete Angler, p. 121.

3. The umber-bird.—4†. Same as *umbrel*, 3.

umber[2] (um'bėr), *n.* and *a.* [Formerly also *umbre*, *ombre*, *oumber*; < F. *ombre* (= It. *ombra*), umber (short for *terre d'ombre*) (= It. *terra di ombra* = Pg. *terra de ombria*), umber, lit. 'shade-earth' (cf. Sp. *sombra de Venecia*, Venetian umber; *tierra de sombras*, umbra), < L. *umbra*, shade, shadow: see *umber*[1].] **I.** *n.* A natural pigment somewhat resembling an ocher, but darker and browner, due to the presence of oxid of manganese. It probably originally came from Umbria in Italy, but now the best varieties come from Cyprus. The natural earth is called *raw umber*. When it is heated to almost a red heat in a furnace, the brown hydrated oxid of iron is changed into the red oxid of iron, and the pigment becomes redder and deeper in color, and is called *burnt umber*. Both these umbers are very important colors, both for artists and in house-painting. They are permanent, pure in tone, and of great service in making various tints.

I'll put myself in poor and mean attire,
And with a kind of *umber* smirch my face.
Shak., As you Like it, i. 3. 114.

These figures are (at least) as big as the life; they are donne only with *umber* and shell gold, and the shadowed *umbre*, as in the pictures of the gods on the dores of Verulam-house. *Aubrey*, Lives, Francis Bacon.

Burnt umber. See def.—**Raw umber**, a highly chromatic but very dark yellow color, like that of the pigment so called. Owing to the small luminosity, it appears greenish, or tending slightly toward olive; but under high illumination it is seen to incline a little toward orange. Its luminosity is about one fourth that of bright chrome-yellow.

II. *a.* Of a brown color; dark; dusky.

The *umber* shade
That hides the blush of waking day.
J. R. Drake, Culprit Fay, xxxii.

umber[2] (um'bėr), *v. t.* [< *umber*[2], *n.*] To color with umber, or as with umber; shade or darken.

Red-ochre rascals *umbered* with soot and bacon as the English gipsies are. *Middleton*, Spanish Gypsy, ii. 1.

Thy dark cloud, with *umber'd* lower,
That hung o'er cliff, and lake, and tower.
Scott, Marmion, v., Int.

I thought the *umbered* meerschaum was dearly bought at the cost of a brain enfeebled and a will enslaved.
O. W. Holmes, Autocrat, v.

umber-bird (um'bėr-bėrd), *n.* The shadow-bird, umber, or umbrette, *Scopus umbretta*, an African altricial grallatorial bird allied both to the storks and to the herons, about as large as the night-heron. It is somber-colored, of a dusky brown, with an occipital crest, lives in the woods, and builds a huge domed nest in trees, in which it lays from three to five white eggs. See cut under *Scopus*.

umberer (um'bėr-ėr), *n.* The vizor of a helmet.

And then Sir Lamorake kneeled downe and unlaced first his *umberere* and then his owne; and then either kissed other with weeping teares.
Sir T. Malory, Morte d'Arthur, II. xli.

umbery (um'bėr-i), *a.* [< *umber*[2] + *-y*[1].] Of or pertaining to umber; of the color of umber; dark-brown; dark; dusky.

umbilic (um-bil'ik), *n.* and *a.* [< L. *umbilicus:* see *umbilicus.*] **I.** *n.* In *geom.*, a point of a surface where the radii of curvature are all equal, and a sphere osculates the surface. The number of umbilics, real and imaginary, on a surface of the *n*th order, is $n(10n^2-28n+22)$. With the older geometrical writers, an umbilicus is a focus; and an umbilic in the modern sense is analogous to a focus.—**Conical umbilic,** a conical point of a surface.

II. *a.* Same as *umbilical.*

umbilical (um-bil'i-kal), *a.* [= F. *ombilical* = Sp. Pg. *umbilical* = It. *umbilicale,* < NL. **umbilicalis* (cf. LL. *umbilicaris:* see *umbilicar*), < L. *umbilicus,* navel: see *umbilicus.*] **1.** Of or pertaining to the umbilicus; umbilic; omphalic. —**2.** Formed or placed like a navel; navel-shaped; central.

> *N. and Q.,* 7th ser., V. 493.

Umbilical arteries, the continuation of the hypogastric arteries in the fetus from the umbilicus to the placenta, forming, with the umbilical vein, the most essential part of the umbilical cord. These arteries convey venous blood from the fetus to be oxygenated in the placenta. See *urachus.*—**Umbilical cord.** (*a*) In *anat.* See *cord*[1], and cut under *uterus.* (*b*) In *bot.*, same as *funicle,* 4 (*a*).—**Umbilical fissure, hernia, notch.** See the nouns.—**Umbilical perforation,** the large open umbilicus of certain cephalopods, as the nautiloids.—**Umbilical points,** in *math.*, same as *foci.* See *focus.*—**Umbilical region.** See *abdominal regions,* under *abdominal.*—**Umbilical ring,** the fibrous circumference of the navel, through which hernia may protrude.—**Umbilical sac.** Same as *umbilical vesicle.*—**Umbilical veins** (paired at first, usually only one of them persistent), the veins communicating between the placenta and the fetus, along the navel-string, and within the body of the fetus thence to the liver and vena portæ and ductus venosus, and consequently between the placenta and general venous system of the fetus. They convey arterialized blood from the placenta to the fetus; at birth they are partly cast off with the navel-string, partly degenerate into the round ligament of the liver.—**Umbilical vesicle.** See *vesicle.*—**Umbilical vessels,** in *anat.*, the umbilical arteries and vein or veins: chiefly allantoic structures, to be distinguished from the omphalomeseraic vessels of the umbilical vesicle. See cuts under *embryo* and *uterus.*

umbilicar (um-bil'i-kär), *a.* [< LL. *umbilicaris,* pertaining to the navel, < L. *umbilicus,* navel: see *umbilic* and *umbilicus.*] In *math.*, of or pertaining to an umbilic.—**Umbilicar focal conic.** See *focal.*—**Umbilicar focus,** a focus having a real plane of contact.

Umbilicaria (um-bil-i-kā'ri-ä), *n.* [NL. (Hoffman, 1789), < LL. *umbilicaris,* umbilical: see *umbilicar.*] A genus of gymnocarpous lichens, mostly growing on rocks, natives of temperate and arctic regions. In times of scarcity some of the arctic species are used as food, as *U. arctica,* the so-called famine-bread. See *lichen,* 1.

Umbilicariei (um-bil"i-kā-rī'ē-ī), *n. pl.* [NL., < *Umbilicaria.*] A family of gymnocarpous lichens of some authors, having a horizontal foliaceous blackish-brown coriaceous thallus attached to the substratum at a single point.

umbilicate (um-bil'i-kāt), *a.* [< L. *umbilicatus,* navel-shaped, < *umbilicus,* navel: see *umbilicus.*] **1.** Shaped like a navel; resembling a navel, as being round and depressed or concave, or as being focal or central, as some pit or depression; umbilicated; umbiliform.—**2.** Having an umbilicus or umbilicated formation, as a shell or a feather, or marks of the sculpture of an insect; pitted, as a pustule.

umbilicated (um-bil'i-kā-ted), *a.* [< *umbilicate* + *-ed*[2].] Same as *umbilicate.*

umbilication (um-bil-i-kā'shon), *n.* [< *umbilicate* + *-ion.*] A central navel-like depression, like that seen in vesicles of vaccinia or of smallpox; also, the condition of having such a depression.

umbilicular (um-bi-lik'ū-lär), *a.* [Appar. intended for *umbilicar,* < LL. *umbilicaris,* pertaining to the navel: see *umbilicar.*] Of or pertaining to the navel; hence, intensely introspective, in allusion to Indian mystics alleged to attain great sanctity by continuous contemplation of the navel.

> This change in tone . . I attribute to a great extent to the new vistas opened up by the school of evolutionists, and by the writers who have drawn attention off mere *umbilicular* contemplation, such as Morris, Rossetti, and Swinburne.
> ★ *Pop. Sci. Mo.,* XXII. 513.

umbilicus (um-bi-lī'kus), *n.*; pl. *umbilici* (-sī). [= F. *ombilic* (also *nombril*) = Sp. *ombligo* = Pg. *embigo* = It. *umbilico,* < L. *umbilīcus,* navel, akin to Gr. *ὀμφαλός,* navel: see *navel,* and cf. *numbles.*] **1.** In *anat.* and *zoöl.*, the more or less nearly central point in the walls of the abdomen where the yolk-bag or umbilical vesicle of the embryo hangs, or where the navel-string or umbilical cord enters the belly; the navel; the omphalos. With the absorption of the yolk-bag or the casting off of the navel-string, the umbilicus remains as a characteristic mark or scar. In man it is a little round pit or depression, its center being hollowed in by the traction of the umbilical vessels inside the belly, as these degenerate into fibrous cords passing to the liver and to the bladder, forming the round ligament of the former and the urachus of the latter viscus.

Hence—**2.** Some navel-like formation; some circumscribed depression or elevation; a sort of button, or a place in which a button might fit: when elevated instead of depressed, oftener called *umbo.* Specifically—(*a*) In *conch.*, a circular and more or less centric pit or hollow of the body-whorl of a spiral shell; an umbilicated formation. It is well shown in the figure of the snail herewith. (*b*) In *ornith.*: (1) The little pit or depression on the scape of a feather, at the junction of the rachis and calamus, where the vanes begin to grow. (2) The contracted opening at that end of a feather which is inserted into the skin. These are also known as the *superior umbilicus* and *inferior umbilicus* respectively, the former being at the top and the latter at the bottom of the calamus.

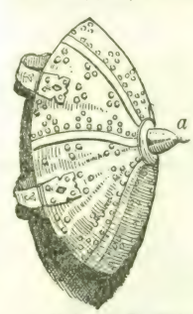
a, Umbilicus of a snail (*Helix lapicida*).

3. In *bot.*: (*a*) [*cap.*: A. P. de Candolle, 1801.] A genus of plants. See *Cotyledon,* 2. (*b*) [*l. c.*] The part of a seed by which it is attached to the placenta; the hilum. See cut under *hilum.* (*c*) [*l. c.*] A depression or an elevation about the center of a given surface. *Henslow.*—**4.** In *antiq.*, an ornamented or painted ball or boss fastened upon each end of the stick on which manuscripts were rolled. —**5.** In *geom.*, a term used by the older geometers as synonymous with *focus;* in modern works, a point in a surface through which all lines of curvature pass.—**6.** The raised central boss of a large plateau or dish, often made to fit the hollow foot of the ewer which stands upon it and forms one design with the dish.

umbiliferous (um-bi-lif'ę-rus), *a.* [< L. *umbili(cus),* the navel, + *ferre* = E. *bear*[1].] Having an umbilicus or navel-like formation.

umbiliform (um'bi-li-fôrm), *a.* [< L. *umbili(cus),* the navel, + *forma,* form.] Having the form or aspect of the umbilicus; like a navel.

umblet (um'bl), *a.* An old spelling of *humble*[3].



> Religioun *umble* and trewe also.
> *Rom. of the Rose,* l. 6154.

umble-pie (um'bl-pī), *n.* Same as *humble-pie.*

umblest, *n. pl.* The entrails of a deer: same as *numbles.*

> This day I had a whole doe sent me by Mr. Hozier, which is a fine present, and I had the *umbles* of it for dinner.
> *Pepys,* Diary, III. 301.

umbo (um'bō), *n.*; pl. *umbones* (um-bō'nēz). [NL., < L. *umbo(n-),* the boss of a shield, any boss, knob, projection, also poet. a shield; akin to Gr. *ἀμβων,* a boss, elevation, pulpit (see *ambo*), and to L. *umbilicus,* Gr. *ὀμφαλος,* navel: see *umbilicus.*] **1.** The boss of a shield, central in the case of a circular shield. The umbo was sometimes hollow, convex toward the outer side and within allowing the hand to pass into the hollow and grasp a transverse bar; this form occurs especially in small round shields (see *buckler*); sometimes the umbo terminated in a spike which was a formidable weapon of offense.

a, Umbo on Rondache Shield of the Carlovingian period. (From Viollet-le-Duc's "Dict. du Mobilier français.")

2. A boss or knob. (*a*) In *bot.*, the knob in the center of the pileus or cap of an agaricoid fungus. (*b*) In *zoöl.*, a small circumscribed protuberance or convex umbilicus; a button-like formation. Specifically—(1) In *conch.*, the beak of a bivalve shell; the protuberance of each valve above the hinge. The umbo represents the apex of a conoidal figure, and is usually a mere protuberance; sometimes, however, it is greatly prolonged into a kind of horn, which may even be twisted or spirally turned. See cuts under *dimyarian, Plicatula,* and *Mytilus.* (2) In echinoderms, a pore-plate; one of the little elevated ambulacral plates or pieces which are perforated for the passage of pedicels or tube-feet. See cut under *ambulacrum.* (3) In *entom.*, one of certain movable bosses, each surmounted by a spine, on the prothorax of some beetles, as of the genus *Macropus,* of *Acrocinus longimanus,* etc. *Kirby and Spence.* (*c*) In *anat.*, a prominence of the tympanic membrane, or drum of the ear, at the point where the handle of the malleus is attached.

umbonal (um'bō-nal), *a.* [< L. *umbo(n-),* a boss, knob, + *-al.*] Protuberant, like a knob, boss, or umbo; umbonic; umbonate: as, an *umbonal* formation.—**Umbonal area** or **region,** in *conch.*, a part of each valve of a bivalve toward the umbo and within the pallial line; that part of the shell which is delimited by the mantle-margin.

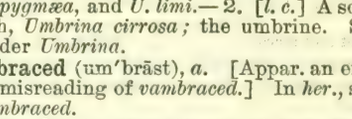
umbonate (um'bō-nāt), *a.* [< NL. **umbonatus,* < L. *umbo(n-),* a boss, knob.] **1.** Having a boss or umbo, as a shield or disk of any sort.—**2.** In *zoöl.*: (*a*) Formed into an umbo, a boss, or a knob; button-like; umbonal; umbonic. (*b*) Having an umbo, as a shell; bearing umbones of this or that kind; umbonated: as, both valves strongly *umbonate.*—**3.** In *bot.*, bearing an umbo or boss in the center, as the pileus of many species of *Agaricus.*

umbonated (um'bō-nā-ted), *a.* [< *umbonate* + *-ed*[2].] Same as *umbonate.*

umbonation (um-bō-nā'shon), *n.* [< *umbonate* + *-ion.*] The formation of an umbo; an umbo.

> Simple or forked spines, hair-like processes, *umbonations,* etc. *H. C. Wood,* Fresh-Water Algæ, p. 101.

umbones (um-bō'nēz), *n.* Plural of *umbo.*



umbonic (um-bon'ik), *a.* [< L. *umbo(n-),* a boss, knob, + *-ic.*] Of or pertaining to an umbo; umbonal. *Huxley,* Anat. Invert., p. 406.

umbonulate (um-bon'ū-lāt), *a.* [< NL. **umbonulus,* dim. of L. *umbo(n-),* a boss, knob: see *umbo.*] In *bot.*, terminated by a very small boss or umbo.

umbra[1] (um'brä), *n.*; pl. *umbræ* (-brē). [NL., < L. *umbra,* shade, shadow: see *umber*[1], *umber*[2]. Hence ult. *umbel, umbrel, umbrella, umbrere, penumbra, adumbrate,* etc.] **1.** A shadow or shade. Specifically, in *astron.*: (*a*) The total shadow of the earth or moon in an eclipse; the dark cone projected from a planet or satellite on the side opposite to the sun. See *penumbra* (with cut). (*b*) The dark central part of a sun-spot, which is surrounded by a brighter annular part called the *penumbra.* See cut under *sun-spot.*

2. Among the Romans, one who went to a feast merely at the solicitation of one invited: so called because he followed the guest as a shadow.—**3.** In *alg.*, a symbol which, when paired with another, makes the symbol of a quantity. See *umbral notation,* under *umbral.* —**Umbra recta,** twelve times the cotangent of an angle; **umbra versa,** twelve times the tangent of an angle. These terms are derived from dialing, and refer to two scales upon an astrolabe.

Umbra[2] (um'brä), *n.* [NL. (Gronovius; Cuvier and Valenciennes, 1846), < L. *umbra,* a fish, the umber: see *umber*[1].] **1.** The only genus of *Umbridæ;* the mud-minnows. See *minnow,* 2 (*c*),

Mud-minnow (*Umbra pygmæa*).

and *Umbridæ.* There are three species, one in Europe and two in North America, *U. krameri, U. pygmæa,* and *U. limi.*—**2.** [*l. c.*] A sciænoid fish, *Umbrina cirrosa;* the umbrine. See cut under *Umbrina.*

umbraced (um'brāst), *a.* [Appar. an error for or misreading of *vambraced.*] In *her.*, same as *vambraced.*

umbracle† (um'brā-kl), *n.* [< L. *umbraculum,* anything that furnishes shade, a shade, shady place, umbrella, dim. of *umbra,* shade: see *umbra.*] A shade; umbrage.

> That Tree (that Soull-refreshing *umbracle*
> Together with our sinne) His Shoulders teares.
> *Davies,* Holy Roode, p. 15.

umbracula, *n.* Plural of *umbraculum.*

umbraculate (um-brak'ū-lāt), *a.* [< NL. **umbraculatus,* < L. *umbraculum,* umbrella: see *umbracle.*] In *entom.*, noting the head when nearly covered by a frontal process which falls over the face and eyes, shading it like an umbrella, as in a few *Orthoptera.*

umbraculiferous (um-brak-ū-lif'ę-rus), *a.* [< L. *umbraculum,* umbrella, + *ferre* = E. *bear*[1].] In *bot.*, bearing an organ or part in the form of an expanded umbrella. See cut under *pitcher-plant.*

umbraculiform (um-brak'ū-li-fôrm), *a.* [< L. *umbraculum,* umbrella, + *forma,* form.] Having the general form of an umbrella, as a mushroom. See cut under *Agaricus.*

umbraculum (um-brak'ū-lum), *n.*; pl. *umbracula* (-lä). [NL., < L. *umbraculum,* umbrella: see *umbracle.*] In *bot.*, any one of certain umbrella-shaped appendages. See cut under *pitcher-plant.*

umbræ, *n.* Plural of *umbra.*

umbrage (um'brāj), *n.* [< F. *ombrage,* shade, shadow, < L. *umbraticus,* of or pertaining to shade, being in retirement, < *umbra,* shade,

shadow: see *umbra*, *umber*[1].] **1.** Shade; a shadow; obscurity.

We are past the twilights of conversion, and the *umbrages* of the world, and walk in the light of God.
Jer. Taylor, Works (ed. 1835), I. 841.

His [Wordsworth's] angels and fiends are human thoughts and feelings, and he can awake them at will from the *umbrage* of the old Rydal woods.
Noctes Ambrosianæ, April, 1832.

2. That which affords a shade; specifically, a screen of trees or foliage.

The linnets warble, captive none, but lur'd
By food to haunt the *umbrage;* all the glade
Is life, is music, liberty, and love.
W. Mason, English Garden, iv.

Into trackless forest set
With trees, whose lofty *umbrage* met.
Wordsworth, Tour in Scotland (1814), The Brownie's Cell.

3. A slight appearance; an apparition; a shade.

Some of them being *umbrages* . . . rather than realities. *Fuller*, Holy War, v. 25. (*Encyc. Dict.*)

A penitent is not taken with *umbrages* and appearances, nor quits a real good for an imaginary.
Jer. Taylor, Works (ed. 1835), I. 183.

The opinion carries no show of truth nor *umbrage* of reason on its side. *Woodward.*

4. The feeling of being overshadowed, as by another standing in one's light or way; hence, suspicion of slight or injury; offense; resentment.

I say, just fear, . . . not out of *umbrages*, light jealousies, apprehensions afar off, but out of clear foresight of imminent danger. *Bacon*, War with Spain.

So they parted for that time without the least *Umbrage* of Discontent, nor do I hear of any engendered since.
Howell, Letters, I. iii. 23.

The Persian ambassador . . . did not care to see any Franks, the port being very suspicious, and the minister very wisely avoided giving *umbrage* without any reason.
Pococke, Description of the East, II. ii. 100.

No part of Henry's conduct gave such *umbrage* to his nobles as the facility with which he resigned himself to the control of favorites. *Prescott*, Ferd. and Isa., i. 3.

=**Syn. 4.** See *pique*[2] and *animosity*.

umbrage (um'brāj), *v. t.*; pret. and pp. *umbraged*, ppr. *umbraging*. [< *umbrage*, *n.*] To shade.

A ridge or hillock heavily *umbraged* with the rounded foliage of evergreen oaks. *Harper's Mag.*, LXXVI. 733.

umbrageous (um-brā'jius), *a.* [Formerly also *umbragious;* < F. *ombrageux*, shady, < *ombrage*, shade: see *umbrage*.] **1.** Forming or affording a shade; shading; shady.

Consider but the rudiment of a tall and *umbrageous* tree, from so minute a seed as may be borne away by every blast. *Evelyn*, True Religion, I. 29.

Ash far-stretching his *umbrageous* arm.
Cowper, Task, i. 311.

Do they play as formerly with thy crisp glossy curls, so delicate and *umbrageous?*
Landor, Imag. Conv., Alcibiades and Xenophon.

2. Shaded; shady: as, an *umbrageous* glen.

Umbrageous grots and caves
Of cool recess. *Milton*, P. L., iv. 257.

3†. Obscure; doubtful, as if from being darkened or shaded; hence, suspicious; "rather shady."

In the present constitution of the Court (which is very *ombrageous*). *Sir H. Wotton*, Reliquiæ.

4†. Apt or disposed to take offense; taking umbrage.

umbrageously (um-brā'jius-li), *adv.* In an umbrageous manner.

umbrageousness (um-brā'jius-nes), *n.* The state or quality of being umbrageous; shadiness: as, the *umbrageousness* of a tree.

umbraid† (um-brād'), *v. t.* [ME. *umbrayden, umbreyden;* < *um-* + *braid*[1]. Cf. *upbraid*.] To upbraid.

Whan she of his falsenesse him *umbreyde*.
Chaucer, Good Women, l. 1671.

I *umbrayde* one, I cast one in the tethe of an offence that he hath done. . . . What though he have done a mysse, it was nat thy parte to *umbrayde* hym.
Palsgrave, p. 766.

umbraid†, *n.* Strife; contention. *Halliwell.*

umbral (um'bral), *a.* [< *umbra* + *-al*.] Pertaining to an umbra.—**Umbral notation**, a notation for determinants invented by the French mathematician Vandermonde (1735–96) in 1772, but substantially known to Leibnitz. Each element of the determinant is represented as the product of two letters, one for the row, the other for the column, which letters do not, of course, denote quantities, but only the numerical position of the row or column, so that the product of one of one set by one of the other is equal to a quantity. If the umbral multiplication is commutative, the determinant is symmetrical; if polar, it is skew symmetrical. The name was given by Sylvester.

Umbral (um'bral), *n.* [< L. *umbra*, shade, twilight, + *-al*.] In the classification of the Paleozoic series of Pennsylvania, according to H. D. Rogers, a group of rocks of great thickness, belonging to the Carboniferous, and lying between the Seral or Millstone-grit (Pottsville) and the Vespertine (Pocono). It is equivalent to the formation called *Mauch Chunk*, and its sandstones, shales, and limestones attain a thickness of 3000 feet.

umbrate† (um'brāt), *v. t.* [< L. *umbratus*, pp. of *umbrare* (> F. *ombrer*), shade, overshadow, < *umbra*, shade, shadow: see *umber*[1].] To shade; shadow; foreshadow.

umbrated (um'brā-ted), *a.* [< *umbrate* + *-ed*[2].] In *her.*: (*a*) Shadowed, or casting a shadow. (*b*) Same as *entrailed*. Neither of these uses is strictly heraldic.

Those ensignes which are borne *umbrated*.
Bossewell, Workes of Armorie (1572), p. 25. (*Encyc. Dict.*)

umbratic† (um-brat'ik), *a.* [< L. *umbraticus*, of or pertaining to shade or shadow, being in retirement, secluded, < *umbra*, shade: see *umbra*, *umber*[1]. Cf. *umbrage*.] **1.** Shadowy; foreshadowing; hence, casting shadows.

Those *umbratick* representations (or insinuations) did obtain their substance, validity, and effect.
Barrow, Sermons, II. xxvii.

2. Keeping in the shade or in retirement; secluded; retired.

umbratical† (um-brat'i-kal), *a.* [< *umbratic* + *-al*.] Same as *umbratic*.

Whole volumes dispatched by the *umbratical* doctors on all sides. *B. Jonson*, Discoveries.

umbratile† (um'bra-til), *a.* [< L. *umbratilis*, remaining in the shade, retired, < *umbra*, shade: see *umbra*.] **1.** Being in the shade or in retirement; secluded.

Health that hath not been softened by an *umbratile* life still under the roof. *Bacon.*

We must not . . . play the geometrician with our soul, as we may with lines and figures, and things obnoxious to our senses, in this *umbratile* state and dependence.
Evelyn, True Religion, I. 56.

2. Pertaining to or resembling a shadow or shadows; shadowy.

Shadows have their figure, motion,
And their *umbratile* action from the real
Posture and motion of the body's act.
B. Jonson, Magnetick Lady, iii. 3.

3. Unreal; unsubstantial.

This life that we live disjoyned from God is but a shadow and *umbratil* imitation of that.
Dr. H. More, Philos. Poems, p. 337, notes.

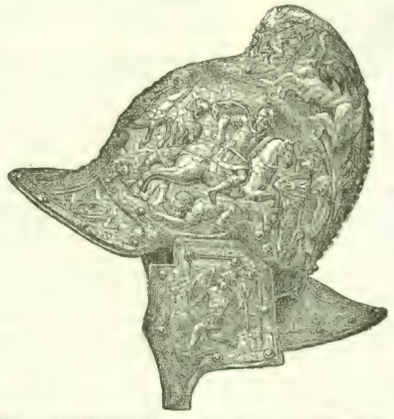
umbration (um-brā'shon), *n.* [< LL. *umbratio(n-)*, a shading, shadowing, < L. *umbrare*, pp. *umbratus*, shade: see *umbrate*.] **1.** A foreshadowing; adumbration.

Nor all this by transient and superficial knowledge, figures, and *umbrations*, but immediate and intuitive notices.
Evelyn, True Religion, I. 241.

2. In *her.*, same as *adumbration*.

umbratious† (um-brā'shus), *a.* [Irreg. var. of *umbrageous*, after *umbratic*, etc.: see *umbrageous*.] Apt to take umbrage; tetchy. [Rare.]

Age, . . . which . . . is commonly . . . *umbratious* and apprehensive. *Sir H. Wotton*, Reliquiæ.



umbra-tree (um'brä-trē), *n.* Same as *bella-sombra-tree*.

umbre, *n.* See *umber*[1].

umbrel (um'brel), *n.* [< OF. *ombrelle*, an umbrella: see *umbrella*. In def. 3 confused with the form *umbrere*, which is used in the same sense.] **1†.** An umbrella.

Each of them besides bore their *umbrels*.
Shelton, tr. of Don Quixote, i. 8. (*Latham.*)

2†. A lattice. *Halliwell.*—**3.** A defense for the face, attached to a helmet. Also called *shade*. See also cut under *armet*.

Helmet with Umbrel, 16th century. (From "L'Art pour Tous.")

★**umbrella** (um-brel'ä), *n.* [Formerly also *umbrello* (also *umbrel*, q. v.); < It. *ombrella*, *umbrella*, an umbrella, sunshade, dim. of *ombra*, shade, < L. *umbra*, shade: see *umbra*. Cf. *umbracle*, *umbel*, *umbella*.] **1.** A portable shade, screen, or canopy which opens and folds, carried in the hand for the purpose of sheltering the person from the rays of the sun or from rain. The name was formerly given to a sort of fan used to protect the face from the sun, but is now applied to a light canopy of silk, cotton, or other cloth, extended on a folding frame composed of bars or strips of steel, cane, etc., which slides on a rod or stick. A small and light form of umbrella, carried by women as a protection from the rays of the sun, often in gay colors, or ornamented with ribbons, lace, etc., is habitually called a *parasol*. The umbrella had its origin in very remote times in the far East, and in some Asiatic countries it was (and still is) regarded as an emblem of royalty or a mark of distinction. In ancient Greece its use was familiar among women for protection from the sun, and it is frequently represented in vase-paintings and terra-cottas. As a defense from rain or snow it was not used in western Europe till early in the eighteenth century. The word is sometimes used figuratively. Compare *cloak*.

Umbrellaes, that is, things that minister shadow unto them [Italians] for shelter against the scorching heate.
Coryat, Crudities, I. 135.

Umbrello (Ital. *Ombrella*), a fashion of round and broad Fans, wherewith the Indians (and from them our great ones) preserve themselves from the heat of the sun or fire; and hence any little shadow, Fan, or other thing wherewith women guard their faces from the sun.
Blount, Glossographia (1670).

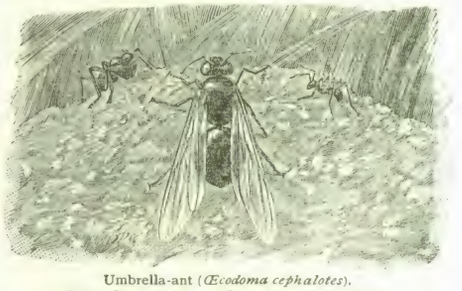
The tuck'd up sempstress walks with hasty strides,
While streams run down her oil'd *umbrella's* sides.
Swift, A City Shower.

The inseparable gold *umbrella*, which in that country [Burma] as much denotes the grandee as the star or garter does in England.
J. W. Palmer, Up and Down the Irrawaddi, p. 90.

Moreover, he [Jonas Hanway] is said to have been the first man who made a practice [about 1750] of using an *umbrella* while walking in the streets of London.
Dict. Nat. Biog., XXIV. 313.

2. In *zoöl.*: (*a*) The gelatinous disk or swimming-bell of an acaleph, as a jellyfish, by the rhythmical contraction and expansion of which the creature swims, taken either with or without the velum. It is usually the largest, most symmetrical, and most coherent part of the jellyfish, from which other parts hang like streamers, either around its margin or from the center of the under surface. If we compare this bell to a woman's sun-umbrella, lined as well as covered with silk, and having a fringe, then the outer or aboral surface is the *exumbrella;* the inner or under lining surface is the *adumbrella*, or adoral surface surrounding the mouth, from which large mouth-parts may hang in the position of the stick or handle of the umbrella; the ring of metal which slides up and down the stick may represent the gastric cavity of the creature, and the metal ribs of the umbrella may suggest the radial canals which go out to the circumference. At points around the margin are the series of adradial, perradial, and interradial sense-organs or other appendages, as tentacles, and where these are long and streaming they represent the fringe of the imagined parasol. See cuts under *acaleph*, *Aurelia*, *Discophora*, and *Willsia*.

In . . . [*Discophora*], the aboral end of the hydranth is dilated into a disk or *umbrella*, which is susceptible of rhythmical contractile movements.
Huxley, Anat. Invert., p. 118.



(*b*) In *conch.* [NL. (Lamarck, 1809).] (1) [*cap.*] A genus of tectibranchiate or pleurobranchiate gastropods; the umbrella-shells, as *U. umbellata*. Also *Ombrella*. (2) A limpet-like tectibranchiate gastropod of the genus *Umbrella* or family *Umbrellidæ;* an umbrella-shell.

Umbrella-shell (*Umbrella umbellata*).

The *umbrellas* are very large creatures, wearing a flat limpet on the middle of the back, not immersed in the mantle. *P. P. Carpenter*, Lect. on [Mollusca (1861), p. 86.

umbrella-ant (um-brel'ä-ant), *n.* A parasol-ant or leaf-carrying ant, which when foraging carries bits of leaves over its back as though for protection, as the sauba-ant, *Œcodoma cephalotes*. See *sauba-ant*.

Umbrella-ant (*Œcodoma cephalotes*).
Center figure, queen; right, worker; left, soldier.

umbrella-bird (um-brel'ä-bėrd), *n.* One of several dragoon-birds, or South American fruit-crows, of the genus *Cephalopterus:* so called

Umbrella-bird (*Cephalopterus ornatus*).

from the radiating crest which overshadows the head, as in *C. ornatus*, *C. penduliger*, and *C. glabricollis*.

Umbrellacea (um-bre-lā'sē-ä), *n.* [NL., < *Umbrella* + *-aceæ*.] Same as *Umbrellidæ*. *Menke*, 1828.

umbrellaed (um-brel'ad), *a.* [< *umbrella* + *-ed*[2].] Having, or protected by, an umbrella. [Colloq.]

The opening door reveals the advent of more *umbrellaed* and mackintoshed waterfalls.
Rhoda Broughton, Alas, i.

umbrella-fir (um-brel'ä-fėr), *n.* Same as *umbrella-pine*.

umbrella-grass (um-brel'ä-gras), *n.* 1. An Australian grass, *Panicum decompositum*, whose millet-like seeds are made by the natives into cakes. Also called *Australian millet*. It is a semi-aquatic plant, often tall and stout, capable of thriving in poor soils.

2. The Australian grass *Aristida ramosa*.—3. A cyperaceous plant of the genus *Fuirena*.

umbrella-leaf (um-brel'ä-lēf), *n.* A plant of the *Berberidaceæ*, *Diphylleia cymosa*, found in wet or springy places in the mountains of Virginia and southward. It has a thick horizontal rootstock sending up each year a huge, centrally peltate, cut-lobed and rounded leaf, or a flowering stem with two leaves, peltate near the side, the stem terminated by a cyme of white flowers. The genus has but one other species, which belongs to Japan.

umbrella-man (um-brel'ä-man), *n.* A dealer who has a small stand under an umbrella.

I learned from one *umbrella man* that, six or seven years previously, he used to sell more portraits of "Mr. Edmund Kean as Richard III." than anything else.
Mayhew, London Labour and London Poor, I. 329.

umbrella-palm (um-brel'ä-päm), *n.* See *umbrella palm*, under *palm*[2].

umbrella-pine (um-brel'ä-pīn), *n.* See *Sciadopitys*.

umbrella-shell (um-brel'ä-shel), *n.* A shell of the family *Umbrellidæ*, and especially of the genus *Umbrella;* an umbrella. See cut under *umbrella*.

umbrella-stand (um-brel'ä-stand), *n.* A stand for holding umbrellas. In a usual form, it has an upright surrounded at a convenient height by a number of rings, through any of which a folded umbrella may be thrust, and a pan at the bottom to receive water trickling from wet umbrellas. Sometimes it has the form of a ★large metal or porcelain jar.

umbrella-tree (um-brel'ä-trē), *n.* 1. An American magnolia, *Magnolia tripetala*, widely distributed, but not common, from Pennsylvania southward and southwestward. It is a tree of 30 or 40 feet, with irregular branches, and leaves 18 or 20 inches long by 8 or 10 inches broad: these, radiating from the ends of the shoots, suggest the name. The flowers are cream-white, 4 or 5 inches deep, unpleasantly scented. The tree is fairly hardy, and frequently planted for ornament. The bark, like that of other magnolias, has the property of a gentle stimulant aromatic tonic. Also called *elkwood* (which see). The screw-pine, *Pandanus tectorius*, is also called by this name.

2. See *Thespesia*.—**Ear-leafed umbrella-tree**, *Magnolia Fraseri*, otherwise called *mountain magnolia* and *long-leafed cucumber-tree*, similar to *M. tripetala*, but having the leaves auriculate at the base, sweet-scented flowers, etc.—**Guinea umbrella-tree**, *Pariti tiliaceum*.—**Umbrella-tree of Queensland**, *Schefflera actinophylla*, of the *Araliaceæ*, a handsome tree 40 feet high.

umbrellawort (um-brel'ä-wėrt), *n.* See *Oxybaphus*.

Umbrellidæ (um-brel'i-dē), *n. pl.* [NL. (J. E. Gray, 1840), < *Umbrella* + *-idæ*.] A family of pleurobranchiate gastropods, named from the genus *Umbrella*. See cut under *umbrella*.

umbrellot (um-brel'ō), *n.* An obsolete form of *umbrella*.

umbrere†, *n.* [Early mod. E. also *umbriere* (also *umber:* see *umber*[1]); < ME. *umbrere*, *oumbrere*, < OF. *ombraire*, **ombriere*, a shade, the shade over the sight of a helmet, sometimes attached to the vizor, < *ombre*, shade: see *umber*[1].] Same as *umbrel*, 3.

Knelis downe to the cors, and kaught it in armes,
Kastys upe his *umbrere*, and kysses hyme sone!
Morte Arthure (E. E. T. S.), l. 3953.

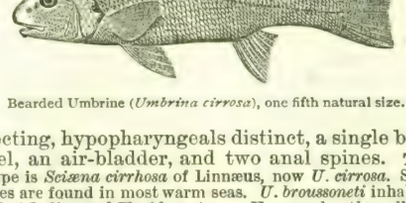
But the brave Mayd would not disarmed bee,
But onely vented up her *umbriere*,
And so did let her goodly visage to appere.
Spenser, F. Q., III. i. 42.

umbrette (um-bret'), *n.* [< F. *ombrette*, dim. of *ombre*, shade.] The umber or umber-bird. See cut under *Scopus*.

Umbrian (um'bri-an), *a.* and *n.* [= F. *Ombrien*, < L. *Umbria*, < *Umbri*, a people of Italy (see def.).] **I.** *a.* Of or pertaining to Umbria, an ancient region of central Italy, and compartimento of the modern kingdom, or its inhabitants or language.—**Umbrian school of painting**, one of the chief groups of development in Italian art, which assumed a distinctive character toward the end of the fourteenth century, and was preëminent at the beginning of the sixteenth. Among its most notable masters were Ottaviano Nelli of Gubbio, Gentile da Fabriano, the graceful Piero della Francesca, Perugino (the able master of Raphael), Pinturicchio, and the wonderfully facile and gifted Raphael of Urbino, with the many lesser names which cluster about his.—**Umbrian ware**, a name formerly given to Italian majolica, from the number of factories of this ware contained within the limits of Umbria.

II. *n.* 1. One of an ancient Italian people who inhabited Umbria.—2. The language of the Umbrians: it was an Italic tongue, allied to Oscan and more distantly to Latin. Its chief monument is the Eugubine tables. See *Eugubine*.

Umbridæ (um'bri-dē), *n. pl.* [NL., < *Umbra* + *-idæ*.] A family of acanthopterygian fishes, typified by the genus *Umbra;* the mud-minnows. They are small carnivorous fishes living in the mud, or among the weeds of ponds and sluggish streams, extremely tenacious of life, and able to survive when the water is almost dried up. The relationships of the family are close with the pikes (*Esocidæ*). See *minnow*, and cut under *Umbra*.



umbrieret, *n.* See *umbrere*.

umbriferous (um-brif'e-rus), *a.* [< L. *umbrifer*, shade-giving, shady, < *umbra*, shade, + *ferre* = E. *bear*[1].] Casting or making a shade. *Blount*, Glossographia (1670).

umbriferously (um-brif'e-rus-li), *adv.* So as to make or cast a shade: as, "growing *umbriferously*," *Tyndall*.

umbril†, *n.* Same as *umbrel*.

Umbrina (um-brī'nä), *n.* [NL. (Cuvier, 1817), < Sp. *umbrina*, < L. *umbra*, shade, shadow: see *umbra*.] 1. A genus of sciænoid fishes, having the dorsals contiguous, the second dorsal much larger than the anal, vertebræ about 10 abdominal and 14 caudal, lower jaw not pro-

Bearded Umbrine (*Umbrina cirrosa*), one fifth natural size.

jecting, hypopharyngeals distinct, a single barbel, an air-bladder, and two anal spines. The type is *Sciæna cirrhosa* of Linnæus, now *U. cirrosa*. Species are found in most warm seas. *U. broussoneti* inhabits West Indian and Florida waters. *U. roncador*, the yellow-finned roncador of the Pacific coast, is one of the handsomest sciænoids, about 15 inches long.

2. [*l. c.*] A fish of this genus; an umbra or umbrine.—3. In *entom.*, a genus of dipterous insects. *Desvoidy*, 1830.

umbrine (um'brin), *n.* [< F. *umbrine* (Cotgrave), < NL. *umbrina:* see *Umbrina*.] A fish of the genus *Umbrina;* an umbra; specifically, *U. cirrosa*, known to the ancients, now the *corvo* of the Italians, ranging in the Mediterranean, and southward along the west coast of Africa. See cut under *Umbrina*.

umbrose (um'brōs), *a.* [= F. *ombreux* = Sp. Pg. *umbroso* = It. *ombroso*, < L. *umbrosus*, full of shade, shady, < *umbra*, shade, shadow: see *umbra*.] 1†. Shady; casting a large shadow or heavy shade. *Bailey*, 1731.—2. In *ornith.*, dusky; dark-colored.—**Umbrose warbler**†. See *warbler*.

umbrosity† (um-bros'i-ti), *n.* [< L. as if **umbrositā(t-)s*, < *umbrosus*, shady: see *umbrose*.] The state or quality of being umbrose; shadiness. *Sir T. Browne*, Vulg. Err., ii. 1.

umiak (öm'yak), *n.* [Eskimo *umiak*, also written *oomeak*.] The native name of the women's or larger kind of Eskimo boat, carrying ten or twelve people, and consisting of a wooden frame covered with sealskins, with several seats. It is used for fishing and for transporting families, and is worked by women. It often has a mast and a triangular sail.

umlaut (öm'lout), *n.* [< G. *umlaut*, modification of vowels, < *um*, around, about, also indicating change, alteration (see *um-*), + *laut*, sound: see *loud*.] In *philol.*, the German name, invented by Grimm, for a vowel-change in the Germanic languages, brought about by the influence of a vowel in the succeeding syllable: namely, of the vowel *i*, modifying the preceding vowel in the direction of *e* or *i*, and of the vowel *u*, modifying the preceding vowel toward *a* or *u*. Only the former, or the change by a following *i* (now generally lost or altered), is found in English or German: thus, German *mann*, *männer;* *fall*, *fällen;* *maus*, *mäuse;* *fuss*, *füsse;* etc.; in English the phenomena are only sporadic remains, like *man*, *men;* *fall*, *fell;* *mouse*, *mice;* *foot*, *feet*. In Icelandic both kinds of umlaut are frequent and regular changes. An English name sometimes used for 'umlaut' is *mutation*. Compare *ablaut*.

umlaut (öm'lout), *v. t.* [< *umlaut*, *n.*] In *philol.*, to form with the umlaut, as a form; also, to affect or modify by umlaut, as a sound.

We have the *umlauted* ü (ÿ).
The Academy, March 17, 1888, p. 190.

umpirage (um'pīr-āj), *n.* [< *umpire* + *-age*.] The post of an umpire; the act of one who arbitrates as umpire; the decision of an umpire; arbitrament.

I gave him the first notice of the Spaniards referring the *umpirage* of the peace 'twixt them and Portugal to the French King. *Evelyn*, Diary, April 11, 1666.

umpire (um'pīr), *n.* [< ME. *umpere*, *oumpere*, *owmpere* (a form due to misdivision of *a numpere* as *an umpere*); prop. *nompere*, *noumpere*, *nounpere*, *nounpier*, < OF. **nomper*, *nonper*, later *nompair*, not equal, odd, < *non*, not, + *per* (< L. *par*), equal: see *non*[3] and *par*[2], *pair*[1], *peer*[2].] 1. A person to whose sole decision a controversy or question between parties is referred; one agreed upon as a judge, arbiter, or referee in case of conflict of opinions; specifically, a person selected to see that the rules of a game, as cricket or base-ball, are enforced, and to decide disputed or debatable points. In American intercollegiate foot-ball the umpire is judge of the conduct of the players, while the referee's duties are more specifically connected with the progress of the ball.

'Twixt my extremes and me this bloody knife
Shall play the *umpire*.
Shak., R. and J., iv. 1. 63.

2. In *law*, a third person called in to decide a controversy or question submitted to arbitrators when the arbitrators do not agree in opinion.=**Syn. 1.** *Arbitrator*, *Referee*, etc. See *judge*.

umpire (um'pīr), *v.;* pret. and pp. *umpired*, ppr. *umpiring*. [< *umpire*, *n.*] **I.** *trans.* 1. To decide as umpire; settle, as a dispute. *South*, Sermons, VI. ii. [Rare.] Specifically—2. To enforce the rules of (a game), and decide disputed points: as, to *umpire* a game of base-ball.

II. *intrans.* To act as umpire.

We list not to *vmpire* betwixt Geographers, but to relate our Historie. *Purchas*, Pilgrimage, p. 328.

umpireship (um'pīr-ship), *n.* [< *umpire* + *-ship*.] The office of an umpire; arbitrament; umpirage.

We refuse not the arbitrement and *umpiership* of the Holy Ghoste. *Bp. Jewel*, Def. of Apol., p. 63. (*Richardson.*)

umpresst (um'pres), *n.* [For **umpiress*, < *umpire* + *-ess*.] A woman who is an umpire; a female umpire. *Marston*.

umquhile (um'hwīl), *adv.* and *a.* A Scotch form of *umwhile*.

umstroket (um'strōk), *n.* [< *um-* + *stroke*.] Boundary line; extreme edge.

Such towns as stand . . . on the very *umstroke*, or on any part of the utmost line of a map. *Fuller*.

umula (ö'mö-lä), *n.* *Eccles.*, same as *mozetta*.

umwhile (um'hwīl), *adv.* and *a.* [Sc. *umquhile;* < ME. *umwhile*, *umwhyle*, *umwile*, *umquile*, *umbewhile*, orig. two words, *umbe while*, lit. 'at times,' at some time: *umbe*, around, about, at; *while*, time: see *um-*, *umbe*, and *while*.] Formerly; late; whilom. [Obsolete or Scotch.]

There was laughyng and louryng and "let go the cuppe,"
And seten so til euensonge and songen *vmwhile*.
Piers Plowman (B), v. 345.

Throgh whiche treason betydes, & ternys *vmqwhile*
Bolde men to batell and biker with hond;
That draghes vnto dethe, & deris full mony.
Destruction of Troy (E. E. T. S.), l. 2943.

Miss Barbara Clinkscale, daughter to the *umquhile*, and sister to the then existing Clinkscale of that ilk.
Scott, Pirate, iv.

umzumbit (ŭm-zŭm'bit), *n.* [Native name, said to mean 'ironwood.'] A leguminous South African tree, *Milletia Caffra*, or its wood. The tree grows 20 or 30 feet high; its wood is of a brown color, is very hard and close-grained, and is said to surpass lignum-vitæ in resistance to wear, and to be impervious to the teredo; it is used for bearings, walking-sticks, tool-handles, etc.

'un, *n.* A dialectal corruption of *one*. It is common in the southern United States, in the phrases *we 'uns, you 'uns*, a sort of expanded plural, equivalent to *we all, you all*, which are used in much the same way.

un-[1]. [< ME. *un-*, < AS. *un-*, sometimes *on-*, not, = OS. *un-* = OFries. *un-*, *on-* = MD. D. *on-* = MLG. *un-* = OHG. MHG. G. *un-* = Icel. *ū-*, *ō-* (contracted from **un-*, **on-*) = Sw. Dan. *u-* = Goth. *un-* = L. *in-* (see *in-*[3]) = Gr. *ἀν-*, *ἀ-* (see *an-*[5], *a-*[18]) = Skt. *an-*, *a-*; a common negative prefix, meaning 'not.' Cf. *un-*[2].] An inseparable prefix, meaning 'not.' (*a*) It is prefixed to adjectives (including participles) and to adverbs, to express simply the negative, as *unable, unfair, untrue, unwise*, etc., *unbending, unyielding, undoubting, unchanging, unthinking*, etc., *unbent, undoubted, unchanged*, etc., 'not able,' 'not fair,' etc. The adverbs or nouns derived from such adjectives or participles (as *unfairly, unfairness*, etc.) may be regarded as formed from the adjective in *un-*, with the adverbial or noun formative (< *unfair* + *-ly*[2], *unfair* + *-ness*), or as formed from such derived forms by prefixing the negative (< *un-*[1] + *fairly*, *un-*[1] + *fairness*, etc.). (*b*) It is prefixed to some nouns to express the absence, incompleteness, or the contrary of what the noun expresses, as in *unrest, untruth, unwisdom, undress*. Before an adjective in *-ing*[2], *un-* is nearly equivalent to *-less* after a noun: *unresting* is nearly equivalent to *restless, unchanging* to *changeless*, etc. This negative may be prefixed to any adjective or participle whatever, whether of native or of foreign origin. It is equivalent to its cognate *in-*[3] of Latin origin, *an-*[5], *a-*[18] of Greek origin, and also to *non-*, sometimes to *dis-*, etc., of Latin origin (the Latin forms, *in-*[3], etc., being used chiefly before adjectives of Latin origin, but also before other adjectives): thus, *uncomplete, incomplete*, and potentially *noncomplete; unelastic, inelastic, non-elastic; unemphatic, nonemphatic*, etc.; *unreputable, disreputable*, etc. As *un-*[1] may be prefixed to any adjective or participle whatever, it is needless, and it would be impracticable, to include all such formations in the dictionary. In the following pages only such are entered and defined as have had a special development, are used in senses not merely reversing the original adjective, or are in Middle English or Anglo-Saxon use, and so form the basis of all the later compounds, or are for other reasons noteworthy. For the meaning and history of the other forms in *un-*[1], see the corresponding simple forms. Of the forms here entered the etymology is usually obvious, and it is therefore not expressly given, except in the older and the exceptional words; the history will be found under the simple form. See also *un-*[2].

un-[2]. [< ME. *un-*, *on-*, < AS. *un-*, *on-*, *ond-*, *an-*, *and-* (as in *on-lūcan*, unlock, *on-leósan*, unloose, etc.), a particular use of *an-*, *and-*, back, against, = G. *ent-*, etc.: see *and-*, *an-*[2], *a-*[5]. This prefix has been more or less confused with *un-*[1], the notion of reversal in the one (AS. *un-*, *on-*, etc., 'back') being in many cases practically identical with the notion of negation in the other (AS. *un-*, 'not'). There are three different senses possible to a form with the prefix *un-*[2] and the suffix *-ed*[2]—e. g., *unarmed* may mean (*a*) 'not now armed' (< *un-*[1] + *armed*, *p. a.*); (*b*) 'not yet armed' (< *un-*[1] + *armed*, pp.); (*c*) 'that has been deprived of arms,' 'no longer armed' (pp. of *unarm*, i. e. < *unarm* + *-ed*[2]). So *unlocked*, (*a*) 'not now locked' (< *un-*[1] + *locked*, *p. a.*); (*b*) 'not yet locked' (< *un-*[1] + *locked*, pp.); (*c*) 'no longer locked,' 'open' (pp. of *unlock*, i. e. < *unlock* + *-ed*[2]); *unlearned*, (*a*) 'not learned,' 'ignorant' (< *un-*[1] + *learned*, *a.*); (*b*) 'not yet learned' (< *un-*[1] + *learned*, pp.); (*c*) 'no longer learned,' 'rejected' (pp. of *unlearn*, i. e. < *unlearn* + *-ed*[2]); etc.] An inseparable prefix of verbs (generally transitive), meaning 'back,' and denoting the reversal or annulment of the action of the simple verb: as, *undo, unlearn, unlock, unmake*, etc. It is very common as prefixed to verbs made from nouns, implying privation of the object named by the noun, or the qualities connoted by it: as, *unarm, uncowl, unfrock, unhelm, unhorse*, etc., to take off or deprive of one's arms, cowl, frock, helm, horse, etc.; *unman, unsex*, to deprive of the qualities of a man, of sex, etc. When used with verbs denoting utterance (which cannot actually be reversed or undone), it implies retractation: as, to *unsay, unspeak, unswear*, etc. Words with this prefix are much confused with words having the prefix *un-*[1] (see etymology). In the following pages words with the prefix *un-*[2] are generally so marked, while words with the prefix *un-*[1] are left without etymological note, except in special cases. See remarks under *un-*[1].

[Of the thousands of self-explaining words formed with the prefix *un-*[1], some, from frequency or convenience of employment, call for mention though not for definition. A selection of these is given in the following list.]

In the extension of space-construction to the infinitely great we must distinguish between *unboundedness* and infinite extent; the former belonging to the extent relations, the latter to the measure relations. That space is an unbounded three-fold manifoldness is an assumption which is developed by every conception of the outer world; according to which at every instant the region of real perception is completed and the possible positions of a sought object are constructed, and which by these applications is forever confirming itself. The *unboundedness* of space possesses in this way a greater empirical certainty than any external experience. But its infinite extent by no means follows from this.
Riemann, tr. by Clifford.

unbounden† (un-boun'den), *a.* [< ME. *unbounden*; pp. of *unbind*, *v.*] Set free; unwedded.

Phillips.*—**2.** In *paleog.*, noting that variety of majuscule character, or writing, usually found in the earlier manuscripts, as opposed to the later minuscule, or cursive. Uncial characters are distinguished from capitals (that is, capital letters similar to the simplest form of those still in use) by relatively greater roundness, inclination, and inequality in height. In Greek paleography the distinction of capital and uncial is unimportant. In Latin manuscripts the difference is strongly marked, several of the uncial letters approaching in form more or less our present lower-case letters (a, ð*d*, ɛ*e*, *f*, h, l, m, q, u). Uncial manuscripts as old as the fourth century are still extant. This style of writing continued till the eighth or ninth century, the transition to minuscule being called *semiuncial* writing. The term *uncial* was originally a misapplication of St. Jerome's expression *litteræ unciales*, "inch-high" (large, handsome) letters. See *majuscule*.

Prompt. Parv., p. 511.

The spirit of wisdom and *understanding*, the spirit of counsel and might, the spirit of knowledge and the fear of the Lord. Isa. xi. 2.

The power of perception is that which we call the *understanding*. Perception, which we make the act of the *understanding*, is of three sorts: 1. The perception of ideas in our mind. 2. The perception of the signification of signs. 3. The perception of the connection or repugnancy, agreement or disagreement, that there is between any of our ideas. All these are attributed to the *understanding*, or perceptive power, though it be the two latter only that use allows us to say we understand.
Locke, Human Understanding, II. xxi. § 5.

A spirit is one simple undivided active being: as it perceives ideas, it is called the *understanding*, as it produces or otherwise operates about them, it is called the will.
Berkeley, Human Knowledge, i. § 27.

3. The representative faculty; the power of abstract thought; the logical power. Kantian writers restrict understanding to the operation of abstractive thought concerning objects of possible experience.

And thus we discover a power we have of heightening the colour of our ideas, of changing or directing their course by the application of our notice: and the exercise of this power I take to be what is commonly meant by an act of the *understanding*.
A. Tucker, Light of Nature, xii. § 1.

As all acts of the *understanding* can be reduced to judgments, the *understanding* may be defined as the faculty of judging. For we saw before that the *understanding* is the faculty of thinking, and thinking is knowledge by means of concepts.
Kant, Critique of Pure Reason (tr. by Müller), II. 61.

4. Intelligence between two or more persons; agreement of minds; harmony; union of sentiment; also, something mutually understood or agreed upon: as, there was an *understanding* between them.

Chapman, Alphonsus, Emperor of Germany, v. 2.

unguilty (un-gil′ti), *a.* [< ME. *ungylty, ongulty* (also, with F. term., *ungiltif*), < AS. *ungyltig*, not guilty; as *un-*[1] + *guilty*.] Not guilty; innocent. *Wyclif.*

unguinal (ung′gwi-nal), *a.* [= Sp. *unguinal*, < L. *unguis*, nail, claw: see *unguis*.] Of or pertaining to the unguis, or human nail. [Rare.]

Dr. —— reports a case of reproduction of the entire *unguinal* phalanx of the thumb by a single bone-graft (Pacific Med. Jour.). *Pop. Sci. News*, XXIII. 143.

unguinous (ung′gwi-nus), *a.* [< L. *unguinosus*, full of fat or oil, < *ungere, unguere*, smear, anoint: see *unguent*.] Oily; unctuous; consisting of fat or oil, or resembling it.

unguirostral (ung-gwi-ros′tral), *a.* [< L. *unguis*, nail, claw, + *rostrum*, beak.] Having a nail at the end of the bill, as a duck or goose.

Unguirostres (ung-gwi-ros′trēz), *n. pl.* [NL.: see *unguirostral*.] In *ornith.*, in Nitzsch's classification, the duck family: so called from the nail at the end of the bill: equivalent to the *Lamellirostres* or *Anseres* of authors, exclusive of the flamingos.

unguis (ung′gwis), *n.*; pl. *ungues* (-gwēz). [NL., < L. *unguis*, nail, claw, talon, hoof, = Gr. ὄνυξ, nail, claw: see *nail* and *onyx*.] **1.** A nail, claw, or hoof of any animal.—**2†.** A measure of length, about half an inch.—**3.** In *anat.*: (*a*) The human lacrymal bone: so called because it resembles the human finger-nail: more fully called *os unguis*. (*b*) The hippocampus minor, or calcar, of the brain. Also *unguis avis*, *unguis Halleri*.—**4.** In *entom.*, one of the curved claws at the extremity of an insect's tarsus. Generally there are two of these on each tarsus, but they may be united; sometimes there is a projection or claw-like organ, the onychium or empodium, between the true claws. The ungues are attached to a very small piece, which, according to Huxley, is a true joint, though the preceding joint is generally called the last of the tarsus: this piece may be expanded beneath into a cushion-like organ, the pulvillus. Some entomologists apply the term *unguis* to the last tarsal joint, including the two claws, which are then distinguished as *unguiculi*. The ungues assume various forms, which are of great importance in classification. The two claws may be more or less united or counate, even nearly to the tips. When forming only a slight angle with each other they are said to be divergent, and when spreading widely they are divaricate. They are cleft when each claw is split from the tip so that there is an upper and a lower division; unequally cleft when these divisions are of unequal size; cleft with movable parts when the divisions are movable on each other; bifid when the divisions are side by side instead of one over the other. According to the processes on the lower or concave surface, ungues are toothed when each has one pointed process; serrate when there are several small pointed teeth; serrulate when these processes are fine and bristle-like; pectinate when they are long, slender, and numerous; appendiculate when each claw has a membranous appendicle beneath. The claws may be unequal in size; and when they can be turned back on the last tarsal joint they are said to be subchelate.

5. In *bot.*, the claw or lower contracted part of some petals, by which they are attached to the receptacle, as in the pink, the mustard, *Cleome*, etc. It is analogous to the petiole of a leaf. ★Also *ungula*. See cut under *claw*.

ungula (ung′gū-lä), *n.*; pl. *ungulæ* (-lē). [NL., < L. *ungula*, claw, talon, hoof, dim. of *unguis*, nail, claw, talon, hoof: see *unguis*.] **1.** A slightly hooked or blunt nail—that is, a hoof, as of the horse, ox, etc.; also, a claw or nail of any kind; a talon.—**2.** In *geom.*, a part cut off from a cylinder, cone, etc., by a plane passing obliquely through the base and part of the curved surface: so named from its resemblance to the hoof of a horse.—**3.** In *surg.*, an instrument for extracting a dead fetus from the womb.—**4.** In *bot.*, same as *unguis*, 5.—**5.** [*cap.*] [NL. (Pander, 1830).] A genus of brachiopods: same as *Obolus*, 3, and *Ungulites*.

ungular (ung′gū-lär), *a.* [< *ungula* + *-ar*[3].] Of the character of an ungula; ungual.

Ungulata (ung-gū-lā′tä), *n. pl.* [NL., neut. pl. of LL. *ungulatus*, having claws or hoofs: see *ungulate*.] In the Linnean classification, one of the primary divisions, a subclass or superorder, of *Mammalia*, including all the hoofed quadrupeds except the elephant. In modern systems of classification the *Ungulata* are usually considered as an order embracing all of the hoofed mammals save the elephants and hyraxes, which are placed in the two orders *Proboscidea* and *Hyracoidea*. The discovery of many intermediate extinct forms has led some authorities, such as Sir William Flower and A. Smith Woodward, to extend the limits of the *Ungulata* to include these also.

ungulate (ung′gū-lāt), *a.* and *n.* [< LL. *ungulatus*, having claws or hoofs, < L. *ungula*, claw, talon, hoof: see *ungula*, *unguis*.] **I.** *a.* **1.** Shaped or formed into a hoof; hoof-like; ungulous.—**2.** Hoofed, as a quadruped, like the horse, ox, etc.; belonging to the *Ungulata*. See *bisulcate*, *multungulate*, *solidungulate*, *subungulate*.

II. *n.* An ungulate or hoofed quadruped.

unguled (ung′gūld), *a.* In *her.*, having hoofs: noting ruminant animals. The epithet is used only when the hoofs are of a different tincture from the rest of the bearing.

Unguligrada (ung-gū-lig′rū-dä), *n. pl.* [NL., neut. pl. of *unguligradus:* see *unguligrade*.] A division of ruminant ungulates; the ruminants proper, exclusive of the *Camelidæ;* the *Pecora unguligrada*, contrasted as a series with the *Pecora tylopoda* or *Phalangigrada*, the latter including only the camel family. Also *Ungulograda*.

unguligrade (ung′gū-li-grād), *a.* and *n.* [< NL. *unguligradus*, < L. *ungula*, hoof, + *gradi*, walk.] **I.** *a.* Walking upon hoofs; having true hoofs; cloven-footed, as a ruminant, or solidungulate, as the horse; belonging to the *Unguligrada;* not phalangigrade or tylopod.

II. *n.* An unguligrade quadruped.

Ungulina (ung-gū-lī′nä), *n.* [NL. (Bosco, or Oken, 1815), dim. of L. *ungula*, claw, hoof: see *ungula*.] A genus of bivalves, typical of the family *Ungulinidæ*, whose few species are African, and live on coral.

ungulite (ung′gū-līt), *n.* A brachiopod of the genus *Ungulites* (or *Obolus*).

ungulite-grit (ung′gū-līt-grit), *n.* A division of the Lower Silurian, extending from near Lake Ladoga to beyond Reval on the Gulf of Finland, and characterized by the presence of so-called ungulites (*Obolus apollinis*), one of the characteristic brachiopods of the Cambrian fauna. So named by Pander.

Ungulites (ung-gū-lī′tēz), *n.* [NL. (Bronn, 1848), < L. *ungula*, a hoof.] A genus of brachiopods: same as *Obolus*, 3. Also *Ungula*.

ungulous (ung′gū-lus), *a.* [< L. *ungula*, hoof, + *-ous*.] Pertaining to or resembling a hoof; ungulate.

ungum (un-gum′), *v. t.* [< *un-*[2] + *gum*[2].] To remove gum from; free from gum or a gummy substance, or from stickiness; degum.

unicorn-moth (ū′ni-kôrn-môth), *n.* A North American bombycid moth, of the family *Notodontidæ*, *Schizura unicornis:* so called from the horn on the dorsum of the first abdominal segment of its larva. Also called *unicorn prominent*.

Unicorn-moth (*Schizura unicornis*).

Larva of Unicorn-moth.

unicornous (ū-ni-kôr′nus), *a.* [< L. *unicornis*, one-horned: see *unicorn*.] **1.** Having only one horn: as, *unicornous* beetles. *Sir T. Browne*, Vulg. Err., v. 19.—**2.** Extended into but one oviducal process, as a womb. See *uterus unicornis*.

unicorn-plant (ū′ni-kôrn-plant), *n.* See *Martynia*.

unicorn-root (ū′ni-kôrn-röt), *n.* The blazing-star, *Aletris farinosa*. The false unicorn-root is *Chamælirium luteum*, also called *devil's-bit* and *drooping starwort*. Its root is difficult to distinguish from that of the former, and some medical virtues are also ascribed to it. Also *unicorn's-horn*.

unicorn-shell (ū′ni-kôrn-shel), *n.* A gastropod of the family *Muricidæ*, the lip of whose shell has one large spine like a horn, as of the genus *Monoceros*. See cut under *Monoceros*.

unicorn's-horn (ū′ni-kôrnz-hôrn), *n.* Same as *unicorn-root*.

unicornuted (ū″ni-kôr-nū′ted), *a.* [< L. *unus*, one, + *cornutus*, horned: see *cornute*.] Decorated with one horn: said of a helmet or other object which usually has two horns.

unicorn-whale (ū′ni-kôrn-hwāl), *n.* The narwhal. See *unicorn*, 4.

unicostate (ū-ni-kos′tāt), *a.* [< L. *unus*, one, + *costa*, a rib: see *costate*.] **1.** Having but one rib; in *bot.*, noting those leaves which have one large vein running down the center, called the *midrib*. Those having more than one great division are called *multicostate*.—**2.** In *zoöl.*, having a single costa, rib, or nervure, as an insect's wing.

unicotyledonous (ū-ni-kot-i-lē′don-us), *a.* In *bot.*, having one cotyledon; monocotyledonous.

unicursal (ū-ni-kėr′sal), *a.* [< L. *unus*, one, + *cursus*, course: see *course*[1].] On one path of a moving element.—**Unicursal curve**, a curve which can be expressed as the locus of a point defined by rational functions of a single parameter. Not every unipartite curve is unicursal, because, though such a curve may be expressed in terms of a single parameter, it may be only by means of an irrational function having but one real value; but such curves are only of odd orders. A unicursal curve may have several branches, owing to its passing through infinity.

unicuspid (ū-ni-kus′pid), *a.* and *n.* **I.** *a.* Having but one cusp, as an incisor or canine tooth; unicuspidate: correlated with *bicuspid* and *multicuspid* or *pluricuspid*.

II. *n.* A unicuspid tooth.

unicuspidate (ū-ni-kus′pi-dāt), *a.* [< L. *unus*, one, + *cuspis* (*cuspid-*), point: see *cusp*.] Unicuspid. *W. H. Flower*, Encyc. Brit., XV. 403.

unicycle (ū′ni-sī-kl), *n.* [< L. *unus*, one, + Gr. *κύκλος*, wheel: see *cycle*.] A vehicle with only one wheel: a form of velocipede.

unidactyl, unidactyle (ū-ni-dak′til), *a.* and *n.* [< L. *unus*, one, + Gr. *δάκτυλος*, digit: see *dactyl*.] **I.** *a.* Having a single (functional) digit, as the horse; monodactyl; unidigitate.

II. *n.* A unidigitate or monodactyl animal.

unidactylous (ū-ni-dak′ti-lus), *a.* [< *unidactyl* + *-ous*.] Same as *unidactyl*.

unideaed (un-ī-dē′ad), *a.* Having no ideas or thoughts; not intelligent; senseless; frivolous.

Pretty *unidea'd* girls . . . seem to form the beau ideal of our whole sex in the works of some modern poets.
Mrs. Hemans (Memorials by Chorley, i. 99). (*Davies.*)

unideal (un-ī-dē′al), *a.* **1.** Not ideal; unimaginative; realistic; material; coarse.

This *unideal* character marks his style of writing, which is commonly formal, stiff, and rather prim.
Theo. Parker, Historic Americans, Washington.

Unideal works of art (the studious production of which is termed realism) represent actual existing things, and are good or bad in proportion to the perfection of the representation. *Ruskin*, Modern Painters, iii. 13, § 2.

2. Having no ideas; destitute of ideas, thoughts, or mental action. *Johnson.* [Rare.]

unidealism (un-ī-dē′al-izm), *n.* [< *unideal* + *-ism.*] The quality or state of being unideal; realism; lack of imagination; prosaicism.

His popularity is an emphatic testimony to the singular *unidealism*—I had almost written the congenital imbecility—of the English mind in respect of eternal and divine things. *Fortnightly Rev.*, N. S., XLIII. 80.

unidentate (ū-ni-den′tāt), *a.* [< L. *unus*, one, + *dentatus*, toothed: see *dentate.*] In *bot.* and *zoöl.*, having a single tooth or tooth-like projection.

unidenticulate (ū″ni-den-tik′ū-lāt), *a.* [< L. *unus*, one, + NL. *denticulus*, denticle, + *-ate*[1].] In *bot.* and *zoöl.*, having but one denticle. *Trans. Roy. Soc. of Edin.*, XXXII. 637.

unidigitate (ū-ni-dij′i-tāt), *a.* [< L. *unus*, one, + *digitatus*, fingered: see *digitate.*] Having but one finger or toe; monodactylous.

unidimensional (ū″ni-di-men′shon-al), *a.* Having only one dimension; varying in only one way.

unidirectional (ū″ni-di-rek′shon-al), *a.* [< L. *unus*, one, + *directio(n-)*, direction, + *-al.*] In *elect.*, noting currents which flow in the same direction round a circuit.

uniembryonic (ū-ni-em-bri-on′ik), *a.* In *bot.*, having a single embryo.

unifacial (ū-ni-fā′shal), *a.* [< L. *unus*, one, + *facies*, a face, + *-al.*] Having only one face, front, or aspect; all facing the same way, as the polypites of some corals; unifarious; secund. See cut under *sea-kidney.*

unifarious (ū-ni-fā′ri-us), *a.* [< L. *unus*, one, + *-farius* as in *bifarius*, etc.: see *bifarious, multifarious.*] Set in one rank, row, or series; uniserial; not bifarious or multifarious.

unifiable (ū′ni-fī-a-bl), *a.* [< *unify* + *-able.*] Capable of being unified or made one. *S. Lanier*, The English Novel, p. 147.

unific (ū-nif′ik), *a.* [< L. *unus*, one, + *-ficus*, < *facere*, make. Cf. *unify.*] Making one; forming unity; unifying.

unification (ū″ni-fi-kā′shon), *n.* [= F. *unification* = Sp. *unificación*; < ML. **unificatio(n-)*, < *unificare*, make one: see *unify.*] The act of unifying, or the state of being unified; the act of uniting into one.

The view of reason here taken is opposed to all such views as would make it consist in the logical principle of unity, a principle compelling us to unify all our conceptions, leading, with Kant, up to the three Ideas of the Pure Reason, God, the World, and the Soul. This *unification* is sufficiently provided for by the principle of Parsimony, and the facts on which it rests.
S. H. Hodgson, Time and Space, § 64.

unifier (ū′ni-fī-ėr), *n.* [< *unify* + *-er*[1].] One who or that which unifies.

That History of Culture itself, which is the great *unifier* and justifier and purifier of all our teaching.
W. K. Clifford, Lectures, II. 292.

unifilar (ū-ni-fī′lär), *a.* and *n.* [< L. *unus*, one, + *filum*, a thread, + *-ar*[2].] **I.** *a.* Having only one thread: specifically applied to a magnetometer consisting of a magnetic bar suspended by a single thread. See *magnetometer.*

II. *n.* A unifilar magnetometer.

uniflagellate (ū-ni-flaj′e-lāt), *a.* [< L. *unus*, one, + NL. *flagellum* + *-ate*[1].] Having a single flagellum; monomastigate, as a protozoan. *W. B. Carpenter*, Micros., xi. § 419.

uniflorous (ū-ni-flō′rus), *a.* [< L. *unus*, one, + *flos* (*flor-*), a flower, + *-ous.*] In *bot.*, bearing one flower only: as, a *uniflorous* peduncle.

unifoil (ū′ni-foil), *a.* and *n.* [< L. *unus*, one, + *folium*, a leaf: see *foil*[1].] **I.** *a.* In *her.*, having but one leaf: noting a plant used as a bearing.

II. *n.* In *her.*, a leaf used as a bearing; especially, a leaf represented as having been a dufoil, one leaf being torn away.

unifoliar (ū-ni-fō′li-ăr), *a.* Same as *unifoliate.*

unifoliate (ū-ni-fō′li-āt), *a.* [< L. *unus*, one, + *folium*, a leaf: see *foliate.*] 1. In *bot.*, one-leafed; unifoliar.—2. Same as *unifoliolate.*

unifoliolate (ū-ni-fō′li-ō-lāt), *a.* [< L. *unus*, one, + NL. *foliolum*, a leaflet: see *foliolate.*] Compound in structure, yet having but one leaflet, as the orange-tree.

unifolium[1] (ū-ni-fō′li-um), *n.*; pl. *unifolia* (-ä). [NL., < L. *unus*, one, + *folium*, leaf.] A quartic oval having a single depression.

Unifolium[2] (ū-ni-fō′li-um), *n.* [NL. (Adanson, 1763), so named because the original species, *Valentinia bifolia*, was seemingly one-leafed.] An untenable name given to *Valentinia*, a genus of plants belonging to the family *Convallariaceæ.*

uniforate (ū-ni-fō′rāt), *a.* [< L. *unus*, one, + *foratus*, pp. of *forare*, bore, pierce: see *foramen.*] Having one opening, pore, or foramen.

★**uniform** (ū′ni-fôrm), *a.* and *n.* [I. *a.* F. *uniforme* = Sp. Pg. It. *uniforme*, < L. *uniformis*, having only one shape or form, < *unus*, one, + *forma*, form, shape. Cf. *biform, triform, multiform.* II. *n.* = D. G. Sw. Dan. *uniform*, < F. *uniforme* = Sp. Pg. It. *uniforme*, uniform dress; from the adj.] **I.** *a.* **1.** Having always the same form; not changing in shape, appearance, character, etc.; in general, not variable; unchanging.

All human bodies, for example, though each of them consists of almost an infinite number of parts, are perfectly *uniform* in their structure and functions.
Beattie, Moral Science, ii. 1.

The experience has been *uniform* that it is the gentle soul that makes the firm hero after all.
Emerson, Harvard Commemoration.

(*a*) Not varying in degree or rate; equable; invariable: as, a *uniform* heat; a *uniform* motion (that is, the motion of a body when it passes over equal spaces in equal times).

They [temperature observations] appear to go far to establish a nearly *uniform* temperature for abyssal depths, not far from the freezing-point of fresh water.
C. Wyville Thomson, Depths of the Sea, p. 359.

(*b*) Having only one character throughout; homogeneous.

Sometimes there are many parts of a law, and sometimes it is *uniform*, and hath in it but one duty.
Jer. Taylor, Rule of Conscience, iii. 6.

(*c*) Consistent at all times; not different.

If the Creator is perfect, his action must be *uniform*; anything else would be unworthy of him.
Dawson, Nature and the Bible, p. 31.

(*d*) Not different at different times or places: applicable to all places, or to all divisions of a country: as, a *uniform* tax; a *uniform* bankruptcy law. (*e*) Of the same appearance, pattern, or style.

The practice of clothing soldiers by regiments in one *uniform* dress was not introduced by Louis XIV. till 1665, and did not become general in our army for many years afterward. *Harper's Mag.*, LXXX. 333.

2. Of the same form or character with others; agreeing with each other; conforming to one rule or mode.

The only doubt is about the manner of their unity, how far churches are bound to be *uniform* in their ceremonies.
Hooker, Eccles. Polity.

Uniform acceleration. See *acceleration* (*b*).—**Uniform current,** a continuous current of constant strength.—**Uniform extension, field, function, sandpiper**†**, symmetry,** etc. See the nouns.—**Uniform strain.** Same as *homogeneous strain* (which see, under *strain*[1]).—**Syn.** Unvarying, unchanging, alike, regular, constant, undeviating, consistent.

II. *n.* A dress of the same kind, fabrics, fashion, or general appearance as others worn by the members of the same body, whether military, naval, or any other, by which the members may be recognized as belonging to the particular body: opposed to *plain clothes*, or ordinary civil dress: as, the *uniform* of a soldier, a sailor, or a policeman.

The *uniforms* in the army were plain and serviceable; the most picturesque being that of the Grenadiers, who, Evelyn says, were first introduced in 1678.
Ashton, Social Life in Reign of Queen Anne, II. 202.

The proposed *uniform*, sir, of the Pickwick Club.
Dickens.

uniform (ū′ni-fôrm), *v. t.* [< *uniform, a.*] **1.** To make uniform; reduce to uniformity. *Sir P. Sidney.*

The more than Protean travesties which words underwent before they were *uniformed* by Johnson and Walker.
Lowell, Study Windows, p. 351.

2. To clothe with or as if with a uniform.

This was the first flag bearing the state arms, and was carried by the first *uniformed* company of militia in the State [Michigan]. *Preble*, Hist. Flag, p. 642.

uniformal† (ū-ni-fôr′mal), *a.* [< *uniform* + *-al.*] Uniform; symmetrical.

Her comlye nose with *uniformall* grace,
Like purest white, stands in the middle place.
Herrick, Appendix, p. 433.

uniformitarian (ū-ni-fôr-mi-tā′ri-an), *a.* and *n.* [< *uniformit-y* + *-arian.*] **I.** *a.* Of or pertaining to uniformity or the doctrine of uniformity. See the noun.

The catastrophist and the *uniformitarian* opinions.
Whewell, Hist. of Scientific Ideas, II. 289.

The *uniformitarian* theories of Sir Charles Lyell were regarded as heresies by many.
Westminster Rev., CXXVI. 544.

II. *n.* One who upholds a system or doctrine of uniformity; specifically, in *geol.*, one who advocates the theory that causes now active in bringing about geological changes have always been similar in character and intensity. The term became current especially as a result of the influence of Sir Charles Lyell, who advocated this conception of the course of past geological events in opposition to the earlier catastrophists.

The Catastrophist constructs Theories, the *Uniformitarian* demolishes them.
Whewell, Philos. of Inductive Sciences, I., p. xxxvi.

uniformitarianism (ū-ni-fôr-mi-tā′ri-an-izm), *n.* [< *uniformitarian* + *-ism.*] The theory advocated by uniformitarians: the opposite of *catastrophism.* See *catastrophe*, 3, and *catastrophism.*

The changes of the past must be investigated in the light of similar changes now in operation. This was the guiding principle of the Scottish School, . . . though under the name of *Uniformitarianism* it has unquestionably been pushed to an unwarrantable length by some of the later followers of Hutton. *Geikie*, Geol. Sketches, p. 293.

uniformity (ū-ni-fôr′mi-ti), *n.* [= F. *uniformité* = Sp. *uniformidad* = Pg. *uniformidade* = It. *uniformità*, < LL. *uniformita(t-)s*, uniformity, < L. *uniformis*, uniform: see *uniform.*] The state or character of being uniform, in any sense; absence of variation or difference. (*a*) Maintenance of the same character, course, plan, laws, etc.; sameness; consistency.

There is no *uniformity* in the design of Spenser; he aims at the accomplishment of no one action. *Dryden.*

Queen Elizabeth was remarkable for that steadiness and *uniformity* which ran through all her actions.
Addison.

How far away is the doctrine of *uniformity* [in nature] from fatalism! It begins directly to remind us that men suffer from preventible evils, that the people perisheth for lack of knowledge. *W. K. Clifford*, Lect., II. 263.

We see that only as fast as the practice of the arts develops the idea of measure can the consciousness of *uniformity* become clear.
H. Spencer, Prin. of Psychol. (2d ed.), § 488.

(*b*) Conformity among several or many to one pattern, plan, rule, etc.; resemblance, consonance, or agreement: as, the *uniformity* of different churches in ceremonies or rites.

Houses are built to live in, and not to look on; therefore let use be preferred before *uniformity*, except where both may be had. *Bacon*, Building.

Such is the *uniformity* of almost al the houses of the same streete . . . that they are made alike both in proportion of workmanship and matter.
Coryat, Crudities, I. 30.

The skilful campaign by which the triumph of the Reformation and of *uniformity* was secured.
R. W. Dixon, Hist. Church of Eng., xv.

(*c*) Continued or unvaried sameness or likeness; monotony.

Uniformity must tire at last, though it is a *uniformity* of excellence. *Johnson.*

Acts of Uniformity. See *act.*

uniformize (ū′ni-fôrm-īz), *v. t.*; pret. and pp. *uniformized*, ppr. *uniformizing.* [< *uniform* + *-ize.*] To make uniform; unify. [Rare.]

The other Congress expressed a similar wish for the formation of . . . an International Commission to fix units and *uniformize* methods. *Nature*, XL. 563.

★**uniformly** (ū′ni-fôrm-li), *adv.* In a uniform manner; with uniformity; evenly; invariably.

In a light drab he *uniformly* dress'd.
Crabbe, Tales (Works, IV. 135).

No assigned nor any conceivable attribute of the supposed archetypal vertebra is *uniformly* maintained.
H. Spencer, Prin. of Biol. (Am. ed. 1872), § 210.

When the simultaneous values of a quantity for different bodies or places are equal, the quantity is said to be *uniformly* distributed in space.
Clerk Maxwell, Matter and Motion, xxiii., foot-note.

Uniformly accelerated motion. See *acceleration* (*b*).—**Uniformly retarded motion.** See *retard.*

uniformness (ū′ni-fôrm-nes), *n.* The state or character of being uniform; uniformity. *Berkeley.*

unifoveate (ū-ni-fō′vē-āt), *a.* [< L. *unus*, one, + *fovea*, a small pit: see *foveate.*] In *entom.*, having a single fovea.

unify (ū′ni-fī), *v.*; pret. and pp. *unified*, ppr. *unifying.* [< F. *unifier* = Sp. *unificar* = It. *unificare*, < ML. *unificare*, make one, < L. *unus*, one, + *facere*, make: see *-fy.* Cf. *unific.*] **I.** *trans.* To form into one; make a unit of; reduce to unity or uniformity.

Perception is thus a *unifying* act. *Sir W. Hamilton.*

Unless we succeed in finding a rationale of this universal metamorphosis, we obviously fall short of that completely *unified* knowledge constituting philosophy.
H. Spencer, First Principles, p. 397.

II. *intrans.* To produce unity or uniformity.

These Homeridæ were not the only authors of epic poems, but they had the great advantage over other epic bards that they were a genos, and that they worked continuously from generation to generation on the same poems, adding and *unifying*, and so they produced the epics which have outlived all others.
Classical Rev., II. 256.

unigenital (ū-ni-jen'i-tal), *a.* [< LL. *unigenitus*, only-begotten, < L. *unus*, one, + *genitus*, begotten: see *genital*.] Only-begotten.

unigeniture (ū-ni-jen'i-tūr), *n.* [< LL. *unigenitus*, only-begotten (see *unigenital*), + *-ure*.] The state of being the only-begotten. *Bp. Pearson.*

Unigenitus (ū-ni-jen'i-tus), *n.* [NL., so called from the first word ("*Unigenitus* Dei Filius," etc.): see *unigenital*.] A bull promulgated by Pope Clement XI. in 1713, and directed against Jansenism.

It commenced with the words "Unigenitus Dei Filius," and condemned 101 propositions taken from Quesnel's "Réflexions Morales sur le Nouveau Testament."

unigenous (ū-nij'e-nus), *a.* [< L. *unigena*, only-begotten, born of one parent or of one family or kind, < *unus*, one, + *gignere*, beget. Cf. *unigenital*.] Of one and the same kind; homogeneous.

uniglobular (ū-ni-glob'ū-lär), *a.* Having or consisting of a single globular part or formation. *Geol. Jour.*, XLVII. 6.

unijugate (ū-ni-jö'gāt), *a.* [< L. *unijugus*, having one yoke (< *unus*, one, + *jugum*, yoke), + *-ate*[1].] In *bot.*, having but a single pair of leaflets: said of a pinnate leaf.

unijugous (ū-ni-jö'gus), *a.* In *bot.*, same as *unijugate*.

unilabiate (ū-ni-lā'bi-āt), *a.* [< L. *unus*, one, + *labium*, lip, + *-ate*[1].] Having a single lip or lip-like part: said in entomology of orifices with a single fleshy lip on one side, by which they can be closed.

unilamellate (ū-ni-lam'e-lāt), *a.* [< L. *unus*, one, + NL. *lamella* + *-ate*[1].] Having one lamella or layer; unilaminar.

unilaminar (ū-ni-lam'i-när), *a.* [< L. *unus*, one, + *lamina*, lamina, + *-ar*[2].] Having one lamina; one-layered; single-layered.

unilaminate (ū-ni-lam'i-nāt), *a.* Same as *unilaminar*.

unilateral (ū-ni-lat'e-ral), *a.* [< L. *unus*, one, + *latus* (*later-*), side, + *-ate*[1].] 1. One-sided; of or pertaining to one side only.

We note that, although *unilateral* movements (the more voluntary) are lost, the more automatic (the bilateral) are retained. *Pop. Sci. Mo.*, XXV. 175.

Certain hallucinations, as is well known, are *unilateral*, i. e. are perceived when (say) the right eye or ear is acting, but cease when that action is obstructed, though the left eye or ear is free. *Mind*, X. 170.

Unilateral lesions. *Princeton Rev.*, July, 1879, p. 106.

2. In *bot.*, one-sided; either originating on one side of an axis or all turned to one side, as the flowers of a *unilateral* raceme.—3. Placed on one side only of a surface; unifacial, as a set of polypites.—**Unilateral bond** or **contract**, one which binds one party only.—**Unilateral leaves**, leaves which lean toward one side of the stem, as in *Convallaria multiflora*.—**Unilateral raceme**, a raceme whose flowers grow only on one side of the common peduncle.

unilaterality (ū"ni-lat-e-ral'i-ti), *n.* [< *unilateral* + *-ity*.] The character or state of being unilateral.

This *unilaterality* is insisted on by Salesbury. *Encyc. Brit.*, XXII. 387.

unilaterally (ū-ni-lat'e-ral-i), *adv.* In a unilateral manner; one-sidedly.

The destruction of the occipito-angular region is incomplete, *unilaterally* or bilaterally. *Lancet*, No. 3485, p. 1291.

He recognized thankfully that the government had abandoned the pretension to settle ecclesiastical affairs *unilaterally*. *Contemporary Rev.*, XLX. 282.

uniliteral (ū-ni-lit'e-ral), *a.* [< L. *unus*, one, + *litera*, *littera*, letter: see *literal*.] Consisting of a single letter: as, *Y* is the *uniliteral* name of some moths.

unillumed (un-i-lūmd'), *a.* Not illumined; not lighted up.

And her full eye, now bright, now *unillumed*,
Spake more than Woman's thought.
Coleridge, Destiny of Nations. (*Davies.*)

unilluminated (un-i-lū'mi-nā-ted), *a.* 1. Not illuminated; not lighted; dark.

The outer or "sporting" door was of course wide open; passing through an interior one of green baize, I blundered up a narrow and totally *unilluminated* passage. *C. A. Bristed*, English University, p. 73.

2. Ignorant.

unillusory (un-i-lū'sō-ri), *a.* Not producing or causing illusion, deception, fallaciousness, or the like; not illusory; not deceptive. *Bulwer*, My Novel, iii. 22.

unilobar (ū-ni-lō'bär), *a.* [< L. *unus*, one, + NL. *lobus*, lobe, + *-ar*[2].] Same as *unilobed*.

unilobed (ū'ni-lōbd), *a.* [< L. *unus*, one, + NL. *lobus*, lobe, + *-ed*[2].] In *entom.*, having a single lobe: especially noting the maxillæ of certain insects.

unilocular (ū-ni-lok'ū-lär), *a.* [< L. *unus*, one, + *loculus*, compartment, + *-ar*[2].] In *bot.*, *zoöl.*, and *pathol.*, having but one loculus, cavity, or compartment; single-chambered; monothalamous, as a foraminifer; uniloculate: as, a *unilocular* pericarp or anther; a *unilocular* heart or shell: correlated with *bilocular*, *trilocular*, *quadrilocular*, and *multilocular* or *plurilocular*. Also *monolocular*.

uniloculate (ū-ni-lok'ū-lāt), *a.* [< L. *unus*, one, + *loculus*, compartment, + *-ate*[1].] Same as *unilocular*.

unimaginable (un-i-maj'i-na-bl), *a.* Not imaginable; not capable of being imagined, conceived, or thought of; inconceivable.

Things to their thought
So *unimaginable* as hate in heaven.
Milton, P. L., vii. 54.

On every side now rose
Rocks which in *unimaginable* forms
Lifted their black and barren pinnacles.
Shelley, Alastor.

unimaginableness (un-i-maj'i-na-bl-nes), *n.* The character of being unimaginable; inconceivableness. *Dr. H. More.*

unimaginably (un-i-maj'i-na-bli), *adv.* In an unimaginable manner; inconceivably. *Boyle.*

unimaginative (un-i-maj'i-nā-tiv), *a.* Not imaginative; lacking or not characterized by imagination; prosaic.

unimaginativeness (un-i-maj'i-nā-tiv-nes), *n.* The character of being unimaginative.

Tom was in a state of as blank *unimaginativeness* concerning the cause and tendency of his sufferings as if he had been an innocent shrewmouse imprisoned in the split trunk of an ash tree in order to cure lameness in cattle. *George Eliot*, Mill on the Floss, ii. 1.

unimagined (un-i-maj'ind), *a.* Not imagined or conceived.

Unimagined bliss. *Thomson*, Liberty, iii.

To a long low coast with beaches and heads
That run through *unimagined* mazes.
Lowell, Appledore.

unimitable† (un-im'i-ta-bl), *a.* Inimitable.

Thou art all *unimitable*. *Beau. and Fl.*, Laws of Candy, i. 2.

unimmortal† (un-i-môr'tal), *a.* Not immortal; mortal. *Milton*, P. L., x. 611.

unimodular (ū-ni-mod'ū-lär), *a.* [< L. *unus*, one, + NL. *modulus*, modulus, + *-ar*[2].] Having only one modulus.—**Unimodular transformation**, in *alg.*, a transformation whose modulus is equal to unity.

unimpaired (un-im-pārd'), *a.* Not impaired, in any sense.

My strength is *unimpaired*. *Cowper*, Odyssey, xxi.

unimpassioned (un-im-pash'ond), *a.* Not impassioned; not moved or actuated by passion; uninfluenced by passion; calm; tranquil.

He [Anselm] was exiled; he returned the same meek, unoffending, *unimpassioned* man. *Milman.*

Such small *unimpassioned* revenges have an enormous effect in life. *George Eliot*, Mill on the Floss, iii. 7.

unimpeachability (un-im-pē-cha-bil'i-ti), *n.* The character of being unimpeachable, or not open to objection or criticism; blamelessness. *Contemporary Rev.*, LIV. 343.

unimpeachable (un-im-pē'cha-bl), *a.* Not impeachable; not capable of being impeached, accused, censured, or called in question; free from guilt, stain, or fault; blameless; irreproachable.

The *unimpeachable* integrity and piety of many of the promoters of this petition renders those aspersions as idle as they are unjust. *Burke*, Speech on the Acts of Uniformity.

And let a single helpless maiden pass
Uninjured. *Milton*, Comus, l. 403.

uninomial (ū-ni-nō'mi-al), *a.* [< L. *unus*, one, + *nom(en)*, name, + *-ial*. Cf. *binomial*.] Same as *uninominal*.

uninominal (ū-ni-nom'i-nal), *a.* [< L. *unus*, one, + *nomen* (*nomin-*), name, + *-al*.] Consisting of a single word or term, as a zoölogical or botanical name; also, specifying that system of nomenclature in which objects are designated by such names. See the extract.

Perceiving sundry objections to binomial, etc., some have sought to obviate them by using binominal, *uninominal*, plurinominal, etc. *Coues*, The Auk, VI. 320.

uninquisitive (un-in-kwiz'i-tiv), *a.* Not inquisitive; not curious to search or inquire; indisposed to seek information.

Go loose the links of that soul-binding chain,
Enlarge this *uninquisitive* belief.
Daniel, Civil Wars, vi.

And this not the ruder only, and *uninquisitive* vulgar, but the wisest and most considering persons in all times.
J. Howe, Works, I. 25.

uninscribed (un-in-skrībd'), *a.* Not inscribed; having no inscription. *Pope*, Windsor Forest, l. 320.

uninspired (un-in-spīrd'), *a.* Not inspired: as, *uninspired* writings.

The *uninspired* teachers and believers of the gospel.
Gibbon.

uninstructed (un-in-struk'ted), *a.* **1.** Not instructed or taught; not educated.

When an *uninstructed* multitude attempts to see with its eyes, it is exceedingly apt to be deceived.
Hawthorne, Scarlet Letter, p. 155.

2. Not directed by superior authority; not furnished with instructions.

In an unlucky hour
That fool intrudes, raw in this great affair,
And *uninstructed* how to stem the tide.
Dryden, Don Sebastian, iii. 1.

unintegrated (un-in'tē-grā-ted), *a.* Not integrated; not subjected to a process of integration.

unintelligence (un-in-tel'i-jens), *n.* Want of intelligence; stupidity due to ignorance; unwisdom.

Their *unintelligence*, numbers, and fluctuating association prevented them from anticipating and following out any uniform and systematic measures. *Sir W. Hamilton.*

unintelligent (un-in-tel'i-jent), *a.* Not intelligent. (*a*) Not possessing or not proceeding from intelligence.

What the stream of water does in the affair is neither more nor less than this: by the application of an *unintelligent* impulse to a mechanism previously arranged . . . by intelligence, an effect is produced, viz. the corn is ground.
Paley, Nat. Theol., ii.

(*b*) Not knowing; not having acute mental faculties; not showing intelligence; dull.

Unintelligent persons that want wit or breeding.
Sir M. Hale.

unintelligently (un-in-tel'i-jent-li), *adv.* In an unintelligent manner; without reason; dully.

unintelligibility (un-in-tel"i-ji-bil'i-ti), *n.* The character of being unintelligible.

I omitted, . . . in the Introduction to the Abbot, any attempt to explain the previous story, or to apologize for *unintelligibility*. *Scott*, Abbot, I. 8.

unintelligible (un-in-tel'i-ji-bl), *a.* Not intelligible; not capable of being understood. *Jer. Taylor*, Rule of Conscience, i. 21.

unintelligibleness (un-in-tel'i-ji-bl-nes), *n.* Unintelligibility. *Bp. Croft.*

unintelligibly (un-in-tel'i-ji-bli), *adv.* In an unintelligible manner; so as not to be understood. *Locke.*

unintentional (un-in-ten'shon-al), *a.* Not intentional; not designed; done or happening without design.

It is to be observed that an act may be *unintentional* in any stage or stages of it, though intentional in the preceding: and, on the other hand, it may be intentional in any stage or stages of it, and yet *unintentional* in the succeeding.
Bentham, Introd. to Morals and Legislation, viii. 12.

unintentionality (un-in-ten-sho-nal'i-ti), *n.* [< *unintentional* + *-ity*.] The character of being unintentional; absence of design or purpose.

Unintentionality with respect to the event of the action, unconsciousness with regard to the circumstances.
Bentham, Introd. to Morals and Legislation, xvii. 11.

unintentionally (un-in-ten'shon-al-i), *adv.* Without design or purpose.

uninteressed† (un-in'tėr-est), *a.* Uninterested.

That true honour and *unintressed* respect which I have always paid you. *Dryden*, Troil. and Cres., Ep. Ded.

uninterested (un-in'tėr-es-ted), *a.* **1.** Not interested; not having any interest or property in something specified; not personally concerned: as, to be *uninterested* in business.—**2.** Not having the mind or the passions engaged: as, to be *uninterested* in a discourse or narration.

The greatest part of an audience is always *uninterested*, though seldom knowing. *Dryden.*

=**Syn.** See *disinterested*.

uninteresting (un-in'tėr-es-ting), *a.* Not interesting; not capable of exciting interest, or of engaging the mind or passions: as, an *uninteresting* story or poem.

Mrs. Henfrey . . . was, to all strangers, an absolutely *uninteresting* woman; but her family knew her merits.
Jean Ingelow, Fated to be Free, xviii.

=**Syn.** Dull, tiresome, tedious, wearisome.

uninterestingly (un-in'tėr-es-ting-li), *adv.* In an uninteresting manner.

uninterestingness (un-in'tėr-es-ting-nes), *n.* The character of being uninteresting.

Intense monotony and *uninterestingness* are the chief characteristics of the river. *Nature*, XLII. 544.

unintermitted (un-in-tėr-mit'ed), *a.* Not intermitted; not interrupted; not suspended for a time; continued; continuous: as, *unintermitted* misery. *Macaulay.*

unintermittedly (un-in-tėr-mit'ed-li), *adv.* Without being intermitted; uninterruptedly.

unintermitting (un-in-tėr-mit'ing), *a.* Not intermitting; not ceasing for a time; continuing.

unintermittingly (un-in-tėr-mit'ing-li), *adv.* Unceasingly; continuously.

unintermixed (un-in-tėr-mikst'), *a.* Not intermixed; not mingled. *Daniel*, Civil Wars, vi.

uninterpretable (un-in-tėr'pre-ta-bl), *a.* Incapable of being interpreted: as, *uninterpretable* enigmas.

uninterrupted (un-in-tėr-rup'ted), *a.* Not interrupted; not broken; unintermitted; unceasing; incessant; specifically, in *bot.*, consisting of regularly increasing or diminishing parts, or of parts all of the same size.

uninterruptedly (un-in-tėr-rup'ted-li), *adv.* Without interruption; without disturbance; unintermittedly; unceasingly. *Paley.*

unintricated† (un-in'tri-kā-ted), *a.* Not perplexed; not obscure or intricate. *Hammond.*

unintroduced (un-in-trō-dūst'), *a.* Not introduced; obtrusive. *Young.*

uninuclear (ū-ni-nū'klē-ār), *a.* [< L. *unus*, one, + *nucleus*, nucleus, + *-ar*[2].] Having a single nucleus; uninucleate.

uninucleate (ū-ni-nū'klē-āt), *a.* [< L. *unus*, one, + *nucleus*, nucleus, + *-ate*[1].] Uninuclear.

uninvented (un-in-ven'ted), *a.* Not invented; not found out.

Not *uninvented* that, which thou aright
Believ'st so main to our success, I bring.
Milton, P. L., vi. 470.

uninventive (un-in-ven'tiv), *a.* Not inventive; not having the power of inventing, finding, discovering, or contriving.

In every company there is not only the active and passive sex, but, in both men and women, a deeper and more important sex of mind—namely, the inventive or creative class of both men and women, and the *uninventive* or accepting class. *Emerson*, Complete Prose Works, II. 345.

uninventively (un-in-ven'tiv-li), *adv.* In an uninventive manner; without invention.

uninvestigable (un-in-ves'ti-ga-bl), *a.* Incapable of being investigated or searched out. *Barrow*, Sermons, III. iv.

uninvite (un-in-vīt'), *v. t.* To countermand the invitation of; put off. [Rare.]

One of the houses behind them is infected, . . . so I made them *uninvite* their guests.
Pepys, Diary, Nov. 26, 1665.

Unio (ū'ni-ō), *n.* [NL., < LL. *unio*, the number one, oneness: see *union*.] **1.** The leading genus of bivalves of the family *Unionidæ:* formerly used with great latitude for many species, some of which are now placed in other families as well as in other genera.—**2.** [*l. c.*] A species of this genus; any river-mussel.

uniocular (ū-ni-ok'ū-lär), *a.* [< L. *unus*, one, + *oculus*, eye, + *-ar*[3].] Monocular: opposed to *binocular*. *Lancet*, No. 3487, p. 1416.

Uniola (ū-nī'ō-lä), *n.* [NL. (Linnæus, 1737), < LL. *uniola*, an unknown plant, < *unio*, unity: see *union*.] A genus of grasses, of the tribe *Festuceæ* and subtribe *Eufestuceæ*. It is characterized by an elongated or ample panicle of broad and flat

1, *Uniola latifolia* (Spike-grass); 2, panicle; *a*, spikelet; *b*, floret, showing the flowering glume, the palet, the single stamen, and the pistil.

two-edged spikelets, each with the three to six lower glumes empty. There are about 8 species, all North American, one (*U. paniculata*) extending into Central and South America. *U. virgata* of the West Indies differs in its minute spikelets. The others are tall erect grasses growing in tufts from strong creeping rootstocks. The leaves are broad and flat, or convolute; the panicle loose or dense, or, in *U. laxa*, contracted and wand-like, and in *U. virgata* forming one-sided spikes. In *U. paniculata*, a tall species reaching 8 feet, and *U. latifolia*, a shorter plant with drooping long-pedicelled flowers, the spikelets reach an unusually large size, sometimes 2 inches long and with 30 flowers. *U. latifolia* and *U. laxa* are pasture-grasses; *U. paniculata* is valuable from its binding sea-sands. See *spike-grass* (*c*).

union (ū'nyon), *n.* and *a.* [< F. *union* = Sp. *unión* = Pg. *união* = It. *unione*, < LL. *unio(n-)*, f., oneness, unity, the number one, a uniting, union, L. *unio(n-)*, m., a single large pearl, a single onion (> ult. E. *onion*), < *unus*, one: see *one*. Cf. *unite*, etc.] **I.** *n.* **1.** The act of joining two or more things into one, and thus forming a compound body or a mixture; the state of being united; junction; coalition; combination: as, the *union* of soul and body.

So we grew together,
Like to a double cherry, seeming parted,
But yet an *union* in partition.
Shak., M. N. D., iii. 2. 210.

In the temper of Bacon . . . there was a singular *union* of audacity and sobriety. *Macaulay*, Lord Bacon.

2. In *zoöl.*, *anat.*, and *bot.*: (*a*) The state of close and immediate connection of parts, organs, or tissues, especially of like parts, or the process of becoming so united; a growing together or its result, as in the different cases of symphysis, synostosis, synchrondrosis, ankylosis, confluence, concrescence, coalescence, conjugation, anastomosis, syzygy, zygosis, and the like. See the distinctive words. (*b*) The connection of two or several individuals in a compound organism, as of several zoöids in a zoanthodeme.—**3.** Matrimony; the matrimonial relation, married state, or conjugal bond.—**4.** Concord; agreement and conjunction of mind, will, affections, or interest; harmony.

Lay a foundation for a blessed *Union* among our selves, which would frustrate the great design of our enemies upon us. *Stillingfleet*, Sermons, II. vi.

Now, when a mutual Flame you have reveal'd,
And the dear *Union* of our Souls is seal'd.
Congreve, To Cynthia.

Self-love and social at her birth began;
Union the bond of all things, and of man.
Pope, Essay on Man, iii. 149.

5. That which is united or made into one; something formed by a combination of various parts or individual things or persons; an aggregate of united parts; a coalition; a combination; a confederation; a league.

An amalgamation of the Christian religious *unions* was effected with the sacrificial societies of the pagans. *English Gilds* (E. E. T. S.), p. lxxiii.

(*a*) A confederacy of two or more nations, or of the various states of a nation: in this sense the United States of America is sometimes called by way of preëminence "The *Union*." (*b*) In England and Ireland, two or more parishes consolidated into one for the better administration of the poor-laws. It is in the discretion of the Local Government Board to consolidate any two or more parishes into one union under a single board of guardians elected by the owners and ratepayers of the component parishes. Each union has a common workhouse, and all the cost of the relief of the poor is charged upon the common fund. (*c*) Two or more parishes or contiguous benefices consolidated into one for ecclesiastical purposes. (*d*) An association of independent churches, generally either Congregational or Baptist, for the purpose of promoting mutual fellowship and coöperation in Christian work. It differs from most ecclesiastical bodies in possessing no authority over the churches which unite in it. (*e*) A permanent combination among workmen engaged in the same occupation or trade. See *trade-union*.

[In old days] if here and there a clergyman, a professional man, a politician, or a writer, ventured to raise a voice on behalf of the *Unions*, he was assailed with a storm of ridicule and abuse. *Nineteenth Century*, XXVI. 722.

6. A union workhouse; a workhouse erected and maintained at the joint expense of parishes which have been formed into a union: in Scotland called a *combination poor-house*.

The poor old people that they brick up in the *Unions*. *Dickens*, Our Mutual Friend, II. 264.

7. That part of a flag which occupies the upper corner next the staff when it is distinguished from the rest in color or pattern, as in the flag of the United States, where it is blue with white stars, or in the flag of Great Britain; the jack. When the flag is hoisted on the staff with the union below, it is considered a signal of distress. See *union down*, below.

8. A flag showing the union only. See *union flag* and *union jack*, below.—**9.** A joint, screw, or other connection uniting parts of machinery, or the like; a kind of coupling for connecting tubes together.—**10.** A textile fabric of several materials, or of different kinds of thread.

Then we had an Irish linen, an imitation, you know, a kind of *Union*, which we call double twist. It is made, I believe, in Manchester, and is a mixture of linen and cotton. *Mayhew*, London Labour and London Poor, I. 420.

11. A shallow vat or tray in which partly fermented beer is kept to complete its fermentation or to cleanse itself.—**12†.** A large fine pearl.

In the cup an *union* shall he throw,
Richer than that which four successive kings
In Denmark's crown have worn.
Shak., Hamlet, v. 2. 283.

Sighelmus bishop of Schirburne . . . trauailed thorough India, and returning home brought with him many strange and precious *vnions* and costly spyces. *Hakluyt's Voyages*, II. 5.

Pliny says that the name *unio* was an invention of the fine gentlemen of Rome, to denote only such pearls as could not be matched. *Nares.*

Act of Union, the name by which several statutes organizing the kingdom of Great Britain and Ireland are known. (*a*) A statute of 1535–6, enacting the political union of Wales to England. (*b*) A statute of 1706, uniting the kingdoms of England and Scotland on and after May 1st, 1707. (*c*) A statute of 1800, which united the kingdoms of Great Britain and Ireland on and after January 1st, 1801.—**Apperceptive union.** See *apperceptive*.—**Bony union**, in *surg.*, the knitting of a fracture by callus: opposed to *ligamentous union*.—**Customs union.** See *customs-union* and *Zollverein*.—**Evangelical, hypostatic, Latin, liberal union.** See the adjectives.—**Liberties' Union Act.** See *liberty*.—**Union Assessment Acts.** See *assessment*.—**Union by first intention**, in *surg.*, the healing of a wound without suppuration.—**Union by second intention**, in *surg.*, the healing of a wound by granulation after suppuration.—**Union churches**, a body of Protestant evangelical Christians organized in its present form about 1863. It recognizes no creed except allegiance to the Bible, no test of membership except character, and no ecclesiastical authority superior to that of membership in the local church. Its membership is mainly confined to the Western States in the United States.—**Union down**, said of a flag displaying the union at the bottom instead of in its normal position at the top. A flag hoisted in this position forms a signal of distress.—**Union flag**, the union jack, or national flag of the United Kingdom. The national flag of England was the banner of St. George (heraldically described as argent, a cross gules), and soon after the union of the crowns this was united with the Scottish national flag, or banner of St. Andrew (in the language of heraldry, azure, a saltier argent), thus forming the first union flag. On the legislative union with Scotland in 1707 a new design for the national or union flag was adopted, described in heraldic terms as azure, a saltier argent surmounted by a cross gules fimbriated or edged of the second. On the union with Ireland the red cross or saltier of St. Patrick was introduced, and as thus modified the flag now exists.—**Union jack**, the national ensign of the United Kingdom of Great Britain and Ireland, formed by the union of the cross of St. George (red on a white ground), the diagonal cross or saltier of St. Andrew (white on a blue ground), and the diagonal cross or saltier of St. Patrick (red on a white ground).—**Universal Postal Union.** See *postal*.=Syn. **1–3.** *Union, Unity, Junction, Connection.* *Union* is the act of bringing two or more together so as to make but one: as, the *union* of the Mississippi and the Missouri; *union* in marriage; or it is the state resulting, or the product of the act: as, the American *Union*. *Unity* is only the state of oneness, whether there has or has not been previous distinctness: as, the *unity* of God, the *unity* of faith, *unity* of feeling, interest, labor. *Junction* expresses not simply collocation, but a real and physical bringing into one. *Union* and *junction* differ from *connection* in that the last does not necessarily imply contact: there may be *connection* between houses by a portico or walk. It is literal to speak of the *connection*, and figurative to speak of the *union*, of England and America by a telegraphic cable.

II. *a.* Of or pertaining to a union or to the Union (see I., 5 (*a*)); in favor of the Union: as, the *Union* party; *Union* principles; *Union* sympathies.—**Union Labor party**, in *U. S. politics*, a political party formed in 1887, which drew support from the Greenbackers, farmers' organizations, Knights of Labor, etc. It nominated a candidate for President of the United States in 1888.—**Union man.** (*a*) In the United States, in the period of the civil war, an opponent of secession and upholder of the federal cause. (*b*) A member of a trade-union.—**Union party**, a party which favors the formation or preservation of a union; specifically, the Constitutional Union party. See *constitutional*.

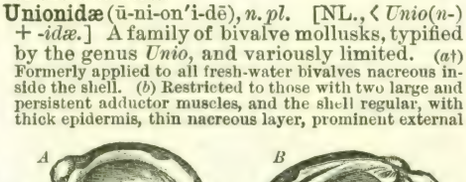
Unionacea (ū″ni-ō-nā′sē-ä), *n. pl.* [NL., ⟨ *Unio*(*n*-) + *-acea*.] A superfamily of integripalliate isomyarian bivalve mollusks, represented by the family *Unionidæ*.

unionacean (ū″ni-ō-nā′sē-an), *a.* and *n.* **I.** *a.* Of or pertaining to the *Unionacea*.

II. *n.* A member of the *Unionacea*.

union-bow (ū′nyon-bō), *n.* A bow made of two or three pieces glued together, as distinguished from the *single-piece bow* or *self-bow*. Also called *back-bow*.

union-cord (ū′nyon-kôrd), *n.* A round white cord made of linen and cotton combined, used for stay-laces, etc. *Dict. of Needlework.*—**Union-cord braid**, a braid composed of two or more cords, usually a worsted or mohair braid like that called *Russia braid*.



unioned (ū′nyond), *a.* [⟨ *union* + *-ed*².] Exhibiting symbols and proofs of union. [Rare.]

Great Washington arose in view,
And *unioned* flags his stately steps pursue;
Blest Gallia's bands and young Columbia's pride.
Joel Barlow, Visions of Columbus.

union-grass (ū′nyon-gras), *n.* A name for grasses of the genus *Uniola*.

unionid (ū′ni-ō-nid), *n.* A unio; any member of the *Unionidæ*.

Unionidæ (ū-ni-on′i-dē), *n. pl.* [NL., ⟨ *Unio*(*n*-) + *-idæ*.] A family of bivalve mollusks, typified by the genus *Unio*, and variously limited. (*a*†) Formerly applied to all fresh-water bivalves nacreous inside the shell. (*b*) Restricted to those with two large and persistent adductor muscles, and the shell regular, with thick epidermis, thin nacreous layer, prominent external

A, Right Valve of River-mussel (*Monocondylæa paraguana*). *B*, River-mussel (*Unio littoralis*), left valve.

ligament, and variable hinge (thus including the *Mutelidæ* and *Mycetopodidæ*). (*c*) Further restricted to the *Unioninæ* (*b*). In the narrowest sense the *Unionidæ* are nearly one thousand species, of most parts of the world, but especially numerous and diversified in the United States, where they are mostly called *fresh-water mussels* or *clams*.

unioniform (ū-ni-on′i-fôrm), *a.* [⟨ NL. *Unio*(*n*-) + L. *forma*, form.] Like a unio in shape or aspect; resembling or related to the *Unionidæ*. Also *unionoid*.

Unioninæ (ū″ni-ō-nī′nē), *n. pl.* [NL., ⟨ *Unio*(*n*-) + *-inæ*.] The leading subfamily of *Unionidæ*, variously limited. (*a*) Including all those unios whose branchial orifice is confluent with the pedal, and whose anal siphon is little prolonged. (*b*) Restricted to such as have the foot compressed and securiform (thus contrasting with *Mycetopodidæ*): same as *Unionidæ* (*c*).

unionine (ū′ni-ō-nin), *a.* Of or pertaining to the *Unioninæ*; unioniform in a narrow sense.

unionism (ū′nyon-izm), *n.* [⟨ *union* + *-ism*.] **1.** The principle of uniting or combining; specifically, trade-unionism.

I apprehend that the notion which lies at the bottom of *Unionism* is this: that a man is bound to think not only of himself, but of his fellow-workmen. *Jevons*, Social Reform, p. 115.

2. Attachment or loyalty to the principle of union, or to some particular union; specifically, attachment or loyalty to the federal union known as the United States of America, and opposition to its rupture, as by the secession of the Southern States in 1861–5.

Mr. Seward had an abiding faith in the *Unionism* and latent loyalty of Virginia and the border States. *The Century*, XXXV. 609.

3. In *British politics*, the principles or sentiments of the Unionists.

unionist (ū′nyon-ist), *n.* and *a.* [⟨ *union* + *-ist*.] **I.** *n.* **1.** One who promotes or advocates union.—**2.** A member of a trade-union; a trade-unionist. *Jevons*, Social Reform, p. 109.—**3.** One who during the American civil war took the side of the national government.

At the same station, we met General Shriver of Frederick, a most loyal *Unionist*. *O. W. Holmes*, Old Vol. of Life, p. 25.

4. [*cap.*] In *British politics*, one who is opposed to the dissolution or rupture of the legislative union existing between Great Britain and Ireland, and especially to the separatist principles and tendencies of those who desire to establish home rule in Ireland: a name applied to the Conservatives and Liberal-Unionists.

II. *a.* **1.** Of or pertaining to a union or to unionism; promoting or advocating union: as, a *unionist* movement; a *unionist* party.

Their [the workmen's] low standard of work, determined by the *unionist* principle that the better workers must not discredit the worse by exceeding them in efficiency. *H. Spencer*, Data of Ethics, p. 211.

2. Specifically, during the civil war in the United States, of or pertaining to the Union party or cause.

unionistic (ū-nyo-nis′tik), *a.* [⟨ *unionist* + *-ic*.] Pertaining to unionism or unionists; relating to or promoting union.

The various phases of a *unionistic* movement. *P. Schaff*, Hist. Christ. Ch., I. § 22.

unionite (ū′ni-ō-nīt), *n.* [⟨ NL. *Unionites*, ⟨ *Unio*(*n*-), q. v.] A fossil unio, or some similar shell.

union-joint (ū′nyon-joint), *n.* A pipe-coupling; a union. *E. H. Knight.*

unionoid (ū′ni-ō-noid), *a.* and *n.* [⟨ *Unio*(*n*-) + *-oid*.] **I.** *a.* Same as *unioniform*.

II. *n.* Same as *unionid*.

union-pump (ū′nyon-pump), *n.* A pump combined in the same frame with an engine. *E. H. Knight.*

union-room (ū′nyon-röm), *n.* The room in a brewery in which the unions for partly fermented beer stand together, and from which the beer is racked off.

The *union-room* [Allsop's] contains 1,424 unions, which can cleanse 230,000 gallons at one time. *Bickerdyke.*

uniovulate (ū-ni-ō′vū-lāt), *a.* [⟨ L. *unus*, one, + NL. *ovulum*, ovule: see *ovule*.] Having but one ovule.

unipara (ū-nip′a-rä), *n.* A woman who has borne one child.

uniparous (ū-nip′a-rus), *a.* [⟨ L. *unus*, one, + *parere*, bring forth, bear, + *-ous*.] **1.** Producing one at a birth: as, *uniparous* animals. *Sir T. Browne*, Vulg. Err.—**2.** In *bot.*, having but one axis or branch: as, a *uniparous* cyme.

unipartite (ū-ni-pär′tīt), *a.* [⟨ L. *unus*, one, + *partitus*, parted: see *partite*.] Not separated into parts.

In the theory of the single system the conceptions and symbolism are to a large extent arithmetical, and are based upon the properties of single integral numbers and their partitions into single integral parts. In this sense the former theory may be regarded as being *unipartite*. *Nature*, XLI. 380.

Unipartite curve, a curve whose real part forms one continuous whole (it being understood that a passage through infinity does not constitute a severing of the curve).

uniped (ū′ni-ped), *a.* and *n.* [< L. *unus*, one, + *pes* (*ped-*), foot.] **I.** *a.* Having only one foot.

II. *n.* One who or that which is one-footed. Compare *monopode*. [Rare.]

One of the best gymnasts in Chicago is a person with a wooden leg, which he takes off at the beginning of operations, thus economizing weight and stowage, and performing feats impossible except to *unipeds*.
W. Mathews, Getting on in the World, p. 194.

Unipeltata† (ū″ni-pel-tā′tạ), *n. pl.* [NL. (Latreille), neut. pl. of **unipeltatus*: see *unipeltate*.] In *Crustacea*, a family of stomatopods, containing adult forms of mantis-shrimps: distinguished from *Bipeltata*. See *Squilla*.

unipeltate (ū-ni-pel′tāt), *a.* and *n.* [< L. *unus*, one, + *pelta*, a light shield: see *peltate*.] **I.** *a.* Having a carapace of one piece, as a crustacean; not bipeltate, like a glass-crab; stomatopodous, as a mantis-shrimp.

II. *n.* A member of the *Unipeltata*. See *Squillidæ*.

unipersonal (ū-ni-pėr′sọn-ạl), *a.* [< L. *unus*, one, + *persona*, person: see *personal*.] 1. Having but one person; existing in one person: said of the Deity.—2. In *gram.*, used only in one person: chiefly noting verbs used only in the third person singular; impersonal.

unipersonalist (ū-ni-pėr′sọn-ạl-ist), *n.* [< *unipersonal* + *-ist*.] One who believes there is but one person in the Deity.

unipersonality (ū-ni-pėr-sọ-nal′i-ti), *n.* [< *unipersonal* + *-ity*.] Existence in one person only.

unipetalous (ū-ni-pet′ạ-lus), *a.* [< L. *unus*, one, + NL. *petalum*, petal: see *petal*.] Having but one petal.

Such a corolla [consisting of one petal on account of abortion of the others] is *unipetalous*, a term quite distinct from monopetalous. *Encyc. Brit.*, IV. 132.

uniphonous (ū′ni-fō-nus), *a.* [< L. *unus*, one, + Gr. *φωνή*, a sound.] Having or giving out only one sound; monophonic. [Rare.]

That *uniphonous* instrument the drum.
Westminster Rev., Nov., 1832. (*Encyc. Dict.*)

uniplanar (ū-ni-plā′nạr), *a.* [< L. *unus*, one, + *planum*, plane.] Lying in one plane.

The first three chapters of the work deal with the usual problems of hydrodynamics, being occupied principally with those in which the motion is *uniplanar* or can be expressed by two co-ordinates.
The Academy, April 11, 1891, p. 349.

Uniplanar dyadic. See *dyadic*.—**Uniplanar node**, a degenerate form of a node or conical point on a surface, where the cone degenerates into two coincident planes: same as *unode*.

uniplicate (ū-nip′li-kāt), *a.* [< L. *unus*, one, + *plicatus*, pp. of *plicare*, fold: see *plicate*.] Once folded; having or forming a single fold. Compare *duplicate*, *triplicate*, *quadruplicate*.

unipolar (ū-ni-pō′lạr), *a.* [< L. *unus*, one, + *polus*, pole: see *polar*.] 1. Exhibiting one kind of polarity.

The so-called "*unipolar*" induction supposed to be due to the rotation of the earth, which behaves like a gigantic magnet. *P. G. Tait*, Encyc. Brit., XXIII. 330.

2. In *biol.*, having a single pole, as a nerve-cell or a rete: correlated with *bipolar*, *multipolar*.

If the rete remains broken up, then it is known as a diffuse, *unipolar*, or monocentric rete mirabile.
Gegenbaur, Comp. Anat. (trans.), p. 597.

Unipolar conduction. Same as *irreciprocal conduction* (which see, under *irreciprocal*).—**Unipolar dynamo**, a dynamo in which an electromotive force is induced in a conductor by causing it to revolve round one pole of a magnet.

unipolarity (ū″ni-pō-lar′i-ti), *n.* [< *unipolar* + *-ity*.] The character of being unipolar.

We do not believe that Ohm ever observed the phenomenon of *unipolarity* in strong sulphuric acid with electrodes of platinum or gold due to a transition resistance.
Philos. Mag., XXVI. 129.

uniporous (ū-nip′ọ-rus), *a.* [< L. *unus*, one, + *porus*, pore.] Having one pore.

Wood-cells elsewhere called discigerous tissue, and to which I applied the terms *uniporous* and multiporous.
Dawson, Geol. Hist. of Plants, p. 160.

unique (ū-nēk′), *a.* and *n.* [< F. *unique* = Sp. Pg. It. *unico*, < L. *unicus*, one, only, single, < *unus*, one.] **I.** *a.* 1. Only; single.

Do I mention these seeming inconsistencies to smile at or upbraid my *unique* cousin? *Lamb*, My Relations.

2. Having no like or equal; unmatched; sole; unequaled; single in its kind or excellence: often used relatively, and then signifying rare, unusual.

That which gives to the Jews their *unique* position among the nations is what we are accustomed to regard as their Sacred History. *Spectator*, No. 3035, p. 1159.

II. *n.* A unique thing; a thing unparalleled or sole of its kind.

Sir Charles Mordant's gold medal, mean as it is in workmanship, is extremely curious, and may be termed an *Unic*, being the only one of the kind that has come to our knowledge. *Archæologia* (1774), III. 374.

Where is the master who could have instructed Franklin, or Washington, or Bacon, or Newton? Every great man is a *unique*. *Emerson*, Self-reliance.

uniquely (ū-nēk′li), *adv.* In a unique manner; so as to be unique.

uniqueness (ū-nēk′nes), *n.* The state or character of being unique.

uniquity (ū-nē′kwi-ti), *n.* [Irreg. < *unique* + *-ity*.] Uniqueness. [Rare.]

Uniquity will make them valued more.
H. Walpole, Letters, iv. 477 (1789). (*Davies.*)

uniradiate (ū-ni-rā′di-āt), *a.* [< L. *unus*, one, + *radius*, ray: see *radiate*.] Having only one ray, arm, or process; monactinal.

uniradiated (ū-ni-rā′di-ā-ted), *a.* Same as *uniradiate*.

uniramose (ū-ni-rā′mōs), *a.* Same as *uniramous*. *Micros. Sci.*, XXX. 109.

uniramous (ū-ni-rā′mus), *a.* [< L. *unus*, one, + *ramus*, branch: see *ramus*.] Having but one ramus or branch. See *biramous*. *Encyc. Brit.*, VI. 652.

unisepalous (ū-ni-sep′ạ-lus), *a.* [< L. *unus*, one, + NL. *sepalum*, sepal: see *sepal*.] Having but one sepal.

uniseptate (ū-ni-sep′tāt), *a.* [< L. *unus*, one, + *septum*, partition: see *septate*.] In *zoöl.* and *bot.*, having only one septum or partition.

uniserial (ū-ni-sē′ri-ạl), *a.* [< L. *unus*, one, + *series*, series: see *serial*.] 1. Set in one row or series; one-ranked; unifarious. *Encyc. Brit.*, XXII. 190.—2. Beset with one rank, row, or series of things.

uniserially (ū-ni-sē′ri-ạl-i), *adv.* So as to be uniserial; in one series.

uniseriate (ū-ni-sē′ri-āt), *a.* [< L. *unus*, one, + *series*, series: see *seriate*.] Same as *uniserial*.

uniseriately (ū-ni-sē′ri-āt-li), *adv.* Same as *uniserially*.

uniserrate (ū-ni-ser′āt), *a.* [< L. *unus*, one, + *serra*, saw: see *serrate*.] Having one row of teeth or serrations; uniserially serrate.

uniserrulate (ū-ni-ser′ọ̈-lāt), *a.* [< L. *unus*, one, + *serrula*, dim. of *serra*, saw: see *serrulate*.] Having one row of small serrations; uniserially serrulate.

unisexual (ū-ni-sek′sū-ạl), *a.* [< L. *unus*, one, + *sexus*, sex: see *sexual*.] 1. Of one sex—that is, having the two sexes developed in different individuals. [Rare.]—2. For or consisting of a single sex. [Rare.]

One final provincialism of the mind there is, which a *unisexual* college certainly never would have any power to eradicate. . . . It is the provincialism of the exclusively sex point of view itself. *The Century*, XXXII. 326.

3. Specifically, in *entom.*, having only female individuals: noting the agamic broods of *Aphididæ* and some other insects which, during certain parts of the year, continue to propagate the species without any males. See *parthenogenesis*.—4. In *bot.*, said of a flower containing the organs of but one sex, stamens or carpels, but not both; diclinous: opposed to *bisexual* or *hermaphrodite*. It is also applicable to an inflorescence with such flowers only, or to any plant producing but one of the sex elements.

unisexuality (ū-ni-sek-sū-al′i-ti), *n.* [< *unisexual* + *-ity*.] The state or character of being unisexual, or of having but one sex, as a male or female individual: the opposite of *hermaphroditism*.

There is some reason to suspect that hermaphrodism was the primitive condition of the sexual apparatus, and that *unisexuality* is the result of the abortion of the organs of the other sex in males and females respectively.
Huxley, Anat. Invert., p. 67.

unisexually (ū-ni-sek′sū-al-i), *adv.* So as to be of either sex, but not of both sexes, in one individual: as, animals *unisexually* developed.

unisilicate (ū-ni-sil′i-kāt), *n.* [< L. *unus*, one, + E. *silicate*.] A salt of orthosilicic acid (H_4SiO_4): so called because the ratio of oxygen atoms combined with the base to those combined with the silicon is 1:1. This is illustrated by zinc unisilicate, willemite, which has the formula Zn_2SiO_4 or $2ZnO.SiO_2$.

unisolated (un-is′ọ̈-lā-ted), *a.* Not isolated or separated; undistinguished or undistinguishable.

The *unisolated* hyoid muscles of the frog.
Jour. Roy. Micros. Soc., 2d ser., VI. 47.

unison (ū′ni-sọn or -zọn), *a.* and *n.* [I. *a.* Also *unisonous*, q. v.; = Sp. *unisono* = Pg. *unisono*, < ML. *unisonus*, having one sound, < L. *unus*, one, + *sonus*, sound: see *sound*[5]. II. *n.* Early mod. E. *unisonne*, < F. *unisson* = Sp. *unison* = It. *unisono*, unison, concord of sounds: from the adj.] **I.** *a.* 1. Sounding alone; unisonous.

All sounds on fret by string or golden wire,
Temper'd soft tunings, intermix'd with voice,
Choral or *unison*. *Milton*, P. L., vii. 599.

2. In *music*, sounded simultaneously; specifically, noting two or more voice-parts that are coincident in pitch, or a passage or effect thus produced.—**Unison string**, in musical instruments with strings, a string tuned in unison with another string, and intended to be sounded with it. In the pianoforte most of the tones are produced from pairs or triplets of strings thus tuned. Such strings are commonly called *unisons*.

II. *n.* 1. In *music*: (*a*) The interval, melodic or harmonic, between any tone and a tone of exactly the same pitch; a perfect prime, acoustically represented by the ratio 1:1. The term is also used as a synonym of *prime* (as, an augmented *unison*), though this is objectionable. (*b*) The interval of the octave, especially when occurring between male and female voices, or between higher and lower instruments of the same class.—2. The state of sounding at the same pitch—that is, of being at the interval of a unison.

"But he wants a shoe, poor creature!" said Obadiah. "Poor creature!" said my uncle Toby, vibrating the note back again, like a string in *unison*.
Sterne, Tristram Shandy, V. ii.

3. A single unvaried tone; a monotone. *Pope.*—4. Same as *unison string*.—5. Accordance; agreement; harmony; concord.

He chants his prophetic song in exact *unison* with their designs. *Burke*, Rev. in France, xvi.

I had the good fortune to act in perfect *unison* with my colleague. *D. Webster*, Speech, Boston, June 5, 1828.

unisonal (ū′ni-sọ̄-nạl), *a.* [< *unison* + *-al*.] Being in unison; unisonant.

We missed . . . the magnificent body of tone in the broad *unisonal* passages in the finale.
Athenæum, No. 3082, p. 678.

unisonally (ū′ni-sọ̄-nạl-i), *adv.* In a unisonal manner; in unison.

Tenors and basses burst in *unisonally*.
Church Times, March 4, 1887. (*Encyc. Dict.*)

unisonance (ū′ni-sọ̄-nans), *n.* [= Sp. Pg. *unisonancia*; as *unisonan(t)* + *-ce*.] Accordance of sounds; unison.

unisonant (ū′ni-sọ̄-nant), *a.* [= OF. *unisonnant*, < L. *unus*, one, + *sonan(t-)s*, ppr. of *sonare*, sound; cf. *unison*.] Being in unison; having the same degree of gravity or acuteness.

Whether the order of those sounds was ascending, descending, or *unisonant*.
Lambillotte, tr. in N. and Q., 7th ser., VII. 161.

unisonous (ū′ni-sọ̄-nus), *a.* [< ML. *unisonus*, having one sound: see *unison*.] 1. Being in unison: said of two or more sounds having the same pitch; unisonant. *Grove*, Dict. Music, II. 763.—2. Sounding alone; without harmony.

These apt notes were about forty tunes, of one part only, and in one *unisonous* key.
T. Warton, Hist. Eng. Poetry, III. 171.

unispiral (ū-ni-spī′rạl), *a.* In *bot.*, having a single spiral, as the elaters of certain liverworts.

unisulcate (ū-ni-sul′kāt), *a.* In *bot.* and *zoöl.*, having a single groove or furrow; one-grooved.

unit (ū′nit), *n.* [Formerly *unite*, a later form of *unity*: see *unity*.] 1. A single thing or person, opposed to a plurality; also, any group regarded as individual in a plurality of similar groups; any one of the individuals or similar groups into which a complex whole may be analyzed.

When first, amid the general discredit of the experiment tried by Lord Cornwallis in Bengal proper, the Indian administrators of fifty or sixty years since began to recognize the village community as the true proprietary *unit* of the country, they had very soon to face the problem of rent. *Maine*, Village Communities, p. 182.

The family is the integral and formative *unit* of the nation. *E. Mulford*, The Nation, xii.

The elementary tissues, particularly tracheary, sieve, fibrous, and parenchymatous tissues, are to be considered as the *units*, and the term Fibro-vascular Bundle as little more than a convenient expression of the usual condition of aggregation of these *units*. *Bessey*, Botany, p. 107.

These columns are not fighting *units* at all, but supply-*units*, and may be classed with commissariat trains and services of like nature. *Fortnightly Rev.*, N. S., XLI. 805.

2. Any standard quantity by the repetition of which, or of some subdivision of it, any other quantity of the same kind is measured. The unit of abstract arithmetic, called *unity*, is represented by the numeral 1. The system of units recommended by a committee of the British Association, and known as the *c. g. s. system* (abbr. of *centimeter-gram-*

second system), adopts the *centimeter* as the unit of length, the *gram* as the unit of mass, and the *second* as the unit of time. In this system the *unit of area* is the square centimeter, the *unit of volume* is the cubic centimeter, and the *unit of velocity* is a velocity of a centimeter per second. The *unit of momentum* is the momentum of a gram moving with a velocity of a centimeter per second. The *unit-force* is that force which acting on a gram for one second generates a velocity of a centimeter per second. This force is called a *dyne*. The *unit of work* is the work done by the force of a dyne working through a distance of a centimeter. This is called an *erg*. Sometimes used attributively.

The ordinary smallest measure we have of either [extension or duration] is looked on as an *unit* in number, when the mind by division would reduce them into less fractions. *Locke*, Human Understanding, II. xv. 9.

For purposes of accuracy it must always be remembered that the pound, the gramme, &c., are, strictly speaking, *units* of mass. *J. D. Everett*, Units and Phys. Const., p. 23.

The *unit* of magnetic moment is the moment of a magnet of *unit* length the strength of whose poles is equal to unity, or generally of any magnet the product of whose strength into its length is equal to unity.
J. E. H. Gordon, Elect. and Mag., I. 154.

Absolute unit, a unit of an absolute system of measurement based entirely on arbitrary units of mass, length, and time; sometimes, but quite incorrectly, used as the synonym of a unit of the C. G. S. system, which is only a special system of absolute units.—**Abstract unit**, the unit of numeration; the number represented by 1.—**Alternate units**. Same as *Hankel's numbers* (which see, under *number*).—**B. A. unit of resistance**. See *ohm*.—**Concrete** or **denominate unit**, a unit of some definite kind, as a yard, a second, a dollar, etc.—**Decimal units, duodecimal units**, units in scales of numbers increasing or decreasing by powers of ten or twelve.—**Electrical units**. See *electrostatic*.—**Electromagnetic units**. See *electromagnetic*.—**Electrostatic units of electricity**. See *electrostatic*.—**Fundamental units**. See *fundamental*.—**Magnetic unit**, a unit of electrical or magnetic quantity, founded on the forces which act on conductors conveying currents, or on magnets, in a magnetic field. See *electromagnetic units*, under *electromagnetic*.—**Monetary unit**. See *monetary*.—**Neural units**. See *neural*.—**Siemens's unit** [named after the electrician *Siemens*], a unit formerly employed in measuring the electric resistance of a conductor: it is the resistance of a column of pure mercury 1 square millimeter in section and 1 meter long; it is a little less than an ohm.—**Thermal unit**, a unit adopted for measuring and comparing quantities of heat. In the English system of measures the thermal unit is the pound-degree, or the amount of heat required to raise a pound of water from the temperature 50° F. to 51° F. (Tait), or from 62° F. to 63° F. In the metric system the unit of heat is the calory — that is, the amount necessary to raise a kilogram of water from 0° to 1° C.; or the small calory, the heat needed to raise the temperature of a gram of water the same amount.—**Unit angle**, in circular measure, same as *radian*.—**Unit field**. See *field*.—**Unit jar**, an instrument of various forms devised for measuring definite quantities of electricity.—**Unit magnetic pole**, a pole which repels a like pole at a unit distance with unit force — that is, one dyne.—**Unit of capacity** of a conductor, the farad.—**Unit of electrical resistance**, the resistance of a conductor through which a current of unit strength is maintained by unit electromotive force.—**Unit of electric potential**, the difference of potential between the ends of a straight conductor, of unit length, when it is moved with unit velocity in a direction at right angles to lines of force and its own length in a magnetic field of unit intensity.—**Unit of force**, the dyne or the poundal. See def. 2.—**Unit of heat**. See *thermal unit*.—**Unit of illumination**. See *candle-power*.—**Unit of length**, a length in multiples of which other lengths are defined.—**Unit of measure**, a certain conventional dimension or magnitude assumed as a standard by which other dimensions or magnitudes of the same kind are to be measured, as a foot, a gallon, an ounce, a pound, an hour, and the like. See *measure, weight*.—**Unit of measurement**, a quantity used as the consequent of a ratio for defining other quantities.—**Unit of output**, a unit by which the rate of working or the activity in an electric circuit is measured. The British Board of Trade unit of output is 1,000 watts.—**Unit of photometry**. See *photometric standard*, under *photometric*.—**Unit of resistance**. See *resistance*, 3, and *ohm*.—**Unit of self-induction**, in *elect.*, in any system of units, the same as the unit of length employed in the basis of the system. For the practical unit of induction in the centimeter-gram-second system, an earth quadrant, or a length equal to 109 centimeters, has been proposed. This unit has been called *secohm*, which has been replaced by *henry*.—**Unit of tale**, a number of things, generally of a particular kind, recognized as a unit, as a dozen, a score, a sum of nails, a lac of rupees, etc.—**Unit pole**. See *pole*[2].—**Unit prism**, in *crystal*. See *prism*, 3.—**Unit pyramid**, in *crystal*. See *pyramid*, 3.—**Unit rule**, in *U. S. politics*, a rule sometimes adopted providing that in a national nominating convention the votes of the entire delegation from each State shall be cast in a body for the candidate preferred by the majority of the delegation, the wishes of the minority being disregarded.

unitable (ū-nī′ta-bl), *a.* [< *unite* + *-able*.] Capable of being united; capable of union by growth or otherwise. Also spelled *uniteable*.

unital (ū′ni-tal), *a.* [< *unit* + *-al*.] Of or pertaining to a unit; unitary. [Rare.]

In nature there is a great, *unital*, continuous . . . development. *Littell's Living Age*, No. 2071, March 1, 1884, p. 515.

unitarian (ū-ni-tā′ri-an), *a.* and *n.* [As *unitary* + *-an*.] **I.** *a.* 1. Of or relating to a unit or unity, or to one thing or plan or party; unitary.

It [division of powers] forms the essential distinction between a federal system such as that of America or Switzerland, and a *unitarian* system of government such as that which exists in England or Russia.
A. V. Dicey, Law of the Constitution, p. 142.

These two theories, the one dualistic, the other *unitarian*, strangely foreshadow the discoveries of modern dynamics. *Encyc. Brit.*, I. 460.

2. [*cap.*] Of or pertaining to the Unitarians or their doctrines.—**Unitarian Church**. See II., 1.

II. *n.* 1. [*cap.*] One who maintains the unipersonality of the Deity; one who denies the doctrine of the Trinity; specifically, a member of a Christian body founded upon the doctrine of unipersonality. The churches of the Unitarian body are congregational in government, and independent of one another. They possess no common symbol of doctrine, and differ widely among themselves. They may be divided into two schools of thought, though there is no sharply defined line between them. The conservative Unitarians hold doctrinal views in many respects resembling those of the orthodox Trinitarians, except in their denial of the tripersonality of the Deity. They accept Christ as the manifestation of God in a human life, though they do not regard him as equal in character or power with the Father. They believe in the work of the Holy Spirit, though they do not generally regard him as a distinct personality. They believe in the Scriptures as containing a divine revelation, and in the miracles as an attestation of that revelation. They hold a doctrine of inherited depravity, but not in guilt, except as the result of a personal choice; to a doctrine of future retribution, though not generally to its endlessness; to an atonement by Christ for the sins of mankind, but not to the expiatory theory of that atonement (see *atonement*); and to the necessity of regeneration wrought by the Spirit of God, but only with the cooperation of man; in what is called "irresistible grace" they do not believe. The doctrines of election, reprobation, foreordination, and decrees, as those doctrines are interpreted in the Calvinistic symbols, they repudiate as unscriptural and irrational. The radical school of Unitarians hold views not materially varying from deism. They reverence Christ as a peculiarly holy man, with whom the Spirit of God abode, but in no sense other than that in which he abides with every truly holy man. They respect the Bible as a work of transcendent moral genius, but in no other sense inspired. They do not believe in the miracles, and either explain them as the product of natural causes or regard the accounts of them as mythical and traditionary. They do not accept the doctrines of atonement and regeneration, and do not employ the terms; and they both attribute sin to defective education, intellectual and moral, and depend upon a right education to redeem the world from its effects. The Unitarian movement in the United States was developed chiefly in New England about the beginning of the nineteenth century, under the lead of Dr. Channing. Many of the oldest Congregational churches in New England passed under Unitarian control, and the "American Unitarian Association" was formed in 1825. Outside of the denomination proper, Unitarian views are held by the Hicksite Friends, some Universalists, and by individuals in other denominations. See *Arian*[1], *Socinianism*.

2. A monotheist; a believer in one God, as opposed to a polytheist, or a believer in many gods. In this sense it is applicable to all Christians, Jews, and Mohammedans, as well as deists. *Fleming*. [Rare.]

3. A monist.

The Realists or Substantialists are again divided into Dualists, and into *Unitarians* or Monists, according as they are or are not contented with the testimony of consciousness to the ultimate duplicity of subject and object in perception. *Sir W. Hamilton*, Metaphysics, xvi.

4. One who advocates any unitary system; an advocate of unity; in politics, an advocate of centralization.

The old men studied magic in the flowers,
And human fortunes in astronomy,
And an omnipotence in chemistry,
Preferring things to names, for these were men,
Were *unitarians* of the united world,
And, wheresoever their clear eye-beams fell,
They caught the footsteps of the Same.
Emerson, Blight.

Unitarianism (ū-ni-tā′ri-an-izm), *n.* [< *Unitarian* + *-ism*.] 1. The affirmation of the unipersonality of the Deity; the denial of the doctrine of the Trinity, or (rarely) of polytheism; the doctrines of the Unitarians.—2. [*l. c.*] Any unitary system.

The principle, in short, which gives its form to our government is (to use a foreign but convenient expression) *unitarianism*, or the habitual exercise of supreme legislative authority by one central power.
A. V. Dicey, Law of the Constitution, p. 127.

3. [*l. c.*] In *philos.*, the doctrine that mind and matter are one, or that there is but one general kind of substance.

Unitarianize (ū-ni-tā′ri-an-īz), *v.*; pret. and pp. *Unitarianized*, ppr. *Unitarianizing*. [< *Unitarian* + *-ize*.] To cause to conform, or to conform to Unitarianism. *Imp. Dict.*

unitary (ū′ni-tā-ri), *a.* [= F. *unitaire* = Sp. It. *unitario*, unitarian (chiefly as a noun, a Unitarian); as *unit, unit-y*, + *-ary*.] 1. Of or relating to a unit; of the nature of a unit; not divided; entire: specifically noting in chemistry that system in which the molecules of all bodies are compared, as to their magnitude, with one molecule — water, for example — and all chemical reactions are as far as possible reduced to one typical form of reaction, namely double decomposition. *Watts*, Dict. of Chem.—2. Of or pertaining to, or characterized by, unity or uniformity; also, directed at or striving for unity: as, a *unitary* system of thought; in politics, centralized.

Man loves the Universal, the Unchangeable, the *Unitary*. *Channing*, Perfect Life, p. 110.

Had any one doubted before that the rights of human nature are *unitary*, . . . the efforts of the advocates of slavery . . . could not fail to sharpen his eyes.
Lowell, Study Windows, p. 173.

We know that the separation and isolation of the different parts of a once *unitary* community must necessarily bring about a separation of its language into different dialects. *W. D. Whitney*, Life and Growth of Lang., ix.

It of course by no means follows that, because we have become in the fullest organic sense a nation, ours has become a *unitary* government, its federal features merged in a new national organization. *W. Wilson*, State, § 881.

3. In *biol.*, monistic, as distinguished from dualistic.

The tendency called *unitary* or monistic . . . must ultimately prevail throughout philosophy.
Haeckel, Evolution of Man (trans.), I. 17.

4. Pertaining to or of the nature of a unit (of measurement).

A wind pressure of 1,200 pounds for the same *unitary* distance is allowed for. *Sci. Amer.*, N. S., LX. 304.

5. In *math.*, involving a root to unit power.

Unitas Fratrum (ū′ni-tas frā′trum). [NL., unity of brethren: L. *unitas*, unity; *fratrum*, gen. pl. of *frater*, brother: see *brother*.] The proper official name of the Moravian Church. See *Moravian*, *n.*, 2.

unitate (ū′ni-tāt), *v. t.*; pret. and pp. *unitated*, ppr. *unitating*. [A back-formation from *unitation*.] To perform the operation of unitation upon.

unitate (ū′ni-tāt), *n.* [As *unit* + *-ate*[1].] The remainder given by a number after division by a digit.

unitation (ū-ni-tā′shọn), *n.* [< *unit* + *-ation*.] 1. Expression in terms of units; measurement in accordance with a system of units.—2. The operation of adding to the units of a number, written in the Arabic notation, (10 — N) times the tens (where N is any number less than 10), $(10-N)^2$ times the hundreds, etc., and repeating the process until a digit is obtained. This (diminished by any multiple of N which it exceeds) is the remainder after dividing the original number by N.

unite[1] (ū-nīt′), *v.*; pret. and pp. *united*, ppr. *uniting*. [< LL. *unitus*, pp. of *unire* (> It. *unire* = Sp. Pg. *unir* = F. *unir*), make one or as one, join together, < L. *unus*, one: see *one*, *a*. Cf. *one*, *v.*, and *adunation*.] **I.** *trans.* 1. To combine or conjoin so as to form one; make to be one and to be no longer separate; incorporate in one: as, to *unite* two kingdoms or two armies.

Unite
Your troops of horsemen with his bands of foot.
Shak., 1 Hen. VI., iv. 1. 164.

As thou hast *united* our nature to thy eternal being, thou mightest also *unite* my person to thine by the interior adunations of love, and obedience, and conformity.
Jer. Taylor, Works (ed. 1835), I. 37.

2. To connect, conjoin, bring together, or associate by some bond, legal or other; join in interest, affection, fellowship, or the like; ally; link together; associate; conjoin; couple; combine: as, to *unite* families by marriage; to *unite* nations by treaty; to *unite* fresh adherents to a cause.

Hymen did our hands
Unite commutual in most sacred bands.
Shak., Hamlet, iii. 2. 170.

3. To make to agree or be uniform; harmonize.

The king proposed nothing more than to *unite* his kingdom in one form of worship. *Clarendon*, Great Rebellion.

4. To cause to adhere; attach; connect together: as, to *unite* bricks or stones by means of cement.

The peritonæum, which is a dry body, may be *united* with the musculous flesh. *Wiseman*, Surgery.

=Syn. 1. To consolidate, amalgamate, blend, merge.

II. *intrans.* 1. To become one; become combined or incorporated; be consolidated; coalesce; combine; commingle.

Virgin Mother, hail,
High in the love of Heaven; yet from my loins
Thou shalt proceed, and from thy womb the Son
Of God Most High; so God with man *unites*.
Milton, P. L., xii. 382.

2. To join in action; concur; act in concert.

If you will now *unite* in your complaints,
And force them with a constancy, the cardinal
Cannot stand under them.
Shak., Hen. VIII., iii. 2. 1.

unite[1]† (ū-nīt′), *a.* [< LL. *unitus*, pp. of *unire*, unite: see *unite*[1], *v.*] United; joint. *Webster*.

unite[1] (ū-nīt′), *n.* [< *unite*[1], *v.*, with ref. to the union of the kingdoms of England and Scot-

land alluded to on the coin in the motto "Faciam eos in gentem unam," 'I will make them one nation' (Ezek. xxxvii. 22).] An English gold coin issued by James I. and current for 20 shillings; a jacobus. A gold coin of the same name and value was issued under Charles I., when it was also called *carolus* (which see), and under the Commonwealth and Charles II.

unite[2]†, *n.* An obsolete spelling of *unit*.

uniteable, *a.* See *unitable*. *Dr. H. More.*

united (ū-nī'ted), *p. a.* [< *unite*[1] + *-ed*[2].] 1. Joined or combined; made one; made to agree; allied; harmonious: as, a *united* household.

> Th' *united* strength of all the gods above
> In vain resists th' omnipotence of Jove.
> *Pope*, Iliad, i. 734.

> [England] found it difficult to maintain a contest against the *united* navies of France and Spain.
> *Macaulay*, Lord Clive.

2. In *Rom. Cath. usage*, noting those communities which have separated from Oriental churches and united with the Roman Catholic Church in what it holds to be essential, but preserve an individual and distinctive church organization, acknowledging the supremacy of the Pope, and accepting the doctrinal decisions of the Roman Catholic Church, while retaining to some extent their ancient liturgy, rites, discipline, and usages.—**United Armenians.** See *Armenian Church*, under *Armenian*.—**United Brethren.** See *brother* and *Moravian*.—**United Brethren in Christ,** a Christian denomination, Arminian in doctrine, and essentially, although not universally, Methodist in polity. It was founded in Pennsylvania in 1800 by Philip William Otterbein. The government of the church is vested primarily in a general conference. The chief officers of the church are bishops elected every four years, presiding elders, and pastors appointed to their charges according to a system of itinerancy. The denomination makes the mode of baptism and the practice of feet-washing optional with each of its members.—**United Colonies of New England.** See *New England Confederation*, under *confederation*.—**United Greeks,** the members of those churches which retain, with some important modifications, the Greek liturgy and discipline, and other ancient Greek usages—as marriage of the lower clergy, communion under both kinds, and the use of leavened bread in the communion service—but are in union with the Roman Catholic Church. They are found chiefly in Austria-Hungary, Russia, Italy, and Turkey. See *Uniat*.—**United Irishmen,** an Irish society formed in 1791 by T. W. Tone, for the purpose of procuring parliamentary reform and the repeal of the penal laws. It afterward became a secret society with revolutionary aims, and was influential in causing the Irish rebellion of 1798.—**United Kingdom.** See *kingdom*.—**United Original Seceders.** See *seceder*.—**United Presbyterian Church.** See *Presbyterian*.—**United Provinces,** the seven provinces of the Low Countries, Holland, Zealand, Utrecht, Friesland, Gelderland, Groningen, and Overyssel, which in 1579 formed the Union of Utrecht and laid the foundation of the republic of the Netherlands.—**United States,** used attributively, of or pertaining to the United States of America; American: as, the *United States* army; the *United States* navy; the *United States* statutes; colloquially, the *United States* language. The adjective *United States* is used where *American* may appear less exact.

unitedly (ū-nī'ted-li), *adv.* In a united manner; with united or joint efforts; jointly; amicably.

unitentacular (ū″ni-ten-tak'ū-lär), *a.* Having but one tentacle. *Amer. Nat.*, XXIII. 597.

uniter (ū-nī'tėr), *n.* [< *unite*[1] + *-er*[1].] One who or that which unites or forms a connection.

> The Priest presides over the worship of the people; is the *Uniter* of them with the Unseen Holy. *Carlyle.*

uniterable† (un-it'ėr-a-bl), *a.* That cannot be renewed or repeated.

> To play away an *uniterable* life.
> *Sir T. Browne*, Christian Morals, iii. § 23.

unition (ū-nish'ọn), *n.* [< ML. *unitio(n-)*, a uniting, < LL. *unire*, unite: see *unite*[1].] The act of uniting, or the state of being united; junction; union. [Rare.]

> As long as any different substance keeps off the *unition*, hope not to cure the wound. *Wiseman*, Surgery, v. 1.

> The precise and total meaning of Christianity . . . is that it affirms the perfect *unition* of the Divine and human natures in Christ. *H. James*, Subs. and Shad., p. 242.

unitism (ū'ni-tizm), *n.* [< *unit* + *-ism*.] Same as *monism*, 1.

unitive (ū'ni-tiv), *a.* [< *unite*[1] + *-ive*.] Having the power of uniting; causing or tending to unite; producing or promoting union; harmonizing.

> There is a degree of meditation so exalted that it changes the very name, and is called contemplation; and it is in the *unitive* way of religion—that is, it consists in unions and adherences to God.
> *Jer. Taylor*, Works (ed. 1835), I. 71.

> A *unitive* power.
> *J. H. Newman*, Development of Christ. Doct., i. 33.

unitively (ū'ni-tiv-li), *adv.* In a unitive or united manner. *Cudworth.* [Rare.]

unitize (ū'ni-tīz), *v. t.*; pret. and pp. *unitized*, ppr. *unitizing*. [< *unit* + *-ize*.] To form into or reduce to a unit; make a unit of; cause to be one. *Imp. Dict.*

unity (ū'ni-ti), *n.*; pl. *unities* (-tiz). [Formerly also *unitie* (also reduced *unite*, *unit:* see *unit*); < OF. (and F.) *unité* = Sp. *unidad* = Pg. *unidade* = It. *unità*, < L. *unita(t-)s*, oneness, singleness, sameness, uniformity, agreement, < *unus*, one: see *one*.] 1. The state or property of being one; oneness, as opposed to multiplicity; individuality, as opposed to plurality.

> Now *unity*, which is defined, is in its own nature more apt to be understood than multiplicity, which in some measure participates of infinity. *Dryden*, Life of Plutarch.

> It sufficing to the *unity* of any idea that it be considered as one representation or picture, though made up of ever so many particulars.
> *Locke*, Human Understanding, II. xxiv. 1.

2. Organic totality; that interconnection of parts which constitutes a complex whole; a systematic whole as distinguished from its constituent parts: as, the *unity* of consciousness; the *unity* of an artistic creation. See def. 9.

> The simplest human consciousness contains more than sensation, it contains a reference of sensation to objects; the simplest human consciousness also contains some conception of the *unity* of all objects in one world (were it but that it represents them all as existing in one space and one time). *Caird*, Philos. of Kant, p. 203.

> An empirical acquaintance with facts rises to a scientific knowledge of facts, as soon as the mind discovers beneath the multiplicity of single production the *unity* of an organic system. *Max Müller.*

3. Identity; self-sameness; uniformity.

> If the *unity* of the Ego is really illusory, if the permanent identical "I" is not a fact but a fiction, as Hume and his followers maintain, why should one part of the series of feelings into which the Ego is resolved be concerned with another part of the same series, any more than with any other series?
> *H. Sidgwick*, Methods of Ethics, p. 389.

> We are able to say that the *Unity* or Continuity of nature is a principle or law of experience.
> *W. R. Sorley*, Ethics of Naturalism, p. 267.

4. The state of being united or combined in one; especially, union as connected parts of a complex whole: as, the national *unity* of the separate states.

> England had hardly as yet [829] realized the need of national *unity*, and outside the king's council chamber there can have been few who understood the need of union between the nations of Christendom.
> *J. R. Green*, Conq. of Eng., ii.

5. Harmony or accord in sentiments, affection, action, etc.; concord.

> How good and how pleasant it is for brethren to dwell together in *unity!* Ps. cxxxiii. 1.

> *Unity*, secrecy, decision, are the qualities which military arrangements require.
> *Macaulay*, Hallam's Const. Hist.

6. Sameness of character or effect; agreement; coincidence.

> There is such *unity* in the proofs. *Shak.*, W. T., v. 2. 35.

7. In *math.*, a quantity which, multiplied by any quantity of the system considered, gives that same quantity as the product. Thus, in the theory of matrices, the matrix of any order having all the constituents zero except those of the principal diagonal, which are all ones, is the unity of that order. In ordinary algebra one, or the unit of abstract number, is the only unity. *Unit* and *unity* are words frequently confused; but with accurate writers unit is the standard of measurement, that which is counted, and has no reference to multiplication; while unity has reference to multiplication alone. In a multiple associative algebra there are as many units as the ordinal number of the algebra, but there can be but one unity, and there need not be any at all.

8. The principle by which a uniform tenor of story and propriety of representation is preserved in literary compositions; conformity in a composition to this principle; a reference to some one purpose or leading idea, or to the main proposition, in all the parts of a discourse or composition. The so-called Aristotelian law of *unity of time, of place, and of action* (called 'the unities') in a drama was the fundamental rule or general idea from which the French classical dramatic writers and critics derived, or to which they referred, all their practical rules for the construction of a drama. This law demanded that there should be no shifting of the scene from place to place, that the whole series of events should be such as might occur within the space of a single day, and that nothing should be admitted irrelevant to the development of the single plot.

> The author has not observed a single *unity* in his whole play. *Addison*, Sir Timothy Tittle.

> The writers of plays have what they call *unity* of time and place, to give a justness to their representation.
> *Steele*, Spectator, No. 358.

> The so-called *unities* of time and place are purely fictitious principles, to either of which it may be convenient to adhere in order to make the unity of an action more distinctly perceptible, and either of which may with equal propriety be disregarded in order to give the action probability.
> *A. W. Ward*, Introd. to Eng. Dram. Lit., p. xi.

9. In artistic creations, a combination of parts such as to constitute a whole or to exhibit a form of symmetry in style and character; the quality of any work by which all the parts are subordinate to or promotive of one general design or effect.

> Among the susceptibilities touched by artistic arrangements may be noticed the sense of *Unity* in multitude, arising when a great number of things are brought under a comprehensive design, as when a row of pillars is crowned by a pediment.
> *A. Bain*, Emotions and Will, p. 235, note.

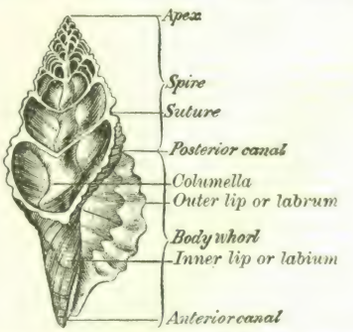
10. In *law:* (*a*) The holding of the same estate in undivided shares by two or more; joint tenancy. (*b*) The joint possession by one person of two rights by several titles.—11. A gold coin of the reign of James I. See *unite*[1].—**Architectonic unity.** See *architectonic*.—**At unity,** at one; in accord or harmony.

> A character *at unity* with itself . . . is strong by its very negations. *George Eliot*, Mill on the Floss, v. 2.

Formal unity. See *formal*.—**Manchester Unity.** See *Odd-Fellow*.—**Material**†**, mathematical, numerical unity.** See the adjectives.—**Primitive *n*th root of unity.** See *primitive*.—**Unity of apperception.** See *apperception*.—**Unity of estate, of possession, of time, of title.** See *estate in joint tenancy*, under *estate*.—**Unity of type,** in *biol.* See *type*.=**Syn. 1-4.** *Junction, Connection*, etc. See *union*.

univalence (ū-niv'a-lens), *n.* [< *univalen(t)* + *-ce*.] In *chem.*, the property of being univalent.

univalency (ū-niv'a-len-si), *n.* [As *univalence* (see *-cy*).] Same as *univalence*. Also called *monovalency*.



univalent (ū-niv'a-lent), *a.* [< L. *unus*, one, + *valen(t-)s*, ppr. of *valere*, be strong, have power: see *valid*.] Having a valence of one, (of an atom) capable of replacing a single hydrogen atom in combination.

univalid (ū-niv'a-lid), *a.* Same as *univalent*.

univalvate (ū-ni-val'vāt), *a.* [As *univalve* + *-ate*[1].] Same as *univalve*.

univalve (ū'ni-valv), *a.* and *n.* [< L. *unus*, one, + *valva*, valve: see *valve*.] **I.** *a.* 1. Having one valve only, as a mollusk; not bivalve or multivalve; univalved or univalvular. See II.—2. Having the carapace single, or not hinged in the middle line: specifying the cladocerous or daphniaceous crustaceans. [Now rare.]—3. In *bot.*, consisting of one valve or piece.

II. *n.* In *conch.*, a univalve mollusk or its shell; a shell consisting of a single piece; formerly, a member of one of three Linnean divisions of *Testacea*, as distinguished from *bivalves* and *multivalves*. The great group of gastropods are univalves. The single valve is sometimes very small, slight, rudimentary, or hidden beneath the mantle; but in most cases it is large and stout, nearly or completely inclosing the soft parts; and in such cases it usually acquires a twist or spiral coil, either in one plane, or, oftener, rising in a conical spire endlessly varied in details of size, shape, etc. Such coiled univalve shells are familiar objects, as those of the snail, whelk, periwinkle, etc. Sometimes the coils are quite flat, as in the planorbis; or the spire is so slight, and the first whorl so large, that the resulting figure is ear-like or saucer-shaped, as in the ormer. Some univalves are simple caps or cones, as the limpets. Some are tubular, as the tooth-shells; or tubular and variously contorted, as the worm-shells or vermetids. Some have an egg-shaped or fusiform figure. Many univalves have actually a second shell or valve, the operculum or lid of the aperture; this, however, does not count against their being univalvular. Many forms of ordinary univalves have special names, as *helicoid, conoid, discoid, ovoid, trochoid, turbinate, turreted*. The direction of the coiling, whether right or left, is *dextrorse* or *sinistrorse;* a coiling in the opposite from the usual direction is *reversed*. The first whorl of a spiral univalve is the *body-whorl;* its opening is the *aperture;* the lips of the aperture are the outer or *labrum*, and the inner or *columellar*, the *labium;* the lips may be variously produced, winged or *alate, canaliculate*, etc. (See *holostomatous, siphonostomatous*.) The central pillar around which the whorls are coiled is the *columella;* the whorls above the

body-whorl or aperture are collectively the *spire*, ending at the tip, point, or *apex*. The opposite end of the shell is the *base*, which often presents a depression, the *umbilicus;* the circumference, a completely lipped aperture, is the *peristome*. The spiral line between the successive whorls or volutions is the *suture*. See words italicized above with various cuts there, or there cited.

univalved (ū′ni-valvd), *a.* [As *univalve* + *-ed*².] Same as *univalve*.

univalvular (ū-ni-val′vū-lär), *a.* [As *univalve* + *-ul-ar*.] Same as *univalve*.

universal (ū-ni-vėr′sal), *a.* and *n.* [< F. *universel* = Sp. Pg. *universal* = It. *universale*, < L. *universalis*, of or belonging to all or to the whole, < *universus*, all together, whole, entire, collective, general: see *universe*. Hence colloq. abbr. *versal, varsal*.] **I.** *a.* **1.** Pertaining to the universe in its entirety, or to the human race collectively.

> Sole monarch of the *universal* earth.
> *Shak.*, R. and J., iii. 2. 94.
>
> All partial evil, *universal* good.
> *Pope*, Essay on Man, i. 292.

2. Pertaining to all things or to all mankind distributively. This is the original and most proper signification.

> Those men which have no written law of God to shew what is good or evil carry written in their hearts the *universal* law of mankind, the Law of Reason, whereby they judge, as by a rule which God hath given unto all men for that purpose. *Hooker*, Eccles. Polity, i. 16.
>
> Nothing can be to us Catholic or *universal* in Religion but what the Scripture teaches.
> *Milton*, Eikonoklastes, xiii.
>
> Which had the *universal* sanction of their own and all former ages. *Story*, Speech, Salem, Sept. 18, 1828.

3. Belonging to or predicated of all the members of a class considered without exception: as, a *universal* rule. This meaning arose in logic, where it is called the complex sense of *universal*, and has been common in Latin since the second century.

> Hearing applause and *universal* shout.
> *Shak.*, M. of V., iii. 2. 144.

We say that every argument which tells in favour of the *universal* suffrage of the males tells equally in favour of female suffrage. *Macaulay*, West. Rev. Def. of Mill.

4. In *logic*, capable of being predicated of many individuals or single cases; general. This, called the simple sense of *universal*, in which the word is precisely equivalent to *general*, is quite opposed to its etymology, and perpetuates a confusion of thought due to Aristotle, whose καθόλον it translates. (See II., 1 (*b*).) In Latin it is nearly as old, perhaps older, than def. 3.—**Universal agent**, in *law*, an agent with unqualified power to act, in place of his principal, in all things which the latter can delegate, as distinguished from a *general agent*, who has unrestricted power in respect to a particular kind of business or at a particular place.—**Universal arithmetic**, algebra.—**Universal chuck**, a form of chuck having a face-plate with dogs which can move radially and simultaneously, to hold objects of different sizes.—**Universal church**, in *theol.*, the church of God throughout the world.—**Universal cognition.** See *cognition*.—**Universal compass**, a compass with extension legs adapted for striking circles of either large or small size.—**Universal conception**, a general concept.—**Universal conversion.** See *conversion*, 2.—**Universal coupling**, a coupling so made that the parts united may meet at various angles, as a gimbal joint.—**Universal deluge.** See *deluge*, 1.—**Universal dial.** See *dial*.—**Universal ferment.** See *ferment*.—**Universal Friends**, an American sect of the eighteenth century, followers of Jemima Wilkinson, who professed to have prophetic and miraculous powers.—**Universal galvanometer**, a galvanometer capable of measuring either currents or electromotive forces or resistances. It usually consists of an ordinary galvanometer, which may have any suitable form, combined with a set of resistance-coils and a slide-bridge all mounted on one base.—**Universal instrument**, in *astron.*, a species of altitude and azimuth instrument constructed so as to combine portability with great power. For convenience the telescope of the instrument, instead of being a straight tube, is usually broken, near the eye-end, into two arms at right angles to one another, a totally reflecting prism at the break changing the direction of the cone of rays. Sometimes the break occurs at the middle of the length of the tube, and the reflected cone passes through one end of the hollow horizontal axis of the instrument. See *coudé*.—**Universal joint.** See *joint*.—**Universal legatee**, in *Scots law*, a legatee to whom a testator gives his whole estate, subject only to the burden of other legacies and debts.—**Universal lever, logic, method, partnership.** See the nouns.—**Universal mood**, a mood of syllogism concluding a universal proposition.—**Universal part**, a part of a universal whole. *Sir W. Hamilton.*—**Universal Postal Union.** See *postal*.—**Universal proposition.** See *proposition*.—**Universal successor**, in *Scots law*, an heir who succeeds to the whole of the heritage of a person who dies intestate.—**Universal suffrage.** See *suffrage*.—**Universal switch**, an apparatus used in telegraph- and telephone-offices for facilitating the connecting of one line to another. It usually consists of a large board or slab of insulating material, on the face of which are mounted two sets of parallel conducting-rods placed across one another. Each rod forms the terminal of one line, and hence any two lines can be connected together by a plug where their terminal rods cross each other.—**Universal syllogism, theorem, time**, etc. See the nouns.—**Universal umbel.** See *umbel*.—**Universal unity**, the capability of existing in many subjects while retaining its identity. This is the unity of a general character belonging to many objects.—**Universal validity**, cogency for all men. This is a phrase used by certain writers who misapprehend the doctrine of Kant.—**Universal whole**, a class with respect to the subjects included under it. =**Syn. 3.** *General*, etc. See *common*.

II. *n.* **1.** In *logic*: (*a*) One of the five predicables of the Aristotelians, or logical varieties of predicates, which are said to be genus, species, difference, property, and accident. (*b*) A general term or predicate, or the general nature which such a term signifies. In order to understand the great dispute concerning universals it is necessary to remark that the word in this sense entirely departs from its etymology. The universe is incapable of general description, and consists of objects connected by dynamical relations and recognized by associations of contiguity; while a universal is an idea connected with experience by associations of resemblance merely. But though a universal is, in its universality, thus not contracted to actual existence, it does not necessarily follow that things real have in their real existence no universal predicates. The common belief is that the mutual actions of things are subjected to laws that are really general—that the laws of mechanics, for instance, are not mere accidental uniformities, but have a real virtue. These laws may be subject to exceptions and interference; such has always been the vulgar belief, and in most ages that of philosophers; it may be they are never precisely followed. But any tendency in the things themselves toward generalizations of their characters constitutes what is termed a *universal in re*. Before the laws of physics were established it was particularly the uniformities of heredity, and consequent commonness of organic forms, which specially attracted attention; so that *man* and *horse* are the traditional examples of universals *in re*. The dispute concerning universals chiefly concerns the universals *in re*, and arises from the different degrees of importance attributed by different minds to the dynamical and to the intelligible relations of things. Those who follow the common opinion are called *realists*. The other party, looking at the blind dynamical character of the connections of things, denies that there is any real operation of law or intelligible guidance. These are the *nominalists*, who may take one of three main positions. First, there are those who hold that the uniformities of nature are due to the interference on every single occasion of general creative ideas, called *universals ante rem*. Second, there are those who, admitting that intelligible relations do govern one great department of creation—namely, the world of thought, so that there are general conceptions, called *universals post rem*—insist that the notion of a law of nature, properly speaking, is purely illusory. Things as they are are therefore entirely incomprehensible, and all that is intelligible is mere seeming. Yet this seeming has so consistent a character that it is for all intents and purposes the real world; and this seemingly real world is seemingly governed by law, which, indeed, is the only feature in it which makes it seem like real. This is substantially Kantianism. Third, there are those who deny universals *in re, ante rem*, and *post rem*, holding that association by resemblance is reducible to association by contiguity, that generalization takes place only upon paper or in talk, and that every fact is at bottom unintelligible. In the middle ages, if not at all times, the realistic opinion has often been carried too far, the mere resemblances of things, which are nothing but the native tendency of the mind to associate them, being supposed to indicate more intimate dynamical relations than can justly be inferred on such a ground alone.

2†. The whole; the system of the universe.

> To what end had the angel been set to keep the entrance into Paradise after Adam's expulsion if the *universal* had been paradise? *Raleigh*, Hist. World.

Posterioristic and **prioristic universals.** See *posterioristic*.

Universalian (ū″ni-vėr-sā′li-an), *a.* [< *universal* + *-ian*.] Same as *Universalist*. [Rare.]

universalisation, universalise, etc. See *universalization*, etc.

Universalism (ū-ni-vėr′sal-izm), *n.* [< *universal* + *-ism*.] The doctrine or belief of Universalists.

Universalist (ū-ni-vėr′sal-ist), *a.* and *n.* [< *universal* + *-ist*.] **I.** *a.* Of or pertaining to Universalism: as, *Universalist* views.

II. *n.* **1.** One who, professing the Christian faith, believes that all mankind will eventually be redeemed from sin and suffering, and brought back to holiness and God. The name is properly applicable to all those who hold to the final salvation of all men; but it is specifically applied to a body of Christians with a distinct church organization, who, like the Unitarians, have no authoritative symbol of doctrine, and on other points than the salvation of the race differ among themselves.

2. [*l. c.*] One who affects to understand everything. [Rare.]

> A modern freethinker is an *universalist* in speculation; any proposition whatsoever he is ready to decide; self-assurance supplies all want of abilities.
> *Bentley*, Phileleutherus Lipsiensis, § 3.

universalistic (ū-ni-vėr-sa-lis′tik), *a.* [< *universalist* + *-ic*.] **1.** Of, relating to, or affecting the whole; universal.

> Distinguishing hedonism into the two kinds, egoistic and *universalistic*, according as the happiness sought is that of the actor himself or is that of all.
> *H. Spencer*, Data of Ethics, p. 151.

2. [*cap.*] Of or pertaining to Universalism; Universalist.

universality (ū″ni-vėr-sal′i-ti), *n.* [< F. *universalité* = Sp. *universalidad* = Pg. *universalidade* = It. *universalità*, < ML. *universalita(t-)s*, < L. *universalis*, universal: see *universal*.] **1.** The state or character of being universal; unlimited application or extent.

> Set before your faith the freeness and the *universality* of the promise. Consider of God's offer, and urging it upon all; and that he hath excepted from the conditional covenant no man in the world. *Baxter*, Saints' Rest, iv. 4.

> The former Realism and Nominalism were lifted into a higher phase by the principle of the *universalising* action of intellect. *Encyc. Brit.*, II. 269.

universally (ū-ni-vėr′sal-i), *adv.* In a universal manner; as a universal; with extension to the whole; in a manner to comprehend all; without exception.

universalness (ū-ni-vėr′sal-nes), *n.* Universality.

universanimous (ū″ni-vėr-san′i-mus), *a.* [< L. *universus*, general, + *animus*, mind.] Of one mind or opinion; unanimous. *Lowell*, Biglow Papers, 2d ser., p. 36. [Rare.]

universe (ū′ni-vėrs), *n.* [< F. *univers* = Sp. Pg. It. *universo*, < L. *universum*, all things, as a whole, the universe, neut. of *universus*, OL. *oinovorsus*, also contr. *oinvorsus*, later *unvorsus*, all together, whole, entire, collective, general, lit. turned or combined into one, < *unus*, one, + *vertere*, pp. *versus*, turn.] **1.** The totality of existing things; all that is in dynamical connection with general experience taken collectively—embracing (*a*) the Creator and creation; or (*b*) psychical and material objects, but excluding the Creator; or (*c*) material objects only.

> For nothing in this wide *universe* I call,
> Save thou, my rose; in it thou art my all.
> *Shak.*, Sonnets, cix.
>
> For this beauty of the *universe* is an emblem and revelation of the Divinity. *Channing*, Perfect Life, p. 13.

2. The whole world; all mankind; all that meets us in experience, in a loose sense.—**3.** In *logic*, the collection of all the objects to which any discourse refers: as, the *universe* of things. The things belonging to a universe cannot be defined or discriminated by any general characters; for every universal proposition excludes some general description of objects from the universe which had been supposed to be found in it. It is only in their dynamical connections that the objects of the universe can be distinguished from all others; and therefore no general term in a proposition can show what universe is meant; but an index is necessary. See *index*, *n.*, 2.

2†. A corporation; a gild.

Some of them are worthy to be expulsed both thence and out of the *university*.
Bp. Ridley, in Bradford's Works (Parker Soc.), II. 372.

3. An association of men for the purpose of study, which confers degrees which are acknowledged as valid throughout Christendom, is endowed, and is privileged by the state in order that the people may receive intellectual guidance, and that the theoretical problems which present themselves in the development of civilization may be resolved. The earliest university was the medical school of Salerno, which was closed in 1817, after a life of about a thousand years. The two models of all the other old universities were those of Bologna and Paris, the former a law school, the latter making theology its chief concern, both founded in the second half of the twelfth century—an epoch at which the advantages that were to accrue to the world from certain studies were strongly felt. The university of Paris had from the outset four faculties, or branches of study (a word also applied to the associate body of teachers in each branch)—theology, canon law, medicine, and arts. But the study of arts—including logic and rhetoric from the trivium, and the quadrivium (arithmetic, geometry, music, and astronomy)—was regarded as merely preliminary to the others, which alone, as attacking vital problems, entitled the university to its high privileges. Hence, upon inception as a master of arts a man did not cease to be called a "scholar"—a word which has consequently come to imply sound learning outside the three professions. It was the elucidation of theology which was above all desired and expected from the university; and the faculty of theology was organized more like a learned academy than as a seminary. The constitutions of universities are various and for the most part complicated. In Paris there were in each faculty three degrees, those of bachelor, licentiate, and master or doctor. Three years' study were required for a master in arts, and he must be twenty-one years of age. Five years' study more were required for the first degree in theology. The instruction was entirely by lectures, and the only exercises were disputations. Each faculty was presided over by a dean, and had two bedels and other servants. The four faculties met in congregation, and were presided over by the vice-chancellor. The position of chancellor was merely formal. For the purposes of administration, all the scholars, including the masters of arts, were divided into four nations, of Gaul, Picardy, Normandy, and England. This was an arrangement not going back to the origin of the university, though students from the same country had from the first clubbed together. Each nation was governed by a proctor, and possessed a seal. The students were mostly gathered into different colleges, hostels, and pedagogies; and in 1459 the class of martinets, or unattached students, was abolished. The corporate institution in Paris and other northern universities embraced only the masters, not the other students, and for this reason it was not until late in the fourteenth century that, first in Germany, this body, called the *studium generale*, began to take the name of the *universitas*, or union—a word which had before and has since been used to include students of all grades. Along with the name of *university*, from before the restriction in its meaning, has always been associated the epithet of *alma mater*.—**General council of the university.** See *council*.—**University extension**, a method, originating in England, for extending the advantages of university instruction by means of lectures and classes at important centers.—**University Test Act**, an English statute of 1871 which abolished the subscribing to articles of faith, etc., before taking degrees.

universityless (ū-ni-vėr'si-ti-les), *a.* [< *university* + *-less*.] Having no university. *Fuller.*

universological (ū-ni-vėr-sō-loj'i-kal), *a.* [< *universolog-y* + *-ic-al*.] Of or pertaining to universology. [Rare.]

universologist (ū"ni-vėr-sol'ō-jist), *n.* [< *universolog-y* + *-ist*.] One versed in universology. [Rare.]

universology (ū"ni-vėr-sol'ō-ji), *n.* [< L. *universum*, the universe (see *universe*), + Gr. *-λογία*, < *λέγειν*, speak: see *-ology*.] The science of the universe, or of the whole system of created things; a science covering the whole ground of philosophy, of the sciences in their general aspects, and of social polity, or the collective life of the human world. *H. Spencer.*

univocal (ū-niv'ō-kal), *a.* and *n.* [Cf. F. *univoque* = Sp. *univoco* = Pg. It. *univoco;* < LL. *univocus*, having but one meaning, < L. *unus*, one, + *vox* (*voc-*), voice, meaning: see *vocal*.] I. *a.* 1. Having one meaning only; having the meaning unmistakable: opposed to *equivocal*.

So does every exercise of the life of Christ kindle its own fires, inspires breath into itself, and makes an *univocal* production of itself in a differing subject.
Jer. Taylor, Works (ed. 1835), I. 23.

2. In *music*, having a unisonous sound.—3. Certain; not to be doubted or mistaken. [Rare.]

The true mothers, the *univocal* parents of their productions. *Jer. Taylor*, Rule of Conscience, ii. 3.

4. Producing something of its own nature: as, *univocal* generation; a *univocal* cause. [Rare.]

Which conceit . . . is injurious unto philosophy, . . . making putrefactive generations correspondent unto seminal productions, and conceiving in equivocal effects an *univocal* conformity unto the efficient.
Sir T. Browne, Vulg. Err., ii. 6.

Univocal action. See *action*.—**Univocal generation**, normal or regular generation, in distinction from equivocal or spontaneous generation.—**Univocal predication.** See *predication*.

II. *n.* A word having only one signification or meaning; a generic word, or a word predicable of many different species, as *fish*, *tree*. *Imp. Dict.*

univocally (ū-niv'ō-kal-i), *adv.* In a univocal manner; in one sense or tenor; not equivocally; unmistakably.

The same word may be employed either *univocally*, equivocally, or analogously. *Whately.*

univocation (ū-niv-ō-kā'shon), *n.* [= F. *univocation* = Sp. *univocación* = Pg. *univocação* = It. *univocazione;* < LL. *univocus*, having but one meaning: see *univocal*.] Agreement of name and meaning. *Whiston.*—**Limited univocation†**, univocation of a genus, species, difference, property, or accident: opposed to *transcendent univocation*, such univocation as is possessed by ens, good, true, relation, absolute, etc.

unjaundiced (un-jän'dist), *a.* Not jaundiced; hence, not affected by envy, jealousy, etc.

unknowability (un-nō-a-bil'i-ti), *n.* [< *unknowable* + *-ity* (see *-bility*).] The state or character of being unknowable. *J. S. Mill.*

unknowable (un-nō'a-bl), *a.* [< ME. *unknowable*; < *un-*[1] + *knowable*.] 1. Incapable of being known; not capable of being ascertained or discovered; above or beyond knowledge.

Their objects, transcending the sphere of all experience actual or possible, consequently do not fall under the categories, in other words are positively *unknowable*.
Sir W. Hamilton.

By continually seeking to know, and being continually thrown back with a deepened conviction of the impossibility of knowing, we may keep alive the consciousness that it is alike our highest wisdom and our highest duty to regard that through which all things exist as The *Unknowable*. *H. Spencer*, First Principles, § 31.

2†. Unknown.

Liggeth thanne stille al owtrely *unknowable*.
Chaucer, Boëthius, ii. meter 7.

unknowableness (un-nō'a-bl-nes), *n.* The character or state of being unknowable.

Herbert Spencer insists on the certainty of the existence of things in themselves, but also on their absolute and eternal *unknowableness*. *J. F. Clarke*, Orthodoxy, p. 25.

unknowably (un-nō'a-bli), *adv.* Not so as to be known.

unknowe†, *a.* A Middle English form of *unknown*.

Then shall come a knyght *vn-knowen* that longe hath be loste, and helpe this kynge, that the prince may not hym chace oute of the felde ne discounfite.
Merlin (E. E. T. S.), iii. 417.

For Frensh of Paris was to hire *unknowe*.
Chaucer, Gen. Prol. to C. T., l. 126.

Get thee into some *unknown* part of the world,
That I may never see thee.
Webster, Duchess of Malfi, iv. 2.

Unknown in this sense is often used in the predicate, followed by *to*: as, a man *unknown to* fame; a fact *unknown to* the public. In this use it is also often used absolutely: as, *unknown to* me (elliptically for *it being unknown to* me), he made a new contract.

That he, *unknown to* me, should be in debt.
Shak., C. of E., iv. 2. 48.

2. Not ascertained, with relation to extent, degree, quantity, or the like; hence, incalculable; inexpressible; immense.

The planting of hemp and flax would be an *unknown* advantage to the kingdom. *Bacon.*

3†. Not to be made known, expressed, or communicated.

For divers *unknown* reasons, I beseech you,
Grant me this boon. *Shak.*, Rich. III., i. 2. 218.

4†. Not having had sexual commerce.

unlamented (un-lā-men'ted), *a.* Not lamented; whose loss is not deplored; not moaned; unwept.

Thus *unlamented* pass the proud away.
Pope, Unfortunate Lady, l. 43.

unland (un-land'), *v. t.* [< *un-*[2] + *land*[1].] To deprive of lands. *Fuller*, Worthies, Monmouth, ii. 117. (*Davies.*)

unlap (un-lap'), *v. t.*; pret. and pp. *unlapped*, ppr. *unlapping*. [< *un-*[2] + *lap*[3].] To unfold.

Tapestry . . . *unlapt* and laid open. *Hooker.*

unlarded (un-lär'ded), *a.* Not larded; not dressed with lard; hence, not mixed with something by way of improvement; not intermixed or adulterated.

Speak the language of the company you are in; speak it purely and *unlarded* with any other.
Chesterfield, Letter to his Son.

unlash (un-lash'), *v. t.* [< *un-*[2] + *lash*[1].] *Naut.*, to loose, unfasten, or separate, as something lashed or tied down.

unlatch (un-lach'), *v.* [< *un-*[2] + *latch*.] **I.** *trans.* To open or loose, as a door, by lifting the latch; also, to loose the latchet of: as, to *unlatch* a shoe.

II. *intrans.* To become open or loose through the lifting of a latch.

unlaw (un-lâ'), *n.* [< ME. *unlawe, unlage*, < AS. *unlagu, unlage*, violation of law, < *un-*, not, + *lagu*, law: see *un-*[1] and *law*[1].] 1†. Violation of law or justice; lawlessness; anarchy; injustice.

Cayphas herde that ilke sawe,
He spake to Jhesu with *un-lawe*.
MS. Cantab. Ff. v. 48, f. 18. (*Halliwell.*)

This state of things was what our fathers called *unlaw*, a state of things where law was in the mouths of men in power, but where law itself became the instrument of wrong. *E. A. Freeman*, Norman Conquest, IV. 421.

2. In *Scots law*: (*a*) Any transgression of the law; an injury, or act of injustice. (*b*) A fine or amercement legally fixed and exacted from one who has transgressed the law.

unlaw (un-lâ'), *v. t.* [< ME. *unlawen*; < *un-*[2] + *law*[1].] 1†. To outlaw.

Nyf me dude him *unlawe*. *Robert of Gloucester*, p. 473.

2. To deprive of the authority or character of law. [Rare.]

That also which is impious or evil absolutely, either against faith or manners, no law can possibly permit that intends not to *unlaw* it self. *Milton*, Areopagitica, p. 54.

3. In *Scots law*, to fine.

unlawed (un-lâd'), *a.* [< *un-*[1] + *lawed*, pp. of *law*[1], *v.*, 4.] See the quotation.

The disabling dogs, which might be necessary for keeping flocks and herds, from running at the deer, was called lawing, and was in general use. The Charter of the Forest, designed to lessen these evils, declares that inquisition or view for lawing dogs shall be made every third year, and shall be then done by the view and testimony of lawful men, not otherwise; and they whose dogs shall be then found *unlawed* shall give three shillings for mercy; and for the future no man's ox shall be taken for lawing. Such lawing also shall be done by the assize commonly used, and which is, that three claws shall be cut off without the ball of the right foot.
Scott, Ivanhoe, note to i. (*Davies.*)

unlawful (un-lâ'fûl), *a.* [< ME. **unlaweful, unlageful*; < *un-*[1] + *lawful*.] 1. Not lawful; contrary to law; illegal; not permitted by law, human or divine; not legalized: as, an *unlawful* act; an *unlawful* oath; an *unlawful* society.

Those that think it is *unlawful* business I am about, let them depart. *Shak.*, W. T., v. 3. 96.

2. Begotten out of wedlock; illegitimate. *Shak.*, A. and C., iii. 6. 7.—**Unlawful assembly**, in *law*, the meeting of three or more persons to commit an unlawful act. Most authorities restrict this phrase to a meeting contemplating riotous acts and in such manner as to give firm and courageous persons in the neighborhood of such assembly reasonable grounds to apprehend a breach of the peace in consequence of it. Technically it ceases to be termed an unlawful assembly when the unlawful act is executed, the offense then being *riot*, or when some steps are taken toward the execution of it, the offense then being deemed a *rout*.=**Syn.** *Illegal*, *Illicit*, etc. See *lawful*.

unlawfully (un-lâ'fûl-i), *adv.* **1.** In an unlawful manner; in violation of law or right; illegally.—**2.** Illegitimately; not in wedlock. *Shak.*, M. for M., iii. 1. 196.

unlawfulness (un-lâ'fûl-nes), *n.* **1.** The character or state of being unlawful; illegality; contrariety to law.

The *unlawfulness* of lying. *South*, Sermons.

2. Illegitimacy.

unlay (un-lā'), *v. t.*; pret. and pp. *unlaid*, ppr. *unlaying*. [< *un-*[2] + *lay*[1].] *Naut.*, to untwist, as the strands of a rope.

unlead (un-led'), *v. t.* [< *un-*[2] + *lead*[2].] In *printing*, to remove the leads from (composed types).

unlearn (un-lėrn'), *v.* [< *un-*[2] + *learn*.] **I.** *trans.* **1.** To discard, put away, or get rid of (what one has learned); forget the knowledge of.

When I first began to learn to push, this last winter, my master had a great deal of work upon his hands to make me *unlearn* the postures and motions which I had got, by having in my younger years practised back-sword, with a little eye to the single falchion. *Steele*, Tatler, No. 173.

2†. To fail to learn; not to learn. *Dr. H. More.*

II. *intrans.* To put away acquired knowledge; become ignorant.

For only by *unlearning* Wisdom comes,
And climbing backward to diviner Youth.
Lowell, Parting of the Ways.

unlearnability (un-lėr-na-bil'i-ti), *n.* [< *un-*[1] + *learn* + *-ability*.] Inability to learn. [Rare.]

You will learn how to conduct it [the camera], with the pleasure of correcting my awkwardness and *unlearnability*. *Walpole*, Letters (1777), iv. 85.

unlearned (un-lėr'ned), *a.* [< ME. *unlerned*; < *un-*[1] + *learned*.] **1.** Not learned; ignorant; illiterate; not instructed; inexperienced.

But how it semethe to symple men *unlerned* that men ne mowe not go undre the Erthe, and also that men scholde falle toward the Hevene, from undre!
Mandeville, Travels, p. 184.

2. Not suitable to a learned man; not becoming a scholar.

I will prove those verses to be very *unlearned*, neither savouring of poetry, wit, nor invention.
Shak., L. L. L., iv. 2. 165.

3 (un-lėrnd'). Not gained by study; not known; not acquired by investigation.

They learned mere words, or such things chiefly as were better *unlearned*. *Milton*, Education.

unlearnedly (un-lėr'ned-li), *adv.* In an unlearned manner; so as to exhibit ignorance; ignorantly. *Sir T. More*, Works, p. 1037.

unlearnedness (un-lėr'ned-nes), *n.* Want of learning; illiterateness. *Sylvester*, tr. of Du Bartas's Weeks, ii., Eden.

unleash (un-lēsh'), *v. t.* [< *un-*[2] + *leash*.] To free from a leash, or as from a leash; let go.

In chase of imagery *unleashed* and coursing.
Stedman, Poets of America, p. 301.

unleave†, *v.* [< *un-*[2] + *leaf*[1], *leave*[3].] **I.** *trans.* To strip of leaves. *Puttenham*, Arte of Eng. Poesie, iii. 25. (*Davies.*)

II. *intrans.* To lose leaves, as a tree; become bare. [Rare.]

Of amorous Myrtles, and immortall Bays
Never *vn-leav'd*.
Sylvester, tr. of Du Bartas's Weeks, ii., Eden.

unleavened (un-lev'nd), *a.* Not leavened: as, *unleavened* bread; hence, not affected as if by leaven.

unlectured (un-lek'tūrd), *a.* **1.** Not addressed in, or as if in, a lecture or lectures.—**2.** Not taught or inculcated by lecture. [Rare.]

A science yet *unlectured* in our schools.
Young, Night Thoughts, v. 518.

unled (un-led'), *a.* Not led; without guidance; hence, in command of one's faculties.

They will quaffe freely when they come to the house of a Christian; insomuch as I have seen but few goe away *unled* from the embassadours table.
Sandys, Travailes, p. 51.

unleful†, *a.* See *unleveful*.

unleisured† (un-lē'zhūrd), *a.* Not having leisure; occupied. *Sir P. Sidney.*

The hasty view of an *unleasur'd* licencer.
Milton, Areopagitica, p. 31.

unleisuredness (un-lē'zhūrd-nes), *n.* Want of leisure; the state of being occupied. *Boyle*, Works, II. 251.

E. also *unlesse*, *onless*, *onlesse*, *onles*, earlier *onlesse that*, *on lesse that* (*that* being ultimately dropped, as with *for*, conj., *lest*, etc.), a phrase analogous to *at least*, *at most*, etc.: see *on*[1] and *less*[1]. Cf. *lest*.] **1.** If it be not that; if it be not the case that; were it not the fact that; if . . . not; supposing that . . . not.

It is not possible for all things to be well, *unless* all men were good: which I think will not be yet these good many years. *Sir T. More*, Utopia (tr. by Robinson), i.

Unless thou tell'st me where thou had'st this ring,
Thou diest within this hour.
Shak., All's Well, v. 3. 284.

You should not ask, *'less* you knew how to give.
Beau. and Fl., Laws of Candy, ii. 1.

2†. For fear that; in case; lest.

Beware you do not once the same gainsay,
Unless with death he do your rashness pay.
Greene, Alphonsus, v.

[By omission of a verb, implied in the context, *unless* may have the force of 'except,' 'but for': as,

Here nothing breeds
Unless the nightly owl.
Shak., Tit. And., ii. 3. 97.

Let not wine,
Unless in sacrifice or rites divine,
Be ever known of shepherds.
Fletcher, Faithful Shepherdess, v. 5.]

=**Syn.** *Except*, *Unless*. *Except* could once be used as a synonym for *unless*, but the words have now drawn entirely apart. *Unless* is only a conjunction; *except* is only a preposition. *Except* introduces an exception to a statement which is otherwise general: it may be followed by a clause when connection is made by a particle, as *when*, *that*, *as*, *while*, or especially another preposition: the omission of such connective makes the structure archaic. *Unless* introduces a clause, or the abbreviation of a clause, indicating a limitation or condition.

unlessoned (un-les'nd), *a.* Not taught; not instructed. *Shak.*, M. of V., iii. 2. 161. [Rare.]

unletted†, *a.* [< *un-*[1] + *letted*, pp. of *let*[2].] Not prevented; unhindered.

What occasion of import
Hath all so long detain'd you from your wife,
And sent you hither so *unlike* yourself?
Shak., T. of the S., iii. 2. 106.

Being *vnlike* in troth of Religion, they must nedes be *vnlike* in honestie of liuing.
Ascham, The Scholemaster, p. 84.

2†. Not likely; improbable; unlikely.

It ne is nat an *unlyk* myracle to hem that ne knowen it nat. *Chaucer*, Boëthius, iv. prose 6.

It is not *vnlike* that the Britons accompanied the Cimbrians and Gaules in those expeditions.
Hakluyt's Voyages, II. 1.

2. The state of being unlike; dissimilarity. *Bp. Hall*, Contemplations, Christ's Baptism.

Strange in its utter *unlikeliness* to any teaching, Platonist or Hebrew. *Kingsley*, Hypatia, xxi.

3†. Unattractiveness; the incapacity to excite liking or love.

I that God of Loves servaunts serve,
Ne dar to love for myn *unliklynesse*.
Chaucer, Troilus, i. 16.

unlikely (un-līk'li), *a.* [< ME. *unlikely*, *unlikly*; < *un-*[1] + *likely*.] **1.** Such as cannot be reasonably expected; improbable: as, an *unlikely* event.

That it wrung his conscience to condemn the Earle of high Treason is not *unlikely*. *Milton*, Eikonoklastes, ii.

2. Not holding out a prospect of success or of a desired result; likely to fail; unpromising.

A very *unlikely* envy she hath stumbled upon against the princess's unspeakable beauty.
Sir P. Sidney, Arcadia, ii.

A strange *unlikely* errand, sure, is thine.
M. Arnold, Balder Dead, I. 83.

3†. Not calculated to inspire liking or affection; not likable or lovable.

Whan I considere youre beautee,
And therwithal the *unlikly* elde of me.
Chaucer, Merchant's Tale, l. 936.

unlikely (un-līk'li), *adv.* In an unlikely manner; with no or little likelihood; improbably.

The pleasures . . . not *unlikely* may proceed from the discoveries each shall communicate to another. *Pope.*

unliken† (un-lī'kn), *v. t.* To make unlike; feign; pretend. *Wyclif.*

unlikeness (un-līk'nes), *n.* Want of resemblance; dissimilarity.

And he supplied my want the more
As his *unlikeness* fitted mine.
Tennyson, In Memoriam, lxxix.

unlimber[1] (un-lim'bėr), *a.* [< *un-*[1] + *limber*[1].] Not limber; not flexible; not yielding. *Sir H. Wotton.*

unlimber[2] (un-lim'bėr), *v.* [< *un-*[2] + *limber*[2].] **I.** *trans.* To detach the limbers from; take off the limbers of: as, to *unlimber* guns.

II. *intrans.* To detach the limbers from the guns.

The battery *unlimbers* and whirls its black-muzzled guns to the front. *Harper's Mag.*, LXXVI. 788.

unlime (un-līm'), *v. t.* [< *un-*[2] + *lime*[1].] To remove the lime from, as from hides sufficiently treated with it. *Pop. Sci. Mo.*, XXXIV. 287.
